Hi

As a consumer I have been nicked and dined to death by Bell, Telus, Rogers and Shaw at one time or another. My bill last month for Cell, Home Phone and Internet (we do not have television) was \$ 280.00 and that's with no long distance. My wife is from France, we were there in January. Her Uncle pays 29 Euro and get the same services as I do...except I pay nearly 10 times the Canadian equivalent. It's ridiculous to say the least. We need competition and a lots of it. We want choice. We are being forced into long term contracts to save 5 dollars a month, simply because the cost is so high, people will do anything to save a few dollars. Open up the doors. We are big kids now. Let the market decide. Do this and you will have my vote!
Barry Hillier
