Dear Mr. St-Aubin:

**Re: DGTP-002-07 – Consultation on a Framework to Auction Spectrum in the 2GHz Range including Advanced Wireless Services – Reply Comments**

---

Attached are the comments of Saskatchewan Telecommunications, ("SaskTel") in response to the Canada Gazette for the second round of notice in the above referenced proceeding.

As a wireless service provider in Saskatchewan, the AWS spectrum is seen as an enabler in SaskTel's goal of making advanced wireless services available to 98% of the businesses and residents in Saskatchewan.

SaskTel is pleased to have been able to provide our comments and input into the consultation process. As one of the smaller cellular providers in Canada, SaskTel has a proven track record in providing quality wireless services, while competing with substantially larger companies. It is our belief that as a result of that experience our attached comments will provide Industry Canada with a formula which can assist in the promotion of a healthy diversity in the national marketplace for wireless services.

Yours truly,
