Subject: Opening Canada's Doors to Foreign Investment in Telecommunications: Options for Reform [71]

We don't need foreign companies in our telecom sector.

- \* Prices of cell phone services won't be lower as they are already very competitive worldwide.
- \* Canadians in rural and remote communities may suffer from poor service and no access to high-speed Internet as there is no profit to be made there by foreign companies.
- \* Our culture is at risk because most telecom companies also provide broadcasting services. If such a company falls into foreign hands, it will definitely influence the content of its broadcasting service. Foreign ownership of telecom is a direct threat to our cultural identity.

= We do not need anything from across any of the borders , because they come in, take over our companies and then close down the competition and operate out of there own country with our customers. If you do not see this then you are in it for no good reason because the forest sector is a good example.

We will pay the extra few dollars to buy products from our country and they should be proud to show the Canadian symbol and they should only show the Canadian FLAG before we are lost in our own country.

Thank you  
Frank
