Having worked in the industry for over 30 years I have seen many changes which have resulted in downsizing and degraded customer service. I really think that the rural customer has been classified as a second or third tear customer and if foreign ownership is allowed it will only get worst. The big companies will come in and take the most profitable and damn the rest, welcome the the new Canada. I would not let them in and as far as quality we have one of the best networks in the world but this will be down graded so we can support the network upgrades in another country. Please think about the consequences of the regular customer instead of the profits of a few shareholders and milionaries. Don't do it because it will destroy a valuable CANADIAN industry.
