Subject: Opening Canada's Doors to Foreign Investment in Telecommunications: Options for Reform [209]

We don't need foreign companies in our telecom sector.

\*I believe that places like Rural Saskatchewan will be the hardest hit from foreign ownership. Why would a company want to invest in equipment and technologies when there is such a low population. If they had to charge the consumer what it cost, the Rural customers would not be able to afford it. I think we all know that the large metropolitan centers do subsidize the less populated remote area.

\* Canadians in rural and remote communities may suffer from poor service and no access to high-speed Internet as there is no profit to be made there by foreign companies.
