Re: SLPB-001-17 - Consultation on Releasing Millimetre Wave Spectrum to Support 5G,

The Board is pleased to submit the attached response to the above noted consultation. The response was developed by the RABC Advanced Wireless Services Subcommittee (a subcommittee of the Mobile & Personal Communications Committee). The consultation had broad interest amongst RABC members, with over twenty stakeholder participants actively involved in developing the response.

The response was sent to RABC Sponsor Members for ballot. Twelve of the RABC's twenty-one Sponsor Members responded as follows: 6 approved, 3 approved with comment, and 3 abstained.

The Sponsor Members' comments (which form an integral part of the RABC's response) are as follows:

Canadian Wireless Telecommunications Association

CWTA submits its approval of the recommendations put forth within RABC's response to SLPB-001-17 where CWTA's Members have unanimously agreed on the positioning outlined therein. However, CWTA's approval does not include any such instances where CWTA's Members are not in agreement.

Canadian Satellite and Space Industry Forum

A majority of CSSIF members support the proposed comments, however certain satellite members will express their comments and concerns separately.

Rogers Communications Canada Inc.

Rogers supports the adoption of the upper and lower frequency range set by the US for the 28 GHz band, but we do not support the adoption of the US band plan which consists of only two

blocks. For all of the reasons set out in Rogers own comments, we support the adoption of a band plan consisting of four blocks.

The Board appreciates the opportunity to respond to this important notice.

Sincerely,

A handwritten signature in black ink, appearing to read "J. D. Farnes", with a stylized flourish at the end.

J. David Farnes
General Manager
