Subject: Opening Canada's Doors to Foreign Investment in Telecommunications: Options for Reform [269]

We don't need foreign companies in our telecom sector.

- \* Prices of cell phone services won't be lower as they are already very competitive worldwide.
- \* Canadians in rural and remote communities will, not may, suffer from poor service and no access to high-speed Internet (we all know how big business works and must make a profit) as there is no profit to be made there by foreign companies.
- \* Our culture is at risk because most telecom companies also provide broadcasting services. If such a company falls into foreign hands, it will definitely influence the content of its broadcasting service. Foreign ownership of telecom is a direct threat to our cultural identity.
- \* Telecommunications is extremely important for our national security, any foreign influence on the truth of communications puts us at risk.
- \* We are doing fine, just leave things alone.
