Reference: *Notice No. DGTP-004-05 — Proposals and changes to the spectrum in certain bands below 1.7 GHz*

On behalf of Correctional Service Canada we wish to bring to your attention a concern we have in regards to the proposed MURS. Our Prince Albert facility has a licensed radio system that uses frequency 151.925. Apparently one of the proposed MURS radio frequencies is 151.940. I understand the MURS radios are being limited to a maximum of two (2) watts. Depending on the location of these radios, there is a small possibility of interference to our licensed system.

Please forward our concerns to the appropriate authority for consideration.

Regards,

Mike Palawaga
