David D Bouzane

In reference to the new proposed Canada Gazette, Part 1 publication date December, 2005.

I am writing this letter on behalf off Reliable Ambulance Services Limited. In reference to the multi use radio's in the 150 Mhz band. These frequencies are very close to the ones that Reliable Ambulance are using. This will probably cause Reliable Ambulance some problems in the future. Due to the nature of there business, Reliable Ambulance can not have room for error in there communications. Reliable Ambulance do not want this band to be approved. If it does go through they will have to get all there radio's and repeaters setup with new Crystals. This will be very expensive and time consuming for Reliable Ambulance. If you have any questions on this please call Murray Caines at 709 634 3000.

Thanks

Murray Caines
