Subject: murs

as emergency 9 support in grs i can not support the new murs vhf fm portable.they make to much unwanted noise and bleed over on 152.345 and 154.890 and 154.070 .we cannot put the fire service at risk and a lote of fire service cannot aford to move to other channels . the citizen band service can go with out murs their still is the gmrs radio to use and with ctss tones on murs its not like you can ask them to stop sending because you have a emergency so support your fire service and end the murs radio program.the citizen band radio service should be their to support the public service than put them at risk
thank you john k laronde
