Trademarks Journal

2020-01-01 — Vol. 67 No. 3401

Trademarks Journal

Vol. 67 No. 3401

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Colour Claim

Colour is claimed as a feature of the trademark. The background of the letters "BR" is in Red, Pantone, 200C; the background of the letters "GADE" is in Blue, Pantone, 280C. "PANTONE" is a registered trademark.

Goods

Class 09

(1) Sirens; sirens for vehicles; loudspeakers, sound amplifiers, acoustic transducers; sound generators, namely speakers, speaker housings, speaker housing equipped with lights; building /tunnel evacuation alarms, train and vehicle sirens, ultrasonic obstacle detection and warning systems used in vehicles for detecting obstacles and preventing collisions, radar obstacle detection and warning systems for motor vehicles, mobile machinery and mobile platforms that utilize ultrasonic sensors for preventing collisions, avoiding obstacles, and increasing visibility in the vicinity around vehicles, machinery or platforms; ultrasonic obstacle detection and warning systems used in vehicles for preventing collisions, avoiding obstacles, and increasing visibility in the vicinity around vehicles, machinery or platforms; pulsed radar obstacle detection and warning systems for use in vehicles; vehicle CCTV systems to improve driver vision, namely closed circuit television apparatus comprising television cameras and television monitors all for mounting on vehicles of all types or mobile apparatus and for use in assisting drivers in manoeuvring; vehicle rear detection and parking sensor systems which senses and warns the driver of obstacles behind the vehicle; paging apparatus and instruments, namely pagers, computer hardware, computer software for operating motor vehicle camera monitors; digital recorders for recording the position, motion, camera feed, and audio feed of vehicles; radar sensors, and obstacle detectors for motor vehicles, mobile machinery and building/tunnel evacuation monitoring systems; vehicle sirens; closed circuit television apparatus comprising television cameras and television monitors all for mounting on vehicles or mobile machinery and mobile platforms; fibre cable, lenses and displays

for use in or on vehicles or mobile machinery; Fresnel-type lenses for fitting to vehicle or mobile machinery and mobile platforms windows to increase the outside-vehicle zone of vision of the driver or operator; beepers, white/pink noise emitters for fitting to vehicles or mobile machinery and mobile platforms so as to give audible warning while the vehicle is being manoeuvred; detection and warning apparatus for use on vehicles or mobile apparatus namely forward, reverse and side warning ultrasonic, infrared, microwave, radar and frequency modulated continuous wave (FMCW) transmitters and receivers; GPS and location tracking devices consisting of computers, computer software, transmitters, receivers and network interface devices for recording speed and location of vehicle, including event records for safety and security purposes for use in vehicles or mobile machinery; electronics used for generating, controlling, managing, and signalling alarms in vehicles, mobile machinery and building/tunnel evacuation systems, namely security and fire alarms;

Class 12

(2) Alarms for vehicles and mobile machinery and used to prevent collisions; reversing alarms for vehicles; electronics for generating, amplifying and emitting sound from vehicles, mobile machinery and building/tunnel evacuation systems for safety purposes, namely building/tunnel evacuation alarms, train and vehicle sirens; alarms and alarm systems for vehicles; sounding generating apparatus and instruments for vehicles, namely, motor vehicle back-up beepers; vehicle warning devices, namely, warning bells for vehicles, warning horns for automobiles

Goods

Class 01

(1) chemicals for eliminating static electricity for industrial purposes for machines, equipment and devices for processing and printing substrates for the packaging industry; adhesives (gluing substances) used in industry, namely, adhesives for use in the packaging industry, adhesives for gluing paper and cardboard in folding-gluing machines

Class 02

(2) inks for printing machines, equipment, units, devices and heads, namely, inks for digital printing machines, rotary printing machines, flexographic printing machines, Central Impression flexographic printing machines, rotogravure printing machines, offset printing machines, typographical printing machines; protective varnishes for printing; precoating paints and varnishes for substrates, in particular, for sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic

Class 03

(3) all-purpose cleaning preparations for machines, grease-removing preparations for cleaning purposes, general use abrasives; industrial detergents, industrial soaps; canned pressurized air, for cleaning and dusting; towels impregnated with detergent for cleaning

Class 04

(4) industrial oils and greases; lubricants, namely, industrial lubricants, all-purpose lubricants; dust absorbing, wetting and binding compositions for industrial use; dust binding compositions for sweeping

Class 07

(5) packaging machines, packaging equipment and packaging devices for processing and printing substrates, in particular sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry and controllers and constituent pieces and spare parts of the aforesaid machines, equipment and devices; packaging machines, packaging equipment and packaging devices for forming and printing, in particular cutting, creasing, embossing, stamping, hot and cold stamping, plating a coloured film, hot and cold

gilding, embossing and folding-gluing inline, laminating, litho-laminating, rotary printing presses, machines for flexographic printing, Central Impression flexo printing, rotogravure printing, offset printing, typographical printing, digital printing, flexo printing and flat bed die-cutting inline, flexo printing and folding-gluing inline, flexo printing and rotary die-cutting inline, gravure printing and foldinggluing inline of substrates, in particular sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry and controllers and constituent pieces and spare parts of the aforementioned machines, equipment and devices; mechanical and electrical systems for machines, namely, loading machines, loading equipment and loading devices for the packaging manufacturing industry introducing, multiple inserting, running, connecting, positioning, conveying, transport, stacking and release of sheets, systems for the separation, release, rolling, handling, packing and conveying out of machine of media, in particular sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, batteries and coils for the aforesaid media, formed, printed and foldglued media; structural parts of printing machines, namely, printing cylinder, printing rollers, flexible relief plates and printing plates, machines for preparing and processing of printing cylinders, printing rollers, flexible relief plates and printing plates

Class 09

(6) computer, data processing apparatus, namely, interface cards for data processing equipment in the form of printed circuits, computer central processing units and card punching and sorting machines for data processing, electronic circuit board, printed circuit board, computer chip and computer software for inputting, entering, recording, reproducing, storing, processing, transmitting, displaying of data in connection with checking, controlling, measuring, programming, adjusting, pre-setting, controlling the quality, monitoring of production parameters, performances and stops management, checking of register of printings, cuts, creases and embossing, measuring and adjusting the colour composition of printings, measuring and adjusting the ink supply, for preprint and postprint image analysing and processing to process and print substrates, in particular sheets, plate elements, blanks, webs, films, paper, cardboard, corrugated board, plastic, in the packaging manufacturing industry

Services

Class 35

(1) retail sales, by mail order and the internet of packaging machines, packaging equipment and packaging devices for processing and printing substrates, in particular, sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry; retail sales and wholesaling of parts and fittings and spare parts, software and inks, for packaging machines for processing and printing substrates, in particular, sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry; retail sales of second-hand packaging machines for processing and printing substrates, in particular sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry; purchasing of secondhand packaging machines for processing and printing substrates, in particular sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry for other companies

Class 37

(2) customer assistance services, namely installation, cleaning, maintenance, settings optimization, remote monitoring of the operation in the framework of the cleaning, maintenance, and settings, repair, mounting and installing spare parts for packaging machines, packaging equipment and packaging devices for processing and printing substrates, in particular sheets,

plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic, for the packaging manufacturing industry

Class 41

(3) theoretical and practical instruction in operating machines for the packaging manufacturing industry, editing teaching materials, publishing teaching materials, preparing audio-visual presentations, for users of packaging machines, packaging equipment and packaging devices for processing and printing substrates, in particular sheets, plate elements, blanks, webs, films, of paper, cardboard, corrugated board, plastic for the packaging manufacturing industry

Goods

Class 09

(1) Electronic storage devices in the nature of blank memory discs, blank memory cards and data storage media, namely, packaged semiconductors, electronic control units and programmers which controls the working parameters of wireless communication systems and wireless powering systems, namely chargers in the nature of battery chargers, digital chargers and electronic chargers for medical devices and implants, electronic transmitters and electronic receivers of electronic signals, and electronic circuits; wireless powering systems, namely chargers in the nature of battery chargers, digital chargers and electronic chargers for medical device and implants, electronic transmitters and electronic receivers of electronic signals, and electronic circuits; remote controls for wireless controlling, and programming wireless power chargers for wireless energizing and control stations for wireless controlling, programming and energizing of active medical implants and surgical and orthopaedic active implants made of artificial materials; software, in particular for measuring, receiving, sending, checking, transferring, calculating, processing, controlling, presenting and analyzing of data, namely, data about electricity, energy, physical parameters, communication and programming data in medical and surgical apparatus, devices and instruments for communicating with, energizing and programming of medical implants; software, in particular for active medical implants, for measuring, receiving, sending, checking, transferring, calculating, processing, controlling, presenting and analyzing of data, namely, data about electricity, energy, physical parameters, and communication and programming data in medical implants; software, in particular for measuring, receiving, sending, checking, transferring, calculating, processing, controlling, presenting and analyzing of data, namely, data about electricity, energy, physical parameters, communication and programming data in medical and surgical apparatus, devices and instruments for communicating with, energizing and programming of medical implants; computers for use in data management and computer hardware.

Class 10

(2) Medical and surgical apparatus, instruments and devices, namely active and non-active medical implants, namely, intrasvacular, gastrointestinal, penile medical implants comprised of artificial material; medical and surgical apparatus, instruments and devices intended for use inside the mammal or human body, in particular manual, electrical or a combination of manual and

electrical apparatus, devices and instruments, in all medical hydraulic, mechanical, and pneumatic apparatus, devices and instruments, namely, intrasvacular, gastrointestinal, penile medical implants comprised of artificial material; medical and surgical apparatus, instruments and devices for replacing and adding bodily functions and parts inside the body, namely, intrasvacular, gastrointestinal, penile medical implants comprised of artificial material; medical and surgical apparatus, instruments and devices designed for wireless programming, wireless controlling, wireless communicating and wireless energizing, namely, active implants in the nature of intrasvacular, gastrointestinal, penile consisting of artificial materials, and a wireless transmitter and a receiver as an integral component of a surgical implantation; electronic muscle stimulators for medical purposes; electronic nerve stimulators for medical purposes; electrodes for medical use; medical apparatus and instruments in the field of neurovegetative reactivity; surgical instruments in particular to be used during operations of active or non-active medical implants; veterinary surgical instruments for use in implant surgeries and orthopaedic joint implants.

Services

Class 36

(1) Insurance; financial affairs, namely, providing funds investment in the health care sector; providing a mixed mutual fund investment, partly in the health care sector and partly in the securities, bond, stock and real estate sectors; providing financial reports in the health care sector; providing financial reports, partly in the health care sector and partly in the following sectors: security, bond, stock and real estate and security and stock investment and management; providing financial reports in the following sectors: health care, security, bond, stock and real estate and security and stock investment and management; providing mutual fund investments in the field of real estate; monetary affairs, namely, financial analysis, appraisals and management within the following sectors: health care, security, bond, stock and real estate.

Class 44

(2) Medical, surgical and health correlated services, namely Internet based services, for collecting, sending, receiving, storing, preparing, controlling, presenting, programming, calculating, analyzing and processing of data from medical implants, remote controls or control stations for use by medical, surgical and health professionals for the purposes of monitoring and diagnosing medical conditions; providing a medical, surgical and health database featuring medical, surgical and health information relating to medical implants that has been input, collected, received, prepared, controlled, programmed, calculated, and analyzed, from medical implants, remote controls or control stations for use by medical, surgical and health professionals for the purposes of monitoring and diagnosing medical conditions; medical and surgical services for programming, controlling, communicating with, and energizing of, active medical implants; medical and surgical services, in person or through the Internet, namely, artificial implantation services for persons having a medical related condition and being candidates for or being operated on with an active or a non-active medical implant.

Goods

Class 09

Industrial personal computers, digital interfaces, namely, computer hardware for coupling industrial controllers to a separate computer, computer adapters, namely, computer software used to package data received from industrial controllers and machine tools within manufacturing plants, industrial floor shops and commercial processing establishments and computer software used to collect information relating to the performance of industrial controllers and machine tools for the purpose of creating analytics for assessing effectiveness and improving inefficiencies

Services

Class 42

Consulting services in the field of asset monitoring systems, namely, identifying, providing, and configuring hardware for manufacturing and industrial floor shops and commercial processing establishments; design and development of computer data monitoring and collection software and hardware associated with monitoring automated machines at manufacturing and industrial floor shops and commercial processing establishments; planning and layout design services for monitoring assets at manufacturing and industrial shops and commercial processing establishments; consulting and advisory services in the field of manufacturing plant, industrial floor shops and commercial processing establishments performance; technical consulting services in the field of monitoring the performance of manufacturing plants and industrial floor shops and commercial processing establishments

Class 09

Downloadable mobile applications for scanning business and personal cards and connecting users with cloud-based information about the card owner.

Services

Class 35

(1) Operating an online marketplace featuring a platform enabling buyers and sellers to connect for the purchase of customized printed products.

Class 38

(2) Providing access to an online marketplace via a website for exchanging goods and services related to customized printed products with other users.

Class 40

(3) Custom printing services namely, printing documents, graphics and pictures to the specifications of others.

Class 42

(4) Providing temporary use of a web-based software application and software as a service (SAAS) services featuring software that allows users of an online marketplace to upload, view, purchase and track orders of custom printed products and to exchange messages with one another.

Goods

Class 09

(1) Electronic monitoring and detection apparatus and instruments, namely, alarms for the detection of inflammable gases, carbon dioxide detectors, electromagnetic frequency detectors, gas alarms, metal detectors, laser speed detectors, motion detectors, infrared detectors, heat detectors and parts and fittings for all the aforesaid goods; detectors in the nature of door alarms, burglar alarms, electronic window alarms, fire alarms and parts and fittings for all the aforesaid goods; electronic apparatus and instruments for detecting body heat, movement and light, namely, passive infra-red receiver motion detection devices, namely, motion sensors and parts and fittings for all the aforesaid goods; intruder alarms and detection devices comprising motion sensors, infrared sensors, heat sensors, pressure sensors, body heat sensors, movement sensors, and proximity sensors and parts and fittings for all the aforesaid goods; fire alarms and parts and fittings for all the aforesaid goods; personal security alarms and parts and fittings for all the aforesaid goods; personal security alarms that connect to a wireless communications network and parts and fittings for all the aforesaid goods; control panels for intruder alarms and parts and fittings for all the aforesaid goods; control panels for electrical and electronic burglar alarms and anti-intrusion alarms and parts and fittings for all the aforesaid goods; infra-red receiver motion detection devices, namely, motion sensors and parts and fittings for all the aforesaid goods; wireless intruder alarms and detection devices comprising motion sensors, infrared sensors, heat sensors, pressure sensors, body heat sensors, movement sensors and proximity sensors and parts and fittings for all the aforesaid goods; communications apparatus and installations, namely, GSM modems, GPRS modems, communication devices to allow access to a Local Area Network, communication devices to allow access to Wi-Fi networks, namely, computers, tablet computers, smart phones, mobile phones, network routers, speech operated diallers, telephones, satellite antennas, radio signal antennas, antenna amplifiers and parts and fittings for all the aforesaid goods; monitoring apparatus and installations, namely intruder alarm monitors, fire alarm monitors and parts and fittings for all the aforesaid goods; apparatus and installations for receiving and transmitting alarms and communications, namely, emergency signal transmitters, optical transmitters, radar transmitters and receivers, satellite transmitters and receivers, audio receivers and parts and fittings for all the aforesaid goods; networked monitoring systems comprising fire

and intruder alarms, electrical and electronic communications systems and equipment and control systems and equipment in the nature of electric control panels, computer monitors, signal converter, radio and video transmitters and receivers and closed circuit televisions, detectors and sensors comprising motion sensors, heat sensors, infrared sensors and detectors, burglar alarms and parts and fittings for all the aforesaid goods; electronic control panels, control panels for security alarms, control panels for fire alarms, control panels for intruder alarms, control panels for social security alarms, lighting control panels, control panels for environmental systems, namely, lighting, heating and ventilation systems; control panels for tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; sounders for use in conjunction with security and fire alarms, namely, signal bells, electronic warning bells, electric door bells, push buttons for bells and parts and fittings for all the aforesaid goods; remote indicators for detecting motion comprised of luminous indicators, digital indicators and software for use with security and fire alarms and electronic video monitoring systems for monitoring and alerting remote motion sensors via the Internet and parts and fittings for all the aforesaid goods; control devices, namely, remote controllers and control panels for controlling security and fire alarms and parts and fittings for all the aforesaid goods; electronic control systems and apparatus, namely, control systems for security alarms, control systems for fire alarms, control systems for intruder alarms, control systems for social security alarms, lighting control systems, control systems for environmental systems, namely, lighting, heating and ventilation systems and parts and fittings for all the aforesaid goods; control panels for tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; data communication systems, namely, computers, computer hardware, computer software for database management and parts and fittings for all the aforesaid goods; terminals for signalling and speech communication, namely, telephone terminals, radio terminals, computer terminals, video display terminals and parts and fittings for all the aforesaid goods; computer software for controlling and managing security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; control devices for lighting, namely, control panels for electric track lighting units and parts and fittings for all the aforesaid goods

(2) Electronic monitoring and detection apparatus and instruments, namely, alarms for the detection of inflammable gases, carbon dioxide detectors, electromagnetic frequency detectors, gas alarms, metal detectors, laser speed detectors, motion detectors, infrared detectors, heat detectors, smoke detectors and parts and fittings for all the aforesaid goods; detectors in the nature of door alarms, burglar alarms, electronic window alarms, fire alarms and parts and fittings for all the aforesaid goods; passive infra-red receiver motion detection devices, namely, motion sensors and parts and fittings for all the aforesaid goods; intruder alarms and detection devices comprising motion sensors, infrared sensors, heat sensors, pressure sensors, body heat sensors, movement sensors, and proximity sensors and parts and fittings for all the aforesaid goods; fire alarms and parts and fittings for all the aforesaid goods; fire alarms and parts and fittings for all the aforesaid goods; smoke detectors and parts and fittings for all the aforesaid goods; carbon monoxide detectors and parts and fittings for all the aforesaid goods; personal security alarms and parts and fittings for all the aforesaid goods; personal security alarms that connect to a wireless

communications network and parts and fittings for all the aforesaid goods; control panels for intruder alarms and parts and fittings for all the aforesaid goods; control panels for electrical and electronic burglar alarms and anti-intrusion alarms and parts and fittings for all the aforesaid goods; infra-red receiver motion detection devices, namely, motion sensors and parts and fittings for all the aforesaid goods; wireless intruder alarms and detection devices comprising motion sensors, infrared sensors, heat sensors, pressure sensors, body heat sensors, movement sensors and proximity sensors and parts and fittings for all the aforesaid goods; communications apparatus and installations, namely, GSM modems, GPRS modems, speech operated diallers, telephones, satellite antennas, radio signal antennas, antenna amplifiers and parts and fittings for all the aforesaid goods; monitoring apparatus and installations, namely intruder alarm monitors, fire alarm monitors and parts and fittings for all the aforesaid goods; fire alarm systems and environmental monitoring systems comprised of meters and sensors that measure pressure, humidity, temperature and air quality and parts and fittings for all the aforesaid goods; closed circuit television systems and parts and fittings for all the aforesaid goods; radio transmitters, radio transceivers and parts and fittings for all the aforesaid goods; apparatus and installations for receiving and transmitting alarms and communications, namely, emergency signal transmitters, optical transmitters, radar transmitters and receivers, satellite transmitters and receivers, audio receivers and parts and fittings for all the aforesaid goods; telephones and parts and fittings for all the aforesaid goods; telephone handsets and parts and fittings for all the aforesaid goods; impact sensors for use in conjunction with alarm systems and parts and fittings for all the aforesaid goods; hand-triggered buttons for activating personal security alarms and parts and fittings for all the aforesaid goods; control panels for heating and furnace boilers and parts and fittings for all the aforesaid goods; electronic door closing and opening systems, electronic door monitoring systems, namely, door alarms, door bells, push buttons for bells, peephole for doors and parts and fittings for all the aforesaid goods; peepholes [magnifying lenses] for doors and parts and fittings for all the aforesaid goods; electronic access control systems for interlocking doors and parts and fittings for all the aforesaid goods; control devices, namely, remote controllers and control panels for controlling security and fire alarms and parts and fittings for all the aforesaid goods; automatic digital telephone diallers and parts and fittings for all the aforesaid goods; carbon monoxide detectors and parts and fittings for all the aforesaid goods; pull cord switches for the operation of lighting systems, personal alarm systems and to call for medical assistance and parts and fittings for all the aforesaid goods; video communication equipment, namely, video transmitters and receivers, videotape recorders, video screens and monitors, and video cameras and parts and fittings for all the aforesaid goods; touch pads and parts and fittings for all the aforesaid goods; speech trigger devices, namely, digital voice signal processors and parts and fittings for all the aforesaid goods; digital voice recorders, voice recognition software and parts and fittings for all the aforesaid goods; two-way radios and parts and fittings for all the aforesaid goods; electronic control systems and apparatus, namely, control systems for security alarms, control systems for fire alarms, control systems for intruder alarms, control systems for social security alarms, lighting control systems, control systems for environmental systems, namely, lighting, heating and ventilation systems and parts and fittings for all the aforesaid goods; control panels for tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; call handling systems comprised of answering machines, call bells, electronic telephone dialers and video phones and parts and fittings for all the aforesaid goods; display units, namely, liquid crystal displays, video display terminals, LED displays, LED screens, video screens and parts and fittings for all the aforesaid goods; speech communication systems comprising optical fibers, telephone receivers, switchboards, telephone and telegraph wires, video telephones

and parts and fittings for all the aforesaid goods; data communication systems, namely, computers, computer hardware, computer software for database management and parts and fittings for all the aforesaid goods; apparatus for initiating, generating and transmitting calls for assistance, alarm calls and emergency calls, namely, emergency signal transmitters, electronic personal emergency response system consisting of a device worn on the body with a button that users push to notify others in the event of an emergency, and a remote unit that dials out on the telephone for help, Emergency response system for elderly persons, invalids and the like, comprising a telephone set and a unit for remotely actuating the said telephone set and parts and fittings for all the aforesaid goods; electronic apparatus and instruments for recording, transmitting and playback of tones, speech and images, namely, digital voice recorders, video recorders, audio tape recorders, video, radio and optical transmitters and parts and fittings for all the aforesaid goods; wireless telephones and parts and fittings for all the aforesaid goods; message display screens and parts and fittings for all the aforesaid goods; central control panels for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; central console panels for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; radio signalling based transceiver stations for controlling security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; indicator switches for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; system wiring, namely, electrical wires for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; terminals for signalling and speech communication, namely, telephone terminals, radio terminals, computer terminals, video display terminals and parts and fittings for all the aforesaid goods; pagers and parts and fittings for all the aforesaid goods; mobile alarms, namely, hand held remotes for operating emergency signal transmitters for use with security alarms, fire alarms, intruder alarms, social security alarms, two-way radios, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; hand held radio triggers and pagers,

namely, hand held remotes for operating emergency signal transmitters and personal security alarms and parts and fittings for all the aforesaid goods; communications controllers for use with security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and telehealth systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers /recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; multiple control signal transmission units for transmitting electric signals for use with security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; network controlling apparatus, namely, network routers, computer network hubs, switches and routers, network servers, network access server hardware and parts and fittings for all the aforesaid goods; communication interface units, namely, network interface cards, interface cards and boards for computers, interface cards for data processing equipment in the form of printed circuits and parts and fittings for all the aforesaid goods; security control apparatus, namely, personal security alarm controllers, biometric retinal scanners, personal security alarm control panels and motion detectors; wireless controllers to remotely monitor and control the function and status of security systems and parts and fittings for all the aforesaid goods; security video cameras and television monitors and parts and fittings for all the aforesaid goods; computer hardware and parts and fittings for all the aforesaid goods; computer firmware for remote monitoring of security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bedwetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; computer software for controlling and managing security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bedwetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; downloadable electronic publications in the nature of magazines, instruction manuals and installation guides in the field of security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands, pre-recorded floppy discs containing spreadsheet and word processing software and parts and fittings for all the aforesaid goods; apparatus and instruments for the storage of information, including data, sound and images, namely, blank computer discs, blank compact discs, blank floppy discs, electronic databases containing information in the field of allergies recorded on computer media, prerecorded optical discs containing information in the field of security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers /recorders for medical patient identification bands, pre-recorded floppy discs containing

spreadsheet and word processing software and parts and fittings for all the aforesaid goods; electronic apparatus and instruments for recording, transmitting and playback of tones, speech and images in the nature of sound, video and data recordings, namely, network video recorders, digital video recorders, network access server hardware, network video access server hardware; video tape recorders, video cassette recorders and parts and fittings for all the aforesaid goods; audio and video players and parts and fittings for all the aforesaid goods; electronic tags for goods, namely, radio-frequency identification (RFID) tags, blank near field communication (NFC) tags, electronic security tags and parts and fittings for all the aforesaid goods; electronic tags for security control purposes and parts and fittings for all the aforesaid goods; electronic security tags and parts and fittings for all the aforesaid goods; encoded identification tags and parts and fittings for all the aforesaid goods; Smoke detectors and parts and fittings for all the aforesaid goods; carbon monoxide detectors and parts and fittings for all the aforesaid goods; fire alarm systems and environmental monitoring systems comprised of meters and sensors that measure pressure, humidity, temperature and air quality and parts and fittings for all the aforesaid goods; closed circuit television systems and parts and fittings for all the aforesaid goods; radio transmitters, radio transceivers and parts and fittings for all the aforesaid goods; telephones and parts and fittings for all the aforesaid goods; telephone handsets and parts and fittings for all the aforesaid goods; care management systems comprising of tele-health devices and apparatus and equipment for monitoring tele-health devices and apparatus, namely, infant movement alarms, electronic alarm for providing notice of bed-wetting, motion alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic barcode readers and recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; lanyards for safety purposes for fall protection and parts and fittings for all the aforesaid goods; emergency signal transmitters and parts and fittings for all the aforesaid goods; push buttons for bells and parts and fittings for all the aforesaid goods; tele-health devices, apparatus, installations and systems, namely, infant movement alarms, electronic alarm for providing notice of bed-wetting, motion alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic barcode readers and recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; telephone transmitters and receivers and parts and fittings for all the aforesaid goods; impact sensors for use in conjunction with alarm systems and parts and fittings for all the aforesaid goods; hand-triggered buttons for activating personal security alarms and parts and fittings for all the aforesaid goods; peepholes [magnifying lenses] for doors and parts and fittings for all the aforesaid goods; electronic access control systems for interlocking doors and parts and fittings for all the aforesaid goods; remote control for opening and closing doors and parts and fittings for all the aforesaid goods; automatic digital telephone diallers and parts and fittings for all the aforesaid goods; pull cord switches for the operation of lighting systems, personal alarm systems and to call for medical assistance and parts and fittings for all the aforesaid goods; temperature sensors and parts and fittings for all the aforesaid goods; video communication equipment, namely, video transmitters and receivers, videotape recorders, video screens and monitors, and video cameras and parts and fittings for all the aforesaid goods; touch pads and parts and fittings for all the aforesaid goods; speech trigger devices, namely, digital voice signal processors and parts and fittings for all the aforesaid goods; digital voice recorders, voice recognition software and parts and fittings for all the aforesaid goods; two-way radios and parts and fittings for all the aforesaid goods; call handling systems comprised of answering machines, call bells, electronic telephone dialers and video phones and parts and fittings for all the aforesaid goods; display units, namely, liquid crystal displays, video display terminals, LED displays, LED screens, video screens and parts and fittings for all the aforesaid goods; speech communication systems comprising optical fibers, telephone receivers, switchboards, telephone and telegraph wires, video telephones and parts and fittings for all the aforesaid goods; apparatus for initiating, generating and transmitting calls for

assistance, alarm calls and emergency calls, namely, emergency signal transmitters, electronic personal emergency response system consisting of a device worn on the body with a button that users push to notify others in the event of an emergency, and a remote unit that dials out on the telephone for help, Emergency response system for elderly persons, invalids and the like, comprising a telephone set and a unit for remotely actuating the said telephone set and parts and fittings for all the aforesaid goods; electronic apparatus and instruments for recording, transmitting and playback of tones, speech and images, namely, digital voice recorders, video recorders, audio tape recorders, video, radio and optical transmitters and parts and fittings for all the aforesaid goods; wireless telephones and parts and fittings for all the aforesaid goods; message display screens and parts and fittings for all the aforesaid goods; central control panels for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bedwetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; central console panels for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bedwetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; radio signalling based transceiver stations for controlling security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; indicator switches for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and telehealth systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers /recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; system wiring, namely, electrical wires for security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; pagers and parts and fittings for all the aforesaid goods; mobile alarms, namely, hand held remotes for operating emergency signal transmitters for use with security alarms, fire alarms, intruder alarms, social security alarms, two-way radios, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; hand held radio triggers and pagers, namely, hand held remotes for operating emergency signal transmitters and personal security alarms and parts and fittings for all the aforesaid goods; remote control for use with security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating, and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes

pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; thermostats and parts and fittings for all the aforesaid goods; control apparatus, namely, power distribution boxes and voltage regulators for energy distribution systems and parts and fittings for all the aforesaid goods; thermal sensors for use in thermostats and parts and fittings for all the aforesaid goods; control panels for heating and furnace boilers and parts and fittings for all the aforesaid goods; communications controllers for use with security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; multiple control signal transmission units for transmitting electric signals for use with security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bedwetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; network controlling apparatus, namely, network routers, computer network hubs, switches and routers, network servers, network access server hardware and parts and fittings for all the aforesaid goods; communication interface units, namely, network interface cards, interface cards and boards for computers, interface cards for data processing equipment in the form of printed circuits and parts and fittings for all the aforesaid goods; security control apparatus, namely, personal security alarm controllers, biometric retinal scanners, personal security alarm control panels and motion detectors; wireless controllers to remotely monitor and control the function and status of security systems and parts and fittings for all the aforesaid goods; security video cameras and television monitors and parts and fittings for all the aforesaid goods; meters, namely, sound level meters, vibration meters, energy meters for tracking and monitoring energy usage and parts and fittings for all the aforesaid goods; meters for measuring and monitoring energy and parts and fittings for all the aforesaid goods; smart meters, namely meters for testing, displaying and reporting on-going energy usage and parts and fittings for all the aforesaid goods; electrical meters and parts and fittings for all the aforesaid goods; gas-flow meters and parts and fittings for all the aforesaid goods; apparatus, equipment and instruments for measuring the efficiency, performance and consumption of gas boilers, namely, gas flow meters and parts and fittings for all the aforesaid goods; computer hardware and parts and fittings for all the aforesaid goods; computer firmware for remote monitoring of security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands and parts and fittings for all the aforesaid goods; apparatus and instruments for the storage of information, including data, sound and images, namely, blank computer discs, blank compact discs, blank floppy discs, electronic databases containing information in the field of allergies recorded on computer media, prerecorded optical discs containing information in the field of security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilating systems and tele-health systems comprised of infant movement alarms, electronic alarm for providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands, pre-recorded floppy discs containing spreadsheet and word processing software and parts and fittings

for all the aforesaid goods; video tape recorders, video cassette recorders and parts and fittings for all the aforesaid goods; audio and video players and parts and fittings for all the aforesaid goods; apparatus and instruments for conducting measurements relating to healthcare for conducting measurements relating to healthcare, namely, laboratory thermometers, not for medical purposes, timer that may be attached to a prescription vial cap for reminding persons to take medicine and parts and fittings for all the aforesaid goods; electronic telehealthcare monitors for the collection of information and data, namely, alarms that utilizes pressure sensitive pads to monitor patients or resident movement, computer hardware and software for controlling and managing patient medical information, namely, heart rate, blood pressure, blood glucose levels and parts and fittings for all the aforesaid goods; electronic devices, namely, optical lenses, stands for cameras, mounting brackets adapted for computer monitors, telephones and computers for the collection and transfer for information and data relating to the healthcare of individuals and parts and fittings for all the aforesaid goods; electronic devices for use in obtaining relevant information for determining the healthcare needs of individuals, namely, medical workstation comprised of computer hardware and software for gathering and transmitting patient image data, namely, medical imaging for use during treatment and procedures and parts and fittings for all the aforesaid goods; electronic tags for goods, namely, radio-frequency identification (RFID) tags, blank near field communication (NFC) tags, electronic security tags and parts and fittings for all the aforesaid goods; electronic tags for inventory control purposes and parts and fittings for all the aforesaid goods; electronic tags for security control purposes and parts and fittings for all the aforesaid goods; electronic security tags and parts and fittings for all the aforesaid goods; encoded identification tags and parts and fittings for all the aforesaid goods

Class 11

(3) Apparatus for lighting, namely, lighting fixtures, electric track lighting units, and parts and fittings for all the aforesaid goods

Services

Class 38

(1) Electronic exchange of messages using chat lines, chatrooms and Internet forums, namely, providing access to online chatrooms and advice and consultancy in relation to the aforesaid services; providing multiple-user access to global computer information networks for the transfer and dissemination of a wide range of information in the field of security and advice and consultancy in relation to the aforesaid services; providing access to a computer database in the field of security, providing user access to global computer networks, information, advice and consultancy in relation to the aforesaid services; electronic transmission of data and documents via the Internet or other databases, namely, e-mail transmission services, electronic transmission of digital photo files via a peer-to-peer network, providing on-line chat rooms and electronic bulletin boards for transmission of messages among computer users, transmission of digital files containing music, photographs, audio books and movies, video clips recorded and uploaded by a computer user and advice and consultancy in relation to the aforesaid services; delivery of data and messages by electronic transmission, namely, electronic text, video and voice message sending, receiving and forwarding and advice and consultancy in relation to the aforesaid services; providing access to an interactive user interface, namely interactive teletext and videotext services and advice and consultancy in relation to the aforesaid services

(2) Providing access to an online interface, namely, a downloadable mobile application for the remote control and operation of security alarms, fire alarms, intruder alarms, social security alarms, lighting control systems, environmental systems, namely, lighting, heating and ventilation systems and tele-health systems comprised of infant movement alarms, electronic alarm for

providing notice of bed-wetting, alarm that utilizes pressure sensitive pads to monitor patients or resident movement, electronic readers/recorders for medical patient identification bands, information, advice and consultancy services relating to the aforesaid services

Class 42

(3) Advisory services relating to the use of energy, energy efficiency and energy-saving, information, advice and consultancy in relation to the aforesaid services; professional consultancy relating to the conservation of energy; preparation of technical reports and advice and consultancy in relation to the aforesaid services; recording and reporting data relating to energy consumption in buildings and domestic homes, information, advice and consultancy in relation to the aforesaid services; providing online reports relating to energy consumption in buildings and domestic homes, information, advice and consultancy in relation to the aforesaid services

Class 45

(4) Monitoring of alarm systems, information, advice and consultancy in relation to the aforesaid services; monitoring of security systems, information, advice and consultancy in relation to the aforesaid services; monitoring of surveillance systems, information, advice and consultancy in relation to the aforesaid services; monitoring services for fire alarms, information, advice and consultancy in relation to the aforesaid services; call monitoring services and call assistance services, information, advice and consultancy in relation to the aforesaid services

Visual Representation

The logo consists of the words "Teddy" and "pop" stacked vertically. Both words are rendered in a highly stylized, bubbly font with thick, rounded letters. Each letter has a white fill, a thick black outline, and a grey drop shadow, giving the logo a three-dimensional, 3D effect. The "Teddy" is positioned above the "pop", and the two words are centered relative to each other.

Colour Claim

Colour is claimed as a feature of the trademark. The colours green, pink, blue, brown, white, black, gold, and red are claimed as a feature of the mark. The mark consists of the letters 'B', 'O', 'R', 'J', 'O', 'M', 'I' at the top of the mark in black letters outlined in gold, and Cyrillic characters at the bottom of the mark that transliterate into the letters 'B', 'O', 'R', 'J', 'O', 'M', 'I' in the English alphabet, that are in black and outlined in gold. The top of the mark has an irregular polygon around the letters 'B', 'O', 'R', 'J', 'O', 'M', 'I' with a curved top and pointed bottom, in red and outlined on the inside of the red polygon with a thin gold line, with the area inside of the polygon in white. Beneath this design is a design of a mountain with a white top at the tips of the mountain, the remainder of the mountain is shaded in blue, outlined in black. Beneath the mountain is a forest and hills in green, and in front of the forest and hills is a building in white, blue shaded arches, with a red and white triangular shaped roof. The top of the roof contains a small bluish-white horizontal line before the tip of the triangular roof. Beneath and to the right of the building the ground are the colours red and brown, with a white and a blue water fountain in a triangular shape that also extends beneath this area of the ground. Horizontal lines appear at the bottom of the

mark beneath the Cyrillic lettering in red and outlined in gold. The colour white appearing elsewhere in the mark represents background, outlining, shading, and/or transparent areas, and is not part of the mark.

Foreign Character Transliteration

As provided by the applicant, the transliteration of the foreign characters is "BORJOMI".

Colour Claim

Colour is claimed as a feature of the trademark. The outline of the circle is black. There is a circular white space between the black outline and the green circle. The green circle is composed of three different semicircles, each in a different shade of green. The topmost semicircle is light green. The semicircle in the middle is medium green, and the bottommost semicircle is dark green. The interior of the circle is composed of three smaller circles, each featuring a grey gradient. The topmost circle contains a white "S". A grey line connects this circle to a second circle in the bottom left part of the larger circle. This circle contains the letter "O". The third circle is located in the bottom right part of the larger circle, and contains the letter "F". A grey line connects the circle containing the letter "F" to the circle containing the letter "O".

Application Number 926,023

PROHIBITED MARK DETAILS

The Registrar hereby gives public notice under subparagraph 9(1)(n)(iii) of the Trademarks Act, of the adoption and use in Canada by City of Hamilton of the mark shown here, as an official mark for goods and services.

Description

The colours blue, orange, green, yellow, purple and red are described as elements of the mark. The circular symbol contains a series of coloured vertical bars, crossing a white horizontal line. The first vertical line is dark blue, the second vertical line is orange, the third vertical line is green, the fourth and fifth vertical line are blue, the sixth vertical line is yellow, the seventh vertical line is purple, and the eighth vertical line is red. The design is shown against a white background. The word "HAMILTON" is black, the word "city" is blue, the word "of" is orange, and the word "music" is green. To the left of the words, the circle is black with a black outline.
