Trademarks Journal

2020-08-12 — Vol. 67 No. 3433

Trademarks Journal

Vol. 67 No. 3433

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Services

Class 42

(1) Hosting a website featuring non-downloadable videos in the fields of genetics, health, wellness, lifestyle and ancestry

(2) Providing ancestry-related genetic reports and uninterpreted raw genetic data; providing online computer databases featuring information based on aggregated results of genotyping to assist users in identifying personal and familial genetic traits and determine personal family history; providing online computer databases featuring information based on aggregated results of genotyping for medical research and scientific research and analysis purposes; application service provider (ASP) featuring software for providing access to multiple databases that contain aggregated results of genotyping; application service provider (ASP) featuring software for use in data management, data storage, data analysis, report generation, user identification, and membership identification, all in the fields of genetics and genetic testing; scientific research in the fields of genetics, genetic testing, genetic screening, genotyping, phenotyping, molecular analytics and ancestry; providing scientific analysis and informational reports based upon results of laboratory testing in the fields of genetics for medical research and scientific research and analysis purposes

Class 44

(3) Providing informational reports for health-related purposes based upon results of laboratory testing in the field of genetics; providing online computer databases featuring health-related and genetics information based on aggregated results of genotyping; providing informational reports on medical conditions, symptoms, treatments, health and general wellness in the field of medicine based upon user surveys, aggregated information, and user-contributed data; providing online computer databases featuring medical information based on aggregated information and user-contributed data on medical conditions, symptoms, treatment, health and general wellness in the field of medicine; medical monitoring and reporting services featuring registered users' medical conditions, symptoms, treatments, health and general wellness

Class 45

(4) Online social networking services in the fields of genetics, health, wellness, lifestyle and ancestry; providing online computer databases featuring genealogical information based on aggregated results of genotyping; providing online computer databases featuring information based on aggregated results of genotyping for further genealogical research purposes

Class 09

(1) Cash registers, computers; electronic pet training collars (safety, protection or teaching); electronic barking control collars (safety, protection or teaching); electronic pet containment fencing systems (safety, protection or teaching); electronic collars for training and controlling animal behavior; electronic barking prevention collars (safety, protection or teaching); remote-controlled electronic pet training collars; electronic animal training collars with a spray feature (safety, protection or teaching); spray collars for animal training, barking control and animal containment (safety, protection or teaching); spray collars for barking control (safety, protection or teaching); animal containment fencing systems with a spray feature (safety, protection or teaching); electronic apparatus for conditioning animals to avoid specific areas, consisting of a spray receiver and a transmitter attached to an animal (safety, protection or teaching); electronic animal containment fencing systems; electronic animal training collars consisting of portable transmitters and animal collars equipped with receivers meant to be worn by the animal to activate a stimulation or correction method; radio receivers; satellite receivers; ultrasonic sound transmitters for pet training; ultrasonic sound transmitters for barking control; ultrasonic sound transmitters for repelling animals; electronic signal transmitters; radio transmitters; transceivers; radio transceivers; transponders; electronic transmitters for activating automated pet doors; electronic anti-bark collars; electronic anti-bark collars; electronic collars for preventing dogs from barking; animal tracking collars using GPS; electronic pet training devices in the form of a mat to condition animals to avoid specific areas; electronic pet training devices in the form of a spray to condition animals to avoid specific areas; electronic containment and training apparatus in the form of a mat; ultrasound-emitting anti-bark boxes for outdoor use; ultrasound-emitting anti-bark boxes for indoor use; bells for pets; electronic fencing systems for containing animals; electronic collars for animal training; electric and electronic stimulators for attaching to pet collars; electrical wires; GPS and radio receivers designed to be attached to animals; GPS and radio transmitters designed to be attached to animals; GPS and radio transceivers designed to be attached to animals; electronic tags for pets; electronic pendants for animals (encoded); electronic identification pendants for pets; bark control collars (safety, protection or teaching); ultrasound-emitting

electronic boxes for repelling unwanted animals; electronic pet tracking collars; GPS tracking devices in the form of collars or boxes for attaching to a person, an animal or an object; beeper collars for tracking pointing dogs; remote-controlled beeper collars for tracking pointing dogs; beeper collars for tracking and locating animals using audio tracking signals activated automatically or remotely; dog whistles; cameras; video cameras; video cameras designed to be attached to animals; infrared cameras designed to be attached to animals; noise-cancelling headphones for humans; electronic noise-cancelling headphones for humans; personal noise protection devices in the nature of headsets, earpieces, earplugs; noise-cancelling devices in the nature of headsets, earpieces, for humans; electronic noise-cancelling devices in the nature of headsets, earpieces, for humans; protective eyeglasses; safety eyeglasses, safety glasses; hand-held portable two-way radio transceivers; pedometers; range finders; compasses; altimeters; anemometers; barometers; electric batteries; sets consisting of a pet collar and a pendant equipped with a removable digital data storage medium for storing information regarding an animal; collars containing an electronic device for training dogs; anti-bark spray collars; anti-bark collars with a spray feature; automated pet food dispensers; automated or electronically operated pet food dispensers.

Class 11

(2) Automated water dispensers for pets; automated or electronically operated drinking water dispensers for pets.

Class 18

(3) Pet collars; luminous pet collars; electronic pet collars; pet collars with integrated receivers; pet collars with integrated transmitters; pet collars with integrated transceivers; pet collars with electronic transmitters that activate automated pet doors; pet collars bearing medical information; animal collars; animal harnesses; leashes; muzzles; leather straps; collars for domestic animals, with integrated or removable pendants; pet collars with removable electric or electronic stimulators; clothing for domestic animals; clothing for pets; backpacks for animals; bags for transporting pets; tracking collars for locating and finding pets (safety, protection or teaching); electronic pet tracking and locating collars.

Class 21

(4) Combs; earthenware; litter boxes for pets; covered litter boxes for pets; cat boxes for pets; litter containers; containers for waste and refuse disposal; feeders for animals; animal feeding dishes; animal bowls; pet food containers and feeders; pet food trays; containers for distributing pet food; pet watering containers; drinking bowls; mechanized pet feeders; battery-operated pet feeders; pet cages; pet carrying cages; combs for animals; electric combs for animals; pet brushes; brushes for grooming pets; brush equipment, namely pet brushes; door flaps for animals.

Class 28

(5) Pet toys; electronic pet toys such as laser toys, interactive toys; educational toys for the development of pets; multiple-activity pet toys such as multiple-activity playing boards; reward dispensing pet toys in the nature of toys in which candies can be hidden for animals to try to catch; equipment for canine sports such as agility, canicross, obedience; equipment for pet sports such as agility, canicross, obedience; hunting game calls.

Class 09

(1) Electronic key fobs and remote controls for operating vehicle alarms, being remote control apparatus for the remote control of vehicles for use in the fields of transportation and automobiles; food analysis apparatus namely, water quality analyzers; material testing instruments and machines namely, spectrum analyzers and metal chemical composition detectors; gas testing instruments, namely, gas gauges, gas meters, gas leak detectors; air analysis instruments for use in the fields of design and engineering, namely, air quality meters, particle counters, aerometers; precision measuring instruments namely, electronic and mechanical apparatuses for measuring the compression, strength, hardness, impact, tensile, thermal, electrical, viscosity, density, and combustion characteristics of industrial materials, namely, metals, rubbers, polymers, silicones and plastics and wood for use in the fields of design and engineering; cases especially made for photographic apparatus namely, cameras, 3D glasses, remote controls for led projectors for use in the field of consumer electronics and instruments; metal detectors for industrial or military purposes; navigational instruments for use in the field of aerospace, namely, gyroscopes, radar, directional compasses; electric installations, namely, electric control panels, for the remote control of industrial operations for use in the field of automation; aerometers; furniture especially made for laboratories; peripherals adapted for use with computers namely printers and scanners; notebook computers; laptop computers; ovens for laboratory use;

Class 10

(2) Instruments containing eyepieces namely, optical and ophthalmic diagnostic instruments; pressure measuring apparatus namely blood pressure measuring instruments; surveying instruments for use in the medical field, namely, otoscopes, audioscopes, ophthalmoscopes;

Services

Class 35

(1) Negotiation and conclusion of commercial transactions for third parties; price comparison services; public relations; professional business consultancy in the fields of 3D printing and computer aided design; commercial intermediation services-for third parties in the fields of 3D printing; providing business information in the fields of 3D printing and computer aided design; commercial information agencies in the fields of 3D printing and computer aided design; business management and organization consultancy; business appraisals; business inquiries in the fields of 3D printing and computer aided design; outsourcing of administrative services [business assistance] for third parties; marketing research in the fields of 3D printing and computer aided design; cost price analysis; provision of commercial and business contact information; providing business information via a web site in the fields of 3D printing and computer aided design; provision of an on-line marketplace for buyers and sellers of goods and services; promoting the sale of goods and services of others in the fields of 3D printing and computer aided design, through advertising, display, presentation and demonstration at point of sale or purchase;

Class 40

(2) Sandblasting services; custom assembling of finished metal materials for others; surface abrasion services, namely, metal abraision; surface grinding services, namely, metal grinding; burnishing by abrasion for metal; millworking; laser scribing; welding services; electroplating; magnetization of items for use in the fields of 3D printing and computer aided design; metal tempering; metal treating; metal plating; metal casting; blacksmithing; optical glass grinding; glass-blowing; colour separation services; printing services namely 3D printing; engraving;

Class 41

(3) Correspondence courses in the fields of 3D printing and computer aided design; instruction services fields of 3D printing and computer aided design; publication of electronic books and journals on-line; layout services for commercial service facilities, other than for advertising purposes; microfilming; photography; scriptwriting services; subtitling; dubbing; film production, other than advertising films; practical training [demonstration] in the fields of 3D printing and computer aided design; publication of books; coaching [training] in the fields of 3D printing and computer aided design; publication of texts, other than publicity texts in the fields of 3D printing and computer aided design; providing on-line electronic publications, not downloadable in the fields of 3D printing and computer aided design; arranging and conducting of colloquiums in the fields of 3D printing and computer aided design; arranging and conducting of workshops [training] in the fields of 3D printing and computer aided design; vocational education in the fields of design, engineering, and 3D printing; vocational guidance; arranging and conducting of workshops [training] in the fields of 3D printing and computer aided design;

Class 42

(4) Technological consultancy in the fields of 3D printing and computer aided design; technical research in the fields of 3D printing and computer aided design; technical project studies in the fields of 3D printing and computer aided design; research and development of new products for others; mechanical research, namely research relating to mechanical engineering; scientific research in the design and development of new products namely, medical and scientific instruments for use in the fields 3D printing and computer aided design; quality control in the field of 3D printing; material testing; packaging design; industrial design; styling [industrial design] in the fields of 3D printing and computer aided design; information technology [IT] consultancy in the fields of 3D printing and computer aided design; outsource service providers in the field of information technology for use in the fields of 3D printing and computer aided design; conversion of data or documents from physical to electronic media; scientific laboratory services in the field of

biotechnology; Mechanical engineering; physics [research] in the fields of 3D printing and computer aided design; chemistry services, namely research in the fields of 3D printing and computer aided design; chemical analysis; calibration [measuring] namely, calibration of laboratory equipment;

Computer chips; semiconductors; semiconductor chips; microprocessors; computer central processing units; integrated circuits; integrated circuit modules; circuit boards; integrated circuit chips; semiconductor sensor chips and integrated circuit sensor chips for wireless communications; computer hardware; computer networking hardware; communications computer hardware; satellite communications equipment, namely, hardware for satellites, satellite dishes, satellite transmissions, satellite radios, satellite processors, and satellite aerials; network communications hardware, namely, network routers; telecommunications and data networking hardware, namely, computer hardware for transporting and aggregating voice, sound, images, graphics, text, user-generated information, and video communications across multiple network infrastructures and communications protocols; converged network interface controllers; broadband communications equipment, namely, transmitters, receivers and processors, namely, satellite, GPS, optical, audio, radio frequency, radio, video, television, satellite, and telephone, transmitters, receivers and processors; modems and routers; cellular telephone and Internet communications hubs, namely, computer network hubs; communications computers; electrical couplers; optical

couplers; electric cables; electrical connectors; electric converters; electricity conduits; fiber optic cables; optical cables; cables for optical and electrical signal transmission; attenuators; computer network switches; Ethernet switches; high frequency switches; computer network hubs, adapters, servers, switches and routers; wired and wireless satellite transmitters, GPS transmitters, optical transmitters, audio transmitters, radio frequency transmitters, video transmitters, television transmitters, telephone transmitters, telecommunication satellite transmitters, audiovisual satellite transmitters, and radio transmitters for remote controls and radio controls; wired and wireless satellite receivers, GPS receivers, optical receivers, audio receivers, radio frequency receivers, video receivers, television receivers, telephone receivers, telecommunication satellite receivers, audiovisual satellite receivers, and radio receivers for remote controls and radio controls; wireless network and wireless sensor data integration equipment, namely, printed circuit boards and extension modules; power control circuits; network switches to enable cloud networking and cloud computing; computer cables; computer hardware for recording, processing, receiving, reproducing, transmitting, modifying, compressing, decompressing, broadcasting, managing, manipulating, merging and enhancing sound, video, images, graphics, information, text and data; computer software for recording, processing, receiving, reproducing, transmitting, modifying, compressing, decompressing, broadcasting, managing, manipulating, merging and enhancing audio recordings and files, and user-generated personal video recordings and files, images, graphics, and user-generated text messages across telephone networks, computer networks and the Internet; photographic instruments and apparatus, namely, electronic hardware for use in cameras and video recorders; photographic instruments and apparatus, namely, firmware for use in operating cameras and video recorders; apparatus and instruments, namely, computer hardware for use in video-conferencing and teleconferencing; computers; laptops; tablet computers; telephones; mobile telephones; cellular phones; headphones; computer keyboards; photocopiers; computer memory integrated circuits, cards, boards and readers; computer mouse; personal digital assistants (PDAs); computer network controllers, namely, Ethernet controllers; computer monitors; set top boxes; cameras; global positioning system (GPS) integrated circuits; global positioning system (GPS) transmitters; global positioning system (GPS) antennas; global positioning system (GPS) receivers; global positioning system (GPS) modems; global navigation satellite system (GNSS) integrated circuits; global navigation satellite system (GNSS) transmitters; global navigation satellite system (GNSS) antennas; global navigation satellite system (GNSS) receivers; global navigation satellite system (GNSS) modems; electronic book readers; computer printers; audio speakers; audio receivers; video receivers; headsets; wireless headsets; handheld computers; electronic encryption units; computer software and hardware for encryption; alarms, namely, personal security alarms, electrical and electronic burglar alarms, electronic door and window alarms; radios; televisions; mobile telephone cases; telephone cases; wearable computers; wearable digital electronic device, namely, smart watches and smart wristbands; wearable activity trackers; wearable computer peripherals, namely, smart watches and smart wristbands; cable connectors; decoders; motherboards and daughter boards; electronic sensors for sensing and monitoring distance, location, position, movement, proximity, light; computer network storage controllers and controller interfaces for network servers and computer networks; Ethernet transceivers, adapters and controllers; wireless battery chargers for cellular phones; electronic proximity sensors and switches; Near Field Communications (NFC) tags; Near Field Communications (NFC) technology-enabled smartphones, tablets, computers, transmitters, receivers, and chip card readers; optically and electronically stored manuals and instructional handbooks in the fields of circuits, computers, software, technology and electronics; software for controlling and operating integrated circuits; computer software and embedded computer software for implementing, enabling and controlling Ethernet networks and broadband computer communication networks; signal amplifiers; power amplifiers; transistors; radio frequency mixers

and multipliers; vehicle locating and tracking apparatus, namely, software and hardware used for locating and tracking vehicle locations; vehicle climate control apparatus, namely, software and hardware used for controlling the climate in vehicles; power switches; microphones; frequency converters; diodes; light emitting diodes (LEDs); electric diodes; Film Bulk Acoustic Resonator (FBAR) filters, duplexers, multiplexers; radio frequency filters; radio frequency converters; power inverters; antennas; computer chips and modules for wired and wireless communications, data communications, and multi-media communications; integrated circuits and integrated circuit modules for use in wireless communications and wireless communication equipment; semiconductors, semiconductor chips, computer chips, computer hardware, integrated circuits and computer networking hardware used for wired communication via fiber optic, electric and coaxial cables, wireless communication, connectivity, interoperability, storage, Near Field Communication (NFC) and network security; computer communications software used to transmit, receive and store audio recordings and files, user-generated personal video recordings and files, images, graphics and user-generated text message communications; software used for computer network security communication of audio, video, images, graphics and data communications transmitted by computers, mobile phones and telephones; integrated circuits for controlling hard disk drives; integrated circuits for processing data read from, and written to, hard disk drives; integrated circuits for controlling multi-protocol input/output operations; network adapter cards for connecting a host computer to a computer network; integrated circuits for controlling the storage of data on a peripheral storage device connected to a host computer; integrated circuits for expanding the number of peripheral devices connected to a host computer; integrated circuits for connecting multiple devices to a host computer over a Peripheral Component Interconnect (PCI) compliant connection; integrated circuits for enabling Peripheral Component Interconnect (PCI) and USB compliant network busses to communicate with a Peripheral Component Interconnect (PCI) Express compliant network bus; integrated circuits for interfacing a Peripheral Component Interconnect (PCI) compliant network bus with a local network bus on an adapter card; integrated circuit for controlling a USB compliant peripheral device attached to a Peripheral Component Interconnect (PCI) Express compliant network bus; host bus adapter cards for enabling a peripheral device to communicate with a host computer; host bus adapter cards for enabling a fiber channel compliant peripheral device to communicate with a host computer; computer hardware for managing remote computer server systems; computer hardware for temporarily storing data on a storage controller card connected to a host computer when the host computer fails; computer hardware for enabling a host computer to access a peripheral storage device directly attached to another host computer; computer hardware in the fields of wireless products and chips for development, testing and verification of software and wireless connectivity; apparatus and instruments for the generation of vision signals, namely, flat panel display screens; electronic display boards, plasma display boards, electronic display screens and light emitting diode (LED) displays; computer network storage controller cards; storage controller cards for data processing equipment in the form of printed circuits; storage controller cards for controlling the storage of data on a peripheral storage device connected to a host computer; computer software for use in manufacturing semiconductors and integrated circuits; computer software for securing data stored on a peripheral storage device; computer software for temporarily storing data, namely, audio recordings and files, user-generated personal video recordings and files, images, and graphics on a storage controller card connected to a host computer when the host computer fails; computer software for managing remote computer server systems; computer software for managing host bus and network adapter cards across a computer network; computer software for designing Peripheral Component Interconnect (PCI) Express compliant integrated circuits; software for processing, managing, and manipulating digital data and information, namely, audio recordings and files, user-generated personal video recordings and files, images and graphics;

software used to program computer chips used for the development, testing and verification of software and wireless connectivity; computer firmware and software for operating mobile phones and computers; software for designing and implementing wireless enabled products, namely, computer software for assisting developers in creating program code for use in multiple application programs; software for designing and implementing wireless enabled products, namely, computer software for running development programs and application programs in a common development environment; software for designing and implementing wireless enabled products, namely, computer software enabling software developers to create other software applications; software for designing wireless applications in the nature of computer software for assisting developers in creating program code for use in multiple application programs; software for designing wireless applications in the nature of computer software for running development programs and application programs in a common development environment; software for designing wireless applications in the nature of computer software enabling software developers to create other software applications; software for designing embedded wireless communications and networking applications in the nature of computer software for assisting developers in creating program code for use in multiple application programs; software for designing embedded wireless communications and networking applications in the nature of computer software for running development programs and application programs in a common development environment; software for designing embedded wireless communications and networking applications in the nature of computer software enabling software developers to create other software applications

Services

Class 42

Computer software design; computer system design; computer hardware design; computer firmware design; integrated circuit design; computer chip design; semiconductor design; semiconductor chips design; computer networking hardware design; design for others in the field of computers and computer telecommunications networks and computer networks; computer network services, namely, design for others in the field of computers, computer networks and computer telecommunication networks; computer software consultancy in the field of computer network design, development, configuration and security; consultancy in the design and development of computer hardware; technical research, namely, research of computer hardware, computer software, computer networks and telephone networks; website design services; computer systems analysis; computer timesharing; research and development of computer hardware and software; installation of computer software; rental and leasing of computers; updating of computer software; maintenance of computer software; hosting of websites; technical advice in the fields of computer hardware, computer software, computer networks; cloud computing, namely, consulting services in the field of cloud computing; technological consultancy in the fields of computer hardware, computer software, wireless network design, semiconductors, integrated circuits and telecommunications technology, namely, multi-user global computer and telephone networks; computer network configuration services; computer programming services; computer and network security consultancy; customizing computer hardware, software and firmware; data decryption services; data encryption and decoding services; engineering services in the fields of computer hardware, computer software, wireless network design, computer networks, telephone networks, semiconductor chips and wafers and integrated circuits; product development services in the fields of computer hardware, computer software, wireless network design, telecommunications, semiconductors and integrated circuits; providing information in the field of computers, semiconductors, integrated circuits and telecommunications technology, namely, computer networks, via a website; consultancy, design, testing, research and advisory services, all in the fields of computer programming and networks; design of home entertainment systems;

computer programming services to create online facilities that will provide telecommunications support; design and development of software and hardware for audio and video operators; design and development of wireless computer and network communication systems for transmission and reception of voice, data and video; computer consultation in the fields of computer hardware, computer software, wireless network design, semiconductors, integrated circuits and computer networks; design and testing of computer hardware, namely, semiconductors and integrated circuits and related software; technical consultancy relating to the design of semiconductors, integrated circuits and software related thereto; technological consultancy in the fields of computer hardware, computer software, wireless network design, semiconductors, integrated circuits and computer networks

歌林美源

GREEN PRAIRIE

Foreign Character Translation

As provided by the applicant, the translation, each word has a separate meaning. Respectively, " " or "Ge" means song in Chinese; " " or "Lin" means woods in Chinese; " " or "Mei" means beautiful in Chinese and last but not least, " " or "Yuan" means source in Chinese. Together, the whole phrase may be interpreted in Chinese as "Woods of songs; Source of Beauty" which is not necessarily the intention behind coming up with this Chinese name but more for its smooth pronunciation and harmonious meaning.

Foreign Character Transliteration

As provided by the applicant, the transliteration or pinyin for " " is "Ge Lin Mei Yuan". "Ge Lin" is a made-up Chinese phrase to match the word "Green" as they have similar syllables. "Mei Yuan", on the other hand, is only made up to match "Ge Lin" to form a catchy phrase.

Goods

Class 09

(1) Nautical apparatus and instruments, namely, underwater housings for nautical lights and parts of all the aforementioned goods; photographic apparatus and instruments, namely, darkroom lights, lamps for photo optic purposes, video cameras, photographic flashlights, lights for use in professional quality photography, exposure meters, collapsible light directors and diffusers for use with photographic lighting equipment for professional and high-end photography and parts of all the aforementioned goods; optical apparatus and instruments, namely, optical couplers, optical lenses, optical sensors, light level meters, light meters, chromatometers, color temperature meters, cables for optical signal transmission, optical signaling cables, fiber optic light and image conduits and optical lamps and parts of all the aforementioned goods; measuring apparatus and instruments, namely, detectors, light sensors, motion detection sensors, water leak sensors, accelerometers for objects, temperature meters, goniometers, lighting sphere meters, lux meters, optical couplers, light level meters, light meters, chromatometers, color temperature meters, metering systems to determine the water and dust proofness of luminaires and parts of all the aforementioned goods; signalling apparatus and instruments namely, signal lamps sold as component of ship navigation lights, electrical signaling apparatus, namely, electrical controlling

devices, electrical control panels, electronic regulating and control devices for the operation of light emitting diodes, signal processors, electric relays, coaxial relays, overvoltage protection relays, thermal overload relays, voltage monitor modules, integrated circuit modules, amplifiers, signal attenuators, acoustic signaling devices, signal amplifiers, gateway routers in the nature of computer control hardware, signaling flashlights for vehicle and air traffic control, radio signaling apparatus, namely, radio-frequency transmitters, radio-frequency receivers, radio frequency generators for supplying radio-frequency energy, radiofrequency identification (rfid) readers, radio receivers and radio signal tuners, radio receivers and transmitters for monitoring and controlling light emitting diodes in a network of lights, satellite signaling apparatus, namely, satellite receivers, radios and dishes, light fidelity signaling devices, namely, satellite receivers, radios and dishes, light fidelity signaling devices, namely, an optical metrology inspection system comprised of a light source, one or more cameras and sensors in communication with computer software and hardware, optical wireless communications transmitter and receivers and parts of all the aforementioned goods; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity namely, power supplies, uninterruptible electrical power supplies, LED drivers, circuits for light emitting diodes, electric relays, batteries, accumulators and transformers, battery management systems, inverters, overvoltage protection relays, electrical protection devices in the nature of insulators, corona rings, armor-rods and surge arresters, cables for electrical signal transmission, light barriers in the nature of motion and movement detectors which detect light changes for determining the presence of an object or individual, cable clamps for electric cables used as grounding clamps, connecting elements and for fixation against stress relief, starters for fluorescent and discharge lamps, electric and electronic ignitors for fluorescent and discharge lamps, dimmers for electric and LED lights, electric switches, and interrupters in the nature of voltage surge protectors, diodes, varistors, spark plug gap gauges, spark plug feeler gauges, fuses, electric and electronic relays, low voltage protectors, voltage stabilizers, thermal protection switches, short circuit protectors namely, connectors for electronic circuits, circuit boards, circuit testers, circuit connectors, and current protectors, namely, electricity limiters and temperature sensors and parts of all the aforementioned goods; apparatus for recording, transmission or reproduction of images and parts of all the aforementioned goods; apparatus for recording, transmission and reproduction of images, namely, image scanners, LED displays, computer screens, advertising screens, digital versatile disc recorders, video cassette recorders, mobile phones, smart phones, mobile devices, namely portable and laptop computers, and personal digital assistants, tablets; projectors, namely, picture projectors, cinematographic projectors, LED multimedia projectors, digital multimedia projectors, LCD projectors and parts of all the aforementioned goods; Picture Projectors, magnetic data carriers namely, prerecorded magnetic data carriers featuring data relating to lighting and electronic controls, as well as blank magnetic data carriers, Data processing equipment, namely, optical data couplers, computer network hubs, switches and routers, LED monitors, blank magnetic discs, CDs, DVDs, USB cards, smart cards, flash memory cards and hard drives, computer hardware, computers, and computer peripherals, namely, mouse, keyboards, monitors and webcams, all for use in the field of lighting apparatus and of goods for the operation, regulation and control of lighting apparatus as well as of accessories for lighting apparatus and parts of all the aforementioned goods; Computers, computer programs and computer software, namely, software apps and recorded software to manage and control indoor, outdoor and underwater lighting systems, traffic lighting systems and lighting systems in buildings, vehicles and public spaces, and lighting control software for use in commercial and industrial facilities and parts of all the aforementioned goods; software and data processing programs to manage and control indoor, outdoor and underwater lighting systems, traffic lighting systems and lighting systems in buildings, vehicles and public spaces, and lighting control software for use in commercial and industrial facilities, radiation apparatus for technical

purposes, namely, the treatment and analysis of material for research purpose, for use in criminology, portable detection and identification instruments using light sources and light detectors for detecting and identifying chemical and biological substances not for medical purposes and parts of all the aforementioned goods; lightemitting diodes [LED] and laser diodes, organic light-emitting diodes [OLED], light conductors, namely, optical fibers, light conducting filaments, light conducting tubes, light conducting bars, light conducting materials, light conducting optical lenses, light conducting reflectors, Optical couplers for indoor, outdoor and underwater lighting systems, traffic lighting systems and lighting systems in buildings, vehicles and public spaces, optical sensors, Electric checking (supervision) apparatus, namely, photo electric detectors, electric loss indicators, lamp modules for signaling lights, LED and OLED displays, electric and electronic devices and apparatus for the operation, regulation and control of lighting facilities, luminaires and lamps for central building control systems, namely, interfaces for such apparatus and devices and transformers and electronic controllers for regulating provision of electricity and electricity consumption, ignitions and electronic starters for lamps and luminaires, Miniature transformers namely, current transformers, electrical transformers, Choking coils for electrical apparatus, electrical coupling and contact elements, namely, plugs, clips, junction sleeves for electric cables, switches, interrupters, and parts of all the aforementioned goods.

Class 11

(2) Apparatus for lighting, namely, electric lamps and luminaires, Lighting apparatus, namely, LED lamps, LED luminaires, organic LED lamps, organic LED luminaires, and parts thereof, LED lamps and LED luminaires, namely, modules composed of LEDs (organic and non-organic) with light function for lighting purpose, Electric lights for Christmas trees, parts of all the aforementioned goods.

Services

Class 35

Mail order services in the field of lighting; administrative data processing services, namely the collection, analysis and visualization of data related to energy consumption and operation of lighting apparatus and lighting systems for others; Computerized file management; business data analysis services in the field of lighting apparatus and lighting systems; Cost price analysis; business merchandising display services; Advisory services in the field of business planning; Business management consulting in the field of strategy, marketing, production, personnel and retail sale matters; providing advertising space in periodicals, newspapers, magazines and the Internet; business management; market assessment services; direct mail advertising of the goods and services of others; conducting project studies for business in the field of lighting products; market analysis; Preparation and presentation of electronic audio-visual displays for advertising purposes for third parties; Data entry and data processing, namely the collection, analysis and visualization of data related to energy consumption and operation of lighting apparatus and lighting systems for others; Cost price analysis, price comparison services, tracking and monitoring price fluctuations in the field of lighting products; Provision of sales analyses in the field of lighting products; Business analyses of markets; market analysis; market research; Provision of space on websites for advertising goods and services; operation of business assistance for enterprises; Arranging of business and technological presentations in the field of lighting products for commercial purposes; Presentation of goods on communication media, for wholesale and retail purpose, namely, electronic billboard, newspaper, television, Internet and e-mail advertising the goods and service of others, business merchandising display services, distribution of commercial announcements for others; Electronic commerce, namely, provision of advertising and technological information on lighting products to consumers; advisory services relating to

commerce and advertising in the field of lighting products; price analysis services in the field of lighting products; telephone order-taking services for others; Distribution of advertising material for others; dissemination of advertising material for others; Rental of advertising space on the internet; business consulting; business networking for others; advertising by mail order for third parties; distribution of brochures for advertising services; handbill distribution; administrative processing of product purchase orders; The bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods, and mail order services, wholesale and retail services in the field of lighting products, lamps, luminaires, control and checking apparatus, interfaces, transformers, electronic controllers for regulating provision of electricity and electricity consumption, sensors for lighting apparatus and lighting installations and for technical, cosmetic and medical radiation apparatus of luminous decorative goods, namely luminous furniture, luminous art objects, luminous loudspeakers, luminous electronic devices, electric lights for Christmas trees, and of clothing and footwear.

Colour Claim

Colour is claimed as a feature of the trade-mark. The mark consists of a design of five blue quadrilaterals that progressively decreases in blue shade intensity from right to left. Anchoring the design in the bottom right hand corner is a dark blue square. To the immediate left of the dark blue square is a horizontally oriented lighter shaded blue rectangle that is the same height as the dark blue square to its right. Above the dark blue square are three rectangles in a row in descending heights in proportion to the dark blue square one adjacent to the other. The first rectangle in the row above the dark blue square is a lighter blue that is taller than the dark blue square. The second rectangle in the row adjacent to the first rectangle is a lighter blue shade that also is taller than the dark blue square but less tall than the first rectangle. The third rectangle in the row adjacent to the second rectangle is a still lighter blue shade that also is taller than the dark blue square, but shorter than the second rectangle.

Services

FINOCCHIONA

Indication type

Agricultural Product or Food

Category

Fresh, frozen and processed meats: products falling under Chapter 2 or heading 16.01 or 16.02

Goods

Salami

Territory

Tuscany, Italy

Qualification

Regulation (EU) No 1151/2012 of the European Parliament and of the Council of 21 November 2012 on quality schemes for agricultural products and foodstuff. The Finocchiona PGI's production area is exclusively the territory of the Tuscany region. This is delineated to the North and East by a mountainous area delimiting its borders, while in the central area there are vineyards, olive trees, woods and pastures for outdoor cattle breeding, which descends towards the coastal plain to the West. Meat, wine and the widespread presence of wild fennel, helped developing the taste of charcuterie producers, who preserved the expert, traditional production methods, a heritage of old techniques and customs that evolved to today's processing factories, located throughout the production area. The main characteristic of Finocchiona which makes it unique in the world of charcuterie, is the pronounced and unmistakable fennel seeds aroma and/or the flowers used in the mixture, as well as its slices' texture, which sometimes tend to crumble when cutting. It has a fresh and appetising taste, which is never acidic. The pieces of fat are distributed in the slice in such a way that they surround the pieces of muscle tissue so that the product remains tender even after a lengthy maturation period. The fatty and lean parts, in medium-sized pieces, have no distinct boundaries. The colour of the slices ranges from meat red in the lean parts to white/pinkish white in the fatty parts. Fennel seeds and/or flowers may also be visible. The historical reputation is recorded in several documents, such as Rigutini and Fanfani's Vocabolario della lingua parlata of 1875, the 1889 edition of the Vocabolario degli Accademici della Crusca, which demonstrates the bond between Finocchiona and Tuscany, also confirmed in the *Italian Universal Lexicon* of the 1971 Treccani encyclopedia, where Finocchiona is described as a *Typical Tuscan salami made of finely chopped pork, flavored with fennel seeds*. The work of Professor Italo Ghinelli in 1977 also confirmed the Tuscan origin of the product. Finocchiona is one of the most famous

cured meat in Tuscany and is regularly referred to in the weekly charcuterie products bulletins, published by an authoritative nationally distributed specialised magazine. Finocchiona owes its characteristics to the interactions over the centuries between the Tuscan environment in which it originated and the human factors, which established the production method. The original choice of ingredients, particularly fennel seeds and/or flowers, typical of the regional cuisine and endemic in the production area, an established tradition of charcuterie production, the specialised knowledge of skilled artisans, contribute to producing a unique and unequalled product, whose reputation is not firmly established. The optional addition of wine to the meat mixture, according to the historical production method, is testimony of the strong bond with the territory, whose wines are known throughout the world. In addition to the traditional pig breeds, the possibility of using Cinta Senese meat in the production, has allowed processing companies to establish themselves throughout the region, helping to further affirm the character of the product and to consolidate its reputation and the bond between the Finocchiona and Tuscany in the minds of consumers. Today Finocchiona has been recognized as a Protected Geographical Indication, and its bond with the Tuscan territory and the traditional production method has been recognized within a production Regulation identifying each production step.

Public notices under section 9 of the *Trademarks Act*

Application Number 925,961

PROHIBITED MARK DETAILS**ONTARIO TECH**

The Registrar hereby gives public notice under subparagraph 9(1)(n)(ii) of the Trademarks Act, of the adoption and use by University of Ontario Institute of Technology of the badge, crest, emblem or mark shown here.
