Trade-marks Journal

Vol. 66 No. 3372

General Information

The *Trade-marks Journal* is published every week in compliance with [Rule 15 of the Trade-marks Regulations](#). The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (<http://cipo.gc.ca>). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see [section 38 of the *Trade-marks Act*](#) for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

of satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; measurement, control, observation and transmission apparatus, namely, accelerometers, electronic control panels, telescopes, dynameters, radar sensors, infra-red sensors, ultra-violet sensors, audio-video receivers; apparatus and instruments for earth observation, encoding and transmission of data via a satellite, namely telescopes, gyroscopes, radio video receivers; satellite altitude and orbit control apparatus and instruments, namely altimeters, barometers and satellite altitude meters, and orbit control instruments; ground systems consisting of electric control panels for satellites; radio transceivers; mirrors for telescopes; infrared cameras; equipment bays consisting of equipment for satellites and spacecraft, namely, avionics and services modules consisting of electronic devices for communications, electronic devices for navigation, electronic devices for operational management of satellites and spacecraft, computers for running diagnostic assessments on satellites and spacecraft, devices for earth observation, gnc sensors and actuators; satellite altitude control and position control devices; measurement, control, observation and communication apparatus, namely, anemometers, illuminometers, differential switches, microscopes, two-way radios; ground systems for operating and controlling satellites; computer programs for managing collection of information from satellites; computer programs for controlling the movement of satellites; radioelectric transceivers and radio transmitters and receivers; avionics and service modules for satellites, spacecraft and launch vehicles consisting of electronic devices for communications, electronic devices for navigation, electronic devices for operational management of satellites and spacecraft, computers for running diagnostic assessments on satellites and spacecraft; electronic, electrical and optical satellite and spacecraft modules namely assemblies that contain the measuring and communications circuits and the auxiliary launch apparatus in a housing; devices for satellite altitude control and position regulation, namely, altimeters, barometers, global positioning system (GPS) transmitters, global positioning system (GPS) receivers and systems consisting of altimeters, barometers, global positioning system (GPS) transmitters, global positioning system (GPS) receivers; satellites for scientific and commercial purposes; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking (supervision), lifesaving and teaching apparatus and instruments, namely sensors for observation, control, steering and supervision, namely, pressure sensors, proximity sensors, thermal sensors, timing sensors, optical sensors, motion sensors, radar sensors, infra-red sensors, ultra-violet sensors; apparatus for recording, transmission or reproduction of sound and images, namely, MP3 digital music players, tape recorders, videocassette recorders, DVD recorders, videocassette players, DVD players, stereo amplifiers, radio tuners, stereo tuners, radio receivers, stereo receivers, loudspeakers; blank floppy discs, hard disk drives, CDs and video discs; floppy discs, hard disk drives, CDs and video discs prerecorded with information on the topics of aerospace, defense and security and with software for controlling, steering, and management of operation of flight control systems, air data computers, flight management systems, flight navigation systems, communications systems for aircraft, helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAVs), electronic data security systems, and for data processing; data processing equipment, namely computer printers, computer monitors, keyboards, mouse, hard disk drives, optical disk drives, floppy disk drive, modems, CD burners and computers; television transmitters, radio transmitters, telephone transmitters, video transmitters, electrical cables, fibre optic cables, electronic apparatus and instruments, namely, electronic circuits, electronic controllers for flight control systems, electronic encryption units; data storage media, namely DVDs, USB flash drives, and hard drives containing flight and navigation instructions for helicopters, rotorcraft and drones; optical and infrared detection equipment and apparatus, namely, optical disk readers, optical multiplexers, infrared cameras, infrared sensors, cameras; thermal imagers; observation instruments, namely, microscopes, magnifying glasses, pocket lenses, binoculars, telescopes and

systems comprising microscopes, magnifying glasses, pocket lenses, binoculars, telescopes; infrared surveillance and tracking equipment, namely, night vision goggles, infrared cameras, infrared video cameras, GPS tracking loggers, GPS Asset Trackers and systems comprising night vision goggles, infrared cameras, infrared video cameras, GPS tracking loggers, GPS Asset Trackers, in location systems; secure observation and reconnaissance equipment, namely, closed circuit televisions, cameras, video cameras, motion detectors, and systems comprising closed circuit televisions, cameras, video cameras, motion detectors; heliborne surveillance equipment, namely, cameras, video cameras, DVD recorders and systems comprising cameras, video cameras, DVD recorders; radar sensors, infra-red sensors, and ultra-violet sensors; airborne surveillance equipment, namely, computers, video cameras, GPS tracking loggers and systems comprising computers, video cameras, GPS tracking loggers; day and night surveillance equipment, namely, night vision goggles, infrared cameras, computers and systems comprising night vision goggles, infrared cameras, computers; high precision optical devices, namely telescopes, microscopes; digital video encoders and decoders; digital sound and image data transmitters, namely, radio transmitters, video transmitters, audio transmitters; telemeters, not for medical use; remote control apparatus and instruments for use in the field of aeronautics and space and in aeronautics and space navigation instruments, namely, radio frequency front-ends, microwave antennas, parabolic antennas, phased array antennas, radar antennas, analog-to-digital converters, flight computers, radio transmitter, radio receiver, fibre optic cables, optical amplifiers, free space optics laser links, computer tablets, smart phones, mobile phones, satellite phones; radio altimetry apparatus and instruments for use in the field of aeronautics and space and in aeronautics and space navigation instruments, namely, radar altimeters, electronic altimeters, reflection altimeters, radio altimeters, low range radio altimeters; proximity and approach apparatus and instruments for use in the field of aeronautics and space and in aeronautics and space navigation instruments, namely, electromagnetic proximity sensors, laser rangefinder, radar, sonar, infra-red sensors, ultraviolet sensors; detection apparatus and instruments, namely, motion sensors, infrared cameras, radars, lidars, electro-optical sensors; computer network security software; radar antennas, satellite transmitters and receivers, converters and transponders; electronic equipment for civilian and military use, namely, electronic cables, electronic encryption units, electronic controllers for flight control systems, two-way radios; electrical and electronic tracking, detection and monitoring and geo-location and geo-localization equipment, namely, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; electrical and electronic equipment for radio location and radio navigation, namely, transponders, vacuum tubes, radio transmitters, radio receivers; radar imagery-based airborne ground surveillance and reconnaissance equipment, namely, radars, computers, radio transmitters, radio receivers and systems comprising radars, computers, radio transmitters, radio receivers; sensors for aircrafts without crew, namely, speed sensors, altitude sensors, timing sensors, proximity sensors; instruments for maritime, land, air and space navigation, namely, compasses, maps, marine sextants, global positioning system (GPS) receivers, global positioning system (GPS) transmitters; guidance and navigation equipment, namely, air data inertial reference units, air data modules, alidades, digital plotters and systems comprising air data inertial reference units, air data modules, alidades, digital plotters; electronic and telecommunication apparatus and equipment, namely, parabolic antennas, mobile phones, analog switches, multiplexers, digital switches, coaxial cables, computers, routers, Ethernet hubs, USB hubs, satellites, network servers; servers and data storage devices, namely, blank DVDs, blank USB flash drives, external hard drives; computers; data storage memories, namely, RAM (random access memory) cards, digital camera memory cards; computer display screens; wireless and satellite-based hardware and software for onboard data networks, namely, VPN (virtual private network) operating software; multi-platform user interface cards for mobile

phones, portable computers, smart phones, voice-over-internet-protocol phones, wireless telephones, and tablet computers, hardware and software for operating multi-platform user interface cards for mobile phones, portable computers, smart phones, voice-over-internet-protocol phones, wireless telephones, and tablet computers; blank media for the storage of data, namely, CDs, DVDs, USB flash drives, external hard drives and user video display terminals for the determination of position, mapping information, course guidance for land, aerial, marine or submarine vehicles; geographic information processing equipment and systems comprising thereof, namely, satellite systems comprised of satellites, radio transmitters, radio receivers and computers, global positioning system (GPS) receivers, global positioning system (GPS) transmitters; apparatus and equipment for the acquisition, compression, transmission, analysis and restoration of satellite images and aerial photographs, namely, cameras, satellites, computer software for organizing and viewing digital images and photographs, computer software to enable the transmission of photographs to mobile telephones; image transmission equipment by digital radio link, namely, radio transmitters, computer scanners, computers and systems comprising radio transmitters, computer scanners, computers; optical components and parts, namely, optical disk readers, optical fiber cables, optical multiplexers, optical reflectors, optical scanners; spatial optic apparatus, equipment and instruments, namely, spatial filters, optical lenses; optical apparatus, equipment and instruments for aerial reconnaissance aircraft, namely, binoculars, spotting scopes, digital cameras; inertial guidance systems for aircraft, radio-control missile guidance systems for aircraft and automatic pilot systems for aircraft; hardware and software (recorded/stored programs) for position determination, monitoring and surveillance in specific geographical areas; monitoring and control hardware and software (recorded/stored programs) for position determination, monitoring and surveillance equipment, namely, cameras, video monitors, motion sensors, and systems comprising cameras, video monitors, motion sensors, for specific geographical areas; blank DVDs, CDs, USB flash drives for the storage of data and user terminals (computer terminals) for determination of position, navigation, navigation databases, radar or satellite navigation, radio navigation and for the following applications: mapping information, security and emergency equipment, instruments and apparatus, research (other than for medical use) and lifesaving equipment, instruments and apparatus; blank DVDs, CDs, USB flash drives for the storage of data and computer terminals for the determination of position, mapping information, route/course guidance for land and airborne vehicles; electrical and electronic instruments and apparatus for the reception, processing and transmission of navigation signals and their elements and component parts, namely, parabolic antennas, GPS transmitters, GPS receivers, satellites; electric and electronic apparatus and instruments for the review, analysis and performance monitoring of navigation data and navigation signals and their parts and components, namely, computers, satellites, radar receivers with amplifiers; electric and electronic apparatus and instruments for the measurement, verification, checking, testing and monitoring of navigational positions and associated navigation data, namely GPS receiver, electronic devices for range measurement, electronic devices for bearing measurement, chronometers; computer software (recorded/stored programs) for the measurement, verification, checking, testing and monitoring of positions and the associated navigation data; satellite localization and satellite navigation appliances and equipment comprising them, namely, satellite aerials, satellite processors; hardware and software for telecommunication and radio communication networks, namely, software for setting up and configuring local area networks, network access server operating software, software for broadcasting internet radio, hardware and software for digital telecommunication networks, namely, LAN (local area network) operating software, VPN (virtual private network) operating software, WAN (wide area network) operating software; telecommunication and radio communication apparatus, namely, mobile telephones, facsimile machines, radio transmitters and receivers, two way radios, radios and telephones; hardware and

software for telecommunication and radio communication networks, namely, software for network monitoring and network traffic management; distress signal processing software for aircraft; computer hardware and computer software for use in telecommunication and radio communication networks featuring transmission by wire, cable, fiber optics, radio or satellite technology, namely, software for providing remote access to radio communication networks, satellites, internet, intranet using transmission by wire, cable, fiber optics, radio or satellite technology and software for enabling the exchange of files and messages in text, audio and/or video formats between different computers or users using transmission by wire, cable, fiber optics, radio or satellite technology; computer servers for call centers, multiplexers, demultiplexers, intranet servers for call centers, multiplexers, demultiplexers, electrical and electronic apparatus and instruments for controlling and administering computer networks, namely, computer network adapters, computer network bridges, network routers, network servers; audiovisual receivers, audio receivers, video receivers, radio receivers; electronic and radioelectric signal transmission apparatus, namely, radio transmitters, video transmitters; satellites for scientific use and satellites designed to receive and transmit radio electric signals; computer terminals, telephone terminals, fixed or mobile computer terminals and telephone terminals; apparatus for communicating, transmitting, receiving voice, image, data and multimedia data, namely, smart phones, mobile phones, computers, tablet computers, satellite phones; network appliances, namely, digital protocol gateways, and systems comprising digital protocol gateways for Internet gateways; items of basic equipment for and access interfaces to Internet protocol (IP) networks, namely, network routers, hard disk drives, computer chips; appliances and equipment comprising thereof and apparatus for the transmission of messages, information, data, sound and images, namely, smart phones, mobile phones, computers, tablet computers, satellite phones, over the airwaves, via cable, via fiber optics, via telephone, via satellite, via terminals, via telecommunication networks and via computer networks; telecommunications and desktop computer automation terminals for military applications; telephony apparatus, namely, mobile telephones, cordless telephones, telephones, pagers, facsimile machines, PDAs (personal digital assistants), mobile devices for Internet access, namely, smart phones, tablet computers, spare parts for the abovementioned goods to allow communications and to conduct secure transactions and online business; software programs for secure communications and enabling one to authenticate, check, record and analyze business relationships and transactions via a system of controlled access rights and notifications, satellite telecommunications equipment and satellite telecommunications stations comprising thereof in aircraft; computer software and hardware for securing of access to computer networks and to Internet protocol (IP) networks; software (recorded/stored programs) for encryption and decryption; software (recorded/stored programs) for encoding and decoding computer utility files, software (recorded/stored programs) for encoding and decoding cryptographic ciphers; software (recorded/stored programs) for the architecture, administration and securing of access to computer networks and to Internet protocol (IP) networks; flight simulation, modeling, testing and experimentation software; servers for modeling simulation, testing and experimentation of civilian and military operations; software (recorded/stored programs) for computers for the development, optimization and performance analysis of cryptographic methods and algorithms as well as central processing units and software modules for the processing and generation of navigation signals and data pertaining to navigation or cartography; software designed to perform the functions of planning, acquisition, processing and dissemination of intelligence information and data exclusively in the areas of intelligence and geography, for the purpose of defense and safety, software for digital radio networks giving the user access to voice services and data such as group telephone calls, two way radio transmissions in relay mode, individual calls, text messages and localization and transmission of intelligence data, all these products for digital radio networks; software (recorded/stored programs) for the provision of access to an email service; transaction security software for

intranet and Internet data terminals, operating stations and terminals for presenting information graphically and textually; secure information processing apparatus for encrypting and encoding secured informational signals, namely, electronic encryption units, electronic encoding units, electronic decryption units and electronic decoding units; electronic handheld devices, namely, mobile telephones, smart phones, tablet computers, for the wireless receipt and transmission of secure data, especially messages, and personal digital assistants allowing users to save and manage personal information; software for the redirection of secure text messages, Internet e-mail and intelligence data to one or more electronic handheld devices from a database stored in or associated with a personal computer or a server; software for the redirection of secure messages, Internet e-mail, voice messages, images, and text messages to one or more electronic handheld devices from a database stored in or associated with a personal computer or a server; software for the synchronization of secure data between a remote station or device and a fixed or remote station or device; electrical and electronic apparatus and instruments namely computers, processors (central processing units) of data and software (recorded/stored programs) for computers for the development, optimization and performance analysis of cryptographic methods and algorithms as well as processors (central processing units) and software modules for the processing and generation of navigation signals and data pertaining to navigation; computer display screens for displaying reports, analyses and measurement results, namely, in the form of graphics, tables and charts resulting from the analysis of performance and the monitoring of performance of navigation signals and data; electrical or electronic apparatus and instruments used for examining and identifying space segments in two dimensions or in three dimensions, namely radar sensors, lidar sensors, infra-red sensors, ultra-violet sensors and computers; computer software (recorded/stored programs) used for examining and identifying space segments in two dimensions or in three dimensions; apparatus for monitoring flight parameters, namely navigation and piloting software (recorded/stored programs) for helicopters, rotorcraft and drones, communication equipment, namely, two-way radios, mobile telephones, wireless headsets and handsets, cable modems, video encoders and decoders and systems comprising two-way radios, mobile telephones, wireless headsets and handsets, cable modems, video encoders and decoders and communication antennas for aircraft; recording equipment, namely, airplane cock pit recorders, audio tape recorders, sound and video recording and playback machines, and systems comprising airplane cock pit recorders, audio tape recorders, sound and video recording and playback machines for aircraft; autoflight control equipment and systems comprising autoflight control equipment; real time test instruments for conducting sample tests on electronic input of electrical circuits; USB hardware for displaying and transmitting data; data transmission equipment namely copper wires, optical fibers, wireless communication channels, namely, two-way radios, walkie-talkies, storage media, namely blank USB flash drives, blank CDs, blank DVDs and computer buses; analogue-digital and digital-analogue converters; simulators for the simulation of mechanical, electrical and electronic functional processes for the operation of aircraft, helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAVs), radar sensors, infra-red sensors, ultra-violet sensors, proximity sensors, communication devices, namely, two-way radios and radio scanners, navigation devices, namely, compasses, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices and for linking and chaining modules simulated as part of the mechanical, electrical and electronic functional processes for the operation of aircraft, helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAVs), radar sensors, infra-red sensors, ultra-violet sensors, proximity sensors, communication devices, namely, two-way radios and radio scanners, navigation devices, namely, compasses, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; data analyzers for interpreting data provided by the testing of aircraft,

helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAVs), radar sensors, infra-red sensors, ultra-violet sensors, proximity sensors, communication devices, namely, two-way radios and radio scanners, navigation devices, namely, compasses, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; changeover switches for telecommunications equipment; selector switches for telecommunications equipment; interface equipment, namely, analogue, digital and discrete data bus interface hardware; electronic controls for testing browsable computer programs recorded on data carriers; browsable aircraft flying test programs, recorded on DVDs, USB flash drives, CDs; electrical and electronic display equipment for preparing and conducting tests on electronic audio tape samples and for processing the test results; software, namely databank software for managing tests on electronic audio tape recording samples for checking the configuration of the test system and definition of the test system; computer hardware and software for establishing test documents for use in modeling and simulating navigational processes for use in aircraft, satellites, launch vehicles, rockets, helicopters and rotorcraft; computer hardware and software for the connection and testing of temporary access to the Internet via local area networks; sighting telescopes for firearms; telescopes, binoculars, telescopic spectacles; protective spectacles for protection against lasers; distance measuring devices, namely, laser distance measuring devices, digital magnetic compasses; reconnaissance cameras, aerial photography equipment; aerial cameras; periscope systems for armoured fighting vehicles; stabilized proximity sensor platforms and stabilized motion sensor platforms for mounting radar systems, infra-red sensors, ultra-violet sensors, and optical sensors on vessels, aircraft, airplanes, helicopters and rotorcraft, spacecraft, satellites, and unmanned aerial vehicles (UAV); night vision goggles; laser target illuminators; software to assess, monitor and control data security within information technology networks; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, circuits, generators, wires, microcircuits, circuit boards; Industrial geoproduction system composed of an automatic geospatial data processor for processing, analyzing, producing and storing satellite, aerial or terrestrial images, data in 3D; blank CDs, blank DVDs, blank USB flash drives, blank magnetic discs, blank magnetic recording discs; automatic vending machines and mechanisms for coin-operated apparatus; radio and television aerials, satellite aerials; tape-recorders; magnetic tape units (for computers); blank magnetic tapes; videotapes; film cameras; video cameras; blank compact discs (audio-video); blank optical compact discs; blank magnetic disks; blank optical disks; gramophone records; blank floppy disks, hard disk drives, plastic cards with magnetic strip, audio tapes, videotapes, CDs, video discs; telecommunication transmitting sets, namely, telephone sets, radio sets, radiotelegraphy, radiotelephony sets; software exclusively for the field of satellite imaging and data, namely, software for reviewing and analysing intelligence data gathered from satellite interceptions, and for image processing; computers for processing data, in particular via satellite; apparatus for simulating the development of infrastructure, namely, computer hardware and software for simulating the location and placement of military infrastructure; computer hardware and computer software for creating and updating development plans and maps and for observing parcels of agricultural land and optimizing crop development and the monitoring thereof; compact disc players; optical character readers; computer games; packaged software for processing and analyzing photographs, such as aerial shots, satellite or terrestrial shots; packaged software for stereographic reproduction, for preparing digital terrain models, for modeling in 3D, ortho, orthoimages and thematic maps; prerecorded computer software databases containing geographic, geologic, cartographic and topographic data; computer files and packaged software containing reproductions of terrain and digital maps; equipment for databases and for access to databases in the nature of computer hardware, computer software and peripherals, namely computer mice, monitors, touch screens, microphones, scanners, keyboards, printers, webcams,

loudspeakers; computer software for processing and analyzing photographs such as aerial and satellite photographs; computer software for stereographic projections, digital land models, orthoimages and thematic maps; computerized files and software for ground mapping and digital maps; satellite navigation equipment, namely, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; satellites for scientific purpose, in particular earth observation satellites; computer software for processing, analysis, reproduction and storage of images, aerial or satellite photograph; database equipment and database access equipment in the nature of computer hardware and peripherals, namely computer mice, monitors [displays], touch screens, microphones, scanners, keyboards, printers, webcams, loudspeakers; computer hardware; data base management software such as for stereographic reproduction, for storage, preparation, treatment and analysis of drawings, images, photos, charts, aerial and satellite photographs, surface models; data carriers for computer software, computerized files and software packages, namely, CDs, DVDs, USB flash drives, all containing or for stereographic reproduction, for storage, preparation, treatment and analysis of surface models, images and photos; carriers for dark plates (photography), compact disk players; computer software for applications in the fields of aerospace, defense and security, namely, telecommunications software for providing single user and multiple user access to a global computer network, telecommunications software for voice over internet protocol (VOIP) calls, phone calls, video calls, text messages, instant message and online social networking applications, computer software for creating, sending and receiving e-mail, software for control of aircraft, helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAVs), radar sensors, infra-red sensors, ultra-violet sensors, proximity sensors, communication devices, namely, two-way radios and radio scanners, navigation devices, namely, compasses, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices, software for monitoring of aircraft, helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAVs), radar sensors, infra-red sensors, ultra-violet sensors, proximity sensors, communication devices, namely, two-way radios and radio scanners, navigation devices, namely, compasses, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices, software for control of optical sensors, electromagnetic sensors (radar, infra-red, ultraviolet), acoustic sensors, software for the processing of measurements provided by optical sensors, electromagnetic sensors (radar, infra-red, ultra-violet), acoustic sensors, image processing software; optical mirrors (optics); satellite navigation systems comprised of global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; satellites for scientific purposes, in particular earth observation satellites and radar satellites; remote controls for unmanned air vehicles, remote controls for drones airborne pressure sensors, airborne proximity sensors, airborne temperature sensors, airborne pollutant sensors; computer hardware and software for processing, analysis, reproduction and storage of satellites images; computer hardware and software to generate digital elevation models; digital elevation models databases (software); computer software for industries, namely, fire and government, namely, computer operating systems, software for management of customer profiles, software for asset database management, software containing geographical maps, software for computer aided design, software for real-time visualization of an area for preparation of emergency responses and mobile systems comprised of smart phones, tablet computers, global positioning system (GPS) receivers and transmitters, modems and configuration of computer software for industries, namely, fire and government, namely, computer operating systems, software for management of customer profiles, software for asset database management, software containing geographical maps, software for computer aided design, software for real-time visualization of an area for preparation of emergency responses, mobile systems comprised of smart phones, tablet

computers, global positioning system (GPS) receivers and transmitters, and modems for usage on computer hardware; spacecraft; vehicles, namely, boats, automobiles, sport utility vehicles, trucks, motorcycles, bicycles, trains, carrier rockets, launch vehicles; aircraft of all types; unmanned aircraft; helicopters; rotorcraft and radio-controlled pilotless aircraft; space vehicles; aeronautic apparatus, machine equipment and appliances, namely, radio aerials, radio frequency connectors, radio receivers and transmitters, radiotelephony sets, two-way radios, for airplanes, aircrafts, helicopters, rotorcrafts, launch vehicles, carrier rockets, spacecraft, unmanned air vehicles, drones, automobiles, trucks, lorries, boats, ships and trains; military vehicles for transport by air, namely aircraft, helicopters, rotorcraft; military aircraft; sights, other than telescopic sights, for firearms; sights, other than telescopic sights, for guns [artillery]; printed matter, namely, books, brochures, magazines, newspapers, post cards, pamphlets; instructional and teaching material (except apparatus), namely, books, videotapes, interactive board games, interactive video games and puzzles; photographs; posters; postcards; calendars; aerial and satellite photographs; geographical maps, topographic base maps, geographical photographs, geographical charts, geographical surveys; carbon fibers, other than for textile use; non-metallic transportable buildings, namely, condominium buildings, conservatories, greenhouses, houses, office buildings; textiles and textile goods, namely, textiles for clothes, textiles for furniture, textiles for towels, textiles for sheets and textiles for bedlinen; scale model vehicles and their parts, in particular models of aircraft and in particular model aeroplanes.

SERVICES

Compiling of data in databases and legal databases; business administration of correspondence exchange services, especially administration of correspondence for third parties; organization of exhibition and trade fairs in the field of aircraft for commercial or advertising purposes; commercial and organizational consultancy in the field of aeronautics; market research; developing marketing strategies and marketing concepts for others in the field of aircrafts and parts thereof; business management; business administration; office functions, namely, accounting services, bookkeeping services, document reproduction services, payroll preparation services, photocopying services, word processing services, computerized file management and managing computer networks; online retail sale of images generated by satellites or goods derived from satellite images (2D or 3D), geographical maps or topographic base maps consisting of images generated by satellites or antennae, digital evaluation models in the form of grids of components coded by elevation and receiver antennae; compilation of information into computer databases, in particular compilation of images generated by satellites or antennae, compilation of high-resolution and very high resolution digital images generated by satellites; retailing and wholesaling of images generated by satellites, in particular geographical images, geographical maps and topographic base maps consisting of images generated by satellites; on-line presentation of images generated by satellite, in particular geographical images, geographical maps and topographic maps consisting of images generated by satellite or by aerial means with a view to selling same and providing commercial information relating to these products; providing business marketing information for others, providing business information in the field of commercial business management, providing business information in the field of incorporation and trade-marks; business acquisition and merger consultancy services, business administration consultancy services, business marketing consultancy services; business consultancy services relating to internet communications; provision of business information relating to advertising services, namely for industries, fire and government; insurance; financial affairs, namely, financial analysis, financial appraisals, financial management; monetary affairs, namely, financial investments in the field of securities, commodities and mutual funds; financial operations, namely, financial management, financial planning, financial trust operations, financial appraisals;

investment of capital; implementation and arranging of investment of funds; building management; financial services, namely buying-in and underwriting of all securities in especially of issuing of capital; financial and asset management services for all securities, partnership shares, bonds and other stock market valuations; stock market valuation portfolio administration, management services for third parties; analysis and research services in the field of agricultural risk analysis from an insurance standpoint; financial analyses and preparation of reports relating thereto; preparation and analysis of financial reports; financial market analysis and preparation of reports relating thereto; preparation of financial and insurance reports; building construction; construction and repair of and installation and mounting services for spacecraft and satellites; failure assistance, namely, aircraft and satellite repair; information relating to repair of aircraft and provision of information relating to repair of aircraft, especially relating to repair of aeroplanes; installation of hardware for mechanical, electrical and computer interfaces between a satellite and launching rocket, especially a launch vehicle; installation of satellites on launch vehicles; services for the installation of satellites and spacecraft on launching vehicles, especially mechanical assembly, set-up (installation) of electrical and computer connections (hardware); construction of installations, namely satellites and ground stations and associated equipment; information relating to repair services and the construction of installations and equipment in the aviation sector, in particular aircraft, spacecraft, satellites, carrier rockets, UAVs, helicopters and rotorcraft; building construction, road construction; repair of unmanned aerial vehicles, aircraft, helicopters, rotorcraft, drones and drive motors; dismantling services for unmanned aerial vehicles, aircraft, helicopters, rotorcraft, drones and drive motors; maintenance of computer hardware; repair and maintenance in the field of vehicles and of apparatus for locomotion by land, air or water, namely, automobiles, aircraft, helicopters, rotorcraft, boats, drones as well as driving motors; telecommunication services, namely, local and long distance transmission of voice, data, graphics, images via mobile phone by means of satellite transmissions; data transmission via satellites and satellite constellations, namely, transmission of radio and television programmes, voice, numbers, characters, graphics, images in the fields of aerospace, defense and security by satellite; rental of telecommunications facilities, namely, telecommunication networks, namely, ground networks, namely, landline telephone networks, mobile phone networks, satellite telephone networks, satellite navigation networks, computer wide area networks (WANs), computer local area network (LANs); email messaging, text messaging, wireless digital messaging via the Internet, extranet, intranet; communication services, namely, transmission of numbers, characters, voice data, graphics, images via radio, telephone, telegraph as well as via any means of remote transmission of data, via videotext, especially via terminals, computer peripherals or electronic and/or digital equipment, videophones, picture phones and videoconferencing, namely, personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security; data transmission, namely, batch transmission of numbers, characters, voice data, images, graphics via internet, computer networks, sending and dispatching of electronic documents comprising numbers, characters, voice data, images, graphics via internet, computer networks in the fields of aerospace, defense and security, e-mail services via satellite, wireless, telephone lines, cable network, cellular, wide-area network; transfer of telephone calls and telecommunications messages, namely, text messages, voice messages, wireless digital messages; radio and TV broadcasting and broadcasting of multimedia programmes, namely, podcasts, webcasts, and weblogs in the fields of aerospace, defense and security, comprised of computer edited texts and still and animated images, and music and other sounds, for interactive use; communication services via computer networks in general, namely, electronic transmission of data and documents, namely, numbers, characters, voice data, graphics, images, among users of computers via internet, extranet, intranet, computer networks in

the fields of aerospace, defense and security; providing telecommunication connection services, namely, transmission of numbers, characters, voice data, graphics, images via satellite and satellite constellations, namely, personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security in the fields of aerospace, defense and security; electronic transfer of messages and data, namely, electronic documents in the fields of aerospace, defense and security and e-mails via the Internet, extranet, intranet, satellite, wireless, telephone lines, cable networks, cellular, wide-area networks; communication services, namely, transmission of numbers, characters, voice data, graphics, images via radio, telephone, telegraph and via any means of remote transmission of data via interactive videography and especially via terminals, computer peripherals or electronic and/or digital equipment, videophones, picture phones and videoconferencing, namely, personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security; data transmission services, namely, batch transmission of electronic documents in the fields of aerospace, defense and security, e-mails via satellite, wireless telephone lines, cable networks, cellular, wide-area networks, sending and dispatching of electronic documents in the fields of aerospace, defense and security via satellite, wireless, telephone lines, cable networks, cellular, wide-area networks, e-mail services; email services; telephone call transfer services in the fields of aerospace, defense and security; mobile radio telecommunication services, namely, transmission of numbers, characters, voice data, graphics, images via personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security; rental of modems; rental of modem peripherals; rental of access times to a database server; telecommunication services, namely, electronic transmission of data, namely, numbers and characters (documents) via computer server in the fields of aerospace, defense and security; operating secure two-way radio communications services in the fields of aerospace, defense and security; emission and reception of data, signals and information processed by telematics, namely, numbers, characters, signals, information in the fields of aerospace, defense and security provided by telematics, by computer or by telecommunication apparatus and instruments, namely, via computer networks, wireless digital messaging, wireless digital telephone services, wireless digital facsimile services; electronic messaging services, namely email messaging, voicemail messaging, text messaging, wireless digital messaging; telecommunication transmission of messages and data, namely, numbers, characters, voice data, graphics, images in the fields of aerospace, defense and security sent by satellite, namely, personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security; transmission of messages, namely, numbers, characters, voice data, graphics, images via teleinformatics via terminals, namely, personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security; telephone communication services; secure mobile telephone services; data transmission services, data transfer services and services for the provision of access to data online, namely, satellite navigation and positional data via computer networks, internet, providing access to an online database containing information on satellite navigation and positioning, especially in the fields of satellite navigation and positional data, media for navigation and positional data; secured communication transmission via electronic networks, namely the internet, local area networks, wide area networks, virtual private networks, and wireless computer networks,

of data and vocal data on behalf of third parties, namely providing access to documents and electronic data, namely, documents (characters, numbers), vocal data on a database in the fields of aerospace, military defence and national security, providing access to software platforms guaranteeing user authentication, data integrity, data confidentiality and file acceptance; provision of access to software platforms for services relating to the encryption and the signature of files, documents or electronic data on behalf of third parties, provision of access to software platforms for services relating to the secure transfer of files, documents, data or electronic payments via electronic networks, including telephone networks and the Internet; providing user access to a global computer network (service providers); satellite transmission of messages (characters, numbers) and images, in particular high-resolution and very high resolution images and geographical information; providing access to databases, in particular to image databases by satellites or aerials, transmission of global digital elevation models data and geographical information via the internet, computer networks, wireless, satellite; access services to electronic databases and to information retrieval centers, such as for drawings, images, photos, maps, aerial and satellite photographs, surface models in particular rental of access time, organization and management of access authorization; communication services in connection with data transmission of numbers, characters, voice data, graphics, images in computer networks, namely, personal communication services, wireless digital messaging services, videoconferencing services, radio broadcasting services, navigation services, namely, GPS navigation services, satellite navigation services in the fields of aerospace, defense and security; providing access to databases in the fields of military intelligence, military defence, national security on the Internet; air transport of goods, air transport of passengers, air transport of freight; aircraft rental; positioning and remote control of satellites and spacecraft, especially launching and suspension of satellites for third parties; flight tracking services; vehicle rental; air traffic management; traffic information; flight safety services, in particular the provision of information and advice regarding flight safety, technical and operational audits and risk management strategies; airport operation services, in particular airport management and organization and guarantee and implementation of air traffic; letterpress printing, photographic printing, printing of advertising matter for others, printing of books; recovery and recycling of aircrafts and parts of aircraft; processing of aerial and satellite, monochrome or multi-spectral photographs for third parties, processing of stereoscopic images; teaching, training, education and entertainment services, namely, courses, seminars and workshops in the field of aerospace, defense and security; management, organization and planning of sports and cultural activities, namely, track and field athletics, baseball games, basketball games, soccer games, football games, bike racing, car racing; educational services in the fields of aerospace, defense and security rendered through correspondence courses; editing and publishing of texts, illustrations, books, newspapers, magazines, printed matter, electronic publications; organization of introductory and further academic events and education namely seminars, classes and lectures in the fields of aerospace, defense and security; providing seminars, classes and lectures in the field of technical writing, in the field of aircraft maintenance and repair, in the field of military combat; organization of lectures, especially forums, conventions and conferences for educational purposes in the field of aerospace, defense and security; production of radio and television programmes, audiovisual and multimedia programmes in film and recording studios, namely, podcasts, webcasts, weblogs, comprised of computer edited texts and still and animated images, and musical and other sounds), for interactive or other use; organization of athletic competitions and games for track and field athletics, baseball games, basketball games, soccer games, football games, bike racing, car racing; organization of information campaigns in the fields of aerospace, defense and security; production of radio information and entertainment programmes, radio and television entertainment, audiovisual and multimedia programmes in film and recording studios, namely, podcasts, webcasts, weblogs,

comprised of computer edited texts and still and animated images, and musical and other sounds, for interactive or other use; production of films and rental of films and tapes, including video tapes, and sound and image carriers, and multimedia carriers, namely, interactive video discs, digital audio CD-ROMs; lending of books and magazines, newspapers, pamphlets; games libraries, namely for lending and distribution of games, through services of a franchiser and namely basic staff training for lending and distribution of games; editors services, especially editing of texts; preparation of news reports, photographic reporting; translation services; rental of recorders, namely cassette recorders; recording of films on video tapes; practical training, instruction (teaching) and demonstration (teaching demonstration) in the fields of military defense, telecommunications, namely, personal communication services, radio broadcasting services, satellite telephone transmission, homeland security, intelligence and geography; organization and conducting training, practice workshops, seminars, internships (training) in the fields of aerospace, defense and security; editing and publication of books, printed matter, CD-ROM, and film production, exclusively in the fields of intelligence and geography, for defense and security; publication of books and periodicals on line; publishing services, except printing, namely, desktop publishing services, publishing of electronic publications; computer training on the operation, performance and security of information and position determining systems, namely, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; arranging and conducting of colloquiums in the field of the exploitation of satellite data, arranging and conducting conferences in the field of the exploitation of satellite data, arranging and conducting of conventions in the field of the exploitation of satellite data, arranging and conducting of seminars in the field of the exploitation of satellite data; organization of art exhibitions for cultural or educational purposes, organization of automobile trade show exhibitions for cultural or educational purposes, organization of animal exhibitions for cultural or educational purposes; professional consultancy and drawing-up of plans unrelated to business dealings, namely: consultancy in the production and manufacture of installations, namely satellites and ground stations and associated equipment, building construction consultancy, technical project feasibility studies; aerospace engineering services, chemical engineering services, mechanical engineering services, space engineering; performance of scientific and technical studies, projects and scientific and technical consultancy relating to satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; preparation of scientific, physical and technical analyses and surveys relating to the production, use and maintenance of satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; scientific and technical consultation in relation to computers, drawing-up of construction plans; technical consultancy for the provision of technical information and know-how, set-up, design (development) and management of databases and legal databases; computer programming of electronic apparatus and instruments, computers, remote data processing and telematic systems, multimedia hardware; multimedia programming, namely, radio programming, television programming; rental of computers, software, scanners, CD recorders, printers and peripherals for printers; technical and technological design consultancy and establishing technical and technological project planning not related to the conducting of business in the area of computer hardware and computer software for application in the field of aerospace, defense and security for communication, control, monitoring, observation, measurement and imagery; services of a franchiser, namely the provision of know-how and technical design, planning and research information, namely, providing advice in the running of establishments as franchises; services of a franchiser, namely installation of software and database development (creation) and maintenance of software and databases and legal databases; programming of software for electronic apparatus and instruments, for computers, remote processing and telematic systems and multimedia hardware and devices, programming of software for multimedia devices; rental of computers, software programs and scanners, DVD

recorders, printers and peripherals for printers; technical organization in the nature of development of computer systems and analysis in the field of telecommunications, namely, wireless broadband internet, wide area networks (WAN), and computer systems; technical and technological examination and development of mechanical, electrical and computer interfaces (integration) between a launching rocket, especially a launch vehicle, and a spacecraft or satellite; testing compatibility and integrity of electrical connections; technical or technological consultation or technical consultancy in the fields of telecommunications hardware and software and data processing; technical consultancy in the field of information technology, namely, computer network security services, computer programming, computer training, installing computer programs; computer security services for flight security and flight monitoring services and flight planning assistance based on a satellite infrastructure; technical software consultancy in the field of telecommunications; provision of technical information in the aviation sector; scientific and technological studies and development in the field of satellite telecommunication networks and radio communication networks; development and adaptation of satellite telecommunication networks and radio communication networks; design, development and updating (for third parties) of software (recorded programs) for the management, administration, architecture management, configuration, and protection of local or remote networks for voice, image, data and multimedia data communication, tests, checks, analyses and/or signal monitoring; scientific, technological and technical development, optimization, performance monitoring and testing for methods, algorithms, processing and software modules for the computer-based signals processing; inspections, tests, analyses and monitoring of system algorithms for the generation of data pertaining to navigation and cartography; scientific, technological and technical development, optimization, inspections (technical verification) and implementation of technical tests for performance of methods, algorithms, processing and software modules for the generation of data pertaining to navigation and cartography; aircraft and spacecraft performance monitoring and inspection; satellite signal checking and verification; scientific and technical development of algorithms and methods for the computer processing of signals; scientific research and design in the field of data processing, data analysis and data conversion; scientific and technological services and research and design relating thereto, namely scientific and technical development, engineering, technical investigation, technical consultancy, optimization, and improvement in the fields of aircraft, spacecraft and carrier rockets development; performance of industrial analyses and measurements in the fields of aerospace, defense and security; provision of database programs in data networks creation, design and development and updating of database programs; scientific, technical and technological study of user requirements and the evaluation of intelligence system architectures, scientific, technical and technological studies relating to the adaptation, integration, qualification and logistics support built into operations, exclusively in the fields of intelligence and geography, for defense and security; scientific and technological services and research and design services relating thereto, in especially scientific and technical development, engineering, scientific and technical investigation, scientific and technical consultancy, optimization and improvement, exclusively in the fields of intelligence and geography for defense and security; scientific, technical and technological data processing, scientific, technical and technological data analysis and data conversion services, exclusively in the fields of intelligence and geography, for defense and security; engineering services applied to the design and troubleshooting of digital radio communication networks intended for security forces; design, development and updating (for third parties) of software (recorded/stored programs) for position determination, supervision and monitoring in specific geographical areas; design, development and updating (for third parties) of command and monitoring software (recorded/stored programs) for position determination, supervision and monitoring in specific geographical areas; scientific evaluation and estimation services provided by engineers of data and electromagnetic signals and providing reports, graphs,

tables, charts in connection thereto; programming of software in especially on behalf of third parties; programming and maintenance of software, including software platforms for secure end-to-end transactions, the management of customer relations and the processing of affairs and transactions; provision of protection services for corporate communication via electronic networks for protection against illegal network attacks, namely, computer network security services; scientific, technical and technological consultancy, consultancy services, hotline services and maintenance services concerning computer hardware, software and wireless data networks in the fields of aerospace, defence, and security, scientific, technical and technological advice centers in the fields of aerospace, defence, and security; technical tests, technical verification, inspections, scientific, technical and technological analyses and monitoring of satellite navigation signals; scientific, technical and technological development, optimization, performance monitoring and testing for methods, algorithms, processing and software modules for the computer processing of navigation signals; inspections (technical verifications), tests (technical tests), scientific, technical and technological analyses and monitoring of system algorithms for the generation of data pertaining to navigation; scientific, technical and technological development, optimization, inspections and tests for performance of methods, algorithms, processing and software modules for the generation of data pertaining to navigation; engineering services in the field of performance monitoring and inspection of aircraft, spacecraft and carrier rockets; engineering services in the field of navigation signal verification; engineering services in the field of developing algorithms and methods for the computer processing of navigation signals; engineering services in the field of developing algorithms and methods for generating data pertaining to navigation; scientific evaluation and estimation for the generation of extrapolated data for navigation; evaluations, assessments and research in the fields of science and technology provided by engineers, namely scientific, technical and technological development, engineering, scientific, technical and technological investigation, scientific, technical and technological consultancy, optimization, calibration, alignment, testing, enhancement, in respect of antennas, satellite dishes, reflecting and radiant objects, technical examination and identification of space segments in two dimensions or in three dimensions; scientific, technical and technological measurement, characterization, verification, scientific, technical and technological examination, digitization by scanning and sampling electromagnetic fields; industrial analyses in the fields of aerospace, defense and security; scientific and technological evaluations, estimates and research in the technological fields of data processing, data analysis and data conversion provided by engineers; creation (design, development) of database programs; performance of technical tests, verification, analyses and monitoring of signals associated with helicopters, rotorcraft and drones; scientific, technical and technological development, optimization, performance monitoring and testing for methods, algorithms, processing and software modules for the computer processing of signals relating to helicopters, rotorcraft and drones; technical verification inspections, technical tests, technical analyses and monitoring of computer system algorithms for the generation of data; engineering services in the field of performance monitoring and inspection relative to helicopters, rotorcraft and drones; engineering services in the field of signal checking and verification; engineering services in the field of developing algorithms and methods for the computer processing of signals; scientific and technological services, and associated research and design, provided by engineers, in the field of data processing, data analysis and data conversion; scientific, technical and technological studies, development and adaptation of telecommunication networks and radio communication networks relating to helicopters, rotorcraft and drones; design, development and updating (for third parties) of software (recorded/stored programs) for the management, administration, architecture, configuration, and protection of local or remote networks for voice, image, data and multimedia data communication networks associated with vehicles and apparatus for locomotion by land, air or water, especially helicopters, rotorcraft and drones; design, development and updating (for third

parties) of software (recorded/stored programs) for the design, development, management and securement of access to computer networks and to Internet protocol (IP) networks, programming and maintenance of computer software for military and aeronautic applications; development of new products for military or aeronautic applications; installation of new products for military or aeronautic applications, namely, computer hardware, computer software, aircraft, helicopters and rotorcraft, satellites, spacecraft, carrier rockets, unmanned aerial vehicles (UAV) for military or aeronautic applications; scientific and technological services, namely providing data generated by earth observation satellites, precision measuring of relief models, physical measuring (characterization of objects observed from the ground according to spectral signatures, atmospheric influence, geometric and radiometric modeling from on-board cameras); research and design in the field of satellite imaging and the exploitation for related data, namely design of processing methods for observation satellite data, development of processing protocols for exploiting satellite data with a view to producing geographical information and engineering in connection with programming aerial photographs from a network of observation satellites; industrial analysis and research services in the field of satellite imagery and the exploitation of the data relating thereto; research in radar, mapping radar; design and development of computers and software; recovery of databases; environmental protection consultancy; conversion of data and computer programs (other than physical conversion), namely, document data transfer and conversion from one media to another; computer software design; technical project feasibility studies; technical surveying, topographic surveying, geological surveying; oil-field surveys; geological surveys; geological research; analysis for oil-field exploitation; land surveying; oil prospecting; urban planning; computer programming; creating and maintaining web sites on behalf of others; geological prospecting; research services in the field of cartographic products, land cover maps and land registers; technical information and inquiry services rendered by engineers relating to the presentation of on-line images generated by satellites, in particular geographical images, geographical maps and topographic base maps composed of images generated via satellite or aerial; technical information and inquiry services rendered by engineers relating to the following products: images generated by satellites, in particular geographical images, geographical maps and topographic base maps consisting of images generated by satellites or aeri-als; computer aided imaging services concerning treatment and analysis of aerial or satellite photographs (monochrome or multi-spectral); services of physicist, engineer and computer scientist for processing of images in connection with computer-aided services in relation to the processing of aerial photographs, satellite recordings monochrome or multispectral; design of global digital elevation models databases; scientific and technological services, namely providing data generated by earth observation satellites, precise relief measurement, measurement physics (characterization of objects observed on the ground on the basis of their spectral signatures, influence of the atmosphere, geometric and radiometric modeling by on-board cameras); scientific research for developing and validation purposes of geo-data relating to digital elevation models; research and design services in the field of satellite imagery and exploitation of related data, namely design of processing methods for related data, namely design of processing methods for observation satellite data, development of processing protocols for exploiting satellite data with a view to producing geographical information and engineering in connection with programming aerial photographs from a network of observation satellites; industrial analysis and research services based on digital elevation models for applications in processing and orthorectification of other geo-data, mapping, modeling of geo-physical processes on earth, calculation of wave propagation in the telecommunication industry as well as logistic and safety applications in transportation (aviation, vehicles); crisis intervention planning consultancy; consultancy to defense and security related missions; analysis for oil and gas field exploitation; design and development of computers and computer software, computer programming, for industries namely, fire, police, government,

relating to operational systems, customer management, asset management systems, geographical information systems, computer aided design, real-time visualization and mobile systems and configuration of the same for usage on appropriate computer hardware; legal counseling; services of a franchiser, namely granting of intellectual property licenses, management of copyright; legal consultancy; flight security guard services; negotiation and exploitation of industrial property rights and copyright, in particular through granting of licenses and know-how licenses for industrial property rights and copyright, sale of industrial property rights and copyright and valuation of industrial property rights and copyright; security services, namely, cyber security, IT security, security guard services for businesses, security guard services for persons and facilities; firefighting services, police protection services, military protection services, custom authorities' protection services.

Goods

(1) Containers of metal for storing industrial waste, particularly radioactive or hospital waste; floating containers of metal for storing industrial waste, particularly radioactive or hospital waste.

(2) Chemicals used in science and photography, particularly natural uranium, enriched uranium, stable isotopes; chemical products for decontamination, particularly the decontamination of hazardous materials, chemical products for reducing contamination, particularly radioactive contamination; adhesive synthetic resins, particularly adhesive synthetic fibers for bonding or for reinforcing films; cables and bars of metal, particularly for the prestressing and/or suspension of construction work; metal supporting elements, sliding and rotating elements, entirely or mainly of metal, for buildings and civil engineering structures; mineral wool for insulation and protection against fire, parts and components for all of the aforementioned goods; flameproof fabrics for use in building insulation and fire protection, parts and components for all of the aforementioned goods; fire resistant fabrics for use in building insulation and fire protection, parts and fittings for the aforesaid goods.

(3) Chemicals used in science and photography, particularly natural uranium, enriched uranium, stable isotopes; chemical products for decontamination, particularly the decontamination of hazardous materials, chemical products for reducing contamination, particularly radioactive contamination; adhesive synthetic resins, particularly adhesive synthetic fibers for bonding or for reinforcing films; common metals and their alloys; cables and bars of metal, particularly for the prestressing and/or suspension of construction work; metal supporting elements, sliding and rotating elements, entirely or mainly of metal, for buildings and civil engineering structures; supports entirely or mainly of metal for major pipe-works, parts and components for all of the aforementioned goods; water-pipes of metal, gutter pipes of metal, metal drain pipes, gas pipes of metal, parts and components for all of the aforementioned goods; chimneys of metal, parts and components for all of the aforementioned goods; Catalysts as parts of machines, particularly catalysts for use in breaking down liquids, parts and components for all of the aforementioned goods; pumps, fittings for engine boilers, filtering machines, cleaning machines, separators, water separators, heat exchangers and siphons, particularly for power station systems, parts and components for all of the aforementioned goods; machines for manufacturing packaging, parts and components for the aforementioned goods; data processors for use in the design, development and operation of power reactors and other nuclear facilities, parts, fixtures and fittings for all of the aforesaid goods; photomultipliers, parts, fixtures and fittings for all of the aforesaid goods; computer software and computer programmes for use in design, development and operation of

power reactors and other nuclear facilities, parts, fixtures and fittings for all of the aforesaid goods; Plastic bags and sachets for wrapping industrial waste, particularly radioactive and contaminated tools, parts and components for all the aforementioned goods; Mineral wool for insulation and protection against fire, parts and components for all of the aforementioned goods; flameproof fabrics for use in building insulation and fire protection, parts and fittings for the aforementioned goods; fire resistant fabrics for use in building insulation and fire protection, parts and fittings for the aforesaid goods; Containers, not of metal, for storing industrial waste, particularly radioactive or hospital waste, parts and components for all of the aforementioned goods; floating containers, not of metal, for storing industrial waste, particularly radioactive or hospital waste, parts and components for all of the aforementioned goods; flexible containers of synthetic and/or composite materials for storing industrial waste, particularly radioactive or hospital waste and contaminated tools, parts and components for the aforementioned goods.

SERVICES

(1) Storing radioactive waste, information, advice and support relating to all the aforementioned services; transport and destruction of radioactive waste, information, advice and support relating to all the aforementioned services; consulting and organization in connection with storing and transporting radioactive materials, information, advice and support relating to all the aforementioned services; decontamination of dangerous materials and equipment following contamination, especially nuclear contamination, information, advice and support relating to all the aforementioned services; providing advice on the transport and disposal of radioactive waste, information, advice and support relating to all the aforementioned services; arranging transport for radioactive materials, information, advice and support relating to all the aforementioned services.

(2) Conditioning radioactive waste by means of processing and treatment, particularly compressing, cementing, bituminization, incineration and declassifying nuclear power stations by dismantling or containment of installations and parts of installations, providing information, support or advice in the aforementioned fields; conditioning radioactive waste by means of decontamination, providing information, support or advice in the aforementioned fields; removing or reducing radioactive contamination, providing information, support or advice in the aforementioned fields; decontamination of hazardous materials, decontamination of land, soil, sand, water and waste, providing information, support or advice in the aforementioned fields; processing and treatment of irradiated fuel elements as well as non-irradiated waste from the treatment process that contains enriched uranium, providing information, support or advice in the aforementioned fields; treatment of radioactive waste, providing information, support or advice in the aforementioned fields; enrichment services relating to radioactive materials and substances, providing information, support or advice in the aforementioned fields; waste management in the field of nuclear power stations, namely processing and treatment of, and working with, waste, providing information, support or advice in the aforementioned fields; providing advice on the transport and disposal of radioactive waste; organizing the transport of radioactive waste providing information, support or advice in the aforementioned fields; treating concrete; Developing, advice services and planning of waste treatment concepts, information, support or advisory services in the aforementioned fields; producing expert reports, survey reports, studies, analyses and development of concepts and preliminary projects in engineering, in particular in the fields of nuclear technology, energy, the environment, nuclear power and safety, information, support or advisory services in the aforementioned fields; controlling and monitoring quality in the nuclear field, information, support or advisory services in the aforementioned fields; planning systems for archiving and access control, information, support or advisory services in the aforementioned fields; technical project studies, construction planning, planning of public works and of

superstructure works, information, support or advisory services in the aforementioned fields; implementation of measures for protection against radiation, information, support or advisory services in the aforementioned fields; preparation of technical documentation, namely reports, expert appraisals and technical calculations relating to nuclear facilities, information, support or advisory services in the aforementioned fields; verification of technical documentation relating to combustion elements, transport and storage containers, nuclear power stations and parts thereof, information, support or advisory services in the aforementioned fields; monitoring of processes relating to nuclear power stations, information, support or advisory services in the aforementioned fields; surveying nuclear power station safety, information, support or advisory services in the aforementioned fields; technical project planning, safety studies, environmental and waste management in connection with nuclear power stations, namely targeted implementation and planning of waste treatment and environmental concepts, taking account of legal and technical requirements, information, support or advisory services in the aforementioned fields; waste management in the field of nuclear plants, namely developing, planning and technical advice relating to waste treatment centers, installations and concepts, information, support or advisory services in the aforementioned fields; planning and advice in the field of protection against radiation and implementing chemical analyses and measures, information, support or advisory services in the aforementioned fields; measuring and assessing the level of contamination in installations, buildings and outside areas, information, support or advisory in the aforementioned fields; technical advice on concluding agreements for transferring the ownership of radioactive substances and materials, information, support or advisory services in the aforementioned fields; technical advice, particularly physic-technical advice as well as planning, and monitoring the functioning of nuclear installations and equipment, especially nuclear reactors, information, support or advisory services in the aforementioned fields; technical advice and planning concerning nuclear technology, particularly relating to the internal and external cycles of nuclear combustion, information, support or advisory services in the aforementioned fields; preparation of technical reports and appraisals in the field of nuclear power, as well as in fields related thereto, namely nuclear technology, energy and environment and nuclear safety, information, support or advisory services in the aforementioned fields; computer programming, information, support or advisory services in the aforementioned fields; rental of computer software, information, support or advisory services in the aforementioned fields; updating of computer software, computer software design, information, support or advisory services in the aforementioned fields; quality control through the planning of security concepts and software, and through concept testing and safety checks in the manufacture and assembly of combustible elements, information, support or advisory services in the aforementioned fields; design of containers to transport radioactive materials, containers for storage and transport, and nuclear power stations and parts thereof, information, support or advisory services in the aforementioned fields; analyses and studies in the fields of prestressing, building structures and civil engineering, information, support or advisory services in the aforementioned fields; professional (non commercial) assistance and advice regarding the measurement, weighing, checking (inspecting), analysis and study of building and civil engineering structures, information, support or advisory services in the aforementioned fields; engineering services, namely professional (non commercial) assistance and advice concerning proactive maintenance in the nuclear field, information, support or advisory services in the aforementioned fields; design, development, programming, rental, repair and maintenance of software, design, development and rental of computer hardware and software in connection with measuring, weighing, checking (inspecting), analyzing and evaluating building structures, civil engineering and works of art, information, support or advisory services in the aforementioned fields; land surveying, information, support or advisory services in the aforementioned fields; architectural consulting, construction drafting, advice concerning technical project studies, land surveying, industrial design,

information, support or advisory services in the aforementioned fields; formation (development) of databases, information, support or advisory services in the aforementioned fields; development and planning of waste treatment centers and installations, information, support or advisory services in the aforementioned fields; consulting relating to the safety of nuclear installations, surveillance and checking (inspection), particularly radiological surveillance; design and development of waste treatment centers and installations; advice, information and support relating to the security of nuclear power stations, surveillance and checking (inspection), particularly checking of installations, mobile or fixed, particularly by means of ionizing radiation.

(3) Training and instruction in connection with radiation protection, information, assistance or advice relating to the aforementioned fields; Services linked to managing the safety of service operations in hostile environments, especially services in the nuclear field, information, assistance or advisory services in the aforementioned fields; consulting relating to legislation in connection with protection against radiation, information, assistance or advisory services in the aforementioned fields.

(4) Repair and maintenance of buildings and civil engineering structures, particularly by means of air-placed concrete, injections into cracks, additional prestressing and patching, information and consulting services relating to all the aforementioned services; repair and reinforcement of civil engineering and building works, information and consulting services relating to all the aforementioned services; damp-proofing, painting, resurfacing and reinforcing structures in the field of buildings and public works, primarily by means of external prestressing using air-placed concrete and resins, by means of injections into cracks and by means of filling, information and consulting services relating to all the aforementioned services; construction, repair and reinforcement of civil engineering and building works, information and consulting services relating to all the aforementioned services; carrying out checks on nuclear power stations, information and consulting services relating to all the aforementioned services; building and maintaining installations for enriching and producing nuclear fuels, fuel elements, security reinforcement materials and neutron absorbers, for the treatment and processing of nuclear fuels and fuel elements, for the storage/reprocessing, processing, recovery, solidification and disposal of nuclear waste, for tritium technology and uranium hexafluoride (UF₆) for cleaning waste gas and environmental technologies, information and consulting services relating to all the aforementioned services; reconditioning nuclear power stations, information and consulting services relating to all the aforementioned services; dismantling and renewing nuclear power station infrastructures, particularly electrical equipment, ventilating technology and waste water reprocessing systems, information and consulting services relating to all the aforementioned services; fragmenting parts of nuclear installations, information and consulting services relating to all the aforementioned services; professional (non-business) assistance and advice on prestressing building materials, particularly steel and concrete, information and consulting services relating to all the aforementioned services; repair and servicing of computer equipment, information and consulting services relating to all the aforementioned services.

(1) Computer hardware; software and firmware for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; software for retrieval of text messages, emails, instant messages, photos, voice messages, and videos and hardware; computer software for sending and receiving, uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing applications software, data, information, files, graphics, audio, video, images and text in the fields of enterprise mobility management, mobile device management, and server, application and desktop virtualization; computer software for database management; computer software for file sharing; user manuals in electronically readable form; computer software for secure access to remote computer systems, networks, software and applications; computer software for use in administering, monitoring, and auditing computer systems, networks and software; computer software for use in securing and encrypting data communications; computer software for use in developing, hosting and accessing data, software files and applications on web and Internet portals; computer software for allowing multiple users to share and collaborate on applications and information; electronic databases in the field of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; downloadable computer databases in the field of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; downloadable electronic publications, namely newsletters, magazines, pamphlets and leaflets all in electronic form provided on the Internet (including web pages and websites); computer software for creating, editing, organizing, modifying, and storing data and information, namely text, graphics, images, video and audio-visual content in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization; computer software to enable uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing data and information, namely text, graphics, images, video and audiovisual content in the fields of enterprise mobility management, mobile device management, server, application and

desktop virtualization via third party mobile applications, global computer networks, mobile networks and the Internet; computer encryption software; downloadable computer software applications for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means hosted in off-site data centers and delivered over global computer networks, mobile networks, and the Internet; computer software uploading, downloading, and exchanging files between mobile telephones via mobile networks, cloud networks, and satellite networks; computer software and firmware for monitoring, analyzing and testing computer network operations to assess the systems vulnerability to a breach; computer software and hardware for analyzing malware; computer hardware and software for setting up, configuring and operating local area networks (LAN) and wide area networks (WAN); LAN (local area network) operating software; WAN (wide area network) operating software; network access server operating software; cloudware and computer applications software for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; computer software for designing and implementing secure architectures; computer software for application, operating system, desktop and server virtualization; computer software for enterprise mobility management, mobile device management, and mobile application management; computer software for enabling and managing cross-domain information systems; downloadable computer software applications for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means hosted in secure virtual data centers and delivered to users through application sharing via global computer networks, mobile networks, local area networks (LAN), wide area networks (WAN), satellite networks, cable networks, cloud networks and the Internet; newsletters, magazines, pamphlets and leaflets all in digital or electronic format; computer software for managing and eliminating web-browser computability issues; computer software to overcome compatibility issues and enable software and applications to communicate with other applications, software and computer systems; computer software for use in installing and uninstalling computer software; computer software for developing computer programs for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means.

(2) Computer software used to deliver, deploy, and manage software applications and data over computer networks; computer software used to deliver, deploy and manage software applications and data for remote users over computer networks and mobile networks.

SERVICES

Class 38

(1) Internet portal services, namely, providing an internet website portal offering information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; telecommunications services, in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; mobile telephone communications services;

telecommunications portal services, namely, providing Internet website portals to provide information and to enable enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; communication by mobile telephone; communication by radio and telephone carrier services provided by means of radio transmission, satellite transmission and, cellular network; electronic transmission of data, namely images, graphics, sound, text, video clips, files or audio-visual data, messages and documents in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; operation of an electronic bulletin boards in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; operation of an electronic message boards in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; email and instant messaging services; audio, text and video broadcasting services over the Internet, global computer networks, mobile networks, cloud networks, cable networks and satellite networks, namely, uploading, posting, displaying, tagging, and electronically transmitting, information, audio and video images in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means transmission of audio, video, electronic communications, documents, text, images, files, and data in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network by means of local area networks (LANs), wide area networks (WANs), cloud networks, mobile networks and the Internet; uploading audio, video, images and text in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network by means of local area networks (LANs), wide area networks (WANs), cloud networks, mobile networks and the Internet; providing cross-domain solutions for enabling and managing the transmission of data, voice, images, video clips, files, applications and other information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; Internet portal services, namely providing an internet website portal for enabling uploading, downloading, sharing, exchanging, receiving, posting, editing, displaying, storing, organizing or otherwise providing data, images, graphics, sound, video clips, information, electronic messages, documents and files in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; provision of access to data, documents and files stored electronically in central files for remote consultation in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing multiple user access

to global computer information networks for the transfer and dissemination of information and files; providing access to online forums for the transmission of third party generated messages among computer users; streaming audio and video via the internet, intranet, global computer network or by any other electronic means featuring information, music, movies, commentary on topics of general interest among computer users and news; remote transmission of data, applications and files in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text via local area networks (LANs), wide area networks (WANs), mobile networks and the Internet; providing computer software applications to enable server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network; website portal services, namely, providing an internet website portal offering information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing links to websites of others featuring business information and news related to enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; monitoring and testing the security from hacking or unauthorised access of data, applications software, information, files, graphics, audio, video, images and text communicated over computer systems; leasing access time to a computer database in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing temporary use of on-line, non-downloadable software for use in uploading, downloading and exchanging files between computers; leasing access time to a website in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; leasing access time to global computer networks and the Internet enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; Advice and information concerning enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network; consultancy in the field of enterprise mobility management, enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means.

Class 42

(2) Installation, maintenance, monitoring, debugging, testing and repair of computer software; hosting a website that allows computer users to upload, download, share, exchange, receive, post, edit, display, store, organize and otherwise provide data, images, graphics, sound, audio-visual information, messages, documents, applications, software and files over the Internet, over a global computer network or information network, by email, using a mobile telephone network or by any other electronic means, namely wireless, cable, satellite and cloud; hosting a website or providing

computer applications software to enable uploading, downloading and exchanging of data, applications software and files between computers and between other applications over a telecommunications or information network namely a mobile telephone network and by other electronic means; providing, installation, maintenance and testing of computer software for secure access to remote computer systems, networks, software and applications; providing, installation, maintenance and testing of computer software for allowing multiple users to share and collaborate on applications and information; providing, installation, maintenance and testing of computer software for use in developing, hosting and accessing data, software, files and applications on web and Internet portals; providing, installation, maintenance and testing of computer software for use in enterprise mobility management, mobile device management, mobile application management, and for application, operating system, desktop and server virtualization; providing installation, maintenance and testing of computer software for allowing multiple users to share and collaborate on applications and information; computer programming services; design and development of computer products, computer network apparatus, computer software and of computer systems; design and development of communications and telecommunications apparatus and software; design, development and testing of computer software; hosting a website and providing applications including software for testing computer systems, communications protocols and the secure exchange of data, files and software between applications and between computer users; testing computer systems, network and data center security; hosting a website and providing applications including software for testing computer systems and configurations for use as, or in conjunction with data centers including off-site data centers; technical consultation services in the field of computer software and computer hardware; testing of computer hardware, software and telecommunications apparatus; design and development of computer databases and computer file management software; design and development of software for enterprise mobility management, mobile device management, mobile application management, and for application, operating system, desktop and server virtualization; design and development of computer software to allow users to upload third party computer applications through a web interface; hosting the websites of others; testing of computer hardware and software and implementation of computer software that allows the user to operate in a secure environment that enables secure-mode access to email, documents and corporate Intranets; computer systems analysis; research and development of computer systems and applications in connection with file, applications and data sharing and management and the management of data centers; providing computer software for enabling and managing cross-domain information systems; providing and testing computer software for systems vulnerability; design and development and providing encryption software; installation, maintenance and repair of computer software; installation, maintenance and repair of communications and telecommunications software; provision, maintenance, installation, monitoring, testing and debugging of computer software and Internet technology applications and firmware used in data centers namely off-site data centers; leasing of computer processing systems namely virtual computer processing systems; providing software to enable computer users and applications to transmit an electronic exchange of messages with other computer users and applications over the internet, intranet, and global computer networks; providing computer software to overcome compatibility issues; providing advice and information concerning installation, maintenance, monitoring, and repair of computer software; providing consulting services in the field of installation, maintenance, monitoring, and repair of computer software; Consultancy in the fields of design and development of computer hardware, computer software, computer databases and computer systems.

Class 09

Computer hardware; software and firmware for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; software for retrieval of text messages, emails, instant messages, photos, voice messages, and videos and hardware; computer software for sending and receiving, uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing applications software, data, information, files, graphics, audio, video, images and text in the fields of enterprise mobility management, mobile device management, and server, application and desktop virtualization; computer software for database management; computer software for file sharing; user manuals in electronically readable form; computer software used to deliver, deploy, and manage software applications and data over computer networks; computer software used to deliver, deploy and manage software applications and data for remote users over computer networks and mobile networks; computer software for secure access to remote computer systems, networks, software and applications; computer software for use in administering, monitoring, and auditing computer systems, networks and software; computer software for use in securing and/or encrypting data communications; computer software for use in developing, hosting and accessing data, software files and applications on web and Internet portals; computer software for allowing multiple users to share and collaborate on applications and information; electronic databases in the field of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; downloadable computer databases in the field of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; downloadable electronic publications, namely newsletters, magazines, pamphlets and leaflets all in electronic form provided on the Internet (including web pages and websites); computer software for creating, editing, organizing, modifying, and storing data and information, namely text, graphics, images, video and audio-visual content in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization; computer software to enable

uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing data and information, namely text, graphics, images, video and audiovisual content in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization via third party mobile applications, global computer networks, mobile networks and the Internet; computer encryption software; downloadable computer software applications for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means hosted in off-site data centers and delivered over global computer networks, mobile networks, and the Internet; computer software uploading, downloading, and exchanging files between mobile telephones via mobile networks, cloud networks, and satellite networks; computer software and firmware for monitoring, analyzing and testing computer network operations to assess the systems vulnerability to a breach; computer software and hardware for analyzing malware; computer hardware and software for setting up, configuring and operating local area networks (LAN) and wide area networks (WAN); LAN (local area network) operating software; WAN (wide area network) operating software; network access server operating software; cloudware and computer applications software for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; computer software for designing and implementing secure architectures; computer software for application, operating system, desktop and server virtualization; computer software for enterprise mobility management, mobile device management, and mobile application management; computer software for enabling and managing cross-domain information systems; downloadable computer software applications for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means hosted in secure virtual data centers and delivered to users through application sharing via global computer networks, mobile networks, local area networks (LAN), wide area networks (WAN), satellite networks, cable networks, cloud networks and the Internet; newsletters, magazines, pamphlets and leaflets all in digital or electronic format; computer software for managing and eliminating web-browser computability issues; computer software to overcome compatibility issues and enable software and applications to communicate with other applications, software and computer systems; computer software for use in installing and uninstalling computer software; computer software for developing computer programs for enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means.

SERVICES

Class 38

(1) Internet portal services, namely, providing an internet website portal offering information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; telecommunications services, in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; telecommunications portal services, namely, providing

Internet website portals to provide information and to enable enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; electronic transmission of data, namely images, graphics, sound, text, video clips, files or audio-visual data, messages and documents in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; operation of an electronic bulletin board in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; operation of an electronic message board in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; email and instant messaging services; audio, text and video broadcasting services over the Internet, global computer networks, mobile networks, cloud networks, cable networks and satellite networks, namely, uploading, posting, displaying, tagging, and electronically transmitting, information, audio and video images in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; transmission of audio, video, electronic communications, documents, text, images, files, and data in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network by means of local area networks (LANs), wide area networks (WANs), cloud networks, mobile networks and the Internet; uploading audio, video, images and text in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network by means of local area networks (LANs), wide area networks (WANs), cloud networks, mobile networks and the Internet; providing cross-domain solutions for enabling and managing the transmission of data, voice, images, video clips, files, applications and other information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; Internet portal services, namely providing an internet website portal for enabling uploading, downloading, sharing, exchanging, receiving, posting, editing, displaying, storing, organizing or otherwise providing data, images, graphics, sound, video clips, information, electronic messages, documents and files in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; provision of access to data, documents and or files stored electronically in central files for remote consultation in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing multiple user access to global computer information networks for the transfer and dissemination of information and files; providing access to online forums for the transmission of third party generated messages among computer users; streaming audio and video via the internet, intranet,

global computer network or by any other electronic means featuring information, music, movies, commentary on topics of general interest among computer users and news; remote transmission of data, applications and files in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text via local area networks (LANs), wide area networks (WANs), mobile networks and the Internet; providing computer software applications to enable server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network; website portal services, namely, providing an internet website portal offering information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing links to websites of others featuring business information and news related to enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; monitoring and testing the security from hacking or unauthorised access of data, applications software, information, files, graphics, audio, video, images and text communicated over computer systems; leasing access time to a computer database in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing temporary use of on-line, non-downloadable software for use in uploading, downloading and exchanging files between computers; leasing access time to a website in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; leasing access time to global computer networks and the Internet enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; Advice and information concerning enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network; consultancy in the field of enterprise mobility management, enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means.

Class 42

(2) Installation, maintenance, monitoring, debugging, testing and repair of computer software; hosting a website that allows computer users to upload, download, share, exchange, receive, post, edit, display, store, organize and otherwise provide data, images, graphics, sound, audio-visual information, messages, documents, applications, software and files over the Internet, over a global computer network or information network, by email, using a mobile telephone network or by any other electronic means, namely wireless, cable, satellite and cloud; hosting a website or providing computer applications software to enable uploading, downloading and exchanging of data, applications software and files between computers and between other applications over a telecommunications or information network namely a mobile telephone network and by other

electronic means; providing, installation, maintenance and testing of computer software for secure access to remote computer systems, networks, software and applications; providing, installation, maintenance and testing of computer software for allowing multiple users to share and collaborate on applications and information; providing, installation, maintenance and testing of computer software for use in developing, hosting and accessing data, software, files and applications on web and Internet portals; providing, installation, maintenance and testing of computer software for use in enterprise mobility management, mobile device management, mobile application management, and for application, operating system, desktop and server virtualization; providing installation, maintenance and testing of computer software for allowing multiple users to share and collaborate on applications and information; computer programming services; design and development of computer products, computer network apparatus, computer software and of computer systems; design and development of communications and telecommunications apparatus and software; design, development and testing of computer software; hosting a website and providing applications including software for testing computer systems, communications protocols and the secure exchange of data, files and software between applications and between computer users; testing computer systems, network and data center security; hosting a website and providing applications including software for testing computer systems and configurations for use as, or in conjunction with data centers including off-site data centers; technical consultation services in the field of computer software and computer hardware; testing of computer hardware, software and telecommunications apparatus; design and development of computer databases and computer file management software; design and development of software for enterprise mobility management, mobile device management, mobile application management, and for application, operating system, desktop and server virtualization; design and development of computer software to allow users to upload third party computer applications through a web interface; hosting the websites of others; testing of computer hardware and software and implementation of computer software that allows the user to operate in a secure environment that enables secure-mode access to email, documents and corporate Intranets; computer systems analysis; research and development of computer systems and applications in connection with file, applications and data sharing and management and the management of data centers; providing computer software for enabling and managing cross-domain information systems; providing and testing computer software for systems vulnerability; design and development and providing encryption software; installation, maintenance and repair of computer software; installation, maintenance and repair of communications and telecommunications software; provision, maintenance, installation, monitoring, testing and debugging of computer software and Internet technology applications and firmware used in data centers namely off-site data centers; leasing of computer processing systems namely virtual computer processing systems; providing software to enable computer users and applications to transmit an electronic exchange of messages with other computer users and applications over the internet, intranet, and global computer networks; providing computer software to overcome compatibility issues; providing advice and information concerning installation, maintenance, monitoring, and repair of computer software; providing consulting services in the field of installation, maintenance, monitoring, and repair of computer software; Consultancy in the fields of design and development of computer hardware, computer software, computer databases and computer systems.

Class 09

(1) Computer hardware; computer software and firmware for enterprise mobility management, server, application and desktop virtualization, networking, to enable cloud computing provider services for the general storage of data, and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; magnetic data carriers, namely, hard disks, external computer hard drives and magnetic tape units for computers, and parts and fittings for all of the aforesaid goods; recording discs, namely, blank optical discs, and parts and fittings for all of the aforesaid goods; data processing equipment, namely computers and calculators, and parts and fittings for all of the aforesaid goods; computer systems, namely, computers and peripheral devices, namely, computer monitors, computer keyboards and computer printers, and parts and fittings for all of the aforesaid goods; networking products, namely, network routers, network servers, computer network adapters, computer network bridges, and computer network switches, and parts and fittings for all of the aforesaid goods; Computer hardware, computer operating software for the retrieval of third party telecommunication information from satellite transmitters, modems, radio and cable antennas, the Internet and global computer networks ; computer software for sending and receiving, uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking to applications software for use with third party user-generated information, document files, graphics, music voice, videos, pictures and text messages shared over a global computer network; computer software for data management; telecommunications apparatus, equipment and instruments, namely thin clients; user manuals in electronically readable form; computer software used to deploy, manage and access software applications and for secure delivery of data namely, files, graphics, audio, video, images and text, to laptop computers, desktop computers, tablet computers, and smart phones via global computer networks; computer software used to deploy, manage and access software applications and for secure delivery of data, namely, files, graphics, audio, video, images and text, to remote users of laptop computers, desktop computers, tablet computers, and smart phones via global computer networks; computer software for use in accessing, managing and using remote computer systems, networks, hardware and software; computer software for use in administering, monitoring, and auditing computer systems, networks and software; computer software for use in securing and encrypting data communications; computer software for use in automated billing; computer software for use in installing and

uninstalling computer software; computer software for use in developing, hosting and accessing web and Internet portals; computer software for developing computer programs for enterprise mobility management, server, application and desktop virtualization, networking, to enable cloud computing provider services for the general storage of data and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; computer software for allowing multiple users to share and collaborate on applications and information; computer software and firmware for operating system programs; computer databases in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce; electronic databases, in the field of enterprise mobility management, business management, business operations, computers and electronic commerce; downloadable computer databases in the field of enterprise mobility management, business management, business operations, computers and electronic commerce, stored on global computer networks, mobile networks and the Internet; communications and telecommunications hardware, namely, transmission lines, multiplexers, LANs, WANs, local loops, modems and routers, switches, web servers and load balancers; Telecommunications software, namely, software for enabling internet connectivity, managing communications over mobile devices, secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, communications software, namely, software for sending and receiving text messages, emails, instant messages, photos, voice messages, files, documents, and videos; computer hardware and software for streaming events, meetings, shows, exhibitions, seminars, presentations, conferences, workshops, lectures, discussions, and any other performances live or recorded, in real time or otherwise, over the Internet, intranets, extra nets, mobile telephone networks, over other communications, information or global computer networks, or by other electronic means, including wireless, cable, satellite and cloud, and parts and fittings for all of the aforesaid goods; computer hardware and software for hosting, recording, transmitting, and broadcasting of events, meetings, shows, exhibitions, seminars, presentations, conferences, workshops, lectures, discussions, and any other performances live or recorded, in real time or otherwise, and parts and fittings for all of the aforesaid goods; E-commerce software to allow users to perform electronic business transactions, business management, business operations, and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; computer hardware, software and firmware for communications management, data traffic management, assessment and analysis, and parts and fittings for all of the aforesaid goods; computer hardware, software and firmware for providing load balancing, caching, compression, traffic management, application acceleration, application and network security and access control, and server optimization, and parts and fittings for all of the aforesaid goods; computer hardware and software for the transmission and sharing of global network traffic, data and information among computer users, network computers, network servers and routers, and parts and fittings for all of the aforesaid goods; computer encryption software;

computer software and hardware for managing, monitoring, assessing and testing communications protocols, and parts and fittings for all of the aforesaid goods; downloadable computer software applications for enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, to enable cloud computing provider services for the general storage of data and secure delivery of applications, software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; applications for mobile phones for enterprise mobility management, server, application and desktop virtualization, networking and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to smart phones, laptop computers, desktop computers and tablet computers via mobile networks and the Internet; computer software and firmware for monitoring, analyzing and testing computer network operations to assess the systems vulnerability to a breach; computer hardware and software for setting up, configuring and operating local area networks (LAN) and wide area networks (WAN); LAN (local area network) operating software; WAN (wide area network) operating software; network access server operating software; computer software for application, operating system, desktop and server virtualization; computer software for enterprise mobility management, mobile device management, and mobile application management; cloudware and computer applications software for enterprise mobility management, server, application and desktop virtualization, networking, and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; computer hardware including chip boards and computer software for designing and implementing secure architectures; computer hardware and software for enabling and managing cross-domain information systems; computer software for enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, to enable cloud computing provider services for the general storage of data and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet in command and control systems; computer hardware and software for search engine optimization, and parts and fittings for all of the aforesaid goods; computer software and hardware for optimizing, accelerating and analyzing web server performance, and parts and fittings for all of the aforesaid goods; telecommunications apparatus, equipment and instruments, namely, transmission lines, multiplexers, LANs, WANs, local loops, modems and routers, switches, web servers and load balancers, and parts and fittings for all of the aforesaid goods; Computer software for sending and receiving, uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing applications software, data, information, files, graphics, audio, video, images and text in the fields of enterprise mobility management, mobile device management, and server, application and desktop

virtualization and networking.

(2) Downloadable electronic publications, namely, newsletters, magazines, pamphlets and leaflets all in electronic form provided on the Internet (including web pages and websites); computer software for creating, editing, organizing, modifying and storing data and information, namely, files, graphics, text, voice messages, images, videos, audio, email, text messages, documents and information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; computer software to enable uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing data and information, namely files, graphics, text, voice messages, images, video, audio, email, text messages, documents and information in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet.

(3) Recording discs, namely, USB flash drives, and parts and fittings for all of the aforesaid goods.

SERVICES

Class 38

(1) Remote transmission of data, information and files in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; Internet portal services, namely, providing an internet website portal offering information in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any

network using any electronic means; telecommunications services in the fields of enterprise mobility management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; mobile telephone communications services; telecommunications portal services, namely, providing Internet website portals to provide information and to enable enterprise mobility management, mobile device management, server, application and desktop virtualization and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; communication by mobile telephone; communication by radio and telephone carrier services provided by means of radio transmission, satellite transmission and cellular network; electronic transmission of data, namely, images, graphics, sound, text, video clips, files or audio-visual data, messages and documents for enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; operation of an electronic bulletin board in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; operation of an electronic message board in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing cross-domain solutions for enabling and managing the transmission of data, voice, images, video clips, files, applications and information in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; streaming of audio and video featuring music, movies, television shows and news via the Internet, Intranets, extranets, mobile telephone networks, and global computer networks; provision of access to data, documents, and files stored electronically in central files for remote consultation in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing multiple user access to global computer information networks for the transfer and dissemination of information and files; providing online forums for transmission of messages among computer users; Data screening, namely, checking raw coding data for errors and removing errors to ensure the code is useable, reliable, and valid; data screening, namely, checking data for errors prior to its upload into a database; data streaming services namely the continuous backup copying and general storage of data on a cloud network; computer software applications to enable server, application and desktop virtualization, networking, cloud computing web hosting services, cloud computing provider services for general storage of data, and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network; website portal services, namely, providing an internet website portal offering information in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; monitoring and testing the security from hacking or unauthorized access of data, applications software, information, files, graphics, audio, video, images and text communicated

over computer systems; leasing access time to a computer database in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; providing temporary use of online, non-downloadable software for use in uploading, downloading and exchanging files between computers; leasing access time to a website in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means; leasing access time to a global computer networks in the fields of enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet; rental of telecommunications communication apparatus, namely, telecommunications apparatus equipment and instruments, namely, transmission lines, multiplexers, LANs, WANs, local loops, modems and routers, switches, web servers and load balancers.

(2) Providing an online forum (or an online website) where computer users can interact with other computer users concerning topics of general interest; providing an online forum (or an online website) where computer users can search for other computer users to create and participate in online communities and social networks; broadcasting of commercials and other programs, namely, television programs, radio programs, blogs, podcasts, films and video clips via local area networks (LANs), wide area networks (WANs), mobile networks, over the cloud and over the Internet; providing a website that enables users to receive coupons, rebates, discounts, promotional messages and advertising from third party retailers, marketers, and service providers and to receive targeted content and information from publishers, media and content service providers.

(3) Providing access to chat rooms for the transmission of information through computers; providing search engines for the Internet; email and instant messaging services; providing online chat rooms for registered users for transmission of messages concerning enterprise mobility management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means.

(4) Audio, text and video broadcasting services over the Internet, global computer networks, mobile networks, cloud networks, cable networks and satellite networks, namely, uploading, posting, displaying, tagging, and electronically transmitting, information, audio and video images in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; internet portal services, namely, providing an internet website portal for enabling uploading, downloading, sharing, exchanging, receiving, posting, editing, displaying,

storing, organizing or otherwise providing data, images, graphics, sound, video clips, information, electronic messages, documents and files in the fields of enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; streaming events, meetings, presentations, shows, exhibitions, seminars, conferences, workshops, lectures, discussions and any other performances live or recorded, in real time or otherwise; remote transmission of events, meetings, presentations, shows, exhibitions, seminars, conferences, workshops, lectures, and any other performances live in real time and recorded via local area networks (LANs), wide area networks (WANs), mobile networks, over the cloud and over the Internet; provision of access to electronic conferencing, audio conferencing, video conferencing, and electronic discussion groups; rental of telecommunications communication services, namely, rental of access time to global computer networks, rental of software for enabling internet connectivity, managing communications over mobile devices, secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, rental of communication software for sending and receiving text messages, emails, instant messages, photos, voice messages, files, documents, and videos; providing advice and information concerning uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing data and information, namely text, graphics, images, video and audio content between computers, networks, computer software applications, websites, mobile phones and providing advice and information concerning enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet, providing consulting services in the field of uploading, downloading, accessing, posting, displaying, tagging, blogging, streaming, linking and sharing data and information, namely text, graphics, images, video and audio content between computers, networks, computer software applications, websites mobile phones, providing consulting services concerning enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting

Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet.

(5) Hire of electronic mail boxes.

Class 42

(6) Computer programming services; design and development of computer products, computer network apparatus, computer hardware, computer software and of computer systems; design and development of communications and telecommunications apparatus and software; installation, maintenance, monitoring, debugging, testing and repair of computer software and hardware; hosting a website that allows computer users to create, record, upload, download, share, exchange, receive, post, edit, display, store, organize and/or otherwise provide data, graphics, text, voice, signals, images, sound, audio content, videos, files, messages, documents and other information over the Internet, intranets, or extranets, by email, by mobile telephone networks, or by other global computer networks, information networks or communications networks including wireless, cable, satellite and cloud, or by other electronic means; uploading, downloading and exchanging files between computers; installation, maintenance, monitoring, debugging, testing and repair of computer software; technical consultation services in the field of computer software, computer hardware and computer systems; testing of computer hardware, software and telecommunications apparatus; design and development of computer databases and computer file management software; design and development of computer software to allow users to upload third party computer applications through a web interface; hosting the websites of others; design, development and testing of computer hardware and software and implementation of computer software that allows the user to operate in a secure environment that enables secure-mode access to email, documents and corporate Intranets; computer systems analysis; research and development of computer systems and applications in connection with file sharing, data management and the management of data centers; repair, maintenance, installation, monitoring and debugging of computer software and Internet technology applications and firmware used in data centers including off-site data centers; leasing of computer processing systems including virtual computer processing systems.

(7) Providing temporary use of online non-downloadable computer software and firmware for enterprise mobility management, mobile device management, server, application and desktop virtualization, networking, software as a service (SaaS), cloud computing and secure delivery of applications software, data, information, files, graphics, audio, video, images and text to any device or any network using any electronic means, leasing access time to the Internet, file sharing and file storage, Internet traffic balancing and management, analyzing and transmitting Internet traffic across local and global networks, providing network security, secure remote access, application traffic management, application traffic acceleration and transmission and sharing of global network traffic, business management, business operations, computers and electronic commerce, via third party mobile applications, global computer networks, mobile networks, cable networks, satellite networks, local area networks (LAN), wide area networks (WAN), over the cloud and over the Internet; technical support services, namely, installing, diagnosing, troubleshooting and repair of computer software and hardware, web and database applications, servers, websites, and telecommunications networking hardware, apparatus, and instruments; research, design and development of computer software to enable the hosting, recording, transmitting and broadcasting of events, meetings, presentations, shows, exhibitions, seminars, conferences, workshops,

lectures, discussions, and any other performances live or recorded, in real time or otherwise; computer services featuring streaming software to enable hosting, recording, transmitting and broadcasting of events, meetings, presentations, shows, exhibitions, seminars, conferences, workshops, lectures, discussions, and any other performances live or recorded, in real time or otherwise; design, development, installation, maintenance, repair and testing of computer software and hardware; design, development, installation, maintenance, repair and testing of computer software and hardware for virtualization; design, development, installation, maintenance, repair and testing of computer software and hardware for mobility management and remote access; design, development, installation, maintenance, repair and testing of computer software and hardware for collaboration; design, development, installation, maintenance, repair and testing of computer software and hardware for computer network optimization and security; installation, maintenance, monitoring, debugging, testing and repair of communications protocols and data streaming; installation, maintenance, testing, monitoring, developing, debugging and repair of communications software, traffic management software and communications protocols; computer services for implementing, managing, monitoring and testing communications protocols over the Internet, intranets, extranets, mobile telephone networks or over any other communications or information network or global computer network, or by any other electronic means, including wireless, cable, satellite and cloud; monitoring, analyzing and testing the safety and security of communications apparatus, software, servers and protocols; design, development and testing of computer systems and configurations for use as, or in conjunction with data centers including off-site data centers; research and development of products, namely computer hardware, software and telecommunications apparatus, namely, computers, routers, network apparatus, mobile phones, transmission lines, multiplexers, LANs, WANs, local loops, modems and routers, switches, web servers and load balancers; design of computer software for enabling and managing cross-domain information systems; design and testing of computer hardware and software for systems vulnerability analysis; design and development of encryption software; design, development, installation, maintenance and repair of computer software, video conferencing software and communications and telecommunications software; design services in relation to information technology and computer systems; design and development of web pages and websites; computer services in the nature of customized web pages featuring user-defined information, personal profiles and information; computer services, namely, hosting online web facilities for others for organizing, recording and conducting online events, meetings, gatherings, presentations, shows, exhibitions, seminars, conferences, workshops, lectures, and discussions organizing; providing search engines for the Internet for obtaining data on a wide variety of topics and fields of general interest via the Internet; hosting of digital content on the Internet and other global computer networks, information networks and communications networks, namely, online journals and blogs; providing temporary use of non-downloadable computer software for use in the creation and publication of online journals and blogs; website hosting services; computer services, namely, providing search engines for obtaining data on a global computer network; computer services for interactive communications and broadcasting, namely, email services, teleconferencing and video conferencing services, voice chat services and broadcasting of television programs, radio programs, blogs, podcasts, films and video clips via local area networks (LANs), wide area networks (WANs), mobile networks, over the cloud and over the Internet; rental of computer hardware and computer peripherals; rental of computer software; computer design services; computer software design; research and development of new products for others.

(8) Providing temporary use of online non-downloadable computer software for the transmission and sharing of data and information in the field of global computer network traffic among computer users, network computers, network servers and routers via local area networks (LANs), wide area networks (WANs), mobile networks and the Internet.

Class 45

(9) Computer software and hardware licensing; licensing of computer software; licensing of intellectual property; exploitation of copyright protected software; exploitation of patents and of products protected by patents; consulting services in the field of maintaining the security and integrity of computer networks and databases.

(10) Facilitating social and business networking via the Internet and other global computer networks, information networks and communications networks, by providing links to the websites of others, or through any other electronic means; providing information regarding social, political and general interest matters from searchable indexes and databases of information, including text, electronic documents, databases, graphics and audio visual information, on computer, communication and electronic networks; online social networking services; providing customized web pages featuring user-defined information, personal profiles and information a" relating to social networking; providing customized web pages featuring user-defined information, personal profiles and information to enable computer users to meet and interact with other computer users on topics of general and mutual interest; providing customized web pages featuring user-defined information, personal profiles and information for social networking; computer software and hardware licensing.
