Trademarks Journal 2020-07-15 — Vol. 67 No. 3429

Trademarks Journal Vol. 67 No. 3429

General Information

The *Trademarks Journal* (the "*Journal*") is published on the website of the Canadian Intellectual Property Office (http://cipo.gc.ca). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the "*Act*"), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Goods

Class 03

(1) Eye pillows.

Class 09

(2) Ebooks, namely, to provide information for yoga instruction, meditation, personal improvement, healthy living and sales strategies development; Digital media, namely, audio and video recordings, namely, pre-recorded DVDs, CDs, MP3s, MP4s, featuring yoga instruction, meditation, personal improvement, healthy living and sales strategies development.

Class 10

(3) Heart rate monitors.

Class 16

(4) Books; posters.

Class 18

(5) Backpacks; beach bags; cosmetic bags; fanny packs; handbags; messenger bags; sport bags; tote bags.

Class 21

(6) Water bottles.

Class 24

(7) Blankets; cloth towels.

Class 25

(8) Clothing, namely hats, shirts, pants, shoes and jackets; Clothing, namely, pants, shorts, skirts, bermudas, dresses, sweatshirts, T-shirts, sweaters, cardigans, jackets, parkas, snowsuits, jumpsuits, overalls, bathing robes, jogging suits, sleepwear, underwear, suspenders, socks, tights, leggings, gloves, mittens, scarves; footwear, namely, shoes and slippers; and headgear, namely, caps and headbands.

Class 26

(9) Belt buckles; hair bands; hair ties.

Class 27

(10) Yoga mats.

Class 28

(11) Skipping ropes.

Services

Class 35

(1) Business administration consulting services.

Class 41

(2) Dissemination of resources for others via the Internet namely conducting classes and seminars online in the field of yoga instruction, meditation, personal improvement, healthy living and sales strategies development.

Class 09

(1) scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking (supervision), life-saving and teaching apparatus and instruments, namely electric and electronic apparatus and instruments for regulating, controlling and monitoring electricity and CO2 emissions, namely scales, namely architects' scales, medical scale, laboratory scales and balances, computers, oscilloscopes, spectrum analysers, voltage surge protectors, vibration sensors, and electric converters; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely electric current switches, electric circuit closers, accumulators, and transformers, apparatus for recording and reproduction of sound, images and data, namely electric and electronic apparatus and instruments for regulating, controlling and monitoring electricity and CO2 emissions, namely electric current switches, electric circuit closers, accumulators, and transformers; sound, image and data carriers, particularly blank audio tapes, music and video cassettes, compact discs, sound recording discs, digital audio tapes (DAT), video tapes and diskettes, and pre-recorded audio tapes, music and video cassette, video tapes, diskettes in the field of sustainable energy and chemistry, and energy saving; blank CD-ROMs and pre-recorded CD-ROMs containing audio and video clips; magnetic storage of data, namely, blank magnetic discs, blank magnetic tapes for tape recorders, magnetic tape drives, pre-recorded audiotapes, pre-recorded videotapes; blank compact discs and prerecorded compact discs containing audio and video clips; blank DVDs (digital versatile discs) and pre-recorded DVDs (digital versatile discs) in the field of sustainable energy and chemistry, and energy saving; calculators; hardware for computers for use in data management and processing. namely, statistics; optical apparatus and instruments, namely spectacles; spectacle lenses; spectacle frames; computer software for database management, computer software for the collection of statistical production data for oil and gas field operations; computer video games; downloadable video games; mobile telecommunication apparatus, namely mobile phones;

downloadable application for mobile phones to enable user to sync automotive information, namely automobile diagnostics, to mobile phones; cases, namely camera cases, cases for mobile phones, computer cases; video game cartridges; office requisites (except furniture), namely computers, computer printers;

Class 12

(2) vehicles, motor vehicles and land vehicles, namely cars, trucks, boats and scooters; apparatus for locomotion by land, air and water, namely locomotives, boats and airplanes; motors and engines for land vehicles; motor cycles; motor racing cars; parts and fittings for locomotives, boats and airplanes

Class 14

(3) precious metals and their alloys; jewellery; costume jewellery; clocks and watches; horological and chronometric instruments, namely wristwatches and timepieces, namely watches, clocks, and chronometers; watch cases

Class 16

(4) printed matter, in particular catalogues, exercise books, books, handbooks (manuals), companion books, newspapers, periodicals and calendars; stationery, namely pens, pencils, envelopes and writing stationery; artists' materials, namely artists' palettes, artists' pastels and artists' pencils; paint brushes; typewriters; office requisites (except furniture), namely printing paper, pens and staplers; instructional and teaching material, namely books, booklets and pamphlets in the field of fuel production and environmental protection; paper, cardboard; boxes, signs, bottle envelopes, index cards and postcards of cardboard and paper; table linen, handkerchiefs and tissues of paper for removing make-up; bags (envelopes, pouches) of paper and plastics, for packaging; tablemats of paper and cardboard; bookbinding material; photographs (prints); plastic bags for packaging, plastic film for packaging; table napkins of paper; posters, transfers (decalcomanias), stickers (stationery);document folders

Class 18

(5) leather and imitations of leather, and goods made of these materials, namely boxes of leather and leather board, cases, namely card cases, cosmetic cases and travel cases, of leather and leatherboard, furniture coverings, furniture covers, pouches, envelopes, bags, for packaging, briefcases, beach bags, bags for campers, shopping bags and net bags for shopping, handbags, toilet bags, travelling bags, backpacks, school satchels, bags for sports, wheeled shopping bags, pocket wallets, purses, key cases; animal skins, hides; trunks and travelling bags; umbrellas, parasols; walking sticks; whips; animal harnesses; saddlery

Class 25

(6) clothing, including leather clothing, in particular T-shirts, hooded sweaters, pullovers, windcheaters, sweatshirts, polo shirts, quilted jackets, quilted waistcoats; footwear, namely shoes, boots and sandals; headgear, in particular caps and hats; belts (clothing)

Class 28

(7) toys, in particular board games, parlour games; toys, namely educational toys, mechanical toys, plush toys and musical toys; gymnastic and sporting articles, in particular golf balls, flying discs, soccer balls, handballs, beach balls, tennis balls; decorations for Christmas trees; playing cards; video game consoles, and joysticks for video games

Class 32

(8) non-alcoholic beverages, in particular those having a vitalizing effect, in particular caffeinated beverages, namely soda pop; energy drinks; fruits drinks; fruit juices; mineral waters; aerated water; syrups for making beverages; beers

Services

Class 35

(1) promoting the goods and services of others by arranging for sponsors to affiliate their goods and services with car races, motorcycle races, motorboat races and sports competitions; promoting the goods and services of others by arranging for sponsors to affiliate their goods and services with an awards program, conducting market surveys for others; market research; market analysis; business management and organization consultancy; arranging commercial transactions, for others; arranging contracts for the buying and selling of goods for others; opinion polling; distribution of products for others for advertising purposes; sales promotion (for others), namely consumer loyalty program, through promotional contests and the distribution of related printed material; advertising the goods and services of others; advertising the goods and services of others, namely publication of advertising prospectuses and catalogues for others; production of advertising films for others; rental of advertising films; compilation, systematization and update of data in computer databases; business management; business administration; office administration services; procuring of contracts for access time to computer databases of others; arranging of subscriptions for access time to computer databases of others; developing marketing strategies and marketing concepts for others; project and event management, namely planning, performance monitoring and conducting of campaigns, projects and events for advertising purposes, in the field of sustainable energy and chemistry, saving and environmental science; organization of trade fairs and exhibitions, namely energy trade fairs, environmental and climate trade fairs; distribution of advertising materials for others, namely catalogues and advertising prospectuses; computerized file management; telephone and computerized order placement for Internet shopping services for merchandising products, namely, watches, clothing, footwear, headgear, and cosmetics; auctioneering, including on the Internet; advertising agencies; planning and implementation of product demonstrations for advertising and sales purposes, on the Internet, on other data networks, in online services, and by means of multimedia technologies; production of advertising films and commercials for others; printing of advertising matter for others; online advertising for others via a computer communications network; rental of advertising time on communication media; computerized database management

Class 36

(2) financial sponsorship of car races, motorcycle races, motorboat races and sports competitions Class 41

(3) organization of sports events in the fields of football, car races, motorcycle races, and motorboat races.

Goods

Class 09

Scientific apparatus and instruments for information processing, namely computers and computer hardware; data processing equipment, namely interface cards for data processing equipment in the form of integrated circuits; computer peripherals, namely USB keys, hard drives, modems, computer keyboards, computer mice, wireless mice, microphones, computer scanners; detectors, namely motion sensors, position sensors, light sensors, thermal radiation sensors. Electrical wires; electrical relays; blank flash memory cards and memory cards; processing devices using electricity, namely semiconductor power elements; optical amplifiers and correctors, namely optical correctors for optical fibres; dispersion-shifted optical fibres; polarization-maintaining optical fibres; non-linear optical fibres; optical fibre couplings; fibre optic cables; fibre optic couplings, namely fibre optic cables; computer network bridges; computer network adapters; computer network switches; wide-area and/or local network hardware, namely data processing hardware; computer networking hardware; computer racks.

Claims

Priority Filing Date: March 31, 2016, Country or Office: EUIPO (EU), Application No: 015290455 in association with the same kind of goods

Goods

Class 09

security systems, comprised of computer software, computer applications and hardware for controlling and monitoring intruder alarms, closed-circuit television (CCTV) and security cameras, motion detection sensors, electrified perimeter fencing, access control equipment namely, electronic access cards, fobs, tags and readers therefor, scanners for biometric identification of personnel using human physiological information, monitors for monitoring the aforedescribed security apparatus and equipment, electronic door opening and locking mechanisms; security and access control equipment, namely intruder alarms, closed-circuit television (CCTV) and security cameras, motion detection sensors, access control equipment namely, electronic access cards, fobs, tags, and readers therefor, scanners for biometric identification of personnel using human physiological information, monitors for monitoring the aforesaid security apparatus and equipment, electronic door opening and locking mechanisms, electronic touch switches for opening doors, electrified fencing, security perimeter beam sensors, fence tension sensors for measuring the mechanical disturbance of a tensioned fence wire in order to raise an alarm when a fence is deflected, fence disturbance sensors for detecting vibration and movement of a security fence structure, fence integrity monitors for detecting cut fence wires, short circuits, full functionality of

the electric fence, and the deterrent electric pulse; electric fence energisers for providing controlled electrical currents to electrified perimeter fences, RFID tags for monitoring the location and movement of personnel, computer software, computer applications, computer hardware and monitors for controlling and monitoring the aforesaid security and access control equipment; biometric authentication apparatus and equipment, namely scanners for recognising a person based on physiological characteristics; access card and key fob readers; electronic access control cards, key fobs and tags and readers and encoders therefor.

Communications software for use in the field of financial services to connect global computer networks and blockchains for the electronic trading of cryptocurrencies and virtual currencies; Computer software for use in the field of financial services for the electronic trading of securities via a global computer network; Computer software for the administration of computer networks, namely WAN (wide area network) administration software

Services

Class 36

(1) Clearing and reconciling financial transactions via a global computer network; Financial services, namely, business fundraising provided over a computer network such as the Internet; Financial services, namely, the sale of virtual currency that can be used and exchanged for products and services by members of an on-line community via a global computer network; Financial services, namely, facilitating secure peer-to-peer electronic transfer of virtual currency between members of an on-line community via a global computer network; Securities trade execution services; Providing fundraising services for others via a global computer network.

Class 38

(2) Communication services, namely, electronic transmission of data and documents regarding financial transactions and payment processing among users of computers; Peer-to-peer network computer services, namely, electronic transmission of audio, video and documents in the field of financial services for the electronic trading of cryptocurrencies and virtual currencies via a global computer network; Provision of access to a global computer network; Electronic transmission for others of securities and financial information via computer linking services, namely, communicating and routing trade information involving orders, entry and execution services, to others via a global computer network

Goods

Class 09

- (1) Electricity meters; electrical coaxial line power attenuators; electrical filters; electrical switches, namely, ethernet switches, fiber optic switches, serial switches, matrix switches, coaxial switches, coaxial selector switches, selector switches, naval tactical data systems switches, and naval tactical data systems network switches
- (2) Electrical switches, namely, ethernet switches, fiber optic switches, serial switches, matrix switches, coaxial switches, coaxial selector switches, selector switches, naval tactical data systems switches, and naval tactical data systems network switches; electrical measuring and testing instruments, namely, electrical meters for evaluating, measuring, recording, capturing, storing, generating, and analyzing radio frequency signals, digital signals, radio frequency signal power, radio frequency signal voltage, radio frequency signal current, and radio frequency signal phase angle, radio frequency signal strength, radio frequency signal power waves, radio frequency signal direction, radio frequency signal frequency, radio frequency signal harmonics, radio frequency signal bandwidth, characteristics of antennas, and transmission parameters of antennas; calibration instruments, namely, calibrators for calibrating digital and radio frequency equipment and components, namely, radio frequency wattmeters, broadband analog radio frequency wattmeters, radio frequency power sensors, radio frequency wattmeters and antenna analyzers for measuring and analyzing the radio frequency power and power wave from a radio frequency transmission line serving antennas, radio frequency signal boosters, electronic equipment, namely, radio frequency filters, filter networks, and duplexers, radio frequency power monitor/alarm for high frequency coaxial transmission equipment, radio frequency analysis products namely, radio frequency data recorders and radio frequency signal generators, radio frequency diagnostic system in the field of semiconductor manufacturing for measuring the voltage, current, and phase angle of a radio frequency signal, comprising sensors and electronic modules, radio frequency diagnostic system comprising sensors and electronic modules for measuring radio frequency signal power and strength, electronic telecommunications measuring and testing device namely, a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter for use in evaluating, measuring, and analyzing radio frequency signal strength, direction, frequency,

harmonic and bandwidth characteristics, as well as to assess the match characteristics of antennas, and to measure the transmission parameters of antenna, and radio-frequency power meters; radio frequency wattmeters; broadband analog radio frequency wattmeters; radio frequency display units, namely, radio frequency counter monitors; radio frequency power sensors; radio frequency wattmeters and antenna analyzers for measuring and analyzing the radio frequency power and power wave from a radio frequency transmission line serving antennas; aircooled termination cabinets for radio frequency transmission lines; electrical apparatus, namely, coaxial electrical cable terminator; radio frequency signal boosters; electrical multicouplers and individual channels therefore; electronic equipment, namely, radio frequency filters, filter networks, and duplexers; instruments for absorbing high frequency electrical power, namely, coaxial load resistors, and absorption type instruments for measuring such power, namely, wattmeters, comprising coaxial resistors; radio frequency power monitor/alarm for high frequency coaxial transmission equipment; software for use in radio frequency data capture, storage, and analysis; radio frequency analysis products namely, radio frequency data recorders and radio frequency signal generators; radio frequency diagnostic system in the field of semiconductor manufacturing for measuring the voltage, current, and phase angle of a radio frequency signal, comprising sensors and electronic modules; radio frequency diagnostic system comprising sensors and electronic modules for measuring radio frequency signal power and strength; electronic telecommunications measuring and testing device namely, a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter for use in evaluating, measuring, and analyzing radio frequency signal strength, direction, frequency, harmonic and bandwidth characteristics, as well as to assess the match characteristics of antennas, and to measure the transmission parameters of antenna; apparatus for signaling, namely, radio frequency to laser light converters, radio frequency to optical converters, radio frequency to modulated laser light converters, DC to AC converters, electric converters, and current converters; apparatus for measuring, namely, antenna testers to assess the match characteristics of antennas and to measure the transmission parameters of antennas; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters; distributed antenna systems comprising amplifiers, receivers, digital signal processors, and a network of spatially separated antennas connected to telecommunications cables, fiber optic cables and coaxial cables, that provide wireless service; apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of, antennas, radio receivers, and digital signal processors; apparatus and equipment for wireless networks, cellular and wireless telephone communication, namely, distributed antenna systems, comprised of antennas, amplifiers receivers, digital signal processors; distributed antenna system head-ends; distributed antenna system remote optic units; amplifiers for wireless communications, namely, antenna amplifiers, radio frequency amplifiers, radio frequency signal amplifiers, radio frequency repeaters, and radio frequency signal boosters; distributed antenna system base station interface unit; distributed antenna system management system comprising telecommunication computer hardware and software for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications; distributed antenna system optical distribution unit; distributed antenna system optical expansion unit; distributed antenna system add on-remote unit; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters; apparatus for recording of sound and apparatus for recording of images, namely, audio tape recorders, CD recorders, DVD recorders,

video tape recorders, and magnetic-tape recorders; optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems comprising of optical transmitters, optical receivers, and optical transceivers; recording discs, namely, pre-recorded optical discs containing information in the field of radio frequency power measurement and communications; compact discs, namely, pre-recorded compact discs containing information in the field of radio frequency power measurement and communications; DVDs, namely, pre-recorded DVDs containing information in the field of radio frequency power measurement and communications; digital recording media, namely, electronic databases containing information in the field of radio frequency power measurement and communications recorded on computer media; computers; rotary converters; phase modifiers; radio-frequency power meters

Services

Class 37

(1) Installation, repair, and maintenance services for radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, monitors, sensors, tower top amplifiers, signal boosters, and analyzers, namely, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers; installation, repair, and maintenance services for distributed antenna systems; repair and maintenance services for apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors; installation, repair, and maintenance services for distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, distributed antenna system head-ends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and firmware for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, distributed antenna system optical distribution unit, distributed antenna system optical expansion unit, and distributed antenna system add on-remote unit; installation, repair, and maintenance services for radio frequency communication systems comprising of wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, monitors, sensors, tower top amplifiers, signal boosters, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers

Class 38

(2) Telecommunications, namely, electronic transmission of email, providing wireless cellular telephone services, providing Internet access, transmission of voice, audio, video and visual images for others via digital and analog computer networks, fiber optic broadband networks, Ethernet computer networks, wireless computer networks, global computer information networks, and cellular phone networks; telecommunications services, namely, telecommunications consultation in the fields of electronic transmission of email, providing wireless cellular telephone services, providing Internet access, transmission of voice, audio, video and visual images via digital and analog computer networks, fiber optic broadband networks, Ethernet computer networks, wireless computer networks, global computer information networks, and cellular phone networks; telecommunications consultancy services in the fields of wireless computer networks, and wireless cellular phone services; providing information in the field of communication services, namely, transmission of voice, audio, visual images and data by wireless computer networks, fiber optic networks, ethernet networks, and by wireless and cellular telephones; providing

telecommunication connections to a global computer network and the Internet, namely, providing access to a global computer network and providing access to the Internet; providing telecommunication access services to a wireless network, namely, providing wireless cellular telephone services and providing Internet access via wireless broadband networks

Class 40

(3) Manufacture of custom radio frequency data capture, storage, and analysis products, namely, radio frequency data recorders, radio frequency signal generators, and software for use in radio frequency data capture, storage, and analysis to order and specification of others; manufacture of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, namely, voltage meter, current meter, and phase angle meter, monitors, sensors, tower top amplifiers, signal boosters, analyzers, namely, antenna analyzers, cable analyzers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers, power distribution and control machines and apparatuses, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters, and electric and magnetic meters and testers to the order and specification of others; manufacture of distributed antenna systems to the order and specification of others; manufacture of apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors, to the order and specification of others; manufacture of distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, headends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and firmware for remotely monitoring. configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, optical distribution unit, optical expansion unit, and distributed antenna system add onremote units, to the order and specification of others

Class 42

(4) Design of radio frequency data capture, storage, and analysis products, namely, radio frequency data recorders, radio frequency signal generators, and software for use in radio frequency data capture, storage, and analysis for others; design of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, namely, voltage meter, current meter, and phase angle meter, monitors, sensors, tower top amplifiers, signal boosters, analyzers, namely, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers, power distribution and control machines and apparatuses, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters, and electric and magnetic meters and testers to the order and specification of others; design of distributed antenna systems to the order and specification of others; design of apparatus and equipment to enable inbuilding wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors, to the order and specification of others; design of distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, distributed antenna system head-ends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and software for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, optical

distribution unit, optical expansion unit, and distributed antenna system add on-remote unit to the order and specification of others; design of radio frequency data capture, storage, and analysis products, namely, radio frequency data recorders, radio frequency signal generators, and software for use in radio frequency data capture, storage, and analysis; design of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, namely, voltage meter, current meter, and phase angle meter, monitors, sensors, tower top amplifiers, signal boosters, analyzers, namely, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers, power distribution and control machines and apparatuses, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters, and electric and magnetic meters and testers; design of distributed antenna systems; design of apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors; design of distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, distributed antenna system head-ends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and software for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, optical distribution unit, optical expansion unit, and distributed antenna system add on-remote unit; design and development of optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems comprising of optical transmitters, optical receivers, and optical transceivers; design and development of apparatuses for signaling, namely, radio frequency to laser light converters, radio frequency to optical converters, radio frequency to modulated laser light converters, DC to AC converters, electric converters, and current converters; design and development of antenna parameter measuring apparatuses, namely, an antenna tester to assess the match characteristics of antennas and to measure the transmission parameters of antennas, and a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter; design and development of apparatuses and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers; design and development of radio frequency repeaters; design and development of computer hardware and software

Electricity meters; electrical measuring and testing instruments, namely, electrical meters for evaluating, measuring, recording, capturing, storing, generating, and analyzing radio frequency signals, digital signals, radio frequency signal power, radio frequency signal voltage, radio frequency signal current, and radio frequency signal phase angle, radio frequency signal strength, radio frequency signal power waves, radio frequency signal direction, radio frequency signal frequency, radio frequency signal harmonics, radio frequency signal bandwidth, characteristics of antennas, and transmission parameters of antennas; electrical coaxial line power attenuators; electrical filters; electrical switches, namely, ethernet switches, fiber optic switches, serial switches, matrix switches, coaxial switches, coaxial selector switches, selector switches, naval tactical data systems switches, and naval tactical data systems network switches; calibration instruments, namely, calibrators for calibrating digital and radio frequency equipment and components, namely, radio frequency wattmeters, broadband analog radio frequency wattmeters, radio frequency power sensors, radio frequency wattmeters and antenna analyzers for measuring and analyzing the radio frequency power and power wave from a radio frequency transmission line serving antennas, radio frequency signal boosters, electronic equipment, namely, radio frequency filters, filter networks, and duplexers, radio frequency power monitor/alarm for high frequency coaxial transmission equipment, radio frequency analysis products namely, radio frequency data recorders and radio frequency signal generators, radio frequency diagnostic system in the field of semiconductor manufacturing for measuring the voltage, current, and phase angle of a radio frequency signal, comprising sensors and electronic modules, radio frequency diagnostic system comprising sensors and electronic modules for measuring radio frequency signal power and

strength, electronic telecommunications measuring and testing device namely, a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter for use in evaluating, measuring, and analyzing radio frequency signal strength, direction, frequency, harmonic and bandwidth characteristics, as well as to assess the match characteristics of antennas, and to measure the transmission parameters of antenna, and radio-frequency power meters; radio frequency wattmeters; broadband analog radio frequency wattmeters; radio frequency display units, namely, radio frequency counter monitors; radio frequency power sensors; radio frequency wattmeters and antenna analyzers for measuring and analyzing the radio frequency power and power wave from a radio frequency transmission line serving antennas; air-cooled termination cabinets for radio frequency transmission lines; electrical apparatus, namely, coaxial electrical cable terminator; radio frequency signal boosters; electrical multicouplers and individual channels therefore; electronic equipment, namely, radio frequency filters, filter networks, and duplexers; instruments for absorbing high frequency electrical power, namely, coaxial load resistors, and absorption type instruments for measuring such power, namely, wattmeters, comprising coaxial resistors; radio frequency power monitor/alarm for high frequency coaxial transmission equipment; software for use in radio frequency data capture. storage, and analysis; radio frequency analysis products namely, radio frequency data recorders and radio frequency signal generators; radio frequency diagnostic system in the field of semiconductor manufacturing for measuring the voltage, current, and phase angle of a radio frequency signal, comprising sensors and electronic modules; radio frequency diagnostic system comprising sensors and electronic modules for measuring radio frequency signal power and strength; electronic telecommunications measuring and testing device namely, a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter for use in evaluating, measuring, and analyzing radio frequency signal strength, direction, frequency, harmonic and bandwidth characteristics, as well as to assess the match characteristics of antennas, and to measure the transmission parameters of antennas; apparatus for signaling, namely, radio frequency to laser light converters, radio frequency to optical converters, radio frequency to modulated laser light converters, DC to AC converters, electric converters, and current converters; apparatus for measuring, namely, antenna testers to assess the match characteristics of antennas and to measure the transmission parameters of antennas; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters; distributed antenna systems comprising amplifiers, receivers, digital signal processors, and a network of spatially separated antennas connected to telecommunications cables, fiber optic cables and coaxial cables, that provide wireless service; apparatus and equipment to enable inbuilding wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of, antennas, radio receivers, and digital signal processors; apparatus and equipment for wireless networks, cellular and wireless telephone communication, namely, distributed antenna systems, comprised of antennas, amplifiers receivers, digital signal processors; distributed antenna system head-ends; distributed antenna system remote optic units; amplifiers for wireless communications, namely, antenna amplifiers, radio frequency amplifiers, radio frequency signal amplifiers, radio frequency repeaters, and radio frequency signal boosters; distributed antenna system base station interface unit; distributed antenna system management system comprising telecommunication computer hardware and software for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications; distributed antenna system optical distribution unit; distributed antenna system optical expansion unit; distributed antenna system add on-remote unit; apparatus and instruments for conducting,

switching, transforming, accumulating, regulating and controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters; apparatus for recording of sound and apparatus for recording of images, namely, audio tape recorders, CD recorders, DVD recorders, video tape recorders, and magnetic-tape recorders; optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems comprising of optical transmitters, optical receivers, and optical transceivers; recording discs, namely, pre-recorded optical discs containing information in the field of radio frequency power measurement and communications; compact discs, namely, pre-recorded compact discs containing information in the field of radio frequency power measurement and communications; DVDs, namely, pre-recorded DVDs containing information in the field of radio frequency power measurement and communications; digital recording media, namely, electronic databases containing information in the field of radio frequency power measurement and communications recorded on computer media; computers; rotary converters; phase modifiers; radio-frequency power meters

Services

Class 37

(1) Installation, repair, and maintenance services for radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, monitors, sensors, tower top amplifiers, signal boosters, and analyzers, namely, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers; installation, repair, and maintenance services for distributed antenna systems; repair and maintenance services for apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors; installation, repair, and maintenance services for distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, distributed antenna system head-ends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and firmware for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, distributed antenna system optical distribution unit, distributed antenna system optical expansion unit, and distributed antenna system add on-remote unit; installation, repair, and maintenance services for radio frequency communication systems comprising of wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, monitors, sensors, tower top amplifiers, signal boosters, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers

Class 38

(2) Telecommunications, namely, electronic transmission of email, providing wireless cellular telephone services, providing Internet access, transmission of voice, audio, video and visual images for others via digital and analog computer networks, fiber optic broadband networks, Ethernet computer networks, wireless computer networks, global computer information networks, and cellular phone networks; telecommunications services, namely, telecommunications consultation in the fields of electronic transmission of email, providing wireless cellular telephone services, providing Internet access, transmission of voice, audio, video and visual images via digital and analog computer networks, fiber optic broadband networks, Ethernet computer networks, wireless computer networks, global computer information networks, and cellular phone

networks; telecommunications consultancy services in the fields of wireless computer networks, and wireless cellular phone services; providing information in the field of communication services, namely, transmission of voice, audio, visual images and data by wireless computer networks, fiber optic networks, ethernet networks, and by wireless and cellular telephones; providing telecommunication connections to a global computer network and the Internet, namely, providing access to a global computer network and providing access to the Internet; providing telecommunication access services to a wireless network, namely, providing wireless cellular telephone services and providing Internet access via wireless broadband networks

Class 40

(3) Manufacture of custom radio frequency data capture, storage, and analysis products, namely, radio frequency data recorders, radio frequency signal generators, and software for use in radio frequency data capture, storage, and analysis to order and specification of others; manufacture of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, namely, voltage meter, current meter, and phase angle meter, monitors, sensors, tower top amplifiers, signal boosters, analyzers, namely, antenna analyzers, cable analyzers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers, power distribution and control machines and apparatuses, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters, and electric and magnetic meters and testers to the order and specification of others; manufacture of distributed antenna systems to the order and specification of others; manufacture of apparatus and equipment to enable in-building wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors, to the order and specification of others; manufacture of distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, headends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and firmware for remotely monitoring. configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, optical distribution unit, optical expansion unit, and distributed antenna system add onremote units, to the order and specification of others

Class 42

(4) Design of radio frequency data capture, storage, and analysis products, namely, radio frequency data recorders, radio frequency signal generators, and software for use in radio frequency data capture, storage, and analysis for others; design of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, namely, voltage meter, current meter, and phase angle meter, monitors, sensors, tower top amplifiers, signal boosters, analyzers, namely, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers, power distribution and control machines and apparatuses, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters, and electric and magnetic meters and testers to the order and specification of others; design of distributed antenna systems to the order and specification of others; design of apparatus and equipment to enable inbuilding wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors, to the order and specification of others; design of distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, distributed antenna system head-ends, distributed antenna system remote optic units, amplifiers for wireless

communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and software for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, optical distribution unit, optical expansion unit, and distributed antenna system add on-remote unit to the order and specification of others; design of radio frequency data capture, storage, and analysis products, namely, radio frequency data recorders, radio frequency signal generators, and software for use in radio frequency data capture, storage, and analysis; design of radio frequency communication products, namely, wattmeters, combiners, duplexers, antennas, attenuators, loads, filters, switches, instruments, namely, voltage meter, current meter, and phase angle meter, monitors, sensors, tower top amplifiers, signal boosters, analyzers, namely, antenna analyzers, cable testers, spectrum analyzers, vector network analyzers, and passive intermodulation analyzers, power distribution and control machines and apparatuses, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers, and radio frequency repeaters, and electric and magnetic meters and testers; design of distributed antenna systems; design of apparatus and equipment to enable inbuilding wireless networks, wireless and cellular telephone infrastructure, namely, distributed antenna systems, comprised of antennas, radio receivers, and digital signal processors; design of distributed antenna systems products, namely, antennas, radio receivers, digital signal processors, distributed antenna system head-ends, distributed antenna system remote optic units, amplifiers for wireless communications, base station interface unit, distributed antenna system management system comprising telecommunication computer hardware and software for remotely monitoring, configuring, and controlling the function and status of other electrical, electronic, and mechanical devices and systems in a distributed antenna system for wireless communications, optical distribution unit, optical expansion unit, and distributed antenna system add on-remote unit; design and development of optical apparatus and instruments, namely, fiber optics, fiber optic transceivers, fiber optic repeaters, fiber optic cables, fiber optic transmitters, free-space optics transmission systems comprising of optical transmitters, optical receivers, and optical transceivers; design and development of apparatuses for signaling, namely, radio frequency to laser light converters, radio frequency to optical converters, radio frequency to modulated laser light converters, DC to AC converters, electric converters, and current converters; design and development of antenna parameter measuring apparatuses, namely, an antenna tester to assess the match characteristics of antennas and to measure the transmission parameters of antennas, and a combined radio frequency spectrum analyzer, radio frequency vector network analyzer, radio frequency reflectometer, and radio frequency wattmeter; design and development of apparatuses and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely, electronic combiners for connecting antennas and receivers, radio frequency power amplifiers; design and development of radio frequency repeaters; design and development of computer hardware and software

Trademark Type Word

Goods

Class 16

(1) coverings for furniture, namely furniture coverings made of paper; face towels of paper, face towels made of paper for removing make-up

Class 24

(2) Textiles, namely non-woven textile fabrics, curtain holders of textile materials, fibre glass fabrics for textile use, curtains of textile, banners of textile, coasters of textile, face towels of textile, flags of textile, handkerchiefs of textile, labels of textile, labels of textile for bar codes, printers' blankets of textile, serviettes of textile, table runners of textile, table mats of textile, towels of textile, wall hangings of textile, labels of textile for identifying clothing, place mats of textile material, textile fabric for use as apparel lining, shower curtains made of textile fabric, bed sheets made of textile, place mats of textile, woven and non-woven filters made of textile for coffee and tea, textile for carpets, textile fabrics, textile labels; fabrics for textiles; fabrics for textiles for household use; fabrics for textiles for use with furniture; fabrics for textiles, namely lining fabric for footwear; furniture coverings of textile; household linens; curtains; kitchen and table linens; towels, namely cotton towels, bath towels, beach towels, tea towels, hand towels, face towels of cotton, face towels of textile, towels of textile, face towels made of textile and cotton for removing make-up (3) reed place mats

Class 25

(4) Clothing, namely shirts, undershirts, sweatshirts, socks, trousers, camisoles, gloves, mittens, scarfs, head scarfs, jackets, pullovers, coats, pyjamas, dresses, skirts, hoodies, suits, sleepwear, t-shirts, shorts, loungewear, underwear, leggings, casual wear, beachwear, formal wear, exercise wear, maternity wear, athletic wear, children's clothing, rainwear, sportswear, swimwear, aprons, caps, hats; wooden shoes, soles for footwear, wooden shoes, namely casual footwear, children's footwear and slippers made of wood

Class 27

(5) Carpets; rugs; mats namely kitchen floor mats, yoga mats, door mats, vehicle mats, bath mats, non-slip mats for shower, woven decoration mats, door mats of rubber, straw mats, textile floor

mats; exercise mats, namely, gymnasium exercise mats, personal exercise mats and yoga mats Claims:

(6) textile wallpaper, wallpaper

Goods

Class 09

- (1) Scientific (other than for medical use), nautical, surveying, measuring, signalling, checking, supervision, life-saving and rescue apparatus and instruments, namely luminous safety beacons for use as a personal locator, marine luminous safety beacons, barometers, marking buoys, signalling buoys, frequency meters, pedometers, sound level meters, binoculars, life belts, life jackets; navigation instruments, namely navigation compasses, compasses; pressure gauges; marking buoys, life buoys, life nets, life rafts, life belts, life jackets; signalling buoys, signalling whistles; diving weights, diving buoyancy compensators; pressure gauges, diving surface marker buoys, diving compasses, diving suits, diving outfits, diving gloves, diving masks, anti-slip diving socks, sports glasses, diving goggles, diving ear plugs, nose clips for divers and swimmers, nose clip cords; breathing apparatus for underwater swimming; scuba tanks, diving regulators, diving regulator mouthpieces, pressure hoses, dive computers; snorkels for swimmers and divers.
- (2) Apparatus for the recording, transmission and reproduction of sound and images, namely video players and recorders, DVD players, MP3 players, audio cassette and CD players, audio tape recorders; information processing apparatus, namely computers; sound amplification apparatus,

namely stereo amplifiers, audio amplifiers; blank audio and video compact discs; magnetic data carriers, namely blank magnetic discs; optical data carriers, namely blank optical compact discs and optical discs; magnetic card decoders; sound recording apparatus, namely tape recorders, audio tape recorders, audio cassette recorders; sound recording media, namely blank USB keys, blank audio discs and blank audio cassettes, blank audio tapes; computers, namely readers, namely optical character readers, smart card readers, electronic card readers, flash memory card readers, magnetic coded card readers, memory card readers, USB card readers, compact disc players, external computer hard drives; optical scanners; devices for personal protection against accidents, namely goggles, nets for protection against accidents, safety harnesses, sports helmet protective visors, nets for protection against accidents, luminous beacons, marking buoys, signalling buoys, compasses, non-explosive fog signals, protective helmets, life belts; one-piece suits, suits, gloves, diving masks, breathing apparatus for underwater swimming, navigation instruments, namely navigation compasses, compasses, observation instruments, namely field glasses, telescopes, life rafts; snorkels.

Class 11

(3) Lighting apparatus, namely fluorescent lighting fixtures, lighting diffusers, searchlights, light bulbs, electric light bulbs, lamps, namely electric flashlights, headlamps, electric lamps, flashlights, waterproof lamps, diving flashlights, diving lights, diving lamps, lamp bulbs.

Class 18

- (4) Leather and imitations of leather; animal skins, hides; trunks and suitcases; umbrellas, parasols and walking sticks; wallets; coin purses not made of precious metals; leatherwork items made of leather and imitations of leather, except cases adapted to the goods they are designed to contain, gloves and belts, namely cases, handbags, travel bags, backpacks, wheeled bags, sports bags, transport bags, beach bags, garment bags.
- (5) Handbags, travel bags; trunks and suitcases; umbrellas, parasols and walking sticks; satchels, wallets; beach bags, backpacks, sports bags. .

Class 25

- (6) Clothing, namely wetsuits and dry suits for diving and snorkelling, footwear, namely aqua shoes, beach shoes, headgear, namely hats, caps, bathing caps; insoles; underwear; bathing suit; swimming trunks; wetsuits for water-skiing; robes, bathrobes, bathing suits, beach clothes, bathing suits, swimming trunks; bathing caps; pullovers, T-shirts, beach wraps, pants, jackets, coats, wetsuits for water-skiing, apparel, namely belts, apparel, namely gloves, waterproof clothing, namely waterproof jackets and pants, waterproof ponchos; sports clothing, namely athletic wear, athletic clothing, exercise wear, clothing for water sports and underwater sports, polychloroprene clothing; apparel, namely headbands, cap peaks, protective visors for athletes, sports helmet visors; footwear, except orthopedic shoes, namely sports shoes, sandals, soft slippers, anti-slip shoe grips.
- (7) Apparel, namely clothing, namely wetsuits and dry suits for diving and snorkelling, footwear, except orthopedic shoes, namely aqua shoes, beach shoes, headgear, namely caps, hats, bathing caps, underwear, bathrobes, bathing suits, bathing shoes and sandals, wetsuits for water-skiing, boots, socks, insoles.

Class 28

(8) Games, namely outdoor activity play sets, toys, namely play balls and balloons, water squirting toys, inflatable toys, sand toys; sporting articles, namely fishing tackle, underwater fishing tackle,

fishing rods, landing nets for fishing, sporting articles, namely nets, fish hooks, lures for fishing, lines for fishing, reels for fishing, fishing gear, namely creels; swimming and diving flippers; sporting articles, namely harpoon guns, spearguns.

(9) Games, namely outdoor activity play sets, toys, namely play balls and balloons, water squirting toys, inflatable toys, sand toys; sporting articles, except clothing, footwear and carpets, namely fishing tackle, underwater fishing tackle, fishing rods, landing nets for fishing, sporting articles, namely nets, fish hooks, lures for fishing, lines for fishing, reels for fishing, fishing gear, namely creels; kites; kite reels; sailboards; masts for sailboards, sporting articles, namely windsurfing harnesses, surfboards, covers specially designed for surfboards; body boards; swimming flippers; baseballs, play balls, balls for juggling; water skis; sporting article, namely swimming belts, sporting articles, namely sea kayaks, swim floats; swimming belts, swimming straps; buoyancy vests.

Colour Claim

The applicant claims the colours 'blue' and 'turquoise' as essential features of the trade-mark. The lower portion of the letter 'i' and the letter 'e' are blue, the dot above the 'i' is turquoise.

Goods

Class 09

Instructional and teaching apparatus and instruments namely smart boards and smart pens, electronic text books; recording apparatus namely DVD recorders, video cassette recorders, telephone recorders, broadcasting equipment namely mobile radio and television broadcasting units, namely, receptors, antennas, television broadcasting equipment, namely, transmitters, amplifiers, sound reproduction apparatus namely sound projectors and amplifiers, sound reproduction mixers and controllers, apparatus for the reproduction of images namely cameras, image scanners; magnetic data carriers, namely recordable optical discs, CDs, and DVDs, all containing multimedia files containing educational seminars, simulators, course materials and interactive tutorials in electronic file form namely audio files, video files, document files, text files in word and pdf format in the field of business management and administration, law, human resources, architecture and design, human sciences and technology, international relations, humanities, health and wellbeing, recording discs namely blank record discs, blank CD-ROMs for

sound or video, compact discs containing computer games; data processing terminals namely computer terminals; computers; dataprocessing equipment namely digital signal processors, central processing units; computer programming software to assist in the collaborative design and development of computer programs and source code; computer software for programming facsimile machines, computer operating programs, computer programs for document management; electronic publications, downloadable namely downloadable electronic periodical publications in the field of business management and administration, law, human resources, architecture and design, human sciences and technology, international relations, humanities, health and wellbeing

Services

Class 38

(1) Telecommunication services namely providing multiple user access to a global computer network, videoconferencing services, in the field of business management and administration, law, human resources, architecture and design, human sciences and technology, international relations, humanities, health and wellbeing; providing internet access to websites and portals containing content in the form of posts, articles and multimedia cases comprised of texts, video and audio clips and computer simulations in the field of business management and administration, law, human resources, architecture and design, human sciences, medical technology, computer technology, applied sciences, mechanical engineering, international relations, humanities namely languages, literature, philosophy, history, human geography, law, politics, religion, and art, general health and wellbeing; providing access to weblogs and web pages in the field of business management and administration, law, human resources, architecture and design, human sciences, medical technology, computer technology, applied sciences, mechanical engineering, international relations, humanities namely languages, literature, philosophy, history, human geography, law, politics, religion, and art, general health and wellbeing, webcasting of educational services in the field of business management and administration, law, human resources, architecture and design, human sciences, medical technology, computer technology, applied sciences, mechanical engineering, international relations, humanities namely languages, literature, philosophy, history, human geography, law, politics, religion, and art, general health and wellbeing; information services relating to videoconferencing, wireless digital messaging, radio broadcasting; providing internet chatrooms namely providing chat lines utilising the internet in the field of business management and administration, law, human resources, architecture and design, human sciences and technology, international relations, humanities, health and wellbeing; providing online forums for the electronic exchange of information in the field of business management and administration. law, human resources, architecture and design, human sciences and technology, international relations, humanities, health and wellbeing; providing on-line electronic bulletin boards for the transmission of messages among computer users in the field of business management and administration, law, human resources, architecture and design, human sciences, medical technology, computer technology, applied sciences, mechanical engineering, international relations, humanities namely languages, literature, philosophy, history, human geography, law, politics, religion, and art, general health and wellbeing; news agencies; telephone services namely telephone carrier services provided by means of fiber optic cables, telephone lines, radio and microwave transmission, satellite transmission, wireless telephone services, telephone communications services provided by using prepaid telephone calling cards; communications by computer terminals namely electronic mail services, teletext services; communications by fiber optic networks namely telephone carrier services provided by means of fiber optic cables, telephone lines, radio and microwave transmission, satellite transmission; television broadcasting; satellite television broadcasting; wireless broadcasting namely uploading, posting, showing,

displaying of videos, images, news, text in the field of business management and administration, law, human resources, architecture and design, human sciences and medical technology, computer technology, applied sciences, mechanical engineering, international relations, humanities namely languages, literature, philosophy, history, human geography, law, politics, religion, and art, general health and wellbeing; providing access to Higher Education Services Websites on the internet namely the operation of educational websites providing access to online course materials in the fields of business management and administration, law, human resources, architecture and design, human sciences, medical technology, computer technology, applied sciences, mechanical engineering, international relations, humanities namely languages, literature, philosophy, history, human geography, law, politics, religion, and art, general health and wellbeing, providing user access to global computer networks; electronic mail; television broadcasting, radio broadcasting services; radio communication services namely paging by radio; radio broadcasting; radio program broadcasting; cellular telephone communications, teleconferencing services; network conferencing services, cable television broadcasting; rental of access time to global computer networks; transmission of digital files namely electronic transmission of digital photo files via peer-to-peer network, electronic transmission via the internet of digital music files, provision of access to internet platforms for the purpose of exchanging digital photographs; message sending namely cellular text messaging services, telephone voice messaging services; electronic mail services through wired and wireless access, paging services, wireless digital messaging services

Class 41

(2) Education, namely, conducting both live and online classes, seminars, workshops, conferences, video conferences at the university level in the field of business management and administration, law, human resources, architecture and design, international relations, psychology, anthropology, humanities, human sciences; providing of training in the field of business management and administration, law, human resources, architecture and design, international relations, psychology, anthropology, humanities such as languages, literature, philosophy, history, human geography, law, politics, religion, and art, human sciences; cultural activities namely organizing cultural events, namely art exhibitions, dance festivals, musical concerts, theatre productions; publication of educational textbooks; publication of printed matter relating to education, providing on-line electronic publications not downloadable in the nature of magazines and newsletters in the field of business management and administration, law, human resources, architecture and design, international relations, psychology, anthropology, humanities, and human sciences; providing on-line publications, not downloadable in the field of business management and administration, law, human resources, architecture and design, international relations, psychology, anthropology, humanities such as languages, literature, philosophy, history, human geography, law, politics, religion, and art and human sciences

Goods

Class 07

(1) machines and machine tools as well as their parts, namely, automated machines and machine tools as well as their parts in the nature of electric drives for electric motors for machines, drives for vacuum pumps, gear drives, drives for machines, namely, electric drives for vehicles and electric drives for industrial machinery, electric generators, turbines other than for land vehicles, namely, wind turbines, turbines for generation of electricity, turbines for jet engines, steam turbines and industrial gas turbines for power generation and industrial gas turbines for mechanical drive, turbochargers for internal combustion engines, electricity generators, spindles being parts of machines, high frequency motor spindles with high frequency electric converters and power supply units; engines, namely, aeronautic engines, boat engines, diesel airplane engines, electric motors for machines, internal combustion engines for boats, jet engines, linear motors and hydraulic motors (except for land vehicles); machine couplings and transmission devices for power transmission in the nature of transmissions and transmission components (except for land vehicles); electric and power generators, namely, gas operated power generators, emergency power generators, electrostatic generators, generators for motor vehicles, generators for boats, wind generators; apparatus for handling and transporting, namely, conveyors, cranes and hoists; conveyor belts; mechanical and electronic control mechanisms for machines, engines and motors, namely, pneumatic and hydraulic controls for ship motors; remote control apparatus in process automation systems, namely, electronic notice boards as well as visual and acoustic warning signals, namely, electronic warning bells, emergency warning lights, luminous and mechanical warning signals, beacons, sirens, warning indicators, signal lights, electric control panels, power distribution boxes, control cables and buttons, namely, cable connectors, electric cables, power switches; industrial robots; turbochargers; pumps, namely, centrifugal pumps, electric heat pumps, electric rotary pumps, electric screw pumps, compressed air pumps, pumps as parts of machines, motors, and engines, hydraulic pumps and pneumatic pumps; compressors, namely, air compressors, electric compressors, centrifugal compressors, compressors as parts of machines, motors and engines; mills, namely, rolling mills; grinding mills for processing ores and minerals in the nature of rod mills, bar mills, rod and bar mills, rail mills, blooming mills, billet mills and heavy, medium and light section mills; floating and nonfloating drilling rigs; elevators and elevator controls, namely, parts of elevators, elevator motors, elevator lifts, elevator gears, elevator belts

Class 09

(2) scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, analyzing, indicating, signaling, monitoring apparatus, instruments and devices, including parts for all the aforesaid goods, namely, timers for recording and measuring electric currents, ammeters, volt meters, control and protective equipment for electrical networks in the nature of surge protectors; apparatus and instruments for the management, distribution, conversion, storage, regulation and control of electricity including parts for all the aforesaid goods, namely, electrical circuit boards, electrical cables, distribution boxes for electrical power, electrical conductors for electric motors, electrical converters, electrical controllers for diesel engines; data processing equipment, namely, calculators, computer programmes for document management, electronic tags for goods and computers; computer software for the optimization of electricity generating power plants, industrial plants, buildings and computer networks for the transport of electric energy, gas and oil, namely automation systems comprised of computers, industrial robots, motion sensors, pressure sensors, timing sensors, voltage regulators for electric power, computer software and databases for use in diagnosis, repair and configuration of computers, and computer software for controlling and operating laser rangefinders for monitoring and control of equipment, namely, electrical transformers, electrical relays, power switches, electric capacitors, electric circuit closers, electric control panels, electric power converters, and voltage regulators for electric power; computer software and hardware for wireless connection of electronic equipment, systems and apparatus with smart devices for remote monitoring and control; computer software for the collection and distribution of statistical production data for communication between handheld computers and industrial apparatus, namely, heating, air conditioning, ventilating, energy usage, lighting, fire alarm, and security access controllers; microprocessors; lasers for use in industrial cutting applications; chargers for electric accumulators, namely, electrical collectors, namely, photovoltaic cells, electrical storage batteries, electric capacitors, electric capacitors for telecommunication apparatus, electric accumulators for vehicles; electrical measuring and controlling instruments in the form of voltage regulators, namely, timers for recording and measuring electric currents, volt meters; electrical capacitors; electric collectors; electrical terminals; electrical cables, wires and wires; accumulator boxes and junction boxes; cable grommets for electrical wires and cable filaments for electrical wires; cable channels; inductors; magnetic data carriers, namely, blank floppy discs, blank hard discs, magnetic tape drives, magnetic tape units for computers, magnetic-stripe cards; semiconductors; electronic and electrical apparatus, devices and instruments including their parts for energy production, distribution and supply, in particular for alternative energy, namely, electrical transformers, electrical switchgear, namely, cut-out switches, circuit closers, electrical circuit breakers, electrical circuit breakers, electrical contacts, namely, electrical circuits, electrical outlets, electrical power connectors, electrical fuses, electrical surge arresters, reactor electric power, namely, electric power generators, electric generators, electric converters, compensators, namely, electrical power distribution blocks, electric semiconductor elements, photovoltaic solar modules, solar panels for production of electricity, solar batteries; fuel cells; blank floppy disks, magnetic disks and optical disks for electronic, magnetic and optical storage; data protection apparatus, namely, overvoltage protection solutions in the nature of surge protectors; computer peripherals, namely, computer printers, computer keyboards, computer monitors, computer mouse; current and voltage converters; current and voltage rectifiers; power converters, namely, electric power converters; electrical power connectors; connecting sleeves for electrical cables; electrical transistors, thyristors, diodes; power semiconductor devices, namely, electronic switches, voltage convertors, current rectifiers, shunts with drive electronics, shunts without drive electronics, power transistors, diodes, power diodes, power controllers, power monitors, current sensors and temperature

sensors; electrical transformers; electrical resistors; distribution boards, namely, circuit breaker panels and power distributing boxes; batteries, namely, general purpose batteries, solar batteries, electric storage batteries; integrated circuits (chips); circuit boards; diagnostic apparatus, namely, computer utility programs for providing diagnostic details on devices installed in a computer system; anti-interference computer hardware in the field of automated process control systems; computer memory, namely, flash memory cards, blank secure digital (SD) memory cards, computer memory expansion modules, flash memory expansion modules, memory boards, random access memory cards for use with data processing apparatus, namely, computers, calculators, tablet computers, smart phones, smart terminals; switchgear, in particular switchboards, cables and control buttons; cut-out switches; electrical relays; modems; electrical conduit pipes; electrical cables connectors; electrical measuring and regulating devices in the form of voltage regulators; sensors, namely, electric sensors, current sensors, voltage sensors and sensors for determining position, velocity, acceleration and temperature, biochip sensors, distance sensors, optical sensors, solar collectors; electrical fuses; circuit breaker; circuit breakers and circuit closers; voltage meter; electric and electronic installations for remote control of industrial process automation systems, namely, electronic notice boards as well as visual and acoustic warning signals, namely, switching connection panels, control panels, distribution consoles; automatic control systems for vehicles, namely, automatic indicators of low pressure in tires, cruise controls for motor vehicles, fuel level indicators for vehicles, simulators for the steering and control of vehicles; apparatus and installations for the transmission, distribution and control of electric current, namely, semiconductor power elements, electric usage meters, voltage testers, electric voltage transformers, voltage regulators, electric conductors, electrical reactors, electric capacitors, electric contacts, electric converters and inverters, metal grounding bushings and metal grounding clamps, both for use only as parts and fittings for coaxial cable, and not for non-electric cable and machinery and machine parts; power wires; power cables; transformers, namely, electrical voltage transformers, power transformers, electrical power reactors, namely, electrical converters, electrical relays and transformers, electric power generators and parts and fittings therefor; electrical sockets; solar cells; electric and electronic apparatus, devices and instruments including parts thereof for the production of energy, particularly alternative energy, namely, electric generators and replacement parts therefor and electrical and electronic apparatus and equipment all for use in generating energy obtained from alternative energy sources, namely, automatic switchboards, power distribution panels, distribution transformers, microcircuits, custom integrated circuits, electronic control panels, electric and electronic sensors, photovoltaic installations for generating solar electricity

(3) electronic controllers for industrial machines and diesel engines; automated process control systems comprised of computers, industrial robots, motion sensors, pressure sensors, timing sensors, voltage regulators for electric power, computer software and databases for use in diagnosis, repair and configuration of computers, and computer software for controlling and operating laser rangefinders in the field of electricity generating power plants and electrical control systems consisting of electric control panels, touch sensitive switches, automatic time switches, thermostats, electronic key fobs being remote control apparatus for heating systems, air cleaning units, air conditioners, air purifying units, cooling evaporators, electrical control systems for heating and air conditioning systems, industrial air purifiers, ventilating fans, water conditioning units and fans for motors and engines; facilities management control system products, namely, electronic controllers for heating, namely furnaces, air conditioning, ventilating fans, solar energy panels for production of electricity, lighting controls, fire alarm, and security access systems, namely, safety access controls in the form of safety alarm controls; facilities management control system products, namely, electrical control devices for the management of heating and energy, lighting controls, fire alarms, namely, thermostats, electromechanical controls for room thermostats, light

switches, dimmer switches, fire alarm control panels; security access controls in the nature of security alarm controllers, and climate control systems consisting of digital thermostats, air conditioning, heating, and ventilation control devices; controllers for ventilating, airconditioning and cooling systems (HVAC controllers) for controlling, gauging and monitoring climate control, air flow, residential furnaces, industrial furnaces, ventilating fans and air conditioning equipment; programmable electronic data acquisition and control apparatus for residential environmental monitoring, control, and automation of lighting, audio, HVAC, security alarms, home appliances, and devices connected to a global computer network, namely security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning and digital thermostats, and internet of things applications, namely, electronic controls for heating, air conditioning, ventilation, energy usage, lighting, smoke alarms and access control and computer software that allows the sharing and transmission of data and information in the field oil, gas, energy, transportation, water purification management processes between the aforementioned devices and networked computers for the purposes of facilitating environmental monitoring, control, and automation in residential settings; downloadable mobile computer software application for remotely managing, administering, modifying, and controlling home security and automation devices, namely, programmable electronic data acquisition and control apparatus for residential environmental monitoring, control, and automation of lighting, audio, HVAC, security alarms, home appliances, devices connected to a global computer network, namely security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning and digital thermostats; building automation systems, namely, programmable electronic data acquisition and control apparatus for residential environmental monitoring, control, and automation of heating, air conditioning, ventilating, energy, lighting, fire alarm, and security access controls and software for building automation systems, namely, security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning and digital thermostats; building automation equipment, namely, electric actuators, control circuit boards and control supervisory systems consisting primarily of electrical actuators; computer software and hardware for enabling wireless connections of electronic devices, systems and appliances, namely, for enabling connection and the sharing and transmission of said data and information in the field of oil, gas, energy, transportation, water purification management processes between networked smart-devices, namely, security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning, digital thermostats, computers, smart phones, tablet computers, calculators for remote monitoring and control; computer software platform for use in diagnosis, repair and configuration of computers and industrial machines in the fields of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in industrial utilities, namely, natural gas, petroleum, oil and carbon based fuels and effluent, raw plastic materials production processes, and in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; computer software for the collection and transmission of statistical production data for oil and gas field operations in computer networks to enable the sharing and transmission of data and information in the field of oil and gas field operations

between computers and the connected consumer devices and the connected industrial apparatus, namely, namely, industrial robots, automatic switchboards, power distribution panels, electronic

control panels, electric and electronic sensors, security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning, digital thermostats; downloadable cloud computing software for information management, data collection and data analysis in the fields of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; downloadable computer software for information management, data collection and data analysis for the purposes of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; downloadable computer software application for information management, data collection and data analysis for the purpose of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; temperature, pressure and liquid level sensors, computer hardware and software programs for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; internet of things applications and other monitoring and control applications, namely, programmable electronic data acquisition and control apparatus, namely, computers, electricity meters, flow meters, gas meters, hydrometers, thermal meters for environmental monitoring, environmental control, and energy management, monitoring and inspecting equipment in a nuclear power station, electrical industrial controls for monitoring waste water treatment, electrodynamic apparatus for the remote control of railway points, firmware for remote monitoring of hardware, voltage monitor modules; remote monitoring apparatus, namely, acceleration sensors, pressure sensors, temperature sensors, humidity sensors, electric sensors, timing sensors and optical sensors; computer software for recording data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and machine diagnostic data in the field of oil, gas, energy, transportation, water purification management processes generated from audio and video recordings generated by machines and human beings; software for control and monitoring of communication between computers in automatic machine systems comprised of oil well boring machines, turbines for generation of electricity, high pressure water jetting system for the gas and oil industry, electric power generators; software platform for use in automated

process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; downloadable cloud computer software for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; downloadable application software for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; downloadable software for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil

Services

Class 37

(1) construction of gas treatment plants, oil processing plants, oil pumping stations, offshore oil and gas production installations, gas compressor stations, oil refineries and petrochemical plants; repair services, namely, repair of construction machines, repair of chemical processing machines, repair of semiconductor manufacturing machines, electrical repair of electrical motors, repair of power generators, electrical repair of lighting, repair of heating installations, repair of computer hardware, repair of office equipment, repair of computer networks; installation services, including advice relating thereto, namely, installation of electrical systems, solar energy based power plants, heating, ventilating and air conditioning systems, as well as installation of computer networks and computer systems, including consultation in the field of installation of computer networks and computer systems; maintenance and installation services for industrial installations, namely, installation and maintenance of electrical and generating machinery; installation, set-up, maintenance and repair of computer hardware and office equipment; maintenance of computer hardware, in particular computers and computer networks; installation, maintenance, repair and disassembly of machines and electrical apparatus and equipment, namely, electrical and generating machinery; installation and maintenance of oil pipelines; underwater construction; consultancy services in the field of automated process control systems, robotics, electricity generation, construction, solar energy based power plants, heating, ventilating and air conditioning systems, and systems for heating, ventilation, air-conditioning, production and distribution of electricity and computer hardware and computer software

Class 42

(2) scientific and industrial research in the field of mechanical engineering, machines and machine tools, power plants, electricity generation, energy efficiency, energy saving, environmental protection and data processing; scientific and industrial research in the field of software and networks online via a computer data bank and via computer networks; scientific and industrial research, namely research in the field of machine construction and engineering; creating programs for data processing; providing temporary use of online, non-downloadable Internet-based computer software for providing user access to a global computer network; providing technical

information regarding the use of computers, computer hardware, computer software, computer databases and computer networks; services of an industrial designer; services of a packaging designer; quality assessment, namely, materials testing, analyzing and evaluation; underwater exploration, namely, oil exploration, gas exploration; material testing; engineering consultancy services relating to environmental compatibility, energy conservation consultancy, technical advice on energy saving measures, technical advice on energy saving and efficiency; design of computer software, in particular in the field of computer security; network engineer services, namely, computer security consulting and computer network security services; scientific and industrial research in the field of network technology, namely, computer network design for others, computer network configuration services, design and development of wireless computer networks, computer software design and development; updating of computer software; carrying out chemical analyzes; execution of petroleum exploration; monitoring of oil drilling; preparation of analyzes for the extraction of oil; preparation of expert opinions on petroleum cork; services provided by a physicist, namely, research in the field of physics; research in the field of chemistry; services of a physicist; computer advisory services, in particular in the field of technical security; restoration of computer data; maintenance of computer software; computer system analyzes; development and research services relating to new products; research in the field of engineering, namely chemical, civil, and mechanical engineering and mechanical engineering; creating of technical opinions, namely, drafting services; engineering consulting services in the field of technical security; construction planning; technical consulting in the fields of computer science, chemistry, physics, solar energy based power plants, electricity generation, chemical engineering, mechanical engineer, computer engineering, automated process control systems, computer networks and computer systems; rental of software for data processing; software development; engineering surveying services, civil engineering drawing services, mechanical engineering, chemical engineering

(3) technological monitoring and control of mechanical and computer systems to ensure proper functioning in the fields of electric power distribution networks, machines and machine tools, namely, electrical and generating machinery; measuring and monitoring electricity consumption for electric power providers, and measuring and monitoring electricity consumption of machines and machine tools, namely, electrical and generating machinery; monitoring, diagnostic and inspection services for fault detection in electricity production, transmission and distribution systems and in machines and machine tools, namely, electrical and generating machinery; computer programming; analysis of computer software; consultancy relating to computers; analysis and design of computer systems and networks performance; providing online, nondownloadable software to enable customers to remotely manage, administer, modify and control home security and automation devices namely, lighting, audio, HVAC, security alarms, home appliances, internet of things applications, namely, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors, light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; information technology services, namely providing a web-based system and online portal (software), enabling customers to remotely manage, administer, modify and control home security and automation devices, namely, lighting, audio, HVAC, security alarms, home appliances, internet of things applications, namely, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors, light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; platform as a service (PAAS) offering computer software platforms for process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in

industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; software as a service (SAAS) featuring software for process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; software as a service (SAAS) featuring software for data collection and data analysis in the field of industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of management for industrial and residential buildings, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; software as a service (SAAS) featuring software for recording data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and industrial machine diagnostic data for use in the fields of industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines and process optimization of industrial operations in the field of oil operations for commercial and residential buildings, power stations, solar energy power plants, air, rail, ship and truck transportation and water purification management, and for the management, control, automation of devices, namely, computer software for connecting controlled hand-held devices, namely, hand-held computers and cellphones, to each other and the internet so the devices are able to transmit and receive data in the field of environmental monitoring, environmental control, and energy management, namely, monitoring and control of heating, air conditioning, and lighting systems in buildings; software as a service (SAAS) featuring software for recording, organizing, distribution and analysis of data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and industrial machine diagnostic data, and for the management, control, automation and network connection between devices, apparatus, sensors and control systems, namely, computers, cell phones, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors, light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; software as a service (SAAS) featuring software for recording, organizing, distribution and analysis of data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and industrial machine diagnostic data, and for the control, automation and network connection between devices, devices, sensors and control systems, namely, computers, cell phones, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors,

equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, and water purification; technological consultancy services for the optimization of the operation, efficiency and functioning of electric power stations;

engineering services and technical and technological consultancy services in the field of the measurement and monitoring of the use of power and energy to improve energy efficiency for owners and operators of industrial, commercial and governmental facilities; diagnostic services in the field of testing electricity generation and distribution, diagnostic services for fault detection in production, transmission and electricity distribution systems and in machines and machine tools, namely, electric drives for electric motors for machines, drive gears, electric motors for machines,

machine tools for removing waste material, power tools; performance of chemical analyses; analyses for oil extraction; performance of exploratory drilling operations for oil; monitoring of oil wells; production of analyses for oil extraction, drawing up of experts reports about oil presence; computer support services, particularly in the field of technical security; computer data recovery; software maintenance; computer systems analyses; installation and maintenance of computer software and technical consultancy relating thereto; technological consultancy services in the field of automated process control systems, robotics, electricity generation, construction, solar energy based power plants, heating, ventilating and air conditioning systems, and systems for heating, ventilation, airconditioning, production and distribution of electricity and computer hardware and computer software; providing temporary use of non-downloadable software applications for accessing and using a cloud computing network; monitoring of computer systems by remote

Vol. 67 No. 3429 page 62 light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; cloud computing offering cloud-based computer software platforms for the process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; providing temporary use of online non-downloadable cloud computing computer software platforms for the process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation

Goods

Class 07

(1) machines and machine tools as well as their parts, namely, automated machines and machine tools as well as their parts in the nature of electric drives for electric motors for machines, drives for vacuum pumps, gear drives, drives for machines, namely, electric drives for vehicles and electric drives for industrial machinery, electric generators, turbines other than for land vehicles, namely, wind turbines, turbines for generation of electricity, turbines for jet engines, steam turbines and industrial gas turbines for power generation and industrial gas turbines for mechanical drive, turbochargers for internal combustion engines, electricity generators, spindles being parts of machines, high frequency motor spindles with high frequency electric converters and power supply units; engines, namely, aeronautic engines, boat engines, diesel airplane engines, electric motors for machines, internal combustion engines for boats, jet engines, linear motors and hydraulic motors (except for land vehicles); machine couplings and transmission devices for power transmission in the nature of transmissions and transmission components (except for land vehicles); electric and power generators, namely, gas operated power generators, emergency power generators, electrostatic generators, generators for motor vehicles, generators for boats, wind generators; apparatus for handling and transporting, namely, conveyors, cranes and hoists; conveyor belts; mechanical and electronic control mechanisms for machines, engines and motors, namely, pneumatic and hydraulic controls for ship motors; remote control apparatus in process automation systems, namely, electronic notice boards as well as visual and acoustic warning signals, namely, electronic warning bells, emergency warning lights, luminous and mechanical warning signals, beacons, sirens, warning indicators, signal lights, electric control panels, power distribution boxes, control cables and buttons, namely, cable connectors, electric cables, power switches; industrial robots; turbochargers; pumps, namely, centrifugal pumps, electric heat pumps, electric rotary pumps, electric screw pumps, compressed air pumps, pumps as parts of machines, motors, and engines, hydraulic pumps and pneumatic pumps; compressors, namely, air compressors, electric compressors, centrifugal compressors, compressors as parts of machines, motors and engines; mills, namely, rolling mills; grinding mills for processing ores and minerals in the nature of rod mills, bar mills, rod and bar mills, rail mills, blooming mills, billet mills and heavy, medium and light section mills; floating and nonfloating drilling rigs; elevators and elevator controls, namely, parts of elevators, elevator motors, elevator lifts, elevator gears, elevator belts

Class 09

(2) scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, analyzing, indicating, signaling, monitoring apparatus, instruments and devices, including parts for all the aforesaid goods, namely, timers for recording and measuring electric currents, ammeters, volt meters, control and protective equipment for electrical networks in the nature of surge protectors; apparatus and instruments for the management, distribution, conversion, storage, regulation and control of electricity including parts for all the aforesaid goods, namely, electrical circuit boards, electrical cables, distribution boxes for electrical power, electrical conductors for electric motors, electrical converters, electrical controllers for diesel engines; data processing equipment, namely, calculators, computer programmes for document management, electronic tags for goods and computers; computer software for the optimization of electricity generating power plants, industrial plants, buildings and computer networks for the transport of electric energy, gas and oil, namely automation systems comprised of computers, industrial robots, motion sensors, pressure sensors, timing sensors, voltage regulators for electric power, computer software and databases for use in diagnosis, repair and configuration of computers, and computer software for controlling and operating laser rangefinders for monitoring and control of equipment, namely, electrical transformers, electrical relays, power switches, electric capacitors, electric circuit closers, electric control panels, electric power converters, and voltage regulators for electric power; computer software and hardware for wireless connection of electronic equipment, systems and apparatus with smart devices for remote monitoring and control; computer software for the collection and distribution of statistical production data for communication between handheld computers and industrial apparatus, namely, heating, air conditioning, ventilating, energy usage, lighting, fire alarm, and security access controllers; microprocessors; lasers for use in industrial cutting applications; chargers for electric accumulators, namely, electrical collectors, namely, photovoltaic cells, electrical storage batteries, electric capacitors, electric capacitors for telecommunication apparatus, electric accumulators for vehicles; electrical measuring and controlling instruments in the form of voltage regulators, namely, timers for recording and measuring electric currents, volt meters; electrical capacitors; electric collectors; electrical terminals; electrical cables, wires and wires; accumulator boxes and junction boxes; cable grommets for electrical wires and cable filaments for electrical wires; cable channels; inductors; magnetic data carriers, namely, blank floppy discs, blank hard discs, magnetic tape drives, magnetic tape units for computers, magnetic-stripe cards; semiconductors; electronic and electrical apparatus, devices and instruments including their parts for energy production, distribution and supply, in particular for alternative energy, namely, electrical transformers, electrical switchgear, namely, cut-out switches, circuit closers, electrical circuit breakers, electrical circuit breakers, electrical contacts, namely, electrical circuits, electrical outlets, electrical power connectors, electrical fuses, electrical surge arresters, reactor electric power, namely, electric power generators, electric generators, electric converters, compensators, namely, electrical power distribution blocks, electric semiconductor elements, photovoltaic solar modules, solar panels for production of electricity, solar batteries; fuel cells; blank floppy disks, magnetic disks and optical disks for electronic, magnetic and optical storage; data protection apparatus, namely, overvoltage protection solutions in the nature of surge protectors; computer peripherals, namely, computer printers, computer keyboards, computer monitors, computer mouse; current and voltage converters; current and voltage rectifiers; power converters, namely, electric power converters; electrical power connectors; connecting sleeves for electrical cables; electrical transistors, thyristors, diodes; power semiconductor devices, namely, electronic switches, voltage convertors, current rectifiers, shunts with drive electronics, shunts without drive electronics, power transistors, diodes, power diodes, power controllers, power monitors, current sensors and temperature

sensors; electrical transformers; electrical resistors; distribution boards, namely, circuit breaker panels and power distributing boxes; batteries, namely, general purpose batteries, solar batteries, electric storage batteries; integrated circuits (chips); circuit boards; diagnostic apparatus, namely, computer utility programs for providing diagnostic details on devices installed in a computer system; anti-interference computer hardware in the field of automated process control systems; computer memory, namely, flash memory cards, blank secure digital (SD) memory cards, computer memory expansion modules, flash memory expansion modules, memory boards, random access memory cards for use with data processing apparatus, namely, computers, calculators, tablet computers, smart phones, smart terminals; switchgear, in particular switchboards, cables and control buttons; cut-out switches; electrical relays; modems; electrical conduit pipes; electrical cables connectors; electrical measuring and regulating devices in the form of voltage regulators; sensors, namely, electric sensors, current sensors, voltage sensors and sensors for determining position, velocity, acceleration and temperature, biochip sensors, distance sensors, optical sensors, solar collectors; electrical fuses; circuit breaker; circuit breakers and circuit closers; voltage meter; electric and electronic installations for remote control of industrial process automation systems, namely, electronic notice boards as well as visual and acoustic warning signals, namely, switching connection panels, control panels, distribution consoles; automatic control systems for vehicles, namely, automatic indicators of low pressure in tires, cruise controls for motor vehicles, fuel level indicators for vehicles, simulators for the steering and control of vehicles; apparatus and installations for the transmission, distribution and control of electric current, namely, semiconductor power elements, electric usage meters, voltage testers, electric voltage transformers, voltage regulators, electric conductors, electrical reactors, electric capacitors, electric contacts, electric converters and inverters, metal grounding bushings and metal grounding clamps, both for use only as parts and fittings for coaxial cable, and not for non-electric cable and machinery and machine parts; power wires; power cables; transformers, namely, electrical voltage transformers, power transformers, electrical power reactors, namely, electrical converters, electrical relays and transformers, electric power generators and parts and fittings therefor; electrical sockets; solar cells; electric and electronic apparatus, devices and instruments including parts thereof for the production of energy, particularly alternative energy, namely, electric generators and replacement parts therefor and electrical and electronic apparatus and equipment all for use in generating energy obtained from alternative energy sources, namely, automatic switchboards, power distribution panels, distribution transformers, microcircuits, custom integrated circuits, electronic control panels, electric and electronic sensors, photovoltaic installations for generating solar electricity

(3) electronic controllers for industrial machines and diesel engines; automated process control systems comprised of computers, industrial robots, motion sensors, pressure sensors, timing sensors, voltage regulators for electric power, computer software and databases for use in diagnosis, repair and configuration of computers, and computer software for controlling and operating laser rangefinders in the field of electricity generating power plants and electrical control systems consisting of electric control panels, touch sensitive switches, automatic time switches, thermostats, electronic key fobs being remote control apparatus for heating systems, air cleaning units, air conditioners, air purifying units, cooling evaporators, electrical control systems for heating and air conditioning systems, industrial air purifiers, ventilating fans, water conditioning units and fans for motors and engines; facilities management control system products, namely, electronic controllers for heating, namely furnaces, air conditioning, ventilating fans, solar energy panels for production of electricity, lighting controls, fire alarm, and security access systems, namely, safety access controls in the form of safety alarm controls; facilities management control system products, namely, electrical control devices for the management of heating and energy, lighting controls, fire alarms, namely, thermostats, electromechanical controls for room thermostats, light

switches, dimmer switches, fire alarm control panels; security access controls in the nature of security alarm controllers, and climate control systems consisting of digital thermostats, air conditioning, heating, and ventilation control devices; controllers for ventilating, airconditioning and cooling systems (HVAC controllers) for controlling, gauging and monitoring climate control, air flow, residential furnaces, industrial furnaces, ventilating fans and air conditioning equipment; programmable electronic data acquisition and control apparatus for residential environmental monitoring, control, and automation of lighting, audio, HVAC, security alarms, home appliances, and devices connected to a global computer network, namely security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning and digital thermostats, and internet of things applications, namely, electronic controls for heating, air conditioning, ventilation, energy usage, lighting, smoke alarms and access control and computer software that allows the sharing and transmission of data and information in the field oil, gas, energy, transportation, water purification management processes between the aforementioned devices and networked computers for the purposes of facilitating environmental monitoring, control, and automation in residential settings; downloadable mobile computer software application for remotely managing, administering, modifying, and controlling home security and automation devices, namely, programmable electronic data acquisition and control apparatus for residential environmental monitoring, control, and automation of lighting, audio, HVAC, security alarms, home appliances, devices connected to a global computer network, namely security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning and digital thermostats; building automation systems, namely, programmable electronic data acquisition and control apparatus for residential environmental monitoring, control, and automation of heating, air conditioning, ventilating, energy, lighting, fire alarm, and security access controls and software for building automation systems, namely, security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning and digital thermostats; building automation equipment, namely, electric actuators, control circuit boards and control supervisory systems consisting primarily of electrical actuators; computer software and hardware for enabling wireless connections of electronic devices, systems and appliances, namely, for enabling connection and the sharing and transmission of said data and information in the field of oil, gas, energy, transportation, water purification management processes between networked smart-devices, namely, security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning, digital thermostats, computers, smart phones, tablet computers, calculators for remote monitoring and control; computer software platform for use in diagnosis, repair and configuration of computers and industrial machines in the fields of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in industrial utilities, namely, natural gas, petroleum, oil and carbon based fuels and effluent, raw plastic materials production processes, and in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; computer software for the collection and transmission of statistical production data for oil and gas field operations in computer networks to enable the sharing and transmission of data and information in the field of oil and gas field operations between computers and the connected consumer devices and the connected industrial apparatus, namely, namely, industrial robots, automatic switchboards, power distribution panels, electronic

control panels, electric and electronic sensors, security cameras, security lights, burglar alarms, fire and gas alarms, electric light switches, electronic controllers for heating, ventilation and air conditioning, digital thermostats; downloadable cloud computing software for information management, data collection and data analysis in the fields of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; downloadable computer software for information management, data collection and data analysis for the purposes of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; downloadable computer software application for information management, data collection and data analysis for the purpose of asset optimization, namely, process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; temperature, pressure and liquid level sensors, computer hardware and software programs for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; internet of things applications and other monitoring and control applications, namely, programmable electronic data acquisition and control apparatus, namely, computers, electricity meters, flow meters, gas meters, hydrometers, thermal meters for environmental monitoring, environmental control, and energy management, monitoring and inspecting equipment in a nuclear power station, electrical industrial controls for monitoring waste water treatment, electrodynamic apparatus for the remote control of railway points, firmware for remote monitoring of hardware, voltage monitor modules; remote monitoring apparatus, namely, acceleration sensors, pressure sensors, temperature sensors, humidity sensors, electric sensors, timing sensors and optical sensors; computer software for recording data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and machine diagnostic data in the field of oil, gas, energy, transportation, water purification management processes generated from audio and video recordings generated by machines and human beings; software for control and monitoring of communication between computers in automatic machine systems comprised of oil well boring machines, turbines for generation of electricity, high pressure water jetting system for the gas and oil industry, electric power generators; software platform for use in automated

process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; downloadable cloud computer software for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; downloadable application software for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil; downloadable software for use in automated process control systems, facilities management and distribution control systems to enable remote monitoring and operation of residential climate control and security systems, to control building environmental access and security systems, to control electricity generating power plants, industrial plants, buildings and networks for the transport of electric energy, gas and oil

Services

Class 37

(1) construction of gas treatment plants, oil processing plants, oil pumping stations, offshore oil and gas production installations, gas compressor stations, oil refineries and petrochemical plants; repair services, namely, repair of construction machines, repair of chemical processing machines, repair of semiconductor manufacturing machines, electrical repair of electrical motors, repair of power generators, electrical repair of lighting, repair of heating installations, repair of computer hardware, repair of office equipment, repair of computer networks; installation services, including advice relating thereto, namely, installation of electrical systems, solar energy based power plants, heating, ventilating and air conditioning systems, as well as installation of computer networks and computer systems, including consultation in the field of installation of computer networks and computer systems; maintenance and installation services for industrial installations, namely, installation and maintenance of electrical and generating machinery; installation, set-up, maintenance and repair of computer hardware and office equipment; maintenance of computer hardware, in particular computers and computer networks; installation, maintenance, repair and disassembly of machines and electrical apparatus and equipment, namely, electrical and generating machinery; installation and maintenance of oil pipelines; underwater construction; consultancy services in the field of automated process control systems, robotics, electricity generation, construction, solar energy based power plants, heating, ventilating and air conditioning systems, and systems for heating, ventilation, air-conditioning, production and distribution of electricity and computer hardware and computer software

Class 42

(2) scientific and industrial research in the field of mechanical engineering, machines and machine tools, power plants, electricity generation, energy efficiency, energy saving, environmental protection and data processing; scientific and industrial research in the field of software and networks online via a computer data bank and via computer networks; scientific and industrial research, namely research in the field of machine construction and engineering; creating programs for data processing; providing temporary use of online, non-downloadable Internet-based computer software for providing user access to a global computer network; providing technical

information regarding the use of computers, computer hardware, computer software, computer databases and computer networks; services of an industrial designer; services of a packaging designer; quality assessment, namely, materials testing, analyzing and evaluation; underwater exploration, namely, oil exploration, gas exploration; material testing; engineering consultancy services relating to environmental compatibility, energy conservation consultancy, technical advice on energy saving measures, technical advice on energy saving and efficiency; design of computer software, in particular in the field of computer security; network engineer services, namely, computer security consulting and computer network security services; scientific and industrial research in the field of network technology, namely, computer network design for others, computer network configuration services, design and development of wireless computer networks, computer software design and development; updating of computer software; carrying out chemical analyzes; execution of petroleum exploration; monitoring of oil drilling; preparation of analyzes for the extraction of oil; preparation of expert opinions on petroleum cork; services provided by a physicist, namely, research in the field of physics; research in the field of chemistry; services of a physicist; computer advisory services, in particular in the field of technical security; restoration of computer data; maintenance of computer software; computer system analyzes; development and research services relating to new products; research in the field of engineering, namely chemical, civil, and mechanical engineering and mechanical engineering; creating of technical opinions, namely, drafting services; engineering consulting services in the field of technical security; construction planning; technical consulting in the fields of computer science, chemistry, physics, solar energy based power plants, electricity generation, chemical engineering, mechanical engineer, computer engineering, automated process control systems, computer networks and computer systems; rental of software for data processing; software development; engineering surveying services, civil engineering drawing services, mechanical engineering, chemical engineering

(3) technological monitoring and control of mechanical and computer systems to ensure proper functioning in the fields of electric power distribution networks, machines and machine tools, namely, electrical and generating machinery; measuring and monitoring electricity consumption for electric power providers, and measuring and monitoring electricity consumption of machines and machine tools, namely, electrical and generating machinery; monitoring, diagnostic and inspection services for fault detection in electricity production, transmission and distribution systems and in machines and machine tools, namely, electrical and generating machinery; computer programming; analysis of computer software; consultancy relating to computers; analysis and design of computer systems and networks performance; providing online, nondownloadable software to enable customers to remotely manage, administer, modify and control home security and automation devices namely, lighting, audio, HVAC, security alarms, home appliances, internet of things applications, namely, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors, light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; information technology services, namely providing a web-based system and online portal (software), enabling customers to remotely manage, administer, modify and control home security and automation devices, namely, lighting, audio, HVAC, security alarms, home appliances, internet of things applications, namely, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors, light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; platform as a service (PAAS) offering computer software platforms for process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in

industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; software as a service (SAAS) featuring software for process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; software as a service (SAAS) featuring software for data collection and data analysis in the field of industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of management for industrial and residential buildings, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; software as a service (SAAS) featuring software for recording data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and industrial machine diagnostic data for use in the fields of industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines and process optimization of industrial operations in the field of oil operations for commercial and residential buildings, power stations, solar energy power plants, air, rail, ship and truck transportation and water purification management, and for the management, control, automation of devices, namely, computer software for connecting controlled hand-held devices, namely, hand-held computers and cellphones, to each other and the internet so the devices are able to transmit and receive data in the field of environmental monitoring, environmental control, and energy management, namely, monitoring and control of heating, air conditioning, and lighting systems in buildings; software as a service (SAAS) featuring software for recording, organizing, distribution and analysis of data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and industrial machine diagnostic data, and for the management, control, automation and network connection between devices, apparatus, sensors and control systems, namely, computers, cell phones, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors, light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; software as a service (SAAS) featuring software for recording, organizing, distribution and analysis of data, namely, video and sound recordings, namely, video surveillance recordings, and audio surveillance recordings, statistical production data, water quality reports, oil well testing data, and industrial machine diagnostic data, and for the control, automation and network connection between devices, devices, sensors and control systems, namely, computers, cell phones, motion detectors, smoke detectors, carbon monoxide detectors, security alarms, video cameras, remotely controlled audio, video and image capture, motion sensors, temperature detectors, water detectors, heat detectors, freeze sensors, flood sensors,

light sensors, remotely controlled door-locks, remotely controlled thermostats, remotely controlled appliance electrical switches; cloud computing offering cloud-based computer software platforms for the process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, water purification; providing temporary use of online non-downloadable cloud computing computer software platforms for the process optimization of mining operations in order to improve the efficiency of mining vehicles, mining machines, and mining equipment, and for use in industrial automation, namely, monitoring and control of heating, air conditioning, ventilation, energy consumption, lighting, fire alarms, and security alarms, machine diagnostics of industrial and mining machines, and optimization of productivity and performance of automation equipment in the fields of mining, healthcare, namely, medical clinics, hospitals, dental clinics, veterinary clinics, medical laboratories, manufacturing and infrastructure, namely, energy, namely, electricity, air, rail, ship and truck transportation, and water purification; technological consultancy services for the optimization of the operation, efficiency and functioning of electric power stations; engineering services and technical and technological consultancy services in the field of the measurement and monitoring of the use of power and energy to improve energy efficiency for owners and operators of industrial, commercial and governmental facilities; diagnostic services in the field of testing electricity generation and distribution, diagnostic services for fault detection in production, transmission and electricity distribution systems and in machines and machine tools, namely, electric drives for electric motors for machines, drive gears, electric motors for machines, machine tools for removing waste material, power tools; performance of chemical analyses; analyses for oil extraction; performance of exploratory drilling operations for oil; monitoring of oil wells; production of analyses for oil extraction, drawing up of experts reports about oil presence; computer support services, particularly in the field of technical security; computer data recovery; software maintenance; computer systems analyses; installation and maintenance of computer software and technical consultancy relating thereto; technological consultancy services in the field of automated process control systems, robotics, electricity generation, construction, solar energy based power plants, heating, ventilating and air conditioning systems, and systems for heating, ventilation, airconditioning, production and distribution of electricity and computer hardware and computer software; providing temporary use of non-downloadable software applications for accessing and using a cloud computing network; monitoring of computer systems by remote access

Claims

Priority Filing Date: October 03, 2016, Country or Office: SWITZERLAND, Application No: 62175 /2016 in association with the same kind of goods (1), (2) and in association with the same kind of services (1), (2)

Application Number 1,832,284 **Language of Application** English

Filing Date 2017-04-12

TRADEMARK DETAILS

LABELLUM

Trademark Type
Standard Characters

Goods

Class 03

(1) Fragrances, perfumery, cosmetics

Class 04

(2) Candles

Class 08

(3) Cutlery, flatware, hand operated home and kitchen tool and implements, namely, scissors, mandolin slicers, spatulas being hand tools, food dicers, food processors, mortars and pestles, non-electric juice presses, non-electric vegetable peelers, pizza slicers, apple corers, non-electric can openers, zesters, knives, oyster openers, hand tools for decanting liquids, and non-electric egg slicers

Class 14

(4) Jewelry

Class 16

(5) Pictures

Class 20

(6) Furniture, namely, living room furniture, picture frames, non-textile home accessories, namely, jewelry organizer displays, decorative boxes of wood, decorative figurines of wax and fabric, decorative party ornaments of plastic, magazine racks, hand-held mirrors, decorative mirrors, umbrella stands, shelves and drapery hardware, namely, traverse rods, poles, curtain hooks, curtain rods and finials; wood chopping blocks, pillows, cushions

Class 21

(7) Household and kitchen containers, namely, beverage containers and food storage containers; household and kitchen utensils, namely, serving scoops, spatulas, strainers, serving ladles, spoons, forks, kitchen tongs, turners, namely, spatulas and barbecue tongs, graters, barbecue branders, rolling pins, non-electric food mixers, hand operated whisks, tea strainers, drink coasters

and napkin rings; glassware, namely, beverage glassware; porcelain and earthenware, namely mugs, cups, bowls, plates, pitchers, figurines, decorative centerpieces, candle holders, flower pots, jars, butter dishes, serving dishes, serving platters, serving trays for domestic or household purposes, vases, jugs, trivets and saucepans

Class 24

(8) Textile products for the home, namely, bedding in the nature of bed linens, blanket throws, baby blankets, curtains, shower curtains, tablecloths, table runners, towels, wall hangings, coasters, namely, drink coasters, place mats and table napkins

Class 25

(9) Footwear, namely, shoes, boot and sandals

The translation provided by the applicant of the word(s) HEIMAT is HOMELAND.

Goods

Class 09

(1) Downloadable computer software for managing fitness club member accounts, operating fitness club check in, to operate payment gateway services, to permit the booking of fitness classes and fitness events to attend at the fitness club, for the booking of personal training sessions and spa treatments, to permit the booking and reserving parking spots at the fitness club, to permit the booking of appointments for related fitness and health club services, to show and demonstrate sport exercises and to provide fitness schedules, to track fitness progress of fitness club members, to book concierge services at the fitness club, to receive fitness club member newsfeeds pertaining to personal fitness status, fitness class information, fitness event information, personal training sessions and sales on spa treatments, managing fitness club member reward information, tracking invitations to fitness events by way of online calendar, managing and tracking pre-paid gift cards, to access an online fitness club associate for help on any of the fitness club services as well as help regarding the operation of the downloadable software, and to search and locate associated fitness clubs in the surrounding area.

Class 18

(2) Sports bags.

Class 21

(3) Drinking bottles for sports.

Class 24

(4) Towels of textile.

Class 25

(5) Clothing, namely, sports and lifestyle clothing, namely, shirts, t-shirts, sweat tops, knit tops, woven tops, halter tops, crop tops, fleece tops, hooded tops, warm-up tops, tank tops, vest tops, cycling tops, jogging tops, tube tops, bandeau tops, woven tops, muscle tops, sweat tops, knit

tops, crop tops, sweaters, pants, shorts, underwear, jackets, leggings; Headgear, namely, caps, hats, sweatbands, bandanas; Footwear, namely shoes and boots.

Class 32

(6) Non-alcoholic beverages, namely, lemonade, vegetable juices, fruit beverages, malt beverages, beer flavored beverages, tea flavored beverages and coffee flavored beverages; Mineral water; Still water; Aerated water; Flavoured waters; Bottled water; Canned water; Nutritionally fortified bottled water with added calcium, vitamin C, potassium, iron and protein; Functional water-based beverages, namely, quinine water, table water, seltzer water, scented water for making beverages, distilled drinking water; Isotonic beverages; Syrups for making beverages; Preparations for making beverages, namely concentrates for making fruit drinks and fruit juices, essences for making flavoured mineral water and soft drinks, fruit concentrates and purées used for making beverages, powders for making beverages, and syrups for making beverages; Juices; Smoothies.

Services

Class 35

(1) Advertising the goods and services of others; Business administration; Business management; Arranging of contracts, namely, outsourcing services in the nature of arranging services contracts for others; Procurement of contracts for third parties for the purchase and sale of goods and services; Arranging of contracts, for others, for the purchase and sale of films, video and audio recordings; Online commercial services, namely procurement of contracts for the purchase and sale of goods and services; Online commercial services, namely, retail sale of fitness club memberships, toiletries, hair care preparations, sports bags, drinking bottles, towels of textile, fitness and lifestyle clothing, fitness and lifestyle headgear, fitness and lifestyle footwear, lemonade, vegetable juices, fruit beverages, malt beverages, beer flavored beverages, tea flavored beverages or coffee flavored beverages, quinine water, table water, seltzer water, scented water for making beverages, distilled drinking water concentrates for making fruit drinks and fruit juices, essences for making flavoured mineral water and soft drinks, fruit concentrates and purées used for making beverages, powders for making beverages, and syrups for making beverages, via e-commerce on the Internet; Operation of a department store.

Class 38

(2) Broadcasting of films, video and audio recordings featuring music, movies, news, sports and advertising; Provision of Internet chatrooms and the electronic exchange of messages via Internet forums; Providing access to information on the Internet, namely, provision of access to online communities in which users create, view, edit, share information on a wide-variety of topics; Telecommunication services provided via Internet platforms and portals, namely, live chat and video chat, as well as text messaging and email services provided through a private and secure real time electronic communication computer network to transmit third-party graphics, images, audio and video by means of the Internet.

Class 39

(3) Travel arrangement, namely, coordinating travel arrangement for individuals and for groups; travel tour conducting; Arranging travel tours; travel agency services for planning, arranging and booking travel; Arranging airline tickets, cruise tickets and train tickets; Travel ticket reservation service; warehouse storage services.

Class 41

(4) Providing gyms and gymnastic studios and sports camps; Rental of sports equipment, except vehicles; Organization of sports competitions, namely gymnastic competitions, fitness contests,

cycling, triathlon; Event planning in the field of sports; Operating of fitness studios; Swimming facilities; Entertainment services, namely, organization of sports competitions, live performances by a musical band or individual performer, magicians and acrobatic dancers; Organization and conducting of cultural and sporting events, namely, music festivals, concerts, live theatrical productions, group exercise activities, group runs, sporting competitions, outdoor gymnastic classes, personal trainer instruction; planning and conducting of parties and special events for entertainment purposes; Conducting and organization of seminars and workshops in the field of physical fitness, health, nutrition, and life guidance; Personal trainer services; Gymnastic instruction; Event planning; Autogenic training namely training on passive concentration of bodily perceptions facilitated by self-suggestions. used to alleviate stress-induced psychosomatic disorders.

Class 43

(5) Pubs; Restaurants; Hotel services; Clubs; Bars; Cafés; Cafe-restaurants; Cafeterias; Restaurants (selfservice); Hotel and restaurant services, namely, lodging services and providing food and drink; Food and drink catering; Catering services; Provision of convention hall facilities and exhibition facilities in convention halls; Hotel reservations.

Class 44

(6) Solariums namely tanning salons; Health and wellness club services; Sauna services; Mental training, namely, mental health therapy services, mental health services; Massage; Health care in the field of therapeutic massage; Medical diagnostic services in the field of medical physical fitness testing and fitness evaluation.

Class 45

(7) Issuing licences for franchising concepts.

Class 06

(1) Common metals and their alloys; ores; metal containers for storage and transport; anchor plates and tie plates; arbours [structures] of metal; aviaries [structures] of metal; badges of metal for vehicles; balustrades of metal; barrel hoops of metal; barrels of metal; beak-irons [bick-irons]; beams of metal and girders of metal; bolt flats; branching pipes of metal; burial vaults of metal and tombs of metal; busts of common metal; cask stands of metal, casks of metal; metal canisters for packing spent nuclear fuel; cast steel; cast iron, unwrought and semi-wrought; cladding of metal for building; closures of metal for containers; common metals, unwrought and semi-wrought; containers of metal for storing spent nuclear fuel; copper, unwrought and semi-wrought; gutter pipes of metal; packaging containers of metal; reinforcing materials of metal for pipes

Class 07

(2) Machines and machine tools, namely, machine tools for removing waste material, nuclear waste management machines, machines for treatment, collecting, transfer and storage of nuclear waste, machines for storage and final disposal of nuclear waste; machine coupling and transmission components (except for land vehicles); bitumen making machines; blowing machines for the compression, exhaustion and transport of gases; concrete mixers [machines]; connecting rods for machines, motors and engines; cutting blow pipes, gas-operated; cylinder heads for engines; drilling rigs, floating and non-floating; excavators; electric hand drills; pneumatic jacks; milling machines; millstones; mine borers; power hammers; presses [machines for industrial purposes]; pump diaphragms; pumps [parts of machines, engines and motors]; pumps [machines]; pumps for heating installations; rubber tracks being parts of crawlers on construction machines; rubber tracks being parts of crawlers on machines; self-regulating fuel pumps; soldering blow pipes, gas-operated; tilt hammers; transmissions for machines

Class 09

(3) cash registers; computers; computer software, namely, computer programs and downloadable software for storage and final disposal of nuclear waste, computer software applications, downloadable for storage and final disposal of nuclear waste; accelerometers; actinometers;

aerometers; amplifying tubes and amplifying valves; anemometers; audio- and video-receivers; barometers; cables, electric; compact disc players; computer programmes recorded on software designed for use in nuclear waste management; computer keyboards; computer hardware; condensers [capacitors] and capacitors; densimeters; densitometers; discharge tubes, electric, other than for lighting; disk drives for computers; electricity conduits; electrolysers; ergometers; exposure meters [light meters]; optic cables; fire extinguishers; gas testing instruments; gasometers [measuring instruments]; hydrometers; identification threads for electric wires; inductors [electricity]; laptop computers; metronomes; micrometers and micrometer gauges; notebook computers; pedometers; planimeters; plumb lines; polarimeters; precision balances; pressure indicator plugs for valves; central processing units [processors]; range finders and telemeters; rods for water diviners; simulators for the steering and control of vehicles; smoke detectors; temperature indicators; thermionic valves and thermionic tubes; transponders; water level indicators; wires, electric

Class 12

(4) land vehicles for final disposal of nuclear waste; cars, automobiles and motor cars; driverless cars [autonomous cars], driving motors for land vehicles; driving chains for land vehicles; forklift trucks; freewheels for land vehicles; funnels for locomotives; handling carts; hydroplanes; locomotives; lorries and trucks; mine cart wheels; mobility scooters; mopeds; motor buses; motors, electric, for land vehicles; omnibuses; repair outfits for inner tubes; rolling stock for railways; solid tyres for vehicle wheels; tilt trucks; tractors; tramcars; undercarriages for vehicles; vans [vehicles]; electric vehicles; wagons

Class 19

(5) non-metallic rigid pipes for building; asphalt, pitch, tar and bitumen; monuments, not of metal; asphalt, bitumen; cement slabs; cement posts; raw chalk; coal tar; concrete; drain pipes, not of metal; drain traps [valves], not of metal and plastic; earth for bricks; fireproof cement coatings; granite; grave and tomb slabs, not of metal; gravel; gutter pipes, not of metal; limestone (calcareous stone); magnesia cement; manhole covers, not of metal; penstock pipes, not of metal; sandstone for building; sandstone pipes; shuttering, not of metal for concrete; slate; slate powder; tomb or grave enclosures, not of metal; tombs, not of metal; waterpipe valves, not of metal or plastic; water-pipes, not of metal

Services

Class 35

(1) professional business consultancy and organization consultancy concerning industrial installations in particular nuclear installations relating to storage and final disposal of nuclear waste

Class 37

(2) Building construction; maintenance, namely, maintenance of machines and devices, apparatus and instruments, namely, boring rigs, canister hole boring devices, bentonite buffer installation devices, canister transfer and installation devices, tunnel backfilling devices, spent nuclear fuel encapsulation plant process devices, machinery and automation, geoscientific monitoring devices and instruments, drilling devices and apparatus, technological surveillance devices and instruments, canister transport and installation devices, transport and handling devices and apparatus for final disposal canisters, handling devices and instruments for bentonite blocks, collection devices and apparatus, purpose-build sampling devices, rock-mechanical measuring instruments, water injection devices, hydration devices, field testing devices, measuring devices, core instruments, auger devices, clamping devices, monitoring instruments, control devices, sensor devices, gripping devices, backfilling installation devices, data collection instruments for

treatment, collecting, transfer and storage of nuclear waste, maintenance of nuclear waste storage and final disposal facilities, maintenance of machines for deep geological final disposal facility of spent nuclear fuel; repair, namely, repair of machines and devices, apparatus and instruments, namely, boring rigs, canister hole boring devices, bentonite buffer installation devices, canister transfer and installation devices, tunnel backfilling devices, spent nuclear fuel encapsulation plant process devices, machinery and automation, geoscientific monitoring devices and instruments, drilling devices and apparatus, technological surveillance devices and instruments, canister transport and installation devices, transport and handling devices and apparatus for final disposal canisters, handling devices and instruments for bentonite blocks, collection devices and apparatus, purpose-build sampling devices, rock-mechanical measuring instruments, water injection devices. hydration devices, field testing devices, measuring devices, core instruments, auger devices, clamping devices, monitoring instruments, control devices, sensor devices, gripping devices, backfilling installation devices, data collection instruments for treatment, collecting, transfer and storage of nuclear waste, repair of nuclear waste storage and final disposal facilities, repair of machines for deep geological final disposal facility of spent nuclear fuel; installation services, namely, installation of machines and devices, apparatus and instruments, namely, boring rigs, canister hole boring devices, bentonite buffer installation devices, canister transfer and installation devices, tunnel backfilling devices, spent nuclear fuel encapsulation plant process devices, machinery and automation, geoscientific monitoring devices and instruments, drilling devices and apparatus, technological surveillance devices and instruments, canister transport and installation devices, transport and handling devices and apparatus for final disposal canisters, handling devices and instruments for bentonite blocks, collection devices and apparatus, purpose-build sampling devices, rock-mechanical measuring instruments, water injection devices, hydration devices, field testing devices, measuring devices, core instruments, auger devices, clamping devices, monitoring instruments, control devices, sensor devices, gripping devices, backfilling installation devices, data collection instruments for treatment, collecting, transfer and storage of nuclear waste, installation of nuclear waste storage and final disposal facilities, installation services of machines and devices, apparatus and instruments, namely, boring rigs, canister hole boring devices, bentonite buffer installation devices, canister transfer and installation devices, tunnel backfilling devices, spent nuclear fuel encapsulation plant process devices, machinery and automation, geoscientific monitoring devices and instruments, drilling devices and apparatus, technological surveillance devices and instruments, canister transport and installation devices, transport and handling devices and apparatus for final disposal canisters, handling devices and instruments for bentonite blocks, collection devices and apparatus, purpose-build sampling devices, rock-mechanical measuring instruments, water injection devices, hydration devices, field testing devices, measuring devices, core instruments, auger devices, clamping devices, monitoring instruments, control devices, sensor devices, gripping devices, backfilling installation devices, data collection instruments for nuclear waste storage and final disposal facilities, installation of machines for deep geological final disposal facility of spent nuclear fuel; asphalting; building construction supervision; rental of cranes [construction equipment]; demolition of buildings; drilling of wells; drilling of deep oil or gas wells; heating equipment installation and repair; hydraulic fracturing services; installation, maintenance and repair of computer hardware; masonry; mining extraction; motor vehicle maintenance and repair; pipeline construction and maintenance; plumbing; pumicing; pump repair; quarrying services; vehicle maintenance; vehicle breakdown repair services; warehouse construction and repair; Repair or maintenance of nuclear power plants; Providing information relating to the repair and maintenance of nuclear power plants; Servicing of nuclear plant; Cleaning of nuclear plant

(3) Nuclear waste treatment; Decontamination of nuclear waste; Processing of nuclear fuels; Providing information relating to nuclear waste treatment; Consultancy in respect of nuclear waste treatment and disposal of spent nuclear fuel; Nuclear Waste Management; Disposal of spent nuclear fuel

Class 41

(4) Education in the field of nuclear waste management and nuclear waste final disposal; providing of training in nuclear waste management and nuclear waste final disposal; arranging and conducting of conferences, congresses and seminars in the field of nuclear waste management and nuclear waste final disposal; on-line publication of electronic books and journals; on-line publication electronic publication of electronic books and journals, and providing on-line electronic publications, not downloadable, in the field of nuclear waste management and nuclear waste final disposal

Class 42

(5) Scientific and technological services and research and design relating to nuclear waste management and nuclear waste final disposal; industrial analysis and research services, namely, safety analysis and research services in the field of nuclear waste management and nuclear waste final disposal; design and development of computer hardware and software; architectural services; bacteriological research; chemical analysis; chemical research; computer programming; computer software design; computer system analysis; computer software consultancy; construction drafting; consultancy in the field of energy-saving; conversion of data or documents from physical to electronic media; data encryption services; energy auditing; engineering services in the field of nuclear waste management and nuclear waste final disposal; geological surveys; geological prospecting; geological research; installation of computer software; land surveying; maintenance of computer software; monitoring of computer systems by remote access; quality control for the nuclear waste management and nuclear waste final disposal; research and development of new products for others; research in the field of environmental protection; provision of scientific information and scientific research in the field nuclear waste management and nuclear waste final disposal; advice and consultancy in relation to carbon offsetting; technical research in the field of nuclear waste management and nuclear waste final disposal; conducting technical project studies; water analysis; Consultancy services relating to nuclear engineering; Nuclear engineering services; Testing of nuclear material

Goods

Class 07

(1) Auxiliary power units for supplying electrical power to heat and power generators; energy solutions or energy systems, namely, power and electric generating systems, composed of vapour expansion engines, turbine-generator packages for conversion of thermal energy to electricity, electric generators and structural parts thereof; retrofit systems for energy systems, namely, power and electric generating systems, composed of vapour expansion engines, turbine-generator packages for conversion of thermal energy to electricity, electric generators and structural parts thereof; power units for supplying electrical power to remote locations.

Class 09

(2) Energy storage systems namely at least one heat storage unit arranged to store energy in the form of heat; Energy management systems namely hardware and computer software for managing and distributing energy in the form of electricity and heat; energy optimization systems namely hardware and computer software for optimizing energy usage and for reducing overall energy consumption; demand response systems namely hardware and computer software for enabling additional production of electricity at times of high demand; computer software for managing and controlling power units, heat engines, devices and plants using heat to producing energy.

Class 11

(3) Heat pumps for energy processing; power plants; geothermal plants; power converters for the production of electricity for industrial purposes, which are powered by a process that captures and converts wasted energy in the form of heat produced during manufacturing processes into electricity.

Services

Class 37

(1) Installation, repair and maintenance of power units for supplying electrical power, power generating systems, and power plants; plant construction, maintenance and construction project management services for businesses in the energy production and transmission sector.

Class 40

(2) Providing information in the fields of power generation, alternative energy generation, production of geothermal energy; energy generation services; production of energy, energy storage, energy management, and management of demand response to reduce energy consumption.

Class 42

(3) Providing information in the field of design, development and implementation of power units for supplying electrical power, power plants and heat pumps for energy processing; technological consulting services in the fields of alternative energy generation, energy storage, energy management, and demand response; research in the field of energy; Providing access to computer software for managing and controlling power units for supplying electrical power, heat engines, devices and plants using heat to producing energy; Electrical engineering services; Technical design services relating to power plants; Analysis and testing services relating to electrical engineering apparatus; Engineering services in the field of electrical power production.
