### General Information

---

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

---

### Electronic *Trademarks Journal*

---

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

---

### Official Languages

---

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

---

### Filing Dates

---

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

---

## Nice Classification

---

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Computer software for managing online content, namely database management software, computer programs for document management, computer utility programs for file management, computer software for creating and inserting meta tags into documents and information, computer software for processing words, photographs and images, computer software for transmitting graphic symbols to mobile telephones, computer software for creating and editing music, computer software for managing audio, video and multimedia content, namely computer software for creating and editing music and sounds, computer software for creating and editing videos; application software, namely downloadable applications for hand-held computers to enable the streaming of music, downloadable applications for hand-held computers for taking and editing digital photographs, downloadable applications for hand-held computers for downloading music, films and television programs; computer software for the collaborative design, development and editing of the editorial website content and for the management of websites; computer software for administering, recording, accessing, finding, categorizing, searching, archiving and transmitting digital files, databases, documents, images, audio files, videos and films; operating software for limited-access (intranet or extranet) and universal-access (Internet) site servers; compact discs, DVDs, CD-ROMs and all other physical media, namely USB keys, containing computer software for administering, recording, accessing, finding, categorizing, searching for, archiving and transmitting digital files, databases, documents, images, audio files, videos and films.

**Services****Class 35**

(1) Computerized data processing and data management services, namely word processing, management and compilation of computer databases, including the compilation of computer data for customizing and contextualizing the user experience, in the form of the collection, segmentation, extraction, aggregation and processing (manual or automatic) of data; multi-site data file processing and management services, namely computer file management in the form of client data collection and analysis, Internet site customization, user experience personalization, database compilation and analysis; computer database management.

**Class 41**

(2) Education and training related to computer software; education and entertainment services, namely conferences and workshops related to the development and design of open-source software for the collaborative design, development and editing of editorial website content and the management of user interfaces for websites and applications.

**Class 42**

(3) Design and development of computer software; compilation of data processing software; development and design of open-source software for the collaborative design, development, editing and management of editorial content for websites and applications; design, maintenance and updating of software solutions, namely provision of online SaaS-type software and computer software (downloadable or non-downloadable and accessible through a service platform) for remote management and publishing and for the development of Internet applications; hosting of websites providing open-source software for the collaborative design, development, editing of website content and the management of websites; computer network security services, including subscription and management of network and computer service access rights; provision of application services, namely services provided to businesses for the management of their Internet sites and application user interfaces, namely technical auditing of websites, technical consulting for websites, technical analysis of websites, development, creation, installation and maintenance of Internet sites; consulting and support services related to computer systems and software; installation, maintenance and repair of computer software; updating and upgrading of computer software; integration and configuration of computer systems; provision of temporary use of non-downloadable software for the development and management of web applications, creation and management of websites, creation, editing, management and organization of content designed for the Internet and an intranet network; web page development.

### Goods

#### Class 01

(1) Chemicals for use in energy production; unprocessed artificial resins, unprocessed plastics; manures; fire extinguishing compositions; synthetic resin adhesives for industrial purposes; ion-exchanger resins in the form of chemical preparations; ion-exchanger resin membranes in the form of chemical preparations; fuels for nuclear reactors; water purification chemicals; hydrogen; uranium

#### Class 04

(2) Industrial oils and greases; industrial lubricants; dust removing preparations; fuel gas, fuel oil and gases for use as illuminants; electrical energy from renewable sources; fossil fuels; biofuels; peat for use as fuel; waste for use as fuel; gases for use as fuel; biogas for use as fuel; bio oil for use as fuel; pyrolysis oil; wood charcoal; aviation fuels; natural gas; coal; biomass fuels; fuel oils; fuels derived from organic and non-organic waste;

#### Class 06

(3) Common metals and their alloys; metal building materials, namely, metal pillar posts, ceiling boards of metal, floor boards of metal, lattice panels of metal, metal trellises and metal cupolas; metal reinforcement materials for building; transportable buildings of metal; non-electric cables and wires of common metal; ironmongery; small items of metal hardware, namely metal nuts and screws, locks of metal; metal branching pipes, metal gutter pipes, metal drain pipes, squeeze tubes of metal; metal tanks for storage and disposal of waste; metal containers for storage and disposal of waste; posts of metal for power lines; metal feed water tanks for use in power generation plants (parts of machines)

#### Class 07

(4) Machines and machine tools in the field of energy industry, namely, generators for electricity, pumps used in power plants and industry, water turbines and wind turbines, waste crushing

machines, conveyors used in power plants and industry, heat exchangers for power plants, industry and buildings, steam turbines for use in power generation plants, gas turbines for use in power generation plants, turbine blades for production of electricity; motors and engines used in industrial applications; machine coupling and transmission components except for land vehicles; turbines for power plants; turbines for generation of electricity and turbine blades therefor; generators for industrial machinery; turbine generators; power plant boilers for wind, water, steam and gas turbines; heat exchangers as parts of machines; pumps as parts of machines, motors and engines; coal pulverizers; conveyors; machines for processing water; machines and devices for processing sewage water; machines for processing radioactive materials; machines for processing nuclear power plant waste; equipment and machines for milling waste; windmills; waste disposal apparatus and machines, namely, waste crushing machines, waste compacting machines, waste compactors, waste material conveying machines, waste separating machines; sewage treatment machines and apparatus, namely, sewage pulverizer machines; machines for handling nuclear waste

### **Class 09**

(5) Electrical controllers for monitoring the use of energy, distribution of energy and energy efficiency; electrical power switches used in the field of energy, distribution of energy and energy technology; equipment for power conditioning and power conversion, namely, electric converters; electric storage batteries; electrical apparatus and instruments related to customers consumption of energy, namely, remote and automatic energy consumption meters; electrical ducts; flash memory cards and hard disc drives featuring data in the field of energy-intensive industries and the energy industry; recording discs, namely, downloadable electronic publications, namely, magazines and manuals in the field of energy-intensive industries and the energy industry; DVDs containing audio and video data in the field of energy-intensive industries and the energy industry; other digital recording media, namely, digital versatile discs featuring data in the field of energy-intensive industries and the energy industry; computers in the field of the use of energy, distribution of energy, energy efficiency and energy technology; computer software for calculating electricity usage and for monitoring electricity meters in the field of the use of energy, distribution of energy, energy efficiency and energy technology; computer software for management of energy data, process control and production planning; computer software for simulation of power plant processes; computer software for management of archived data and for use on revision optimization of power plants and turbines; computer software for modeling combustion in power plant boilers; electricity grid apparatus, namely, electric voltage transformers, electrical relays and transformers, distribution transformers; remote and automatic energy consumption and production meters; apparatus for smart electricity grid comprised primarily of microprocessor based computer operating system hardware and software, inverters, converters, transformers, and electronic power connectors; constructional measuring, adjusting and supervision equipment, namely, electric switches, electric transformers, and electric meters; electrical apparatus and instruments used in connection with electrochemical storage of energy, namely, accumulators, batteries, fuel cells, battery chargers; apparatus for control and transformation of power, namely, batteries, electrical controllers and electric transformers; electric accumulators for electric control panels and electric controllers; solar batteries; turbine vibration measurement systems, namely, electronic vibration meters; remotely read electricity meters; electricity meters; energy meters for tracking and monitoring energy usage; electrical systems consisting of regulators, thermostats and electrical resistance filaments; electrical coupling panels; electrical connectors; multipole connectors; electrical sockets; power switchboards; electrical fire, smoke and motion detectors; wireless remote control units and remote controllers to remotely monitor and control the function and status of other electrical, electronic, and mechanical devices or systems, namely, security systems,

lighting systems, heating systems, and ventilation systems; electric timers for electric controllers; electronic alarm monitoring systems; fire alarm devices, namely fire alarm control panels, smoke detectors, heat detectors, alarm pull stations, audible and visible notification appliances, strobes, sirens, bells, horns, and speakers; solar panels for production of electricity; azimuth instruments, namely surveying instruments; electric cables; optical cables; fiber optical cables; electric cable tubes; charging apparatus, namely, electric car chargers; charging poles, namely, electric car charging poles; charging apparatus and charging poles, namely, charging stations for charging electronic vehicles; chargers for electrical batteries; led monitors for use with battery chargers; battery charge level indicators; software for management, namely, collection, analysis and storage, of electrical energy data, process control, production planning and optimization; computer programs for simulation and modeling of power plant processes; power plant simulators, namely, computer programs for simulating power plant energy production processes; computer programs for modeling combustion in power plant boilers; software for remote monitoring of power plants; revision optimization software, namely, software used to optimize electrical output at a power plant; computer programs for document management and management of archived data; computer terminals; energy consumption display units; electronic and computer devices for wireless data transmission, namely, electronic communications systems comprised of computer hardware and software for the transmission of data between two points; terminals for electronic payments with credit and debit cards; downloadable electronic publications in the nature of magazines, books and newsletters, handbooks and manuals in electronic form; electronic bulletin boards; computers and computer hardware relating to distribution of energy, energy efficiency and energy technology;

#### **Class 11**

(6) Power plants for generation of heat and steam; heat pumps for use in energy production; nuclear generators and nuclear reactors; industrial boilers for use in power plants; boilers for heating units; combustion chambers; oil burners; gas burners; oil heating apparatus, namely, oil heaters, oil boilers, furnaces and ducts; heat pumps; water control valves for faucets; collectors of solar thermal energy; heating systems consisting of regulators, thermostats and electrical resistance filaments; steam accumulators; water purification plants; clarification plants, namely, water filtering installations, chemical sterilization installations, and water filtration installations; purification plants for industrial wastewater; boilers, tanks, purifiers, filters, machines and valves for use in the treatment of wastewater; purification apparatus for use in the processing of wastewater; purification installations for waste materials; water filtering units for industrial use; water treatment plants; sewage treatment plants; purification installations for waste material and liquids; water filtering machines

#### **Class 16**

(7) Paper and cardboard; printed matter, namely, brochures, leaflets, handbooks, company magazines, newsletters, periodicals, stock market bulletins and manuals in paper form in the field of energy-intensive industry and energy industry; photographs; educational books; pens; brochures, magazines, posters, postcards, stickers, handbooks and manuals in paper form; company magazines; printed news reports in the field of energy-intensive industry and energy industry; newsletters; periodicals; lecture folders; educational folders, namely, folders for papers

#### **Class 17**

(8) Plastics in extruded form for use in manufacture; semi-worked plastic substances; recycled plastics; granules and aggregate of recycled polyethylene, polypropylene and polyethylene terephthalate

#### **Class 19**

(9) Non-metallic building materials, namely, fiberglass panels; floor boards of wood, plastic, rubber and recycled materials, and non-metal heating ducts; PVC rigid pipes for construction purposes; non-metallic storage sheds; non-metallic utility poles; non-metal chimneys; electrical substation buildings, non-metallic, transportable; doors and windows made of wood, plastic, rubber and recycled materials; glass for buildings; building materials of recycled plastic; planks, plank boards, interlocking plank boards, beams and posts of plastic

### **Class 31**

(10) Agricultural seeds, horticultural mulches; litter for animals

### **Services**

### **Class 35**

(1) Advertising agency services; business management; business administration; providing business marketing information for others; business marketing consulting services; advice in the field of marketing; mediation and conclusion of electronic commercial transactions for others; commerce or electronic commerce services, namely, providing information about products and contracts via telecommunication networks for advertising and sales purposes in the fields of electricity, heat, steam, district heating, and district cooling; electronic retailing and wholesaling of different types of meters, monitoring and control devices relating to energy via Internet and extranet; presentation of services relating to sales of energy, namely, providing a service that allows customers to purchase energy, electricity, renewable energy, heat and related apparatus, namely, home meters, solar panels; negotiation and conclusion and conclusion of commercial transactions for third parties; arranging of trading transactions and commercial contracts; arranging contracts for the purchase and sale of products, for others; business management assistance and consultancy in the field of energy intensive industry and energy industry; compilation of information relating to business into computer databases; advising relating to business management; research relating to business management; business appraisal and auditing services; business efficiency expert services; compilation, systematization and organization of business information into computer databases; storage of data in a computer database; computerized search and retrieval of energy related data and information for others from computer files; collection of business and energy industry information for databases; compilation of computerized databases; updating of computerized databases; systematization of computerized databases; updating and maintenance of data in computer databases; database management; consultation relating to data processing; services organized online and via Internet extranet networks, namely search, retrieval, indexing and organization of business data in electronic telecommunication networks; on-line advertising the goods and services of others on computer communications networks; production of advertising audio-visual recordings and advertising materials for others; publication of advertising leaflets; analysis, management and optimization of costs relating to the use and maintenance of machines, devices and power plants; computerized processing of energy related data in the field of energy industry; electricity meter reading for billing purposes

### **Class 36**

(2) Insurance; financial analyses; financial analysis consultation services; real estate affairs; electronic transfer of funds and money relating to energy stock exchange; capital and money transfer via computer communications networks; electronic bill payment; processing of credit and debit card payments; electronic transfer services for capital; electronic transfer services for funds; investment management services; advisory services relating to investment analysis, appraisal and consultation; electronic payment services involving electronic processing and subsequent transmission of payment data

**Class 37**

(3) Repair of machines and instruments being part of power plants and electricity grids; installation of machines and instruments being part of power plants and electricity grids; construction, overhaul, repair and installation services for production, transmission and supply of energy in power plants and transmission networks; assessment and inspection services relating to construction, overhaul, use, maintenance and repair in power plant operations and the energy industry; installation, use, overhaul and maintenance services for equipment used in the production, transmission and supply of energy; power plant construction; mobilization services of power plants, namely, installation, maintenance and repair services, namely, the installation, maintenance and repair of power plant safety systems; installation, operation, overhaul, maintenance and advisory services for different types of power plants and industrial production plants; planning services relating to maintenance of power plants and electricity grids; construction, installation, overhaul and repair of power plant boilers; construction and installation of power plant air ducts; construction and installation of power plant burners; overhaul and repair of burners; overhaul of turbines; overhaul of generators; anticipatory maintenance of power plants and industrial machinery; analyzing failures and repair needs for machines and apparatus used in the energy industry; building and installation of energy solutions for buildings as well as cooling solutions for computer rooms and industrial processes; installation, overhaul and advisory services for solar electricity systems; installation, overhaul and advisory services for solar heat systems; construction of waste incineration plants and waste processing plants; construction, overhaul, repair and installation of waste incineration equipment; installation and repair of electrical, heating and central heating equipment; maintenance of hardware for process automation systems and computer systems; renovation and restoration of electric power transmission networks; cable laying; drilling of pipelines; drilling of pipes; inspection, control and repair of oil burners; charging point and charging station services for electric vehicles; installation, maintenance and repair of battery charging apparatus and electronic video surveillance installations; battery charging relating to computers; installation, maintenance and repair of district heating apparatus, namely cogeneration plants, boilers, heat pumps and insulated pipes; construction of nuclear reactors; cleaning of nuclear plant

**Class 38**

(4) Telecommunication services, namely, personal communication services, local and long distance transmission of voice, and text messages by means of broadband, copper and optical, power lines and wireless networks; electronic and digital transmission of information relating to production and use of energy; providing access to a global computer network; providing telecommunications connections to the Internet; providing access to Internet and extranet; leasing access time to a computer database via global computer networks; personal communication services; electronic mail transmission services; operation of an electronic bulletin board containing information in the field of energy; leasing access time to an electronic bulletin board in the field of energy production and consumption; providing an online bulletin board in the field of energy production and consumption; providing electronic transmission of electronic payment data for enabling activation and payment of charging station visits for electric vehicles; broadcasting of radio and television programs; broadcasting of radio and television programs relating to the energy industry via Internet; providing access to extranet accounts for management of customer data

**Class 39**

(5) Transport and storage of refuse, trash and waste; utility services in the form of energy, electricity and heat transmission and distribution; utility services in the form of natural gas distribution; consultation services relating to transmission and distribution of energy; storage of

energy; storage of electricity; storage of heat; delivery of reserve power, steam, pressurized air and water; carbon dioxide storage; management, use and control of electricity and heat supply networks; freight transportation by means of truck, rail, air, and ocean; utility services in the form of energy distribution, namely supply of natural gas, electricity, heat and district cooling

#### **Class 40**

(6) Fuel, emission, gas and waste treatment services; generation of power; generation of electricity; generation of heat; generation of steam; generation of district heating and district cooling; combined generation of electricity and heat; combined production of heat/ steam and electricity; consultation services relating to production of energy; control of combustion services for combustion and burning technologies and boilers in the field of energy generation; capture and treatment of carbon dioxide; treatment of ash for energy generation purposes; waste treatment, namely, treatment of water, waste water, sewage water and liquids; incineration of waste and trash for production of energy; consultation services relating to waste treatment; nuclear waste processing services; decontamination of nuclear waste; treatment of water, waste water, sewage water and liquids; services for removing components from liquids by selective ion exchange materials; water purification for nuclear power plants; services for removing radioactive components from radioactive waters in nuclear power plants; decontamination of hazardous waste; rental of water treatment equipment; refining of materials by catalytic pyrolysis process; consultation relating to the production of energy via remotely controlled power plants; processing of nuclear fuels; nuclear fuel recycling; treatment of contaminated soil; high temperature incineration of hazardous waste; carbon dioxide capture

#### **Class 41**

### Colour Claim

Colour is claimed as a feature of the trademark. The colours blue, yellow, orange, brown, gold and white are claimed as a feature of the mark. The mark consists of a blue shield with a beveled edge of dark and light blue bands. The blue shield is outlined with a beveled border of alternating yellow and gold bands. The stacked words "Fresh Step" appear in white with light blue beveled initial case lettering on a blue background. The background has a light blue highlighted focal point behind the "E" of "FRESH". Violating the bottom right corner of shield is a fanciful cat design. The cat is orange and brown-striped, tuxedo pattern with white whiskers and a pink nose. The cat has white paws, chin and cheeks with a white blaze between the eyes. The cat is wearing a blue neck collar with a gold-framed, white medallion. The cat's eyes are blue and ears are orange and brown. The end of the cat's orange and brown-striped tail appears behind the cat's head. The white background is not part of the mark.
