Trade-marks Journal

2019-01-23 — Vol. 66 No. 3352

# Trade-marks Journal

## Vol. 66 No. 3352

---

### General Information

---

The *Trade-marks Journal* is published every week in compliance with [Rule 15 of the Trade-marks Regulations](#). The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

---

### Electronic *Trade-marks Journal*

---

The *Trade-marks Journal* is available in electronic form on the CIPO web site (<http://cipo.gc.ca>). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

---

### Official Languages

---

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

---

### Filing Dates

---

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

---

## Nice Classification

---

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see [section 38 of the Trade-marks Act](#) for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

### Goods

computer application software for scheduling, providing information on, and advertising musical concerts, for desktop computers, laptop computers and mobile telecommunication devices, such as cellular telephones and electronic tablet computers; printed periodicals in the field of dance; printed periodicals in the field of music; printed periodicals in the field of figurative arts; books and magazines; downloadable digital books; downloadable electronic publications in the nature of magazines; computer hardware such as USB flash drives; coffee mugs, pens and key pendants; shopping bags, backpacks and kit bags; clothing such as, hats, jackets, T- shirts, sweatshirts, golf shirts, fleece vests, belts, belt buckles, scarves and gloves; guitar picks, carrying straps for musical instruments, cases for personal media players; bottles for water, sold empty; pre-recorded CD's and DVD's featuring music, music videos and information in the field of music; downloadable music; downloadable video recordings featuring music

### SERVICES

business management consulting services for multimedia production and marketing companies, business management consulting services for musical, theatrical and artistic performers, business management consulting services for live performance production and recording companies; investment counseling and management services with respect to the sectors of multimedia production and marketing, musical, theatrical and artistic performance, and live performance production and recording; production services for live and recorded music performances; distribution services for audio recordings featuring music; distribution services for video recordings featuring music; music educational services for performance by musical instrument, singing and musical composition; musical recording studio production services; musical performance production services; musicals production services; music radio show production services; music television show production services; special event production services which feature audio recordings of music; special event production services which feature video recordings of music; distribution of downloadable music; distribution of downloadable video recordings featuring music; distribution of downloadable audio recordings of music; distribution of downloadable video recordings of music; distribution and sale of written articles and promotional materials in the field of paintings, drawings and photographs; distribution and sale of books and magazines; distribution of downloadable books and magazines

### Goods

Electronic test and measurement instruments, namely, oscilloscopes and parts therefor; electronic instruments in the nature of signal generators, namely, analog and vector signal generators, waveform generators, function generators in the nature of electronic devices used to generate various types of repeating waveform signals over a wide range of frequencies, pulse generators, digital pattern generators, arbitrary waveform generators, noise generators in the nature of electronic devices that produce random signals, and signal generation devices synthesizing electronic signals, and synchronization modules for various types of signal generators, remote controls for the aforesaid goods; electronic test and measurement instruments in the nature of analyzers, namely, spectrum, vector, signal, network, power and power source, protocol, radio frequency, microwave, logic, modulation-domain, optical component, light wave component, optical modulation, time-interval, polarization, and photonic dispersion and loss analyzers; automatic test equipment for integrated circuits, circuit boards and electronic equipment, namely, flat panel display testers, system on a chip (SOC) testers, memory testers, parametric testers, automated optical inspection testers, and in-circuit testers; electronic and optical communications instruments, namely, light wave testers and light wave multimeters; electronic component of digital multimeters for testing and measuring voltage in electrical products; measuring instrumentation and apparatus, namely, digitizers; test and measurement equipment, namely, electromagnetic interference receivers, radio frequency interference receivers, and electromagnetic compliance products, namely, electromagnetic interference receivers for testing electromagnetic compliance and making conductive emission measurements; polarization controller units used to change light from any polarized or unpolarized light source into any well-defined state of polarization; electronic test and measurement instruments, namely, electric meters, inductance meters, capacitance meters, resistance meters, impedance meters, acoustic testing meters, flow testing meters, vibration testing meters, ohmmeters, ammeters, voltmeters, microwave meters, electromagnetic interference meters, power meters, wavelength meters, frequency meters, and frequency counters, and remote controls for the aforesaid goods; electrical and electronic measuring and testing devices, namely, DC electronic load measurers and testers; electronic test and measurement instruments in the nature of testers, namely, cable, radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, voltage, amperage, telephone line, and continuity testers, and remote controls for the aforesaid goods; electronic test and measurement instruments, namely, handheld cable and antenna testers for

radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, with optional spectrum analyzer, network analyzer, and power meter and remote controls for the aforesaid goods; electronic testing equipment, namely, power meters for testing radio frequency and microwave signals; electronic and optical communications instruments and components, namely, communication link testers for testing connections within local area networks, fiber optic cables, digital cables, telephone cables, computer networks and connection to servers, and remote controls for the aforesaid goods; testing apparatus for testing circuit boards; electronic apparatus for testing electromagnetic properties and characteristics of industrial materials, namely testers for measuring how industrial materials interact with electromagnetic fields to calculate their related properties, namely electromagnetic permittivity, conductivity, resistance, impedance and electromagnetic permeability; electronic test and measurement instruments, namely, voltmeters and source measure units; test and measurement equipment, namely, one box testers containing a signal source and a signal analyzer for testing microwave generators and transmitters, and wireless communication signal strength, signal quality and protocol compliance; electronic test and measurement instruments, namely, interferometers, electrical transducers, and vibration transducers; electronic test and measurement instruments, namely, nano-indenters for nano-mechanical testing of semiconductors, thin films, wafer applications, hard coatings and DLC films, composite materials, fibers, polymers, metals, ceramics, and biomaterials; component features of electronic testing, signaling, diagnostic and measurement systems and equipment used in signal generators, signal analyzers, arbitrary waveform generators, pulse generators, and one-box testers, namely, mobile cellular and wireless local area network (WLAN) testers and network analyzers; electronic component in the nature of software and hardware, namely, digital signal processor and its controlling algorithm, sold as integral components of waveform generators, for improving signal fidelity and signal breadth; optical encoders; data processing equipment, namely, optical couplers and acoustic couplers; signal amplifiers, namely wireless, cellular, satellite and optical signal amplifiers, and remote controls for the aforesaid signal amplifiers; electrical signal attenuators; electricity limiters; binary multipliers, voltage multipliers, radio, microwave, wireless communication, cellular, satellite acoustic and optical signal frequency multipliers, and remote controls for the aforesaid multipliers; testing apparatus for testing fiber optics; electric switches; optical switches; probes for testing integrated circuits, semiconductors, and telecommunication networks; electronic, optoelectronic, photonic and nanoscale test, signaling, imaging, and measurement apparatus and instruments, namely, amplifiers, attenuators, filters in the nature of signal processors that function to remove unwanted frequency components from the signal, to enhance wanted ones, or both, conditioners in the nature of devices used to prepare sensor output signals for processing, converters, mixers in the nature of devices for creating new frequencies from two or more signals applied to it, modulators in the nature of devices for varying one or more properties of a periodic waveform in order to carry a signal, demodulators, prescalers, dividers in the nature of devices for coupling a portion of the signal in a transmission line to a port enabling the portion signal to be used in another circuit, combiners in the nature of devices for combining the signals at a port into the signals already present in a transmission line, isolators in the nature of a nonreciprocal 2 port device that allows signals to pass in one direction only, circulators in the nature of a nonreciprocal multiport device in which a signal entering any port is transmitted only to the next port in rotation, integrated diode limiters, switches and routers for performing signal generation, signal processing, signal amplification, signal conversion, and signal control; accessories for lasers for measuring purposes, namely, monolithic laser combiners, laser heads, beam splitters, beam benders, beam translators, retro reflectors, adjustable mounts, plane mirrors, plane mirror converters, plane mirror reflectors, and turning mirrors; lasers not for medical use, namely for use in spectroscopy, imaging, alignment, optical measurement, optical component testing and fiber optic communications;

microscopes; microscopes, namely, atomic force microscopes; microscopes, namely, scanning electron microscopes; recording apparatus for recording traffic on telecommunications networks, namely for recording data usage and data speed and remote controls for the aforesaid recording apparatus; portable electronic recorder for measuring and recording multiple voltage, current and thermocouple readings from various transducers; electric sensors; industrial calibration sensors; optical sensors; timing sensors; ultrasonic sensors; surface acoustic wave sensors; sensors for measuring air pressure, temperature, and humidity; sensors for monitoring the temperature of an object being measured; electronic and optical communications instruments and components, namely, optical transmitters and electrooptical transmitters; wireless signal transmitters and receivers namely analog, vector, radio frequency, digital video and microwave signal generators and signal receivers; Wireless transmitters and receivers for generating, receiving and analyzing signals for testing connections within telecommunications networks, local area networks, computer networks and connection to servers; receivers and transmitters of electronic signals namely, optical signals, opto-electrical signals; electronic and optical communications instruments and components, namely, optical and optoelectrical receivers; computer hardware; computer peripherals, namely cables and USB plugs to permit computers to be connected to scientific and measurement instruments; computer operating system software programs for nonmedical scientific instruments and for electronic test, signaling, and measurement instruments and equipment; computer software used to calibrate and configure electronic testing, signaling and measuring equipment used to test and measure voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; computer software used in association with electronic testing, signaling and measuring equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing and measuring voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; Computer software used in association with electronic testing equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits; electronic design automation (EDA) software for computer aided design of electronic systems, namely radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits and used to simulate and test the speed and performance of said circuits; computers; power supplies, namely, computer power supplies, high-frequency switching supplies, voltage stabilizing power supplies, uninterruptible power supplies; power supplies and power systems for simulating various operating conditions of electronic equipment; programmable power supplies and power systems for simulating various operating conditions of electronic equipment.

## SERVICES

Retail services, catalog services, and online retail services featuring laboratory equipment for scientific research, optoelectronic, photonic, and nanoscale testing, signal measuring and imaging instruments, electronic and optical communications instruments, telecommunication and communication systems hardware and software and parts thereof; retail store and catalog sales services, available through mail order, phone-in orders and electronic communications networks, featuring semiconductors, computer hardware, computer software and electronic and optical components in the fields of scientific research, optoelectronic, photonic, nanoscale test and signal measurement instruments and equipment, and electronic test and measurement equipment; maintenance, repair and installation of laboratory equipment for scientific research; maintenance,

repair and installation of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; maintenance, repair and installation of electronic signal testing equipment; maintenance, repair and installation of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; repair and refurbishing of laboratory equipment for scientific research; repair and refurbishing of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; repair and refurbishing of electronic signal testing equipment; repair and refurbishing of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; maintenance and repair of computer hardware; design and development of computer software; computer programming services; troubleshooting and maintenance of computer software; electrical engineering design services; testing, analysis and evaluation of materials; calibration of laboratory equipment for scientific research; calibration of electronic equipment, namely electronic test and measurement equipment; calibration of optical communications instruments, and testing equipment for integrated circuits, circuit boards and electronic equipment; calibration of electronic equipment, namely, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment; calibration of telecommunication and communication systems hardware and software for testing and measuring the performance of communications and telecommunication networks; technical support services in the form of providing information, diagnostic services and consultation on the design, installation and operation of computer hardware, computer software, laboratory equipment for scientific research, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment, electronic test and measurement equipment, telecommunication and communication systems hardware and software, and providing an internet website related thereto; computer services, namely, operating a website allowing users to participate in discussions, get feedback from others, and obtain information, all in the field of news, design, operation, performance and reviews related to electronic test and measurement equipment, and signal measurement instruments and equipment; providing a website that gives computer users the ability to generate and share software script and plugins and to share software data related to software script and plugins with other users.

## Goods

Electronic test and measurement instruments, namely, oscilloscopes and parts therefor; electronic instruments in the nature of signal generators, namely, analog and vector signal generators, waveform generators, function generators in the nature of electronic devices used to generate various types of repeating waveform signals over a wide range of frequencies, pulse generators, digital pattern generators, arbitrary waveform generators, noise generators in the nature of electronic devices that produce random signals, and signal generation devices synthesizing electronic signals, and synchronization modules for various types of signal generators, remote controls for the aforesaid goods; electronic test and measurement instruments in the nature of analyzers, namely, spectrum, vector, signal, network, power and power source, protocol, radio frequency, microwave, logic, modulation-domain, optical component, light wave component, optical modulation, time-interval, polarization, and photonic dispersion and loss analyzers; automatic test equipment for integrated circuits, circuit boards and electronic equipment, namely, flat panel display testers, system on a chip (SOC) testers, memory testers, parametric testers, automated optical inspection testers, and in-circuit testers; electronic and optical communications instruments, namely, light wave testers and light wave multimeters; electronic component of digital multimeters for testing and measuring voltage in electrical products; measuring instrumentation

and apparatus, namely, digitizers; test and measurement equipment, namely, electromagnetic interference receivers, radio frequency interference receivers, and electromagnetic compliance products, namely, electromagnetic interference receivers for testing electromagnetic compliance and making conductive emission measurements; polarization controller units used to change light from any polarized or unpolarized light source into any well-defined state of polarization; electronic test and measurement instruments, namely, electric meters, inductance meters, capacitance meters, resistance meters, impedance meters, acoustic testing meters, flow testing meters, vibration testing meters, ohmmeters, ammeters, voltmeters, microwave meters, electromagnetic interference meters, power meters, wavelength meters, frequency meters, and frequency counters, and remote controls for the aforesaid goods; electrical and electronic measuring and testing devices, namely, DC electronic load measurers and testers; electronic test and measurement instruments in the nature of testers, namely, cable, radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, voltage, amperage, telephone line, and continuity testers, and remote controls for the aforesaid goods; electronic test and measurement instruments, namely, handheld cable and antenna testers for radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, with optional spectrum analyzer, network analyzer, and power meter and remote controls for the aforesaid goods; electronic testing equipment, namely, power meters for testing radio frequency and microwave signals; electronic and optical communications instruments and components, namely, communication link testers for testing connections within local area networks, fiber optic cables, digital cables, telephone cables, computer networks and connection to servers, and remote controls for the aforesaid goods; testing apparatus for testing circuit boards; electronic apparatus for testing electromagnetic properties and characteristics of industrial materials, namely testers for measuring how industrial materials interact with electromagnetic fields to calculate their related properties, namely electromagnetic permittivity, conductivity, resistance, impedance and electromagnetic permeability; electronic test and measurement instruments, namely, voltmeters and source measure units; test and measurement equipment, namely, one box testers containing a signal source and a signal analyzer for testing microwave generators and transmitters, and wireless communication signal strength, signal quality and protocol compliance; electronic test and measurement instruments, namely, interferometers, electrical transducers, and vibration transducers; electronic test and measurement instruments, namely, nano-indenters for nano-mechanical testing of semiconductors, thin films, wafer applications, hard coatings and DLC films, composite materials, fibers, polymers, metals, ceramics, and biomaterials; component features of electronic testing, signaling, diagnostic and measurement systems and equipment used in signal generators, signal analyzers, arbitrary waveform generators, pulse generators, and one-box testers, namely, mobile cellular and wireless local area network (WLAN) testers and network analyzers; electronic component in the nature of software and hardware, namely, digital signal processor and its controlling algorithm, sold as integral components of waveform generators, for improving signal fidelity and signal breadth; optical encoders; data processing equipment, namely, optical couplers and acoustic couplers; signal amplifiers, namely wireless, cellular, satellite and optical signal amplifiers, and remote controls for the aforesaid signal amplifiers; electrical signal attenuators; electricity limiters; binary multipliers, voltage multipliers, radio, microwave, wireless communication, cellular, satellite acoustic and optical signal frequency multipliers, and remote controls for the aforesaid multipliers; testing apparatus for testing fiber optics; electric switches; optical switches; probes for testing integrated circuits, semiconductors, and telecommunication networks; electronic, optoelectronic, photonic and nanoscale test, signaling, imaging, and measurement apparatus and instruments, namely, amplifiers, attenuators, filters in the nature of signal processors that function to remove unwanted frequency components from the signal, to enhance wanted ones, or both, conditioners in

the nature of devices used to prepare sensor output signals for processing, converters, mixers in the nature of devices for creating new frequencies from two or more signals applied to it, modulators in the nature of devices for varying one or more properties of a periodic waveform in order to carry a signal, demodulators, prescalers, dividers in the nature of devices for coupling a portion of the signal in a transmission line to a port enabling the portion signal to be used in another circuit, combiners in the nature of devices for combining the signals at a port into the signals already present in a transmission line, isolators in the nature of a nonreciprocal 2 port device that allows signals to pass in one direction only, circulators in the nature of a nonreciprocal multiport device in which a signal entering any port is transmitted only to the next port in rotation, integrated diode limiters, switches and routers for performing signal generation, signal processing, signal amplification, signal conversion, and signal control; accessories for lasers for measuring purposes, namely, monolithic laser combiners, laser heads, beam splitters, beam benders, beam translators, retro reflectors, adjustable mounts, plane mirrors, plane mirror converters, plane mirror reflectors, and turning mirrors; lasers not for medical use, namely for use in spectroscopy, imaging, alignment, optical measurement, optical component testing and fiber optic communications; microscopes; microscopes, namely, atomic force microscopes; microscopes, namely, scanning electron microscopes; recording apparatus for recording traffic on telecommunications networks, namely for recording data usage and data speed and remote controls for the aforesaid recording apparatus; portable electronic recorder for measuring and recording multiple voltage, current and thermocouple readings from various transducers; electric sensors; industrial calibration sensors; optical sensors; timing sensors; ultrasonic sensors; surface acoustic wave sensors; sensors for measuring air pressure, temperature, and humidity; sensors for monitoring the temperature of an object being measured; electronic and optical communications instruments and components, namely, optical transmitters and electrooptical transmitters; wireless signal transmitters and receivers namely analog, vector, radio frequency, digital video and microwave signal generators and signal receivers; Wireless transmitters and receivers for generating, receiving and analyzing signals for testing connections within telecommunications networks, local area networks, computer networks and connection to servers; receivers and transmitters of electronic signals namely, optical signals, opto-electrical signals; electronic and optical communications instruments and components, namely, optical and optoelectrical receivers; computer hardware; computer peripherals, namely cables and USB plugs to permit computers to be connected to scientific and measurement instruments; computer operating system software programs for nonmedical scientific instruments and for electronic test, signaling, and measurement instruments and equipment; computer software used to calibrate and configure electronic testing, signaling and measuring equipment used to test and measure voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; computer software used in association with electronic testing, signaling and measuring equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing and measuring voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; Computer software used in association with electronic testing equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits; electronic design automation (EDA) software for computer aided design of electronic systems, namely radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits and used to simulate and test the speed and performance of said circuits; computers; power supplies, namely, computer power supplies, high-frequency switching supplies, voltage stabilizing power supplies, uninterruptible power supplies;

power supplies and power systems for simulating various operating conditions of electronic equipment; programmable power supplies and power systems for simulating various operating conditions of electronic equipment.

## SERVICES

Retail services, catalog services, and online retail services featuring laboratory equipment for scientific research, optoelectronic, photonic, and nanoscale testing, signal measuring and imaging instruments, electronic and optical communications instruments, telecommunication and communication systems hardware and software and parts thereof; retail store and catalog sales services, available through mail order, phone-in orders and electronic communications networks, featuring semiconductors, computer hardware, computer software and electronic and optical components in the fields of scientific research, optoelectronic, photonic, nanoscale test and signal measurement instruments and equipment, and electronic test and measurement equipment; maintenance, repair and installation of laboratory equipment for scientific research; maintenance, repair and installation of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; maintenance, repair and installation of electronic signal testing equipment; maintenance, repair and installation of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; repair and refurbishing of laboratory equipment for scientific research; repair and refurbishing of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; repair and refurbishing of electronic signal testing equipment; repair and refurbishing of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; maintenance and repair of computer hardware; design and development of computer software; computer programming services; troubleshooting and maintenance of computer software; electrical engineering design services; testing, analysis and evaluation of materials; calibration of laboratory equipment for scientific research; calibration of electronic equipment, namely electronic test and measurement equipment; calibration of optical communications instruments, and testing equipment for integrated circuits, circuit boards and electronic equipment; calibration of electronic equipment, namely, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment; calibration of telecommunication and communication systems hardware and software for testing and measuring the performance of communications and telecommunication networks; technical support services in the form of providing information, diagnostic services and consultation on the design, installation and operation of computer hardware, computer software, laboratory equipment for scientific research, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment, electronic test and measurement equipment, telecommunication and communication systems hardware and software, and providing an internet website related thereto; computer services, namely, operating a website allowing users to participate in discussions, get feedback from others, and obtain information, all in the field of news, design, operation, performance and reviews related to electronic test and measurement equipment, and signal measurement instruments and equipment; providing a website that gives computer users the ability to generate and share software script and plugins and to share software data related to software script and plugins with other users.

## Goods

Electronic test and measurement instruments, namely, oscilloscopes and parts therefor; electronic instruments in the nature of signal generators, namely, analog and vector signal generators, waveform generators, function generators in the nature of electronic devices used to generate various types of repeating waveform signals over a wide range of frequencies, pulse generators, digital pattern generators, arbitrary waveform generators, noise generators in the nature of electronic devices that produce random signals, and signal generation devices synthesizing electronic signals, and synchronization modules for various types of signal generators, remote controls for the aforesaid goods; electronic test and measurement instruments in the nature of analyzers, namely, spectrum, vector, signal, network, power and power source, protocol, radio frequency, microwave, logic, modulation-domain, optical component, light wave component, optical modulation, time-interval, polarization, and photonic dispersion and loss analyzers; automatic test equipment for integrated circuits, circuit boards and electronic equipment, namely, flat panel display testers, system on a chip (SOC) testers, memory testers, parametric testers, automated optical inspection testers, and in-circuit testers; electronic and optical communications instruments, namely, light wave testers and light wave multimeters; electronic component of digital multimeters for testing and measuring voltage in electrical products; measuring instrumentation and apparatus, namely, digitizers; test and measurement equipment, namely, electromagnetic interference receivers, radio frequency interference receivers, and electromagnetic compliance products, namely, electromagnetic interference receivers for testing electromagnetic compliance and making conductive emission measurements; polarization controller units used to change light

from any polarized or unpolarized light source into any well-defined state of polarization; electronic test and measurement instruments, namely, electric meters, inductance meters, capacitance meters, resistance meters, impedance meters, acoustic testing meters, flow testing meters, vibration testing meters, ohmmeters, ammeters, voltmeters, microwave meters, electromagnetic interference meters, power meters, wavelength meters, frequency meters, and frequency counters, and remote controls for the aforesaid goods; electrical and electronic measuring and testing devices, namely, DC electronic load measurers and testers; electronic test and measurement instruments in the nature of testers, namely, cable, radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, voltage, amperage, telephone line, and continuity testers, and remote controls for the aforesaid goods; electronic test and measurement instruments, namely, handheld cable and antenna testers for radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, with optional spectrum analyzer, network analyzer, and power meter and remote controls for the aforesaid goods; electronic testing equipment, namely, power meters for testing radio frequency and microwave signals; electronic and optical communications instruments and components, namely, communication link testers for testing connections within local area networks, fiber optic cables, digital cables, telephone cables, computer networks and connection to servers, and remote controls for the aforesaid goods; testing apparatus for testing circuit boards; electronic apparatus for testing electromagnetic properties and characteristics of industrial materials, namely testers for measuring how industrial materials interact with electromagnetic fields to calculate their related properties, namely electromagnetic permittivity, conductivity, resistance, impedance and electromagnetic permeability; electronic test and measurement instruments, namely, voltmeters and source measure units; test and measurement equipment, namely, one box testers containing a signal source and a signal analyzer for testing microwave generators and transmitters, and wireless communication signal strength, signal quality and protocol compliance; electronic test and measurement instruments, namely, interferometers, electrical transducers, and vibration transducers; electronic test and measurement instruments, namely, nano-indenters for nano-mechanical testing of semiconductors, thin films, wafer applications, hard coatings and DLC films, composite materials, fibers, polymers, metals, ceramics, and biomaterials; component features of electronic testing, signaling, diagnostic and measurement systems and equipment used in signal generators, signal analyzers, arbitrary waveform generators, pulse generators, and one-box testers, namely, mobile cellular and wireless local area network (WLAN) testers and network analyzers; electronic component in the nature of software and hardware, namely, digital signal processor and its controlling algorithm, sold as integral components of waveform generators, for improving signal fidelity and signal breadth; optical encoders; data processing equipment, namely, optical couplers and acoustic couplers; signal amplifiers, namely wireless, cellular, satellite and optical signal amplifiers, and remote controls for the aforesaid signal amplifiers; electrical signal attenuators; electricity limiters; binary multipliers, voltage multipliers, radio, microwave, wireless communication, cellular, satellite acoustic and optical signal frequency multipliers, and remote controls for the aforesaid multipliers; testing apparatus for testing fiber optics; electric switches; optical switches; probes for testing integrated circuits, semiconductors, and telecommunication networks; electronic, optoelectronic, photonic and nanoscale test, signaling, imaging, and measurement apparatus and instruments, namely, amplifiers, attenuators, filters in the nature of signal processors that function to remove unwanted frequency components from the signal, to enhance wanted ones, or both, conditioners in the nature of devices used to prepare sensor output signals for processing, converters, mixers in the nature of devices for creating new frequencies from two or more signals applied to it, modulators in the nature of devices for varying one or more properties of a periodic waveform in order to carry a signal, demodulators, prescalers, dividers in the nature of devices for coupling a

portion of the signal in a transmission line to a port enabling the portion signal to be used in another circuit, combiners in the nature of devices for combining the signals at a port into the signals already present in a transmission line, isolators in the nature of a nonreciprocal 2 port device that allows signals to pass in one direction only, circulators in the nature of a nonreciprocal multiport device in which a signal entering any port is transmitted only to the next port in rotation, integrated diode limiters, switches and routers for performing signal generation, signal processing, signal amplification, signal conversion, and signal control; accessories for lasers for measuring purposes, namely, monolithic laser combiners, laser heads, beam splitters, beam benders, beam translators, retro reflectors, adjustable mounts, plane mirrors, plane mirror converters, plane mirror reflectors, and turning mirrors; lasers not for medical use, namely for use in spectroscopy, imaging, alignment, optical measurement, optical component testing and fiber optic communications; microscopes; microscopes, namely, atomic force microscopes; microscopes, namely, scanning electron microscopes; recording apparatus for recording traffic on telecommunications networks, namely for recording data usage and data speed and remote controls for the aforesaid recording apparatus; portable electronic recorder for measuring and recording multiple voltage, current and thermocouple readings from various transducers; electric sensors; industrial calibration sensors; optical sensors; timing sensors; ultrasonic sensors; surface acoustic wave sensors; sensors for measuring air pressure, temperature, and humidity; sensors for monitoring the temperature of an object being measured; electronic and optical communications instruments and components, namely, optical transmitters and electrooptical transmitters; wireless signal transmitters and receivers namely analog, vector, radio frequency, digital video and microwave signal generators and signal receivers; Wireless transmitters and receivers for generating, receiving and analyzing signals for testing connections within telecommunications networks, local area networks, computer networks and connection to servers; receivers and transmitters of electronic signals namely, optical signals, opto-electrical signals; electronic and optical communications instruments and components, namely, optical and optoelectrical receivers; computer hardware; computer peripherals, namely cables and USB plugs to permit computers to be connected to scientific and measurement instruments; computer operating system software programs for nonmedical scientific instruments and for electronic test, signaling, and measurement instruments and equipment; computer software used to calibrate and configure electronic testing, signaling and measuring equipment used to test and measure voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; computer software used in association with electronic testing, signaling and measuring equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing and measuring voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; Computer software used in association with electronic testing equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits; electronic design automation (EDA) software for computer aided design of electronic systems, namely radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits and used to simulate and test the speed and performance of said circuits; computers; power supplies, namely, computer power supplies, high-frequency switching supplies, voltage stabilizing power supplies, uninterruptible power supplies; power supplies and power systems for simulating various operating conditions of electronic equipment; programmable power supplies and power systems for simulating various operating conditions of electronic equipment.

## SERVICES

Retail services, catalog services, and online retail services featuring laboratory equipment for scientific research, optoelectronic, photonic, and nanoscale testing, signal measuring and imaging instruments, electronic and optical communications instruments, telecommunication and communication systems hardware and software and parts thereof; retail store and catalog sales services, available through mail order, phone-in orders and electronic communications networks, featuring semiconductors, computer hardware, computer software and electronic and optical components in the fields of scientific research, optoelectronic, photonic, nanoscale test and signal measurement instruments and equipment, and electronic test and measurement equipment; maintenance, repair and installation of laboratory equipment for scientific research; maintenance, repair and installation of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; maintenance, repair and installation of electronic signal testing equipment; maintenance, repair and installation of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; repair and refurbishing of laboratory equipment for scientific research; repair and refurbishing of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; repair and refurbishing of electronic signal testing equipment; repair and refurbishing of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; maintenance and repair of computer hardware; design and development of computer software; computer programming services; troubleshooting and maintenance of computer software; electrical engineering design services; testing, analysis and evaluation of materials; calibration of laboratory equipment for scientific research; calibration of electronic equipment, namely electronic test and measurement equipment; calibration of optical communications instruments, and testing equipment for integrated circuits, circuit boards and electronic equipment; calibration of electronic equipment, namely, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment; calibration of telecommunication and communication systems hardware and software for testing and measuring the performance of communications and telecommunication networks; technical support services in the form of providing information, diagnostic services and consultation on the design, installation and operation of computer hardware, computer software, laboratory equipment for scientific research, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment, electronic test and measurement equipment, telecommunication and communication systems hardware and software, and providing an internet website related thereto; computer services, namely, operating a website allowing users to participate in discussions, get feedback from others, and obtain information, all in the field of news, design, operation, performance and reviews related to electronic test and measurement equipment, and signal measurement instruments and equipment; providing a website that gives computer users the ability to generate and share software script and plugins and to share software data related to software script and plugins with other users.

# UNLOCKING MEASUREMENT INSIGHTS

### Goods

Electronic test and measurement instruments, namely, oscilloscopes and parts therefor; electronic instruments in the nature of signal generators, namely, analog and vector signal generators, waveform generators, function generators in the nature of electronic devices used to generate various types of repeating waveform signals over a wide range of frequencies, pulse generators, digital pattern generators, arbitrary waveform generators, noise generators in the nature of electronic devices that produce random signals, and signal generation devices synthesizing electronic signals, and synchronization modules for various types of signal generators, remote controls for the aforesaid goods; electronic test and measurement instruments in the nature of analyzers, namely, spectrum, vector, signal, network, power and power source, protocol, radio frequency, microwave, logic, modulation-domain, optical component, light wave component, optical modulation, time-interval, polarization, and photonic dispersion and loss analyzers; automatic test equipment for integrated circuits, circuit boards and electronic equipment, namely, flat panel display testers, system on a chip (SOC) testers, memory testers, parametric testers, automated optical inspection testers, and in-circuit testers; electronic and optical communications instruments, namely, light wave testers and light wave multimeters; electronic component of digital multimeters for testing and measuring voltage in electrical products; measuring instrumentation and apparatus, namely, digitizers; test and measurement equipment, namely, electromagnetic interference receivers, radio frequency interference receivers, and electromagnetic compliance products, namely, electromagnetic interference receivers for testing electromagnetic compliance and making conductive emission measurements; polarization controller units used to change light from any polarized or unpolarized light source into any well-defined state of polarization; electronic test and measurement instruments, namely, electric meters, inductance meters, capacitance meters, resistance meters, impedance meters, acoustic testing meters, flow testing meters, vibration testing meters, ohmmeters, ammeters, voltmeters, microwave meters, electromagnetic interference meters, power meters, wavelength meters, frequency meters, and frequency counters, and remote controls for the aforesaid goods; electrical and electronic measuring and testing devices, namely, DC electronic load measurers and testers; electronic test and measurement instruments in the nature of testers, namely, cable, radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, voltage, amperage, telephone line, and continuity testers, and remote controls for the aforesaid goods; electronic test and measurement instruments, namely, handheld cable and antenna testers for

radio antennas, wireless communication signal antennas, microwave antennas, telephone signal antennas, with optional spectrum analyzer, network analyzer, and power meter and remote controls for the aforesaid goods; electronic testing equipment, namely, power meters for testing radio frequency and microwave signals; electronic and optical communications instruments and components, namely, communication link testers for testing connections within local area networks, fiber optic cables, digital cables, telephone cables, computer networks and connection to servers, and remote controls for the aforesaid goods; testing apparatus for testing circuit boards; electronic apparatus for testing electromagnetic properties and characteristics of industrial materials, namely testers for measuring how industrial materials interact with electromagnetic fields to calculate their related properties, namely electromagnetic permittivity, conductivity, resistance, impedance and electromagnetic permeability; electronic test and measurement instruments, namely, voltmeters and source measure units; test and measurement equipment, namely, one box testers containing a signal source and a signal analyzer for testing microwave generators and transmitters, and wireless communication signal strength, signal quality and protocol compliance; electronic test and measurement instruments, namely, interferometers, electrical transducers, and vibration transducers; electronic test and measurement instruments, namely, nano-indenters for nano-mechanical testing of semiconductors, thin films, wafer applications, hard coatings and DLC films, composite materials, fibers, polymers, metals, ceramics, and biomaterials; component features of electronic testing, signaling, diagnostic and measurement systems and equipment used in signal generators, signal analyzers, arbitrary waveform generators, pulse generators, and one-box testers, namely, mobile cellular and wireless local area network (WLAN) testers and network analyzers; electronic component in the nature of software and hardware, namely, digital signal processor and its controlling algorithm, sold as integral components of waveform generators, for improving signal fidelity and signal breadth; optical encoders; data processing equipment, namely, optical couplers and acoustic couplers; signal amplifiers, namely wireless, cellular, satellite and optical signal amplifiers, and remote controls for the aforesaid signal amplifiers; electrical signal attenuators; electricity limiters; binary multipliers, voltage multipliers, radio, microwave, wireless communication, cellular, satellite acoustic and optical signal frequency multipliers, and remote controls for the aforesaid multipliers; testing apparatus for testing fiber optics; electric switches; optical switches; probes for testing integrated circuits, semiconductors, and telecommunication networks; electronic, optoelectronic, photonic and nanoscale test, signaling, imaging, and measurement apparatus and instruments, namely, amplifiers, attenuators, filters in the nature of signal processors that function to remove unwanted frequency components from the signal, to enhance wanted ones, or both, conditioners in the nature of devices used to prepare sensor output signals for processing, converters, mixers in the nature of devices for creating new frequencies from two or more signals applied to it, modulators in the nature of devices for varying one or more properties of a periodic waveform in order to carry a signal, demodulators, prescalers, dividers in the nature of devices for coupling a portion of the signal in a transmission line to a port enabling the portion signal to be used in another circuit, combiners in the nature of devices for combining the signals at a port into the signals already present in a transmission line, isolators in the nature of a nonreciprocal 2 port device that allows signals to pass in one direction only, circulators in the nature of a nonreciprocal multiport device in which a signal entering any port is transmitted only to the next port in rotation, integrated diode limiters, switches and routers for performing signal generation, signal processing, signal amplification, signal conversion, and signal control; accessories for lasers for measuring purposes, namely, monolithic laser combiners, laser heads, beam splitters, beam benders, beam translators, retro reflectors, adjustable mounts, plane mirrors, plane mirror converters, plane mirror reflectors, and turning mirrors; lasers not for medical use, namely for use in spectroscopy, imaging, alignment, optical measurement, optical component testing and fiber optic communications;

microscopes; microscopes, namely, atomic force microscopes; microscopes, namely, scanning electron microscopes; recording apparatus for recording traffic on telecommunications networks, namely for recording data usage and data speed and remote controls for the aforesaid recording apparatus; portable electronic recorder for measuring and recording multiple voltage, current and thermocouple readings from various transducers; electric sensors; industrial calibration sensors; optical sensors; timing sensors; ultrasonic sensors; surface acoustic wave sensors; sensors for measuring air pressure, temperature, and humidity; sensors for monitoring the temperature of an object being measured; electronic and optical communications instruments and components, namely, optical transmitters and electrooptical transmitters; wireless signal transmitters and receivers namely analog, vector, radio frequency, digital video and microwave signal generators and signal receivers; Wireless transmitters and receivers for generating, receiving and analyzing signals for testing connections within telecommunications networks, local area networks, computer networks and connection to servers; receivers and transmitters of electronic signals namely, optical signals, opto-electrical signals; electronic and optical communications instruments and components, namely, optical and optoelectrical receivers; computer hardware; computer peripherals, namely cables and USB plugs to permit computers to be connected to scientific and measurement instruments; computer operating system software programs for nonmedical scientific instruments and for electronic test, signaling, and measurement instruments and equipment; computer software used to calibrate and configure electronic testing, signaling and measuring equipment used to test and measure voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; computer software used in association with electronic testing, signaling and measuring equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing and measuring voltage, radio waves, microwaves, radio and wireless communication signals, acoustic waves, cellular signals, satellite and optical signals; Computer software used in association with electronic testing equipment for the purposes of collecting, analyzing, storing and managing data obtained from testing radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits; electronic design automation (EDA) software for computer aided design of electronic systems, namely radio frequency and microwave circuits, integrated circuits, circuit boards, signal-processing circuits, semiconductor circuits, signal-processing circuits, electrothermal and electromagnetic circuits and used to simulate and test the speed and performance of said circuits; computers; power supplies, namely, computer power supplies, high-frequency switching supplies, voltage stabilizing power supplies, uninterruptible power supplies; power supplies and power systems for simulating various operating conditions of electronic equipment; programmable power supplies and power systems for simulating various operating conditions of electronic equipment.

## SERVICES

Retail services, catalog services, and online retail services featuring laboratory equipment for scientific research, optoelectronic, photonic, and nanoscale testing, signal measuring and imaging instruments, electronic and optical communications instruments, telecommunication and communication systems hardware and software and parts thereof; retail store and catalog sales services, available through mail order, phone-in orders and electronic communications networks, featuring semiconductors, computer hardware, computer software and electronic and optical components in the fields of scientific research, optoelectronic, photonic, nanoscale test and signal measurement instruments and equipment, and electronic test and measurement equipment; maintenance, repair and installation of laboratory equipment for scientific research; maintenance,

repair and installation of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; maintenance, repair and installation of electronic signal testing equipment; maintenance, repair and installation of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; repair and refurbishing of laboratory equipment for scientific research; repair and refurbishing of optoelectronic, photonic, and nanoscale testing, signaling, imaging and measuring instruments and equipment; repair and refurbishing of electronic signal testing equipment; repair and refurbishing of electronic test and measurement instruments, electronic and optical communications instruments, and testing equipment for integrated circuits, circuit boards; maintenance and repair of computer hardware; design and development of computer software; computer programming services; troubleshooting and maintenance of computer software; electrical engineering design services; testing, analysis and evaluation of materials; calibration of laboratory equipment for scientific research; calibration of electronic equipment, namely electronic test and measurement equipment; calibration of optical communications instruments, and testing equipment for integrated circuits, circuit boards and electronic equipment; calibration of electronic equipment, namely, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment; calibration of telecommunication and communication systems hardware and software for testing and measuring the performance of communications and telecommunication networks; technical support services in the form of providing information, diagnostic services and consultation on the design, installation and operation of computer hardware, computer software, laboratory equipment for scientific research, optoelectronic, photonic and nanoscale test and signal measurement instruments and equipment, electronic test and measurement equipment, telecommunication and communication systems hardware and software, and providing an internet website related thereto; computer services, namely, operating a website allowing users to participate in discussions, get feedback from others, and obtain information, all in the field of news, design, operation, performance and reviews related to electronic test and measurement equipment, and signal measurement instruments and equipment; providing a website that gives computer users the ability to generate and share software script and plugins and to share software data related to software script and plugins with other users.

## CLAIMS

Priority Filing Date: UNITED STATES OF AMERICA January 10, 2014, Application No: 86163058 in association with the same kind of goods and in association with the same kind of services.  
Proposed Use in CANADA on goods and on services

**Application Number** 1,670,174 **Filing Date** 2014-03-27

**Language of Application** English

## APPLICANT AND REPRESENTATIVE FOR SERVICE

### Applicant

Intelsat Investments S.A., 4, rue Albert  
Borschette, L-1246, LUXEMBOURG

### Representative for Service

GOWLING WLG (CANADA) LLP  
SUITE 2600, 160 ELGIN STREET, OTTAWA,  
ONTARIO, K1P1C3

## TRADEMARK

### Index Headings

INTELSAT ENVISION. CONNECT. TRANSFORM.

### Image Description (Vienna)

- Sectors of circles or ellipses (except 26.2.7)
- Joined or intersecting segments or sectors of circles or ellipses
- Other irregular parallelograms, trapezia and quadrilaterals, quadrilaterals containing one or more rounded corners
- One quadrilateral
- Quadrilateral figures with one or more convex or concave sides -- Note: Not including elongated surfaces with one or more convex or concave sides (25.3.1).
- Segments or sectors of circles or ellipses with one or more quadrilaterals

### Authorisation For Use

Consent from INTERNATIONAL TELECOMMUNICATIONS SATELLITE ORGANIZATION / ORGANISATION INTERNATIONALE DE TÉLÉCOMMUNICATIONS PAR SATELLITES is of record.

## SERVICES

Satellite communication services, namely the wireless transmission of audio, video, voice, images, and data of third parties, namely, music, music videos, films, photos, movies, television programs, radio broadcasts, news podcasts, music podcasts, sports podcasts, news webcasts, music webcasts, sports webcasts, video games, via satellite transmission; satellite transmission of television programs; satellite transmission of radio programs; satellite phone transmission services; Satellite communication services, by providing satellite Internet transmission via wireless broadband networks of audio, video, voice, images, and data of third parties

## CLAIMS

Priority Filing Date: UNITED STATES OF AMERICA March 13, 2014, Application No: 86/220,367 in association with the same kind of services. Proposed Use in CANADA on services

**Application Number** 1,682,116 **Filing Date** 2014-06-20

**Language of Application** English

## APPLICANT AND REPRESENTATIVE FOR SERVICE

### Index Headings

VEDETT EXTRA WHITE

### Image Description (Vienna)

- Labels, collarettes (bottle-neck labels) -- Note: Not including tie-on labels (20.5.15).
- Other labels
- Rectangles
- Several quadrilaterals juxtaposed, joined or intersecting
- Quadrilaterals containing representations of animals or parts of animals' bodies or plants
- Quadrilaterals containing one or more letters
- Bears, koalas, wombats
- Polar bear
- Sparks, explosions, exploding fireworks -- Note: Not including sparks represented by uneven-pointed stars (1.1.1).
- Vortices, rotary movements, tornadoes -- Note: Not including astronomic orbits (1.13.1), atomic orbits (1.13.1), concentric circles (26.1.4 or 26.1.5) and spirals (26.1.5).
- Blue
- Yellow, gold
- White, grey, silver
- Black

---

### Colour Claim

Colour is claimed as a feature of the trade-mark. The upper rectangular design figure is light blue. The lower rectangular design figure is yellow. The words EXTRA WHITE and the flash design

figure and the inner portion of polar bear design figure are white. The outline and facial features of the polar bear design figure and the word VEDETT are black.

## **Goods**

### Index Headings

CRYSTALS FROM SWAROVSKI SINCE 1895

### Image Description (Vienna)

- Other representations of the sun
- Sun with rays constituted by rectilinear lines, sheaves of lines or bands
- Letters presenting a special form of writing
- Letters in the form of a signature, illegible signatures
- Letters or numerals forming geometrical figures, written or typographical matter in perspective
- Letters or numerals forming a figure in the shape of an arc of a circle

## Goods

(3) Hand tools and cutlery; side arms, namely sport knives, pocket knives; razors; knives, spoons and forks, household knives; cheese slicers, non-electric; scissors for household use; ladles [hand tools]; hand-operated tools, in particular grinding and polishing tools equipped with natural or artificial abrasive grit; curling tongs, cuticle nippers, cuticle tweezers, cutting tools [hand tools], depilation appliances, electric and non-electric, ear-piercing apparatus, eyelash curlers; fingernail polishers, electric or non-electric; flat irons; hair clippers for personal use, electric and non-electric;

hand implements for hair curling; hair-removing tweezers; manicure sets, electric or non-electric; nail buffers, electric or non-electric; nail clippers, electric or non-electric; nail files, electric or non-electric; razors, electric or non-electric; nail scissors, cuticle scissors, tweezers

### **Class 03**

(1) Bleaching preparations for laundry use for eyeglasses and sunglasses, jewelry and imitation jewelry, ornaments of precious metal in the nature of jewelry, small jewelry made of gemstones, metal for personal use jewelry, jewelry cases and accessories; soaps, namely facial soaps, medicated soaps, deodorant soaps, perfumed soap, bar soaps, liquid hand soap, liquid body soap, perfumery, essential oils namely essential oils for the face, body, and to be used in the bath, essential oil products, namely massage oil, inhalation oil, vaporizer oil, oil mists, room fresheners, pot pourri, bath oil, essential oil bath blends, essential oil bubble baths, essential oil bath salts, natural essential oil products, namely soaps and butters, cosmetics, hair lotions, dentifrices; lens cleaner for optical lenses and eyewear, cleaning and polishing preparations for stones and crystal stone products and jewelry; perfumes and scented linen water; cosmetic preparations for skin care, cosmetic creams and lotions for cosmetic purposes; toiletries, namely deodorants for personal use; toilet soaps, shower gels and shampoos

### **Class 06**

(2) Common metals and their alloys; metal building materials, namely, ceiling boards and floor boards, metal reinforcement materials for building, building materials, namely, composite panels composed primarily of metal; metal constructions, namely construction elements made of metal, namely, shores, supports, braces and fabricated metal components for building foundations, materials of metal for railway construction, metal brackets for use in the construction and assembly of decking, metal cable trays used in building construction, metal cladding for construction and building, metal concrete construction hardware, namely, load transfer dowels, metal construction materials, namely, exhaust vent hoses for external ventilation of furnaces, heaters, stoves and boilers, metal drains for use in construction of basement waterproofing systems, metal staples for construction or industrial use, refractory construction materials of metal, transportable metal constructions for nuclear stations and for nuclear reactors, prefabricated and transportable non-metal buildings and non-metal building materials namely, concrete blocks, tiles, ports, poles, slabs, warehousing; materials of metal for railway tracks; cables and metal wires for non-electric applications; ironmongery, small items of metal hardware; pipes and tubes of metal; safes; ores; metal screws and metal tracks for rail vehicles metal fittings, door handles, drawer handles, door fittings, drawer fittings, cup hooks, wall brackets, shelf brackets, drapery and curtain brackets; wall tiles and wall panels of metal; metal partition walls and metal curtain walls; non-electric cables and wires of common metal used in connection with curtains and lighting products; pipes and tubes of metal to be used in the area of components of lighting fixtures; metal towel holders, towel rails of metal, towel hooks of metal, fixed towel dispensers of metal; metal fixing clamps, exterior blinds of metal, metal jalousies, metal partitions and metal curtain walls; hooks of metal for clothes; door handles of metal, rings of common metal for keys, toolboxes of metal; nails, screws, and nuts of metal

### **Class 09**

(4) Scientific instruments, nautical instruments, surveying instruments, photographic instruments, cinematographic instruments, optical instruments, weighing instruments, measuring instruments, namely wearable computers, wearable digital electronic devices, namely, necklaces, bracelets, wristwatches, eyeglasses incorporating wireless communication technology comprised primarily of software for displaying, measuring and monitoring time, date, heart rate, physical activity, global positioning, direction, distance, altitude, speed, steps taken, calories burned, navigational

information, weather information, hours slept, or quality of sleep and display screens; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity namely diodes, electronic transistors, capacitors, integrated circuits, circuit breakers, microprocessors, automatic time switches, low voltage electric components, namely electric switches, electric relays, electric isolators, electric contactors, electric starting relays; apparatus for recording, transmission or reproduction of sound or images namely straps for mobile phones, mobile phone docs, docking stations for mobile phones, headsets, wireless headsets, headsets for telephones, headsets for use with computers, telephone headsets, loudspeakers, loudspeakers with built-in amplifiers, loudspeaker systems, loudspeaker installations, loudspeaker housings, loudspeaker cabinets, horns for loudspeakers, soundbars, sound bars, set-top boxes, acoustic couplers; magnetic data carriers, namely recording discs, compact discs, DVDs and other digital recording media, namely, downloadable audio and video files featuring information about gemstones, jewelry, needlework, beading, crafts, fashion, design, interior design, architecture, lighting, lifestyle, and cosmetics; mechanisms for coin-operated apparatus, namely, automatic vending machines; cash registers, data processing equipment namely computers; computer software, namely computer software for configuring and operating and analyzing data uploaded from wearable computer products; fire-extinguishing apparatus; headphones and earphones; mobile telephones; USB sticks; USB flash drives; USB-compatible data storage devices; bags, cases and covers for all the aforesaid goods; stylus pens for use with touch-screens; speakers and speaker systems, in particular portable loudspeakers; sunglasses; spectacles (optics); spectacle cases; field glasses; binoculars; telescopes; photographic cameras; laptops (computers); mouse pads; navigation apparatus for vehicles (on board computers); hand-held calculators

**Class 11**

(5) Apparatus for lighting, namely, chandeliers and chandelier decorations, lighting fixtures, chandeliers and parts of glass therefor; automobile lights; bathroom and kitchen fittings namely plumbing fixtures; bath tubs; shower cubicles (enclosures); hair driers; lanterns; lamp shades; lampshade holders; torches; toilet seats; bath tub and shower partitions; street lamps; lamps, bicycle lamps, arc lamps; bathroom and kitchen fittings for sinks, basins, bath tubs and showers, plumbing fixtures in the nature of faucets with rotary knobs, single lever faucets, shower mixers, shower heads, shower sprayers, and sink traps; food and beverage cooling apparatus, namely portable beverage coolers

**Class 12**

(6) Vehicles, namely apparatus for locomotion by land, air or water, namely cars, trucks, boats and airplanes; bicycles; bicycle bells; bicycle handlebars; bicycle pumps; pedals for cycles; cigar lighters for automobiles; covers vehicle steering wheels; upholstery for vehicles; rearview mirrors; vehicle wheel hubs; covers for baby carriages; pushchairs; pushchair covers; pushchair hoods

**Class 14**

(7) Precious metals and their alloys and ornaments of precious metal in the nature of jewelry; jewelry, precious stones; horological and chronometric instruments namely watches and clocks and their parts; genuine and costume jewelry; gemstones; ornaments (jewelry); necklaces; earrings; bracelets; rings (jewelry); brooches; bangles; charms (jewelry); pendants; chains of precious metals; locket; cuff links; medallions; key chains of precious metal; small items of jewelry of glass, natural or artificial precious stones, plastic, common or precious metal for personal use; watches and clocks and their parts; natural or synthetic, precious stones of all types and for every purpose; gem stones, in particular glass gemstones and gem stones jewelry stones of faceted glass

**Class 16**

## TRADEMARK

# EPISEQ

### Goods

Database management software and databases in the fields of science, medicine, veterinary medicine, research and health; database management software and databases in the fields of sequencing, diseases, epidemiology and infections; database management software and databases for micro-organism detection and epidemiological analysis; database management software and databases for epidemiological surveillance and epidemiological comparisons; reagents for scientific use or for laboratory research; reagents used in the fields of sequencing, diseases, epidemiology and infections; reagents for clinical, medical, pharmaceutical, veterinary and health use; reagents used in the fields of sequencing, diseases, epidemiology and infections.

### SERVICES

Collection, computer processing, and storage of data in the fields of sequencing, diseases, epidemiology and infections; updating and correction of data in the fields of sequencing, diseases, epidemiology and infections; publication of a methodical data report in the fields of sequencing, diseases, epidemiology and infections; information and consulting in the fields of medical and scientific research applied to the fields of sequencing, diseases, epidemiology and infections; provision of information and consulting in the field of veterinary research applied to the fields of sequencing, diseases, epidemiology and infections; information and consulting in the field of health, namely related to sequencing, diseases, epidemiology and infections; transmission of information, data and reports via a computer network, the Internet, and online databases, all these services being in the fields of sequencing, diseases, epidemiology and infections; provision of access to databases and global computer networks; provision of chat lines on the Internet; web hosting; transmission of messages, images and files via a computer network, via satellite, via the Internet and via online databases, all the aforementioned services being in the fields of sequencing, diseases, epidemiology and infections; training, support and technical assistance in the fields of science, medicine, veterinary medicine, research and health, all these services being in the fields of sequencing, diseases, epidemiology and infections; epidemiological studies conducted in the fields of science, medicine, veterinary medicine, research and health; research and analysis in the fields of sequencing, diseases, epidemiology and infections; scientific and industrial research; biotechnological research; bacteriological research; biological research; laboratory work; epidemiological studies for laboratory or industrial use in the fields of sequencing, diseases, epidemiology and infections, for epidemiological monitoring and epidemiological comparisons; development of protocols and tests to validate the industrial, technological and

scientific operating procedures used in laboratories; technical assistance in the establishment of laboratory automation; development, design, installation, maintenance, updating and repair of computer software and databases used to process and interpret research results in the scientific, medical, veterinary, research, and health fields; development, design, installation, maintenance, updating and repair of computer software and databases used to process and interpret research results in the fields of sequencing, diseases, epidemiology, and infections.

### Goods

#### Class 09

(1) camera batteries, electric storage batteries, mobile telephone batteries, watch batteries, computer batteries, batteries for tablets; battery chargers for use with telephones, camera battery chargers, battery chargers for use with tablets, computers and watches; photographic and digital cameras; computer hardware; computer peripheral equipment, namely, keyboards, computer mice, touchscreens, pen tablets, joysticks, MIDI keyboards, scanner, digital cameras, video cameras, projectors, TV screens, plotters, speakers, computer peripherals for use in playback, recording and editing digital audio and video, computer disaster recovery, file backup and retrieval, namely blank card readers, flash card readers, chip card readers, USB card readers, electronic card readers, magnetic encoded card readers, blank flash memory cards and sticks, blank hard disks, blank flash drivers, hard disk drivers, webcams, cable reels and cables, computer monitors, computer displays screens, computer terminals, print servers, computer peripheral hardware devices containing memory storage, namely, memory boards, namely computer memory card, computer memory storage controllers, namely, double data rate memory controllers, dual chain memory controllers, fully buffered memory controllers, flash memory controllers, computer software used to access data storage drives and disks, namely, computer memory storage devices, namely, solid state memory and flash memory, optical, and magnetic disk drives, computer hard drives, CD burners, DVD burners, WIFI adapter, cell phone battery charger, electronic data backup memory storage hardware, network-attached storage (nas) hardware, user instructional manuals sold as a unit with any of the foregoing goods, computer and peripheral connection cables; computers; computer servers; desktop computers; laptop computers; notebook computers; tablet computers; mobile personal computers; computer keyboards; computer mice; computer monitors; computer games; network routers; blank integrated circuits and circuit cards; electronic information storage server systems for use in enterprise storage application, network electronic storage, network attached storage and storage area networks, comprised of computer hardware, and computer peripherals, namely, keyboards, computer mice, touchscreens, pen tablets, joysticks, MIDI keyboards, scanner, digital cameras, video cameras, projector, TV screens, plotters, speakers, computer peripherals for use in playback, recording and editing digital audio and video, computer disaster recovery, file backup and retrieval, namely blank card readers, flash card readers, chip card readers, USB card readers, electronic card readers, magnetic encoded card readers, blank flash memory cards and sticks, blank hard disks, blank flash drivers, hard disk drivers, webcams, cable reels and cables, computer monitors, computer displays screens,

computer terminals, print servers, computer peripheral hardware devices containing memory storage, namely, memory boards, namely, computer memory card, computer memory storage controllers, namely, double data rate memory controllers, dual chain memory controllers, fully buffered memory controllers, flash memory controllers, computer software used to access data storage drives and disks, namely, computer memory storage devices, namely, solid state memory and flash memory, optical, and magnetic disk drives, computer hard drives, CD burners, DVD burners, WIFI adapter, cell phone battery chargers and electronic data backup memory storage hardware, network-attached storage (nas) hardware, user instructional manuals sold as a unit with any of the foregoing goods, computer and peripheral connection cables, and operating system software; handheld mobile and wearable digital electronic devices capable of providing access to the internet, for the sending and receiving of telephone calls, electronic mail and other data and digital media, and accessories therefore, namely, mobile telephones, smart phones, smart watches, smart watch phones, tablet computers, smart watches and personal digital assistants, bags and cases specially adapted for holding or carrying notebook, laptop computers and tablet computers, portable telephones and telephone equipment and accessories, namely, head phones and earbuds, wireless speakers, chargers, cables, adapters, mobile phone cases, mobile phone covers, mobile phone screen protectors, tablet computer cases, tablet computer covers, tablet computer screen protectors, personal computer cases, personal computer covers, personal computer screen protectors, batteries for mobile phones and tablet computers; modems; blank CDs; CD-ROMs containing computer operating programs; compact disc recorders and players; power adapters; ink jet printers; printers for use with computers; protective covers for laptop computers and tablet computers; computer scanners and computers; televisions, namely, smart TV's and accessories in the nature of set-top boxes, 3D glasses and remote controls all for use with televisions; apparatus for recording, transmission and/or reproduction of sounds, images or other data, namely, VCD players; DVD players; radios; stereo speakers; audio speakers; audio speakers for home; monitor speakers; speakers for computers; radio receivers, audio amplifiers, sound amplifiers, radio frequency amplifiers, sound recording and reproducing apparatus, namely, blank CDs, blank DVDs, blank USB sticks, blank audio discs, blank discs, blank floppy disks, blank hard discs, blank laser discs, and blank optical discs, headphones, earphones, ear buds, loudspeakers, microphones, headsets, tape recorders, portable digital music players and video players, namely MP3 players, MP4 players, CD players, DVD players, equalizers, sound mixers for high quality amplification, recording and reproduction of music, video, multimedia and audio files, electric phonographs, record players, high fidelity stereo apparatus, namely, cables, receivers, tuners, power adapters and adapter plugs for high quality amplification, recording and reproduction of music, video, multimedia and audio files, tape recorders and reproducing apparatus, namely, DVRs, CD players and DVD players, loudspeakers, multiple speaker units for amplification, recording and reproduction of music, video, multimedia and audio files, namely audio speakers, computer speakers, microphones, digital audio and video players, namely, CD players, DVD players, MP3 players and MP4 players with multimedia and interactive functions, digital audio and video devices, namely CD players, DVD players, MP3 players and tape and video tape players, audio cassette recorders and players, video cassette recorders and players, compact disc players, digital versatile disc recorders and players, digital audio tape recorders and players, radios, audio, video, and digital mixers, radio transmitters; carrying cases, sacks and bags, all for use with computers and portable handheld digital electronic devices; computer hardware for the reproduction, processing and streaming of audio, video and multimedia content and computer software for creating and editing music, computer software for creating computer games, computer software for processing digital images, computer software that allows transmission of graphics to mobile telephones, music-composition software; earphones; headphones; built-in wireless audio and video receivers and electronic docking stations for use with electronic book readers, tablet

computers, MP3 players, MP4 players, mobile phones and smart phones; portable listening devices, namely, CD players, digital and analog cassette decks; digital recorder and playback equipment for personal use, namely, built-in wireless audio and video receivers and electronic docking station for use with electronic book readers, tablet computers, MP3 players, MP4 players, mobile phones and smart phones, portable listening devices, namely, CD players, digital and analog cassette decks; single crystal silicon wafers and chips; integrated circuits; computer communications software for connecting computer network users and global computer networks; computer e-commerce software to allow users to perform electronic business transactions via a global computer network; computer graphics software; computer software for graphics arts, animation and manipulation of images; computer screen saver software; computer search engine software; computer software for database management; computer software for use as a spreadsheet; computer software for word processing, for accounting; downloadable computer software for managing retail store customer accounts; computer software for running development programs and application programs in a common development environment; computer software for accessing information directories that may be downloaded from the global computer network; computer software for application and database integration; computer software for creating searchable databases of information and data; computer software to enable the transmission of photographs to mobile phones, computer software for organizing and viewing digital images and photographs, computer software for processing digital images, computer software for creating and editing music, computer software for digital animation and special effects of images, computer software for image processing, computer software that allows transmission of graphics to mobile telephones, computer software for use in generating streaming music, music videos, movies, television shows, news and sports podcasts and webcasts; computer software that allows users to create, send and receive electronic mail and text messages by means of handheld computers via a global computer network; computer software that assists computers in deploying parallel applications and performing parallel computations; computer software to automate data warehousing; computer software to control and improve computer and audio equipment sound quality; computer software to enhance the audio-visual capabilities of multimedia applications, namely, for the integration of text, audio, graphics, still images and moving pictures; computer software, namely, an application allowing sales and field service employees to update and receive data stored in an enterprise's computer databases in real time, using a mobile device, with full telephony integration with the telephone and features of mobile device management software; computer software that enables telephone services over the internet, namely, voicemail, multiple mailbox extensions, telephone message notification, fax capabilities, detailed call reports, call waiting, call identification, call forwarding, message waiting, instant messaging, voice calls and video calls; computer software for use with a global positioning system (GPS); computer application software for mobile phones, portable media players and handheld computers, namely, software for use in voice recognition; computer software for instant messaging, sending and receiving emails and contact information; computer software and hardware for managing computer network adapters, computer network bridges, computer network switches, network access server operating software, network interface cards, network routers, network servers and computers; computer software and hardware for the management, control and networking of servers; computer software for use with computer servers, data storage devices and computer memory devices, namely, computer programs for searching the contents of computers and computer networks; operating system software, namely computer operating programs and computer operating systems; computer software for setting up and configuring local area networks; network interface modules for servers, switch modules, transceivers, keyboards, computer mice, touchscreens, pen tablets, joysticks, MIDI keyboards, 3D scanners, bar code scanners, laser scanners, digital cameras, video cameras, projector, TV screens, plotters and speakers; computer

switches that enable enhanced input/output (I/O) for an entire rack of computer servers; computer network switches; electrical and electronic connectors, couplers, wires, cables, chargers, docks, docking stations; adapters for use with electrical and electronic connectors, couplers, wires, cables, chargers, docks, docking stations and computer network adapters, user manuals in electronically readable, machine readable or computer readable form for use with and sold as a unit with all the aforementioned goods; mobile telephone cases and mobile telephone holders all of leather or imitation leather

#### **Class 14**

(2) Watches; watch straps; watch bands; timepieces, namely, pocket watches, watch pendants, watch rings, chronographs, smart watches; clocks; parts for watches and clocks; cases for watches and clocks; bracelets of jewelry incorporating functions of watches, speed sensors, pace counters, measurements of calorie consumption, distances, momentum, heartbeat measuring monitors, built-in pedometers; watch cases; watch glasses

#### **Class 28**

(3) Gamepads

### **SERVICES**

#### **Class 35**

(1) Online retail store services provided via a global computer network featuring computer hardware, computer software, computer peripherals, consumer electronics, telecommunications apparatus, namely, keyboards, computer mice, touchscreens, pen tablets, joysticks, MIDI keyboards, scanner, digital cameras, video cameras, projector, TV screens, plotters, speakers, smart phones, tablet computers, mobile phones, smart watches and personal digital assistants, smart TV's, set-top boxes, gamepads, 3D glasses, remote controls, bags and cases specially adapted for holding or carrying notebook and laptop computers, tablet computers, portable telephones and telephone equipment and accessories, namely, head phones and earbuds, wireless speakers, chargers, cables, adapters, mobile phone cases, mobile phone covers, mobile phone screen protectors, tablet computer cases, tablet computer covers, tablet computer screen protectors, personal computer cases, personal computer covers, personal computer screen protectors, batteries for mobile phones and tablet computers; retail store services provided via a global computer network featuring computer hardware, computer software, keyboards, computer mice, touchscreens, pen tablets, joysticks, MIDI keyboards, scanner, digital cameras, video cameras, projector, TV screens, plotters, speakers, smart phones, tablet computers, mobile phones, smart watches and personal digital assistants, smart TV's, set-top boxes, gamepads, 3D glasses, remote controls, bags and cases specially adapted for holding or carrying notebook and laptop computers, tablet computers, portable telephones and telephone equipment and accessories, namely, head phones and earbuds, wireless speakers, chargers, cables, adapters, mobile phone cases, mobile phone covers, mobile phone screen protectors, tablet computer cases, tablet computer covers, tablet computer screen protectors, personal computer cases, personal computer covers, personal computer screen protectors, batteries for mobile phones and tablet computers

#### **Class 36**

(2) Financial services, namely, credit services related to the acquisition of goods; extension of retail credit services for the purchase of computers, consumer electronics and related accessories; lease-purchase financing services; bill payment services and credit card and payment card services; providing extended warranties on notebook and laptop computers, tablet computers, portable telephones and telephone equipment and computer equipment

**Class 37**

(3) Maintenance, installation and repair of computer hardware and computer peripherals and consumer electronic devices, namely, keyboards, computer mice, touchscreens, pen tablets, joysticks, MIDI keyboards, scanner, digital cameras, video cameras, projector, TV screens, plotters, speakers, smart phones, tablet computers, mobile phones, smart watches and personal digital assistants, smart TV's, set-top boxes, gamepads, 3D glasses, remote controls, electric appliances, office machines

**Class 38**

(4) Communication and telecommunication services, namely, telecommunication bundle services that allow customers to reach cellular phones, voicemail and call routing between wireline and wireless phones and voicemail boxes, telecommunication routing and junction services; computer aided transmission of messages and images, namely, recording, storage and subsequent transmission of voice and text messages by telephone or computer; providing telecommunication connection to a global computer network, namely, operating a wide-area network (WAN) and provision of access to a global computer network; streaming of audio and video content via the Internet featuring music, movies, news, sports and entertainment; providing multiple use access to global computer information networks for the transfer and dissemination of a wide range of information; provision of access to the Internet; electronic transmission of computer software for smart phones, mobile phones, and handheld electronic devices via the internet and other computer and electronic communication networks, namely, pay-per-view television transmission services, recording, storage and subsequent transmission of voice and text messages by telephone

**Class 41**

(5) Workshops and seminars in the field of computers and mobile phones, namely, workshops and seminars on how to operate and use computers and mobile phones; arranging, organizing and conducting conferences and symposia in the field of computer hardware, computer software and mobile telephone services; providing electronic publications for browsing and downloading over computer networks, namely, books, pamphlets, brochures, newsletters, journals and magazines relating to computer hardware, computer software, mobile phones, smart phones, handheld and mobile electronic devices

**Class 42**

(6) computer consultation services, namely, computer software consultancy, consultancy in the design, development and operation of computers and mobile phones; computer hardware and software design, editing, updating, testing, research and advisory services; consulting services in the field of design, selection, implementation and use of computer hardware and software systems for others; computer software design; computer system design; computer system analysis; planning, designing, implementing and developing computer networks for others; design, installation, interconnection, testing and maintenance of computer hardware and computer software for use in network computing; computer system and computer network integration; installation and maintenance of computer software; development and maintenance of computing network software for others; recovery of computer data; updating computer software for others; computer and consumer electronic diagnostic services; computer programming services; technical support in the form of monitoring global computer network systems, technical support services in the form of troubleshooting of mobile phones, computer hardware and software problems; computer consultation services for determining the compatibility of computer hardware and computer software; computer consultation services for computer hardware and computer software for use in the field of heat exchangers and thermal management; technological consultation services in the field of design, selection, implementation and use of heat exchangers and thermal

management systems; computer services, namely, creating an online community for registered users to participate in discussions, share recommendations, get feedback from their peers, from virtual communities and engage in social networking; design, development, maintenance and management of application software for mobile phones, computers, TVs and consumer audio and visual electronics; maintenance, repair and updating of computer operating system software; computer system integration; computerized data storage and retrieval services for audio and video works, and for computer data and digital images, namely, digital compression of computer data and computer software for processing photographic images, audio and video works

## Goods

### Class 09

(1) Downloadable mobile applications for browsing product catalogs, reviewing product information and ordering products in the field of industrial supplies.

(2) Downloadable mobile applications for accessing and managing product orders; downloadable mobile applications for creating and managing lists for ordering and re-ordering products.

### Class 16

(3) Catalogs in the field of industrial supplies.

## SERVICES

### Class 35

(1) Providing a website for reviewing and managing product orders; providing a website for creating and managing lists for ordering and re-ordering products.

(2) Distributorship services in the field of industrial supplies consisting of products in the fields of abrading and polishing, building and grounds, electrical and lighting, fabricating, fastening and joining, filtering, flow and level control, furniture and storage, hand tools, hardware, heating and cooling, lubricating, material handling, measuring and inspecting, office supplies and signs, pipe, tubing, hose and fittings, plumbing and janitorial, power transmission, pressure and temperature control, pulling and lifting, raw materials, safety supplies, sawing and cutting, sealing, shipping, and suspending; electronic catalog services featuring industrial supplies consisting of products in the fields of abrading and polishing, building and grounds, electrical and lighting, fabricating,

fastening and joining, filtering, flow and level control, furniture and storage, hand tools, hardware, heating and cooling, lubricating, material handling, measuring and inspecting, office supplies and signs, pipe, tubing, hose and fittings, plumbing and janitorial, power transmission, pressure and temperature control, pulling and lifting, raw materials, safety supplies, sawing and cutting, sealing, shipping, and suspending; catalog ordering services, online ordering services, and online wholesale and retail store services in the field of industrial supplies consisting of products in the fields of abrading and polishing, building and grounds, electrical and lighting, fabricating, fastening and joining, filtering, flow and level control, furniture and storage, hand tools, hardware, heating and cooling, lubricating, material handling, measuring and inspecting, office supplies and signs, pipe, tubing, hose and fittings, plumbing and janitorial, power transmission, pressure and temperature control, pulling and lifting, raw materials, safety supplies, sawing and cutting, sealing, shipping, and suspending; wholesale and retail store services in the field of industrial supplies provided by means of catalogs, telephone, facsimile, and electronic communications; the bringing together, for the benefit of others, of a variety of goods, enabling customers to conveniently view and purchase those goods in the field of industrial supplies consisting of products in the fields of abrading and polishing, building and grounds, electrical and lighting, fabricating, fastening and joining, filtering, flow and level control, furniture and storage, hand tools, hardware, heating and cooling, lubricating, material handling, measuring and inspecting, office supplies and signs, pipe, tubing, hose and fittings, plumbing and janitorial, power transmission, pressure and temperature control, pulling and lifting, raw materials, safety supplies, sawing and cutting, sealing, shipping, and suspending; providing a website featuring product information, technical drawings, and three-dimensional electronic models in the field of industrial supplies consisting of products in the fields of abrading and polishing, building and grounds, electrical and lighting, fabricating, fastening and joining, filtering, flow and level control, furniture and storage, hand tools, hardware, heating and cooling, lubricating, material handling, measuring and inspecting, office supplies and signs, pipe, tubing, hose and fittings, plumbing and janitorial, power transmission, pressure and temperature control, pulling and lifting, raw materials, safety supplies, sawing and cutting, sealing, shipping, and suspending.

### Goods

(1) Chemical fiber yarns and threads for general industrial and manufacturing use; elastomer rubber threads and elastomer rubber yarns; elastic soldering threads and elastic soldering yarns; rubber thread and covered rubber yarn; yarns and thread in the nature of carbon fibres; ceramic fibre wool yarns and ceramic fibre wool threads for general industrial and manufacturing use; ceramic fibre yarns and ceramic fibre threads for insulation; ceramic enamel fibre insulation; ceramic fibre yarns and ceramic fibre threads for ceramic insulators; plastic yarn and thread for general industrial and manufacturing use; yarns and threads of rubber; carbon fibres; semi-worked polymer resins in the form of fibres; fibres impregnates with synthetic resins for use in manufacture; spun polyester fibre for general industrial and manufacturing use; vulcanized fibre; plastics fibres for general industrial and manufacturing use; glass fibre and glass wool for insulation; glass fibre thread and yarn; yarns and threads, for textile use; chemical fibres, namely, nylon, polyethylene terephthalate, rayon, diacetate fibre, triacetate fibre, metallic fibre, silicon carbide fibre, inorganic fibre base mixed thread and yarn; yarns, threads and fibres for insulation, namely thermal insulation; glass fibre thread and yarn.

(2) Yarns and threads for general industrial use and manufacturing use, composite yarns and threads for thermoplastic industrial and manufacturing applications, yarns and threads for the manufacture of high performance automotive parts, sporting goods, aerospace goods, wind energy goods, construction goods and reinforced thermoplastic pipes, yarns and threads for the manufacture of rubber-mechanical goods, yarns and threads to be wrapped around optical fibres to improve signal quality, yarns and threads for the manufacture of cables and protective cables, yarns and threads for wrapping around cables; fibreglass yarns and threads, for general industrial and manufacturing use; fibreglass for general industrial and manufacturing use; vitreous silica fibres for general industrial and manufacturing use.

(3) Synthetic fibres for general industrial and manufacturing use.

(4) Chemical fibre base mixed thread and yarn.

## SERVICES

Custom assembling of spools of yarns, threads and fibres for others and advisory, consultancy and information services relating to all the aforementioned services; custom manufacture of spools of yarns, threads and fibres for others and advisory, consultancy and information services relating to

(1) electronic and computer devices enabled for wireless communication, namely, computers; computer mice; video conference equipment, namely, video monitors, microphones, audio speakers, and cameras; remote controls for radios, televisions, stereos, lights, video cassette recorders, DVD machines, and electronic door openers; meters, namely, utility meters that measure gas, electricity and water, gas meters, water meters, and electric meters; components, parts and fittings in the consumer electronics field, namely for televisions, for radios, for stereos, for personal digital assistants, for video cassette recorders, for DVD machines, and remote controls for the aforementioned items; video gaming equipment, namely, joysticks, interactive remote control units, video game machines for use with televisions and computers, and video monitors for use with video game machines; anti-intrusion security systems comprised of security alarms, anti-intrusion alarms, intrusion detectors, personal security alarms, and electronic motion sensitive switches; electrical and heating systems comprised of controllers, thermostats, and electrical resistance heating wires; glass breakage monitoring sensors; wireless keypads; child monitoring systems comprised of video cameras, and audio speakers; smoke and fire detectors; fire alarms; alarm stations comprised of fire alarms and remote controls for fire alarms; personal transponders; garage door openers; voice control systems comprised of voice sensors and voice recognition software; interoperable electronic and computer devices, namely, computers, computer mice, personal digital assistants, cellular telephones, mobile communication devices, namely, mobile telephones, mobile facsimile machines, mobile handheld televisions, laptop computers and portable handheld computers, personal stereos and radios, portable handheld video monitors, walkie-talkies, wireless utility meters that measure gas, electricity and water, wireless gas meters, wireless water meters, and wireless electric meters, data processors, namely computer central processing units, interface cards for computers; facsimile machines and components, parts and fittings for facsimile machines, television receivers and components, parts and fittings therefor, radio receivers and components, parts and fittings therefor, electronic conferencing equipment, namely, video monitors, microphones, audio speakers and cameras and components, parts and fittings therefor, computerized personal organizers and components, parts and fittings therefor, and telecommunications machines and apparatus enabled for wireless communication, namely, transceivers, signal amplifiers, signal repeaters for use in computer networks, computer network switches, change-over switches for telecommunication apparatus, A/D converters and D/A converters; electronic and computer devices, namely, computers, computer mice, personal digital

assistants, cellular telephones, mobile computers, walkie-talkies, data processors, namely computer central processing units, interface cards for computers, facsimile machines, television receivers, radio receivers, electronic conferencing equipment, namely, video monitors, microphones, audio speakers, and cameras, computerized personal organizers, and telecommunications machines and apparatus enabled via interoperability standards for wireless communication, namely, transceivers, signal amplifiers, signal repeaters for use in computer networks, computer network switches, change-over switches for telecommunication apparatus, A/D converters and D/A converters; wireless communication devices, namely, single channel and multiple channel radio communication machines and apparatus for fixed stations, telecommunications radio transmitters, audio-visual receivers, wireless access point devices comprising network routers, radio wave antennas for computer networking, radio transceivers and firmware for controlling and coordinating the aforementioned components; wireless communication devices, namely, radio wave antennas for use in computer networking, gateway routers in the nature of computer control hardware, and modems for enabling electronic and computer devices in the nature of computers, computer mice, meters, namely, acoustic meters, frequency meters, pulse meters, vibration meters, and water meters; personal digital assistants and components, parts and fittings therefor, cellular telephones and components, parts and fittings therefor, mobile communication devices, namely, mobile telephones, mobile facsimile machines, mobile handheld televisions, laptop computers and portable handheld computers, personal stereos and radios, portable handheld video monitors, walkie-talkies, wireless utility meters that measure gas, electricity and water, wireless gas meters, wireless water meters, and wireless electric meters, and components, parts and fittings therefor, data processors, namely computer central processing units and components, parts and fittings therefor, interface cards for computers and components, parts and fittings therefor; facsimile machines, television receivers, radio receivers, electronic conferencing equipment, namely, video monitors, microphones, audio speakers, and cameras, computerized personal organizers, and telecommunications machines and apparatus for communicating wirelessly, namely, transceivers, signal amplifiers, signal repeaters for use in computer networks, computer network switches, change-over switches for telecommunication apparatus, A/D converters and D/A converters; and electronic and computer devices conforming to interoperability standards for wireless communication, namely, computer hardware, computers, laptop computers, portable handheld computers and mobile phones; electronic and computer devices enabled via interoperability standards for wireless communication, namely, computer hardware, computers, laptop computers, portable handheld computers and mobile phones; devices for enabling electronic and computer devices for wireless communication, namely, single-channel radio communication machines and apparatus for fixed stations, radio transmitters, radio receivers, wireless access point (wap) devices comprising network routers, radio wave antennas for computer networking, radio transceivers and firmware for controlling and coordinating the aforementioned components; devices for enabling electronic and computer devices for wireless communication, namely, radio wave antennas for use in computer networking, gateway routers in the nature of computer control hardware, and modems

### **Class 11**

(2) environmental control devices enabled for wireless communication, namely, water control valves for use as components in heating and cooling installations, gas control valves for use as components in environmental control devices, refrigerators, freezers, air conditioners, electric radiators, steam radiators for heating buildings, regulating accessories for water, namely, flow control valves, steam pipes for use as components in heating and cooling installations, gas supply valves for use as components in heating and cooling installations and gas pipes for use as components in heating and cooling installations, steam generating installations, sanitary sewage

purification system installations namely water purification machines, steam generating installations and landscape irrigation systems comprised of pipes, valves and controllers; environmental control systems and devices enabled through use of interoperability standards for accommodating remote monitoring and control by wireless communication, namely, water control valves for use as components in heating and cooling installations, gas control valves for use as components in environmental control devices, refrigerators, freezers, air conditioners, electric radiators, steam radiators for heating buildings, regulating accessories for water, namely, flow control valves, steam pipes for use as components in heating and cooling installations, gas supply valves for use as components in heating and cooling installations and gas pipes for use as components in heating and cooling installations, sanitary sewage purification system installations namely water purification machines, steam generating installations and landscape irrigation systems comprised of pipes, valves and controllers; water supply systems, namely, plumbing systems for residential, commercial and industrial use comprised of pipes, water meters, water valves, metal and plastic drains, hot-water heaters, hot and cold water storage tanks, sinks, toilets, clothes washers, bathtubs, showers, and related fixtures; cooking systems, namely, cooking ovens and convection ovens, slow cookers, microwave ovens, cooking stoves, coffee makers and toasters; sanitary sewage systems, namely, toilets, urinals, on-site sewage systems comprised of water and sewage pipes, water and sewage valves and water and sewage tanks, septic systems comprised of sewage pipes, sewage valves and septic tanks, effluent systems comprised of waste water pipes, waste water valves and waste water tanks; devices enabled via interoperability standards for wireless communication, namely, transceivers, signal amplifiers, signal repeaters for use in computer networks, computer network switches, change-over switches for telecommunication apparatus, a/d converters and d/a converters; devices for enabling environmental control devices for wireless communication, namely, environmental control devices for use in remotely monitoring and controlling environmental conditions within a building, facility, grounds or designated spatial area, namely, water supply valves for use as components in heating and cooling installations, gas supply valves for use as components in heating and cooling installations, refrigerators, air conditioners, electric radiators, steam radiators, regulating accessories for water, namely, water control valves for use as components in heating and cooling installations, steam control valves for use as components in heating and cooling installations, steam pipes for use as components in heating and cooling installations, gas supply valves for use as components in heating and cooling installations and gas pipes for use as components in heating and cooling installations steam generating installations; electric lamps; led lighting apparatus, namely, interior light fixtures, exterior light fixtures, LED landscape lights, electrical control systems for interior lights, exterior lights and landscape lights, timers for interior lights, exterior lights and landscape lights, LED lamps; automobile lights; electric cooking utensils; refrigerators; refrigerating appliances and installations, namely, freezers; air conditioners; steam generating installations; regulating accessories for water or gas apparatus and pipes, namely, gas control valves and fittings for use as components in heating and cooling installations, gas supply valves and pipes for use as components in heating and cooling installations, water supply valves and fittings for use as components in heating and cooling installations, gas pipes for use as components in heating and cooling installations, water control valves for use as components in heating and cooling installations and fittings, water flow control valves and fittings; water supply apparatus, namely, landscape irrigation systems comprised of water pipes, water valves and controllers, water supply valves, hose bibs, namely, water pipes, water flow control valves and controllers; heating apparatus, namely, electric radiators, steam radiators, furnaces for residential, commercial and industrial buildings, heating boilers, heat pumps, electric space heaters, radiant floor heaters, hot-water heaters, steam radiators for heating buildings; sanitary apparatus and installations, namely, aerosol dispensing systems comprised of cans for containing disinfectants, bottles for containing

disinfectants, containers for containing disinfectants, flow control valves for disinfectants and atomizers; disinfectant apparatus for household, commercial and industrial use, namely, aerosol dispensing systems comprised of cans for containing disinfectants, bottles for containing disinfectants, containers for containing disinfectants, flow control valves for disinfectants and atomizers; electric radiators; automatic watering installations, namely, water control valves, plastic and metal water pipes, irrigation sprinklers, dripper irrigation systems

## SERVICES

### Class 38

(1) wireless communication services, namely, delivery of textual and voice messages by electronic transmission via the Internet and neighborhood area computer networks; electronic, electric, and digital transmission of data, namely, text documents, live streaming audio and pre-recorded computer audio files, music, live streaming videos and pre-recorded video files, computer files, images, namely, photographs, pictures, drawings and downloadable computer graphics, and textual and voice messages, via the Internet and neighborhood area computer networks; wireless personal communication services (PCS); and wireless digital messaging

### Class 42

(2) wireless communication services, namely, development of new technology for others, namely, development of new products for others in the fields of wireless communication, energy management, and environmental control; development of new technology for others, namely, interoperability standards for wireless communication, energy management, environmental control, and remote monitoring; development of interoperability standards (data formats) for permitting communications between the computer hardware and software products of others used in remote monitoring services of heating, ventilating and air conditioning apparatus; research and development for new products for others; monitoring by remote access computer systems used to control heating, ventilating and air conditioning apparatus; technical consultation and research in the field of interoperability standards, namely, data formats permitting communications between the computer hardware and software products of others used in remote monitoring of heating, ventilating and air conditioning apparatus; development of new technology for others in the fields of consumer electronics and wireless communications; research and development of standards for products and services in the fields of consumer electronics and wireless communications; testing, analysis, and evaluation of wireless communication networks, home area networks, commercial networks, industrial networks, and utility company networks of others for the purposes of certification; technical support services, namely, remote monitoring services of heating, ventilating, and air conditioning apparatus; and technical consultation and research in the field of consumer electronics

### Index Headings

ENERGY BAGUA BAGUA NEI GONG

### Image Description (Vienna)

- Religious figures, men wearing a robe or a toga
- Trees or bushes of some other shape
- One tree or one bush
- Deciduous trees
- Circles
- One circle or ellipse
- Circles or ellipses containing representations of human beings or parts of the human body
- Circles or ellipses containing representations of animals, parts of animals' bodies or plants
- Inscriptions in Chinese, Japanese or Korean characters

### Foreign Character Translation

The translation provided by the applicant of the Chinese word(s) reading from the left, the first two Chinese characters mean the eight trigrams used in Daoism to represent the fundamental principles of reality. The second two Chinese characters is internal 'Kung Fu; a practice to increase vital energy and self-cultivation.

### Foreign Character Transliteration

The transliteration provided by the applicant of the Chinese character(s) is reading from the left, the transliteration of the first two Chinese characters is 'Bagua'. The transliteration of the second two Chinese characters is 'Nei Gong'. As a whole these four characters translate to 'energy bagua'. The four Chinese characters refer to the ancient Chinese philosophy and to the methodology created by the applicant to gain health and self-cultivation through this ancient philosophy.

---

### Colour Claim

Colour is claimed as a feature of the trade-mark. The mark consists of the words 'Maku Laku' on an asymmetrical oval. The word 'Maku' appears in red above the word 'Laku' in black. The words appear on a yellow asymmetrical oval having a downward sloping curve at the top from left to right. There is a white curved area near the top right of the mark made to look like it is reflecting light. The mark has a black border, with red shading inside the border from top left to the bottom right of the mark.

**Foreign Character Translation**

As provided by the applicant, MAKU is Finnish for taste and LAKU is a colloquialism for licorice.

**Goods****Class 30**

Confectionery, namely licorice, licorice sweets, chocolate, candy bars, dragees.
