Trademarks Journal

Vol. 66 No. 3378

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Goods

Class 07

(1) Combined heat and power (CHP) units for producing energy; combined heat and power (CHP) units that converts biomass to power; biomass gasification operated power generators; gasifiers; fuel feeding apparatus for plants producing energy, namely fuel screw conveyors and fuel chain conveyors; generators of electricity; gas operated power generators; engines for the generation of electricity; electric motors for heating installations; gas motors; internal combustion engines for power generation, other than for land vehicles; internal combustion engines for power generation; ignition system for internal combustion engines; fuel converters for internal combustion engines; gas converters; refrigerant compressors for heating installations.

Class 09

(2) Scientific apparatus and instruments, namely, electronic analyzers for measuring, testing and detecting power production processes where energy is obtained from biomass; measuring apparatus and instruments, namely fuel level detectors; signaling apparatus and instruments, namely temperature alarm sensors, pressure alarm sensors and gas leak alarm sensors; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely control systems for monitoring and controlling of power generation and distribution comprising electrical control systems for conveying, distributing, transforming, regulating or controlling electric current; data processing equipment, namely computer central processing units; computers; computer software for remote monitoring, controlling and operating power plants and combined heat and power (CHP) units for producing energy; electric control panels; energy regulators, namely voltage regulators; electrical controls for heating boilers; temperature sensors; automation apparatus for control engineering, namely programmable logic

control (PLC) system for controlling biomass CHP units; automatic time switches; remote controls for monitoring and controlling function of power plants and combined heat and power (CHP) units for producing energy; remote alarms [other than antitheft for vehicles], namely high or low temperature alarms, high or low pressure alarms, SMS or email alarms; electronic maintenance manuals.

Class 11

(3) Apparatus for steam generating, namely steam generators; apparatus for refrigerating, namely gas cooling units, namely, heat exchangers for industrial use; apparatus for drying purposes, namely air dryers for use in heating systems, ventilation systems, air conditioning systems and refrigeration systems; heating elements; industrial heating apparatus, namely industrial space heaters; heating boilers; boilers for central heating installations; feeding apparatus for heating boilers, namely pipes for heating boilers; gas generating furnaces for industrial purposes; gas operated apparatus for heating, namely gas operated space heaters; gas fired water heaters; gas boilers; heat regenerators; gas burners; gas boilers [other than parts of machines]; gas scrubbers; gas recovery apparatus, namely gas recovery installations used in power plants and in combined heat and power (CHP) units that converts biomass to heat; separators for purifying gas; burners for the combustion of gas in boiler units; brackets for gas burners; reactors for gas-solids reactions, namely biomass gasification reactors; gas reactors for converting wood chips into wood gas; gas regulators for biomass gasification operated power generators; gas burners for industrial purposes; pressure controllers [regulators] for gas pipes; heat exchangers; heat exchangers for central heating purposes; pressure relief valves for use with gas installations; filters for gases [household or industrial installations]; gas condensers; incinerators; furnace ash boxes; air dryers; firewood dryers; dryers for drying wood chips; heat exchangers; heat regulating apparatus, namely temperature regulators for regulating temperature in power plants and in combined heat and power (CHP) units for producing energy.

Services

Class 37

(1) Construction of power plants; installation and repair of heating elements; maintenance of heating apparatus, namely heating boilers; installation of combined heat and power (CHP) units for producing energy; repair of combined heat and power (CHP) units for producing energy; maintenance of combined heat and power (CHP) units for producing energy; installation, maintenance and repair of remote controls for monitoring and controlling function of power plants and combined heat and power (CHP) units for producing energy; installation, maintenance and repair of advisory services relating to the installation of power plants; repair information in the field of repair of power plants, heating elements and combined heat and power (CHP) units for producing energy.

Class 42

(2) Scientific research in the field of heating technology and energy generating; technical research in the field of heating technology and energy generating; industrial analysis and research services in the field of heating technology and energy generating; technological consultancy in the field of heating technology and energy generating; energy generating engineering; design and development of computer hardware and software; computer programming; software as a service [saas] featuring software for remote monitoring, controlling and operating power plants, power stations and combined heat and power (CHP) units for producing energy; cloud computing featuring software for use in database management and software for remote monitoring, controlling and operating power plants, power stations and combined heat and power (CHP) units for producing energy; technical design and planning of power stations; design and development of

electrical controllers for use in the field of control engineering; design and development of remote controllers and remote monitoring systems for monitoring and controlling function of power plants, power stations and combined heat and power (CHP) units for producing energy; remote control and remote monitoring services of heating systems for households and industrial use; energy usage monitoring, metering, and analysis in the field of heating technology and energy generating; consultancy in the field of energy-saving; providing technical reports in the field of heating technology and energy generating.

Colour Claim

Colour is claimed as a feature of the trademark. The colours blue, black, white, gold, orange and green are claimed as features of the trademark. The background of the label is blue. The words "hydrate & revive +" and "of" are white. The words "argan oil" and "morocco" are a slightly deeper blue than the background. The words "EXTRA STRENGTH/FORTIFIÉ" are black and are presented within a gold oval. The letters "ogx" are primarily black but a green swish extends across the "g" and the "x", forming part of the "x". The words "beauty pure and simple" are black. The letters "ogx" and the words "beauty pure and simple" appear on a gold background. The gold background is approximately trapezoidal in shape. The top and bottom lines of the trapezoid are parallel to each other but the left and right lines of the trapezoid curve inwardly in a downward direction. Two orange leaf designs appear on the gold background, one on each side of the composite of "ogx" and "beauty pure and simple". The red outline does not form part of the trademark but only serves to show the shape of the label.
