Trademarks Journal

Vol. 67 No. 3426

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Computer hardware; computer software namely, software for use in the designing and planning of energy, gas, petroleum, oil and water facilities for use in the energy, utilities, electric, gas, water and petroleum industries; software for use in managing, operating and controlling energy, gas, petroleum, oil and water production facilities in the energy, utilities, electric, gas, water and petroleum industries; software for use in forecasting energy, gas, petroleum, oil and water demand and production for use in the energy, utilities, electric, gas, water and petroleum industries; software for use in creating, developing and managing marketing campaigns in the energy, utilities, electric, gas, water and petroleum industries; software for use in training employees and operators of energy, gas, petroleum, oil and water production facilities in the energy, utilities, electric, gas, water and petroleum industries; computer software for database management; network operating system programs; magnetic data carriers and recording discs, namely, prerecorded magnetic data carriers, namely floppy disks, hard discs, CD's, DVD's, CO-ROM's and USB-sticks, all containing information in the field of the oil and gas, energy and utility sectors, optical disks and CD-ROMs featuring instructional manuals and technical information for use in the design, forecasting, marketing, operations, planning and training needs in the electric, gas, water and petroleum industries; compact discs, DVDs and other digital recording media, namely, prerecorded compact discs, optical disks, CD-ROMs, and DVDs featuring instructional manuals and technical information for use in the electric, gas, water and petroleum industries; data processing equipment, namely computers; computers.

Services**Class 35**

(1) Business management; business administration; business consultancy services relating to the supply of quality management systems, namely, business management services for establishing

business quality policy and determining business means for implementing those policies to improve customer satisfaction, business evaluation of business management structure, policies, practices and procedures, expert evaluations and reports relating to business management structure, policies, practices and procedures, management of business operational risks, and business evaluations and expert assessments related to business management structure, policies, practices and procedures; data processing services for reducing operational risks of others in the fields of oil and gas and maritime oil and gas; provision of business information, namely provision of business information in the fields of quality control in the oil and gas, maritime and power generation sectors; provision of business information in the environmental, health and safety, maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy and solar energy sectors

Class 37

(2) Building construction; building construction supervision; supervision of underwater construction; supervision of the engineering of structures, namely, construction supervision and construction management; information services relating to repair or installation also provided on-line from a computer database or the internet, namely, providing information related to the installation and repair of onshore and offshore oil and gas production installations, equipment and pipelines, maritime vessels, offshore oil and gas platforms, and industrial equipment; marine construction and engineering, namely, marine construction of onshore and offshore oil and gas production installations, pipelines, maritime vessels, offshore oil and gas platforms; marine dry docking services and fitting out, namely, construction, repair and maintenance of boats and ships; repair of oil and gas onshore, maritime and offshore production installations for others; installation, maintenance and repair of computer hardware; installation services of oil and gas onshore, maritime and offshore systems, namely, installation of oil and gas production equipment, installation of maritime oil and gas production equipment, installation of computer systems in relation to oil and gas onshore, maritime and offshore systems, technical consulting related to the installation of oil and gas equipment, control systems, and machinery.

Class 39

(3) Transport, namely, transport by pipeline, cargo ship transport, marine transport, transportation of goods by air and road; packaging, namely, packing, crating and warehousing services and packing or packaging articles for transportation; advisory services relating to the transportation of goods in the maritime field and in relation to offshore installations, namely, marine and offshore transportation consulting services.

Class 40

(4) Coating services for the marine construction, maintenance and repair industry, namely, application of coatings and sealers to and application of protective coatings to, onshore and offshore oil and gas production installations, equipment and pipelines, maritime vessels, offshore oil and gas platforms and industrial plant equipment.

Class 41

(5) Training of seafarers' staff according to STCW (seafarers' training, certification and watch keeping); setting of training standards; technical training relating to technical risk; training in the operation of software systems; providing on-line electronic publications, in particular concerning technical rules in the maritime sector, particularly concerning IMO, ILO and IACS regulations, and /or concerning technical rules in the field of renewable energy; drilling technology safety training; technical training relating to health and safety; education services relating to water, in particular education services relating to water management, water pollution and/or water safety; arranging and conducting of colloquiums, conferences, congresses, seminars, symposiums and workshops,

in particular in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy and solar sectors; certification of management systems in the fields of quality, the environment, health and safety as well as in the in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy and solar sectors.

Class 42

(6) Scientific and technological services and research and design relating thereto, namely, underwater exploration, scientific research, analysis, and testing in the field of energy, marine exploration, underwater and onshore energy exploration and production, scientific research for others; industrial analysis and research services, namely, industrial research in the field of energy, marine exploration, underwater and onshore energy exploration and production; design and development of computer hardware and software; computer and information technology consultation services, namely providing technology relating to the energy, oil and gas industries, and providing technical information updates of industrial process control computer software via the global computer network; information services in the field of the development of computer systems and networks, namely, providing technology relating to the energy, oil and gas industries, and providing technical information updates of industrial process control computer software via the global computer network; consultancy services relating to marine claims, marine surveying and marine technology, namely, marine surveying for others, technology consultation in the field of marine exploration, technological consultation in the technology field of marine exploration equipment; marine engineering consultation services; oil and gas industry professional consultation services, namely, analysis services for oilfield exploration, geophysical exploration for the oil, gas and mining industries; oceanography and meteorological services; underwater exploration; geological, underwater and oilfield surveying; classification and certification of ships and offshore installations, namely, testing, analysis, and evaluation of ships, offshore oil platforms, and oil pipelines for the purpose of certification and re-certification; quality control certification, namely, testing and monitoring ships, offshore oil platforms, and oil pipelines for quality control purposes; testing, analysis and evaluation of the goods and services of others for the purpose of certification in the fields of maritime energy production and transportation technologies, oil and gas production, storage and transport, underwater energy production technology, power generation, material science, water management, water pollution and water safety, and onshore and offshore wind energy, wave energy, tidal energy and solar energy production, storage and transport; certification of management systems in the fields of quality, the environment, health and safety as well as in the in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy and solar sectors, namely, testing, analysis, and evaluation of computer information systems, ships, offshore oil platforms, oil pipelines, wind turbines, wave energy converters, tidal stream generators and photovoltaic systems to assure compliance with shipbuilding, maritime transport and energy production industry standards; technical analysis, consulting and surveys, namely, analyzing technology requirements and developing recommendations for the computer software and systems and other technology needed to meet those requirements, in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy and solar sectors; certification of material, installations and components in the fields of oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and maritime technology, namely, testing, analysis and evaluation of the goods and services of others for the purpose of certification in the maritime energy production and

transportation industries, oil and gas production, storage and transport industries, underwater energy production industry, power generation industry, water management, pollution and safety industries, and onshore and offshore wind energy, wave energy, tidal energy and solar energy production, storage and transport industries; basic scientific research in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and of wind energy systems; inspection and certification of wind energy systems, bridges, dikes and dams, namely, testing, analysis, and evaluation of wind energy systems, bridges, dikes and dams for the purpose of certification and re-certification; laboratory testing and analysis services, namely, scientific research in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; engineering; providing of scientific expertise, namely, technical consultancy in relation to technical research in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; technical testing and checking, namely, surveying, materials testing and analyzing research in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; technical measurements, namely, surveying in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; scientific examinations, namely, scientific research in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; development of technical and scientific surveys, namely, conducting scientific studies for others in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; technical research, namely, conducting scientific studies in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; mechanical research, namely conducting scientific studies in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; material testing; quality control for others in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; technical project studies, namely, conducting scientific feasibility studies in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; certification of quality management systems according to different standards, namely, testing, analysis, and evaluation of quality management systems of others for the purpose of certification and re-certification; certification of seafarers' stall according to STCW (seafarers' training, certification and watch keeping), namely, testing, analysis, and evaluation of the knowledge, skills and abilities of others for the purpose of certification and recertification in the field of seafarers' training, certification and watch keeping; certification of pipelines, petrochemical facilities and industrial plants, namely, testing, analysis, and evaluation of pipelines, petrochemical facilities and industrial plants for the purpose of certification and re-certification; certification of ships and offshore-installations, namely, testing, analysis, and evaluation of ships and offshore-energy exploration and production installations for the purpose of certification and re-certification; providing quality

assurance services, namely, providing quality control for others in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; process monitoring for quality assurance for others in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; quality assurance consultancy, namely, quality control for others in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and wind energy systems; issuing of scientific and technological information, in particular statutory certificates, issuance of statutory certificates, certificates of compliance and initial surveys for the maritime industry, namely, conducting surveys and testing for workplace excellence in the maritime industry, developing and administering standards and procedures for certifying professionals in the oil and gas production and transport and maritime industries and issuing or awarding certificates of accreditation in connection therewith; design of seagoing vessels for others; advisory services relating to obtaining quality systems approvals from organizations, namely, quality control for others, providing quality assurance services in the field of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy, solar sectors and of wind energy systems; professional consultancy relating to the conservation of energy, namely, engineering and advisory services in the field of energy efficiency, consulting services in the fields of energy measurement to improve energy efficiency; assessing technical information in relation to risks in the field of maritime technology, namely, technical research in the field of underwater exploration hazards and onshore and offshore energy production; computer programming and software design in the fields of ship design and ship operations; advisory services relating to the use of computer software, in particular in the fields of ship design and ship operations, namely, advisory services in the field of software use, product development and quality improvement of software in the fields of ship design and ship operations; maintenance of computer software for others in the fields of ship design and ship operations; health and safety testing, research, design and auditing, namely, designing workplace facilities and equipment to optimize efficiency and safety, product safety testing, testing, analysis, and evaluation of pipelines, petrochemical facilities, ships, offshore oil platforms, wind turbines, wave energy converters, tidal stream generators, photovoltaic systems and industrial plants for the purpose of safety certification and recertification; energy auditing; providing technical safety services for engineering products, namely, testing, analysis, and evaluation of pipelines, petrochemical facilities, ships, offshore oil platforms, wind turbines, wave energy converters, tidal stream generators, photovoltaic systems and industrial plants for the purpose of safety certification and re-certification; chemical analysis; certification for the purpose of quality control of management systems in the fields of quality, the environment, health and safety as well as in the fields of maritime technologies, oil and gas, underwater technology, power generation, material science, water, onshore and offshore wind energy, wave energy, tidal energy and solar sectors, namely, testing, analysis, and evaluation of pipelines, petrochemical facilities and industrial plants for the purpose of certification and re-certification, testing, analysis and evaluation of the goods of others for the purpose of certification all in the fields of maritime energy production and transportation, oil and gas production, storage and transport, underwater energy production technology, power generation, material science, water management, water pollution and water safety, and onshore and offshore wind energy, wave energy, tidal energy and solar energy production, storage and transport; electronic data storage; inspection of pipelines, petrochemical facilities and industrial plants, namely, inspection services in the course of construction of pipelines, offshore oil platforms, petrochemical facilities and industrial plants and facilities.

Class 45

(7) Advisory services relating to the preparation of standards, namely, tracking and monitoring regulatory requirements in the field of occupational health and safety, maritime shipping and transport, energy exploration, production and transport and ship-building for regulatory compliance purposes; information services relating to manufacturing standards, namely, providing a web site featuring information in the fields of occupational health and safety rules and regulations; reviewing standards and practices to assure compliance with environmental, ship building, occupational health and safety, maritime safety, and energy exploration, production and transport laws and regulations particularly as they pertain to the maritime industry; setting of standards for the maritime industry, namely, defining and reviewing standards and practices to assure compliance with shipbuilding, maritime shipping and transport laws and regulations, tracking and monitoring regulatory requirements in the field of maritime shipping and transport, off-shore energy exploration, production and transport, ship-building for regulatory compliance purposes; security assessment of risks relating to the security and protection of property, in particular in the field of maritime technologies, namely, providing security assessments of physical locations, and working environments, providing security assessments for businesses and governmental agencies, security threat analysis for protecting personal and industrial property; inspection of factories, ships and on or offshore installations for safety purposes, namely, inspection of factories for safety purposes, inspection of ships and onshore or offshore energy exploration and production facilities for safety purposes to ensure compliance with maritime rules and regulations; consultancy on regulations on safety at work; consultancy services relating to health and safety, namely, tracking and monitoring regulatory requirements in the field of occupational health and safety for regulatory compliance purposes; inspection of industrial machinery and equipment for safety purposes in the fields of occupational health and safety, maritime shipping and transport, energy exploration, production and transport and ship-building; research relating to safety, namely, reviewing workplace safety data, analyzing the data in connection with workplace safety laws and regulations, and preparing compliance reports; safety evaluation, namely, reviewing standards and practices to assure compliance with workplace and maritime safety laws and regulations; development of guidelines and best practices for industries, in particular for maritime industries, namely, reviewing standards and practices to assure compliance with shipbuilding, maritime shipping and transport, workplace safety laws and regulations.
