## Trademarks Journal

2019-11-27 — Vol. 66 No. 3396

# Trademarks Journal

## Vol. 66 No. 3396

---

### General Information

---

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

---

### Electronic *Trademarks Journal*

---

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

---

### Official Languages

---

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

---

### Filing Dates

---

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

---

## Nice Classification

---

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

630, boul. René-Lévesque Ouest, 20e étage,  
Montréal, QUEBEC, H3B1S6

**TRADEMARK DETAILS****Trademark Type**

Design

**Visual Representation****Colour Claim**

Colour is claimed as a feature of the trade-mark. The bigger diamond shape at the left of the design is comprised of four smaller diamond shapes which are red PANTONE\* 186C for the left one, orange PANTONE\* 1595C for the top and bottom ones, and yellow PANTONE\* 116C for the right one. The trapeze shapes at the upper and down right of this bigger diamond shape are yellow PANTONE\* 116C. The small diamond shape at the right of the design is dark magenta PANTONE\* 234C. The letters GLN are black PANTONE\* black C. The words 'Molding the Future' are gray PANTONE\* cool gray 8C. \*PANTONE is a registered trademark.

**Goods****Class 06**

(1) moulds (parts of machines), namely, metallic moulds for metal casting.

**Class 07**

(2) Moulds, namely, forging moulds; injection moulds for moulding plastic products and for injection moulding tools; gas injection moulds for moulding plastic products and for injection moulding tools; moulds for moulding plastic products (parts of machines); moulds for injection moulding tools; injection moulds for moulding plastic products and for injection moulding tools; die cast moulds (parts of machines); casting moulds of metal (parts of machines) for moulding plastic products and

for injection moulding tools; press moulds for metal moulding; machine-tool moulds; moulds for use in the manufacture of implant models for the human body and the manufacture of furniture; plastic injection moulding machines; machines for the manufacture of moulds for use in the manufacture of implant models for the human body and the manufacture of furniture; injection, stretch and blow moulding machines for use in the manufacture moulds for the manufacture of implant models for the human body and the manufacture of furniture; injection moulding guns; metallic moulded parts, namely, mouldings of metal for cornices; moulding die holders for use with machines for the manufacture of moulds for use in the manufacture of implant models for the human body and the manufacture of furniture.

## **Services**

### **Class 40**

(1) Custom manufacture of moulds used for the manufacture of implant models for the human body and the manufacture of furniture; engraving of moulds used for the manufacture of implant models for the human body and the manufacture of furniture, engraving services of moulds for moulding plastic products; contract moulding services, namely, parts molding services for medical equipment for the furniture industry; custom manufacture and assembly of plastic injection moulding machines; material treatment and transformation, namely, heat treatment of plastics and metals, metalworking; moulding of implants for the human body; moulding of implant models for the human body; moulding of metals, namely, metalworking; moulding of furniture; moulding of synthetic plastics for use in the manufacture of implant models for the human body and the manufacture of furniture; custom manufacture for others of models, moulds, tools and small-batch machines parts and mass production machine parts, all for use in the manufacture of implant models for the human body and the manufacture of furniture; development of models, moulds, tools and small-batch machines parts and mass production machine parts, all for use in optimizing the manufacture of implant models for the human body and the manufacture of furniture; injection moulding, investment casting, namely, die casting and metal casting, vacuum moulding by thermoforming, in particular of plastics, rubber, metal, casting resin and wax; surface finishing services and surface coating, namely for textile; material processing services, including plastic materials, namely, processing of plastic materials for use in the manufacture of moulds for moulding plastic products; plastic injection moulding; treatment of plastic materials to produce plastic moulds.

### **Class 42**

(2) Research, development, engineering in the field of the production and construction of moulds for moulding plastic products; design and development of tools for the plastic injection moulding industry; engineering services, namely, mechanical engineering in the field of mould construction for use in moulding plastic products, plastics and die-cutting technology, plastic injection moulding, die casting and metal casting and vacuum moulding by thermoforming, textile and metal finishing and textile and metal coating; technological consultancy and planning, and construction drafting and construction work, for others, namely, construction drafting and construction planning in the field of mould construction for use in moulding plastic products, plastics and die-cutting technology, plastic injection moulding, die casting and metal casting and vacuum moulding by thermoforming, textile and metal finishing and textile and metal coating; technical project planning, project preparation and project management, for others, namely, business project management services for construction projects in the field of mould construction for use in moulding plastic products, plastics and die-cutting technology, plastic injection moulding, die casting and metal casting and vacuum moulding by thermoforming, textile and metal finishing and textile and metal coating; industrial design; design and development of plastic injection moulding machines, injection moulds

for moulding plastic products, plastic injection-moulding tools for moulding plastic products and seals; part and mould design services, namely, design of moulds for moulding plastic products and of parts of plastic injection moulding machines ; computer aided part and mould design services, namely, computer aided graphic design of moulds for moulding plastic products and of parts of plastic injection moulding machines; consultancy relating to the design and development of machine-tools and the manufacture of plastic products, namely, technical consulting in the field of plastic injection moulding; quality control (testing), namely, consumer product safety testing services; development of industrial machinery for use in the field of plastic injection moulding; development of new products for others; development of industrial processes, namely, development of data processing programs by order of third parties; design of moulds for use in the manufacture of implant models for the human body and the manufacture of furniture; design and development of products for others; mechanical engineering; mechanical engineering research; research and development of new products for others in the field of plastic materials; engineering design services, namely, tool design; industrial testing of engineering works, namely, design and testing of new products for others; material testing services; engineering testing, namely, evaluation of employee performances.

**Claims**

Priority Filing Date: April 24, 2015, Country or Office: EUIPO (EU), Application No: 013985197 in association with the same kind of goods and in association with the same kind of services

#### Class 09

(1) computers; computer software to control electrical lighting and electrical control systems for lighting systems; computer software for the operation and control of lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; computer software programs and software applications for laptop computers, smart phones, smart watches and tablet computers, to enable the transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, computer software for creating, sending and receiving e-mail, computer software for predictive and corrective text entry for use with smart phones, tablet computers and personal digital assistants, network access server operating software; computer software for LED lighting installations, namely, lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object, to create a positioning grid using visible light communications to send a unique identifier to laptop computers, smart phones, smart watches and tablet computers, allowing the LED lighting installations to pinpoint the shopper's location in the store; wireless communication systems, comprising computers for use in data management, smart phones, tablet computer, touch panels, motion detectors, electric lamps, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures; wireless data network products, comprising computers for use in data management, smart phones, tablet computer, touch panels, motion detectors, electric lamps, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures; communication hubs comprising network servers, network routers and network interface cards for transmitting data, namely, photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes,

customer surveys and customer reviews applications, downloadable computer games, between laptop computers, smart phones, smart watches, tablet computers and luminaires and lighting installations, fitted with LED light sources, namely, electric lamps, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use with lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; communication hubs comprising network servers, network routers and network interface cards for delivery of consumer information received from in-store location-based positioning systems to portable devices, namely, laptop computers, smart phones, smart watches and tablet computers; lighting for use as communication hubs, namely lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; communication software to allow customers and service providers to communicate information in the field of lighting fixtures and visible light communications technology (VLC) via an electronic text messaging service; communications network hardware comprising, computer network switches, bridges and adapters; communications processors, namely, signal processors; communication devices, comprising computers for use in data management, laptop computers, smart phones, smart watches and tablet computers, touch panels, motion detectors; wireless communication apparatuses, comprising computers for use in data management, laptop computers, smart phones, smart watches and tablet computers, touch panels, motion detectors; electronic communication devices, comprising computers for use in data management, laptop computers, smart phones, smart watches and tablet computers, touch panels, motion detectors; electronic communication installations, comprising, lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; optical communications instruments, namely optical character readers, optical character recognition apparatus, optical scanners, optical receivers, optical transmitters, optical transceivers; antenna masts; lighting installations, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; lighting installations, fitted with LED light sources for use as a communication apparatus with lighting-based positioning systems; computer software for communicating purposes between microcomputers to control electrical lighting and electrical control systems for lighting systems and lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; computer software programs and software applications for communicating purposes between microcomputers for laptop computers, smart phones, smart watches and tablet computers, to enable the transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, computer software for communicating purposes between microcomputers for creating, sending and receiving e-mail, computer software for communicating purposes between microcomputers for predictive and corrective text entry for use with smart phones, tablet computers and personal digital assistants; computer software for communicating purposes between microcomputers for LED lighting installations, namely, laptop computers, smart phones, smart watches and tablet computers to create a positioning grid using visible light communications to send a unique identifier to a portable device, allowing the LED lighting

installations to pinpoint the shopper's location in the store; electrical signal attenuators, light-emitting electronic pointers, digital voice signal processors

### **Class 11**

(2) apparatus for lighting, namely, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers, lighting fixtures, electric lamps, luminaires, and parts and fittings of the aforesaid; lighting fixtures, luminaires

### **Services**

### **Class 35**

(1) provision of services, namely, analysis of market research data and statistics, in the field of navigating, positioning and localization, particularly, in the field of lighting-based positioning systems and visible light communications technology (VLC); retail sales and wholesale services for apparatuses, namely, laptop computers, smart phones, smart watches and tablet computers, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures, used for navigating, positioning and localization in the field of lighting-based positioning systems and visible light communications technology (VLC); advertising the goods and services of others; business marketing consulting services, collection of market research information, conducting marketing studies, database marketing services in the form of compiling customer specific databases, developing marketing strategies and marketing concepts for others, direct marketing of the goods and services of others, market analysis and research services, market research by means of a computer database, marketing services in the field of arranging for the distribution of the products of others, marketing services in the field of evaluating markets for existing goods and services of others, providing business marketing information for others; advertising by transmission of on-line publicity for third parties through electronic communications networks, advertising on the Internet for others, advertising the goods and services of others via electronic media and specifically the internet, dissemination of advertising for others via an on-line communications network on the internet, providing a searchable online advertising guide featuring the goods and services of other on-line vendors on the internet, providing and rental of advertising space on the internet, provision of space on websites for advertising goods and services; distribution of advertisements for others, compilation of data in computer databases for commercial purposes; product demonstration in the field of commercial lighting systems, sales demonstration for others

### **Class 37**

(2) provision of services, namely, providing installation and maintenance of lighting installations fitted with LED light sources, namely, electric lamps, lighting armatures, lighting installations, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems in the field of navigating, positioning and localization in the field of lighting-based positioning systems and visible light communications technology (VLC)

### **Class 38**

(3) telecommunication services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting

units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; telecommunication systems, namely, electronic communication via commercial lighting fixtures, namely, using individual light points to transmit a unique identifier through a modulation of light; electronic communications services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; providing electronic communications services by electronic means, namely, electronic communication via commercial lighting fixtures, namely, using individual light points to transmit a unique identifier through a modulation of light; wireless communications services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; digital communications services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; providing digital communications services by electronic means, namely, electronic communication via commercial lighting fixtures, namely, using individual light points to transmit a unique identifier through a modulation of light; providing communication services provided electronically by electronic means, namely, electronic communication via commercial lighting fixtures, namely, using individual light points to transmit a unique identifier through a modulation of light; online communication services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared

lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; providing online communication services, namely, using individual light points in commercial lighting fixtures to transmit a unique identifier through a modulation of light via the Internet; mobile communication services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; providing mobile communication services, namely, using individual light points to transmit a unique identifier through a modulation of light via a cellular phone network; telematic communication services, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; providing telematic communication services by electronic means, namely, using individual light points to transmit a unique identifier through a modulation of light via a cellular phone network; advisory services in the field of communication, namely, communication by lighting fixtures using visible light communications technology (VLC) and lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; leasing of communications apparatus, comprising computers for use in data management, smart phones, tablet computer, touch panels, motion detectors, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures; transmission of data, namely, photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, by communications satellite; consultancy in the field of the electronic communications, namely, communication by lighting fixtures using visible light communications technology (VLC) and lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; communications by fiber optic networks, namely, providing transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet, from lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and

lighting fixtures for use as a communication apparatus with lighting-based positioning systems; providing communications by fiber optic networks by electronic means, namely, by means of commercial lighting fixtures using individual light points to transmit a unique identifier through a modulation of light; communication by lighting and lighting apparatus, namely, communication by means of lighting fixtures using visible light communications technology (VLC) and lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; provision of online communications services, namely providing computer terminals and smart terminals connected to the Internet, said terminals comprising computer hardware, network servers and computer interface boards; communication by hertzian wave, namely, transmission of photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games via radio waves; advisory services in the field of communications equipment, namely, lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; providing information in the field of telecommunication services in the field of communication through lighting fixtures using visible light communications technology (VLC) and lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; providing information in the field of telecommunication services, namely, electronic telecommunications networks; providing transmission of information in the field of communication through lighting fixtures using visible light communications technology (VLC) and lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC) by electronic communications networks; information services in the field of electronic communication networks; providing user access to a computer network by means of lighting fixtures using visible light communications technology (VLC); provision of wireless communication facilities for the interchange of data, namely, photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, by electronic means, namely, the Internet; provision of wireless communication facilities for the interchange of data, namely, photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games via lighting installations, fitted with LED light sources, namely, electric lamps, lighting fixtures, luminaires, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures for use as a communication apparatus with lighting-based positioning systems; electronic exchange and transmission of data, namely, photographs, pictures, digital images, images of in-store promotional items, location-based services, namely, location of an in-store product, consumer location in-store and promotional coupons, data comprising in-store customer flow and behavior, information about in-store merchandise, information about consumer loyalty programs, optimal shopping routes, customer surveys and customer reviews applications, downloadable computer games, via the Internet for navigating,

positioning and localization in the field of lighting-based positioning systems and visible light communications technology (VLC); providing access time to a computer database in the field of lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC), and advisory services related to providing access time to a computer database in the field of lighting-based positioning systems; providing access time to the internet and advisory services related to providing access time to the internet

#### **Class 42**

(4) science and technological services, namely, research and design in the field of lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC); industrial analysis and industrial research services in the field of navigating, positioning and localization in the field of lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC); design and development of computers and software; testing, inspection and advice in the field of lighting and energy, namely, lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC); testing and inspection of lighting apparatuses, namely, electric lamps, lighting armatures, lighting installations, ceiling lights, electric track lighting units, fluorescent lighting fixtures, infrared lighting fixtures, led light bulbs, light diffusers and lighting fixtures; technical consulting in the field of visible light positioning and avigation in the field of lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC); design of communication systems, namely, lighting fixtures fitted with lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object; engineering services in the field of the design of communications systems, namely, location-based positioning systems to help consumers locate goods; advisory services and provision of information in the field of navigating, positioning and localization in the field of lighting-based positioning systems comprising of light sources, receivers, and communication system management software for identifying and tracking the location of an object and visible light communications technology (VLC); advisory services and provision of information in the field of apparatuses, namely, for laptop computers, smart watches and tablet computers, motion sensors, positioning sensors, smart phones, barcode scanners, digital signage display panels, laptop computers, tablet computers and touch panels for navigating, positioning and localization in the field of lighting-based positioning systems and visible light communications technology (VLC)

#### **Class 45**

(5) providing legal services and information in the field of matters of intellectual property; licensing, in the lighting industry, of intellectual property rights, patents, trademarks, technological, knowledge in the field of the lighting industry, know-how, namely, trade-secrets; certification services in the field of lighting and energy, namely, reviewing standards and practices to assure compliance with environmental regulations and industrial regulations and household electrical regulations

### Visual Representation

### Colour Claim

Colour is claimed as a feature of the trade-mark. The background design appears in red and the letters 'TH' appear in white.

### Goods

#### Class 07

(1) Machine tools for use in the water treatment and recycling industry; Motors and engines used in industrial applications; Machine tools for the mining industry; Hydraulic cylinders, hydraulic pumps, piston pumps being parts and fittings for machine tools; Pumps as parts of machines, Electric motors for machines, and mineral filters being parts of machines, electric water filters, mineral filters, air filters and oil filters as parts of engines, Filters for purifying waste water, Sludge thickeners, hoppers and sludge decanters, Heat exchangers for machines, Generators for industrial machinery, Heat generators for sludge treatment, Separating machines for the recycling and mining industry, Mineral separators, Drain cocks, Mineral washing machines, mineral cake drum washing machines, mineral grinding mills, mineral grinding machines, attrition cells, cyclones

and hydrocyclones being machines, Wringing machines for laundry, Machines for sorting and separating materials, hydraulic coolers (being parts of machines), screening machines for sorting and separating materials.

### **Class 11**

(2) Water purification, desalination and water conditioning installations for use in the mining, recycling and water treatment industries; Seawater desalination plants and seawater desalination equipment namely, flushing filtration systems, reverse-osmosis membranes, and chlorine dosing systems; Wastewater, mineral sludge, and wastewater sludge purification installations; Wastewater, mineral sludge, and wastewater sludge purification and treatment equipment, namely, bioreactors, membranes, and flocculation treatments.

### **Services**

#### **Class 35**

(1) Business management; Business administration; Office functions namely, scheduling required mining, recycling and wastewater equipment maintenance appointments, and the administrative processing of warranty claims; Operation of businesses namely the sale of electric filters, filters for machines, filters (parts of machines and motors), filters for purifying water, pumps, sludge thickeners, hoppers and sludge decanters, heat exchangers (parts of machines), generators, heat generators for sludge treatment, separation devices, mineral separators, water separators, mineral washing apparatus, drum washers, mineral grinding mills, mineral grinding machines, attrition cells, cyclones and hydrocyclones (machines), drainers (machines), machines for sorting and separating materials, hydraulic coolers (being parts of machines), screening machines for sorting and separating materials, and machine tools for use in the mining, naval and water treatment fields; Import and export agency services specifically for electric filters, filters for machines, filters (parts of machines and motors), filters for purifying water, pumps, sludge thickeners, hoppers and sludge decanters, heat exchangers (parts of machines), generators, heat generators for sludge treatment, separation devices, mineral separators, water separators, mineral washing apparatus, drum washers, mineral grinding mills, mineral grinding machines, attrition cells, cyclones and hydrocyclones (machines), drainers (machines), machines for sorting and separating materials, hydraulic coolers (being parts of machines), screening machines for sorting and separating materials, and machine tools for use in the mining, naval and water treatment fields.

#### **Class 37**

(2) Installation and repair of industrial mining, water treatment and recycling machinery;

#### **Class 40**

(3) Manufacture of electric filters, filters for machines, filters for motors, filters for purifying water, pumps, sludge thickeners, hoppers and sludge decanters, heat exchangers, generators, heat generators for sludge treatment, separation devices, mineral separators, water separators, mineral washing apparatus, drum washers, mineral grinding mills, mineral grinding machines, attrition cells, cyclones and hydrocyclones being machines, drainers being parts of machines, machines for sorting and separating materials, hydraulic coolers being parts of machines, screening machines for sorting and separating materials, and machine tools for use in the mining, naval and water treatment fields;

#### **Class 42**

(4) Scientific and technological services and research and design in the mining, naval and water treatment fields; Specialist engineering in the mining, naval and water treatment fields; Technical support in the form of troubleshooting, process design, and plant optimisation for the industrial mining, recycling and water treatment machinery.
