## Vol. 67 No. 3440

---

### General Information

---

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

---

### Electronic *Trademarks Journal*

---

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

---

### Official Languages

---

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

---

### Filing Dates

---

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

---

## Nice Classification

---

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

### Trademark Description

The trademark consists of the position of the colour black as applied to the visible surface of the particular three-dimensional bottle and the position of two labels applied to the three-dimensional bottle, as shown in the visual representation. In particular, the two-dimensional label situated at the center of the bottle contains the words THE SEXTON within a double frame in rectangular form with the word THE set in the top of the frame and the word SEXTON in stylized letters in the frame; a broken horizontal line under the frame with an oval and scroll over the frame; within the oval is the upper portion of a profile of a skeleton with a high hat on the skeleton's head, and the two-dimensional label situated at the neck of the bottle contains the words THE SEXTON with a band above the words THE SEXTON and horizontal parallel lines framing said words. The three dimensional object shown in dashed outline does not form part of the trademark but is included merely to show the position of a sign

### Colour Claim

Colour is claimed as a feature of the trademark. The colours black, silver and gold are claimed as a feature of the trademark. The visible surface of the particular bottle is black. The band directly

underneath the bottle cap, the words THE SEXTON below it and the horizontal parallel lines framing the words are in gold. The words THE SEXTON on the middle label, the double rectangular frame, the broken horizontal lines, the oval and the scroll are all in gold. The skeleton head and the top hat are in silver.

(1) Chemicals used in industry, namely catalysts and complexing agents, namely ethylenediaminetetraacetic acid (EDTA) and diethylenetriaminepentaacetic acid (DTPA) used as chelating agents for the recovery of precious metals from used precious metal salts and solutions, or for the manufacture of catalysts for this purpose; catalysts for the recovery of precious metals from used catalysts, or for the manufacture of catalysts for this purpose; chemical products for the manufacture of optical lenses and chemical products for the surface treatment of optical lenses; chemicals used for the manufacture of batteries and rechargeable batteries, namely lithium-ion, lithium-polymer and nickel- metal-hydrure; cobalt oxide for industrial purposes; chemicals for the manufacture of paints, varnishes, lacquers, inks and pneumatic tyres; catalysts for the manufacture of polymers and organic molecules; biochemical catalysts for use in the mining industry, in the metal industry, in the metallurgy industry; chemical catalysts for use in the mining industry, in the metal industry, in the metallurgy industry; catalysts for use in the automotive and stationary industries; catalysts for use in the manufacture of rubber; catalysts for the manufacture of industrial chemicals; catalytic agents for use in the mining industry, in the metal industry, in the metallurgy industry; unprocessed synthetic resins; catalytic products for use in the manufacture of chemical products, namely packs of monolayer and multilayer wire cloth consisting predominantly of precious metals or precious metal alloys for use as catalysts in the chemical industry; compound semiconductor materials, namely gallium arsenide, indium arsenide, and enzyme substrates for use in the telecommunications industry, fiber optic telecommunications industry, high- speed networking industry, display and lighting industry, semiconductor materials and devices industry, light emitting diode industry, electro- and opto-electronic device industry, satellite communications

systems industry, communications semiconductor industry, wireless devices industry, laser industry, consumer electronics industry, radar industry; galvanizing baths for treatment with precious and common metals; metal salts and chemicals used for electrolytic and galvanic baths; chemicals for use in electroplating process in the metal industry; chemicals for use in electroplating process in the electronics industry; chemicals for use in electroplating process in the jewelry industry; metal tempering preparations; soldering chemicals; polyurethane based catalysts for use in the manufacture of interior and exterior paints, and aluminium paints, adhesive sealants and elastomer resin; gold salts and rare earth metal salts as well as gold salt and rare earth metal salt solutions for the retrieval of precious metals for the manufacture of catalysts for use in the mining industry, in the metal industry, in the metallurgy industry; oxide dispersion strengthened solutions made of platinum and alloys of platinum used to oxidize impurities and regulate temperatures in glass production furnaces and to manufacture special glass types; ingots being prepared substrates for the manufacture of semi-conductors, namely germanium and gallium arsenide substrates for the manufacture of solar cells for satellites, LED displays, LED monitors, LED microscopes.

### **Class 02**

(2) Colorants for use in the manufacture of paints and inks, colourants for use in the manufacture of pharmaceuticals, of paper; interior and exterior paints, aluminium paints, and floor protection varnishes, varnishes for use in cabinet making; siccatives for paints, lacquers, varnishes, paints and ink material; siccatives for use as drying agents for paints, varnishes, lacquers, coatings and inks; engraving ink; metallic printing inks; dry inks; preservatives against rust and wood deterioration; anti-corrosive paints; protective paints, namely corrosion inhibiting paint type; dyestuffs; metals in foil and powder form for painters, decorators, printers and artists; unprocessed natural resins; emulsions in the nature of paints (primers and topcoats).

### **Class 06**

(3) Common metals and their alloys; non-electric cables and wires of common metal; screw rings of metal; drainage and water metal pipes and tubes; ores and ores of metals; brazing alloys; unprocessed and semi-processed materials of metal, namely common metals, unwrought and semi-worked, for further manufacture.

### **Class 07**

(4) Machines and machine tools, namely tool grinding machines, boring machines for metalworking, extracting machines for chemical processing, dissolving machines for chemical processing, ore treating machines, extruding machines for metals, cutting machines for metalworking, paint mixing machines, lapping machines for metalworking, soldering machines, metalworking machine tools; motors (except for land vehicles), namely power tool motors, milling grinding motors, electric motors for machines, motors and engines used in industrial applications; machine coupling and transmission components (except for land vehicles); exhaust pipes for motors; catalyzers for motor vehicles (motor parts), namely catalytic converters; catalytic exhaust-gas converters (motor parts); individual components for emission control systems for vehicles, namely gas and particle filters for motor and engines.

### **Class 09**

(5) Scientific, optical apparatus and instruments, namely apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely high-frequency switching power supplies and their constitutive parts and fittings; optical lenses; apparatus and instruments for conducting, distributing, transforming, accumulating, regulating or controlling electric current, namely batteries and rechargeable batteries, namely electric storage batteries, lithium secondary batteries and lithium secondary rechargeable batteries, general

purpose batteries and general purpose rechargeable batteries, automotive batteries and automotive rechargeable batteries, ignition batteries and ignition rechargeable batteries, camera batteries and camera rechargeable batteries, cellular phone batteries and cellular phone rechargeable batteries, portable computer batteries and portable computer rechargeable batteries, and their constitutive parts and fittings; solar cells, and their constitutive parts and fittings; semi-conductors, and their constitutive parts and fittings; integrated circuits, and their constitutive parts and fittings; light emitting diodes (LED), and their constitutive parts and fittings; consumer electronics, namely graphic tablets constitutive parts; satellite communications apparatus and instruments, namely satellite receivers, satellite dishes, satellite processors, and satellite radios, and their constitutive parts and fittings; laser apparatus and instruments, namely laser equipment designed for cutting, drilling, marking, engraving, and shaping optical lenses for eyeglasses, and their constitutive parts and fittings; radar, and their constitutive parts and fittings.

#### **Class 14**

(6) Precious metals and their alloys; goods made of or coated with precious metal and their alloys, namely ingots of precious metals, real and imitation jewellery.

#### **Services**

#### **Class 40**

Treatment of materials, namely heat treatment of metals, laminating, metal casting, metal tempering, metal plating, chromium plating, tinsplating, silver-plating, nickel plating, gold-plating, cadmium plating, custom assembling of metals, namely metal melting services, welding services, soldering services; optical glass grinding, recycling and destruction of waste and trash; recycling precious metal containing catalytic converters; recycling automobile exhaust gas catalytic converters; recycling of precious and non-precious metal wastes, namely separating precious and non-precious metals from catalytic converters residues and automobile exhaust gas catalytic converters residues; metalworking and refining of precious metals, namely processing and extracting precious metals contained in catalytic converters and automobile exhaust gas catalytic converters; refining recycled precious metals, recycling precious metals; information and advice in the field of treatment and recycling of waste and trash, water recycling, paper recycling and glass recycling; recycling of industrial chemicals, namely chemicals used for the manufacture of batteries and rechargeable batteries, namely lithium-ion, lithium-polymer and nickel-metal-hydrure; recycling of apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely batteries and rechargeable batteries; soldering of metals, galvanization of metal, tempering of metals.
