NOTE: This document is intended to provide guidance on current practice of the Industrial Design Office and interpretation of relevant legislation. However, in the event of any inconsistency between this document and the applicable legislation, the legislation must be followed.
SHOW THE COMPLETE ARTICLE
The complete finished article must be shown in all views.

Not Acceptable  Acceptable

The game board including its outer edges must be shown.

Title: Game Board

Description: The design consists of the features of shape, pattern, ornament and configuration of the game board as shown in the drawings.
SOLID AND STIPPLED LINES

It is acceptable to illustrate the article in one of two ways:

1. Show the entire article in solid lines
2. Show the portion of the article embodying the design in solid lines, and show the other parts of the article that are not part of the design in stippled lines. (Stippled lines are broken lines formed by evenly spaced short dashes, evenly spaced dots, or a combination thereof.)

---

**Title:** Training cup

**Description:** The design consists of the features of shape and configuration of the lid of the training cup as shown in the drawings.

**Description:** The design consists of the features of shape and configuration of the portion of the training cup as shown in solid lines in the drawings. The stippled line portions do not form part of the design.
The article must be shown as it actually appears. Non-design portions of an article shown in stippled lines should be illustrated as opaque (i.e. non-transparent) unless they are, in fact, transparent.

**Acceptable**

**Not acceptable:**

**Title:** Spray Bottle

**Description:** The design consists of the features of the shape and ornamentation of a Spray Bottle as shown in solid lines in the drawings. The portions shown in stippled lines do not form part of the design.
Shading techniques used to better illustrate the shape of the design are acceptable provided they do not distort or hide the design. Shading should be shown consistently throughout the drawings.

Title: Recycling Bin

Description: The design consists of the features of shape and configuration of the Recycling Bin as shown in the drawings.

Figure 1 is a perspective view of the Recycling Bin.
Figure 2 is a perspective view with the lid in an open position.
CONTRASTING TONES

It is acceptable to use shading to show contrasting tones.

Title: Jacket

Description: The design consists of the features of shape, configuration, pattern and ornament of the JACKET as shown in the drawings.
ARTICLE IN ISOLATION
The article must be shown in isolation.

Acceptable  

Not acceptable

Title: In-line skate

Description: The design consists of the features of shape, configuration and ornament of the in-line skate as shown in the drawings.
TRANSPARENCY

Transparency can be illustrated by the use of thin shade lines. Portions of the article that would be visible through the transparent section must be shown.

Title: Butter Dish

Description: The design consists of the features of shape, configuration and ornamentation of the Butter Dish as shown in the drawings.
**TRANSLUCENCY**

Translucency can be shown with thin shade lines and overall shading throughout the translucent area. Portions of the article that would be visible through the transparent section must be shown.

---

**Title:** Sunglasses  
**Description:** The design consists of features of the shape, configuration and ornamentation of a Sunglasses as shown in the drawings.
OPEN AND CLOSED POSITIONS
Views of the article in the open and closed position may be included to reveal design features provided that the article is normally seen and used in those positions. It is recommended that the figure reference indicate the different positions shown.

Fig. 1

Title: Pill Container

Description: The design consists of the features of shape, pattern, ornament and configuration of the pill container as shown in the drawings.

Figure 1 is a perspective view of the pill container with the lid in an open position
Figure 2 is a side view with the lid in the closed position.
**FLEXIBLE ARTICLE**

Articles that are flexible may be shown flat or as they appear in use, provided that the features of the design are shown clearly and accurately.

![Figure 1](image1.png)

![Figure 2](image2.png)

**Title:** Bandanna

**Description:** The design consists of the features of shape and ornamentation of the bandanna as shown in the drawings.

Figure 1 is a front view of the bandanna.

Figure 2 is a front view of the bandanna shown in use.
EXTENDED VIEWS
A multi-component article must be shown fully assembled. An extended view may also be included provided that the article is seen and used in that position. In extended views, it must be clear how the components join together.

**Title:** Feeder For Animals

**Description:** The design consists of the features of shape and configuration of the feeder for animals as shown in the drawings.

Figure 1 is a perspective view of the Feeder for Animals.
Figure 2 is an extended view of the feeder of Figure 1.
EXTENDED/RETRACTED POSITIONS
Views of the article in extended and retracted positions are accepted provided that the article is normally seen and used in those positions.

Title: Patio Umbrella

Description: The design consists of the features of shape and configuration of the entire Patio Umbrella as shown in the drawings.

Figure 1 is a side view of the patio umbrella in a retracted position.
Figure 2 is a side view of the patio umbrella in an extended position.
INDEFINITE AND VARIABLE LENGTH

In most cases, indefinite or variable length must be illustrated by means of break lines (see exception on page 17 for articles such as paper towels and fabric).

ARTICLE OF INDEFINITE LENGTH WITH CONSTANT CROSS SECTION

It is recommended that a statement referring to indefinite length be included in the description.

(Sinusoidal Lines)

Title: Decorative Molding

Description: The design consists of the features of shape and configuration of the entire Decorative Molding of indefinite length as shown in the drawings.
Title: Extrusion

Description: The design consists of the features of shape and configuration of the entire Extrusion of indefinite length as shown in the drawings.

Figure 1 is a perspective view.

Figure 2 is a front view.

Title: Window Extrusion

Description: The design consists of the features of shape and configuration of the entire Window Extrusion of indefinite length as shown in the drawings.
ARTICLE OF INDEFINITE LENGTH WITH REPEATING FEATURES
The drawings must show break lines and a statement referring to indefinite length must be included in the description.

(Sinusoidal Lines)

Title: Drainage Track

Description: The design consists of the features of shape, ornament, pattern and configuration of the Drainage Track of indefinite length as shown in the drawings. The apertures are repeated at regular intervals throughout the length of the article.

ARTICLE OF INDEFINITE LENGTH OR WIDTH WITH REPEAT SURFACE PATTERN
A statement referring to indefinite length or width must be included in the description.

(Sharp jagged lines)

OR

(Jagged line at one end)

Title: Ribbon

Description: The design consists of the features of shape, ornament and pattern of the entire ribbon of indefinite length as shown in the drawings. The pattern shown on the surface repeats throughout the length of the article.
VARIABLE LENGTH IN A PORTION OF AN ARTICLE:
The drawings must show break lines in the relevant portion and a statement referring to variable length must be included in the description.

Title: Rake

Description: The design consists of the features of shape, ornament, pattern and configuration of the entire rake having a handle of variable length as shown in the drawings.
ARTICLE OF INDEFINITE LENGTH AND WIDTH WITH REPEAT SURFACE PATTERN

Repeat pattern with indefinite length and width may be shown by a stippled line around the pattern to be repeated. It is recommended that a statement referring to indefinite length and width be included in the description.

Title: Paper Towel
Description: The design comprises the features of pattern of the Paper Towel of indefinite length and width as shown in solid lines in the drawings. The pattern shown on the surface repeats throughout the length and width of the article.

Title: Fabric
Description: The design comprises the features of pattern of the Fabric of indefinite length and width as shown in solid lines in the drawings. The pattern shown on the surface repeats throughout the length and width of the article.
ENLARGED FRAGMENTARY VIEWS

A fragmentary view may be included to show a portion of the design on a larger scale in order to better disclose small detail.

Title: Putter

Description: The design consists of the features of shape and configuration of the entire putter as shown in the drawings.

Figure 1 is a side view of the putter.
Figure 2 is an enlarged fragmentary view of the putter head of figure 1.
CROSS-SECTIONAL VIEWS

Cross-sectional views may be used to illustrate exterior features which are not clearly shown in conventional views. The features should be visible when the article is in use. The cut surface of the article may be illustrated as solid black or as alternating black and white diagonal lines (as shown below)

Title: Mug

Description: The design consists of the visual features of the entire mug as shown in the drawings.

Figure 4 is a front view.
Figure 5 is a cross sectional view taken along line 5-5 of figure 4.
**SET**

All pieces of the set must be shown in the drawings in at least one view. Individual views of each article are acceptable.

![Figure 1](image)

**Title:** Set of Flatware

**Description:** The design consists of the features of ornamentation applied to the outer portion of the handles of the set of flatware as shown in the drawings.

Figure 1 is a front view of the spoon, fork and knife of the set of flatware.
**ELECTRONIC ICONS**

Electronic icons must be shown as applied to a finished article. The title must identify the finished article to which the electronic icon is applied.

**Acceptable**

![Acceptable Icon](image)

**Title:** Computer Monitor

**Description:** The design consists of the ornamentation of the computer monitor as shown in solid lines in the drawings. The stippled line portions do not form part of the design.

**Not acceptable**

![Not Acceptable Icon](image)

**Title:** Electronic Icon

**Description:** The design consists of the ornamentation of the electronic icon as shown in the drawings.
Title: Shoe

Description: The design consists of the visual features of the shoe shown in solid lines in the drawing. The bold, wavy line does not constitute a feature of the design. It is included for illustrative purposes only in order to define the boundary of the design.

Figure 1 is a side view of the shoe.
**Title:** Clothes Washer

**Description:** The design consists of the features of shape, configuration, and ornamentation of the portion of the clothes washer shown in solid lines in the drawing. The portions shown in stippled lines do not form part of the design. The bold, wavy line does not constitute a feature of the design. It is included for illustrative purposes only in order to define the boundary of the design.

Figure 1 is a front view of the clothes washer.
