Subject: 700 MHz Broadband for Public Safety - Reference Number SMSE-018-10

Regarding Notice No. SMSE-018-10 – Consultation on a Policy and Technical Framework for the 700 MHz Band and Aspects Related to Commercial Mobile Spectrum

I just wanted to voice my support for allocating some of the 700 MHz spectrum for Public Safety and the use of First Responders. I realize that there is intense competition for this very finite resource. However, it is hard to imagine anything more important than the quick delivery of information to first responders in a crisis. Modern multi-media formats require greater bandwidth than has been available in the past. This is a once in a lifetime opportunity to see that our front line people have access to the information they require.
