

## **60M Amateur Authorization**

Reference RAC Bulletin 2012-026E: 60M consultation bulletin

I fully support the RAC proposals for the reasons as they are explained in the bulletin.

I might add that the use of CW on one or more of these channel authorizations should be strongly encouraged to reinforce the notion that these frequencies are to enhance the emergency and disaster capabilities of Amateur radio. It has been proven that the CW mode is one of the more effective ways of using spectrum when band conditions are marginal.

John Noakes, VE7NI  
RAC Member #3368
