

February 4, 2011

To whom it may concern:

Ongoing wireless expansion across Canada absolutely depends on a fair and open market auction. Our community deserves access to the latest mobile technology. In order to deliver the best technology, when bidding on 700 MHz spectrum, we need and encourage a fully open bidding process. Set-asides or caps that restrict access to the new spectrum will drive costs up needlessly.

Thank you,

***Lois Kueneman on behalf of Mayor Geoffrey Dawe***
