(1) Magnetic data carriers namely, radio receivers and transmitters; calculating machines, data processing equipment, namely computer hardware and computers; weather balloons; satellites; satellite computers; satellite receivers; satellite transmitters and satellite receivers; satellite antennas; satellite navigation equipment, namely satellite navigation devices and systems; satellites for scientific purposes; satellite for signal transmission; computer software for image processing, namely software for the analysis of satellite imagery; software for satellite navigation systems; recorded computer programs for image processing, namely for the analysis of satellite imagery; downloadable computer programs for image processing, namely for the analysis of satellite imagery; recorded computer software for image processing, namely for the analysis of satellite imagery; computer operating programs [saved]; data processing equipment, namely computer central processing units; distance measuring apparatus, namely electronic distance meters, laser distance meters; apparatus for recording distances, namely distance sensors; downloadable electronic publications in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; transmitters of electronic signals, namely temperature transmitters, pressure transmitters, GPS transmitters, emergency locator transmitters (ELT); global positions systems and satellite transmitting sets [telecommunications]; electronic apparatus and equipment for transmitting, receiving and processing data from remote sensing satellites, namely modems, transceivers, signal processors and hardware therefor; electronic hardware for computers; downloadable software for image processing, namely for the analysis of satellite imagery; electronic devices namely USB flash drives and hard disk drives for storing data and user terminals for meteorological, environmental and climatology information and data processing; detectors, namely, microwave detectors, ultraviolet detectors, infrared detectors, global navigation satellite system signal detectors, radiation detectors; remote control telemetering devices for the remote control of satellites; electrical and electronic equipment and installations

composed of remote control telemetering devices for the remote control of satellites used for industrial operations; electrodynamic apparatus for the remote control of satellite signals; interfaces [interface devices for computers], namely computer interface boards, computer interface cards; echo sounders; monitoring apparatus [electric], namely infrared sensors, microwave sensors, ultraviolet sensors, radiation sensors, global positioning system (gps) device consisting of position sensors; nautical apparatus and instruments, namely, radars, marine depth finders, windsocks; optical apparatus and instruments, namely, light detectors, interferometry mirrors, telescopes, radiometers, spectrosopes, spectrum analyzers, interferometers; speed indicators, namely speedometers; high-frequency apparatus, namely, microwave sounder and transmitters and receivers; cosmographic instruments namely, star trackers for satellite navigation, space telescopes; precision measuring instruments, namely, theodolite, laser interferometers; measuring instruments, namely laser doppler for measuring purposes, high-precision time clocks and Global Navigation Satellite System radio occultation sounding instruments; computer software for encryption of digital files; image recognition software; data storage devices, namely computer servers.

### **Class 16**

(2) Paper; printed matter, namely books, manuals, handbooks, and newsletters in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; bookbinding material; photographs; stationery agendas, stationery binders, stationery folders, stationery labels; printed instructional and teaching materials [except apparatus] in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; brochures; booklets; partially printed forms [forms], newsletters; printed magazines; newspapers; printed reports in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; prospectuses; drawings; printed graphic representations; atlases; books; geographical maps; terrestrial globes; correspondence cards; schedules [print], namely printed boards for scheduling activities and appointments; souvenir albums; almanacs; calendars; printed arithmetic table; printed diagrams; printed advertising boards of paper or cardboard; document file folders [stationery].

### **Services**

#### **Class 35**

(1) Business management; business administration; office functions, namely, secretarial and clerical services; business organization services, namely assistance, advisory services and consultancy with regard to business organization; business management and organization consultancy; assistance with regard to business organization; computerized file management; systemization of data in a central file, namely into computer databases; maintenance of meteorological, environmental and climatology information data in computer databases; maintenance of meteorological, environmental and climatology information and earth observation data in computer databases and cloud environments; data processing [office work], namely database management services; automated compilation and systemization of information into computer databases; compilation of statistical data, namely compilation of computerised databases containing statistical data; compilation and systematization of data in computer databases; data search in computer files [for others] for others in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; updating and maintenance of data in computer databases; collection, systemization, compilation of meteorological, environmental and climatological data stored in computer databases.

#### **Class 38**

(2) Telecommunications, namely, transmission of voice, audio, images and data in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather by computer terminals, via telematics, satellites, radio, telegraphy, telephones; Satellite transmission of data and metadata for monitoring the environment and maintaining space to ground communications; leasing satellite transmission capacity; operation of telecommunications satellites, namely operating a wide-area network (WAN) via satellite communication; telecommunications services, namely operation of satellite-to-earth receiving antennas; telecommunication services, namely operation of the earth-satellite-television channels; satellite broadcasting of sound, images, signals and data in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; satellite transmission of data in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather through a global online computer network; computer aided transmission of messages and images over the internet; communications by and between computers and computer terminals, namely email transmission of data and documents via computer terminals; providing information about satellite transmission and broadcasting; satellite-based and terrestrial data transmission services, namely transmission of meteorological, environmental and climate data to users through satellite, cellular and other wireless networks and fiber optics and other wired transmissions; satellite-based and terrestrial data access services, namely leasing of access time to a computer database; data transfer, namely providing multiple user access to global computer information networks for the transfer of information and files; data communication services by means of e-mail, namely provision of email services; streaming of data, namely of audio and video content via the internet, other computer networks, wireless networks and electronic communication networks; advisory services relating to data transmission in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather by computer terminals, via telematics, satellites, radio, telegraphy, telephones; computerised transmission of messages, information in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather and images via the internet; provision of access time to databases.

#### **Class 40**

(3) Processing of aerial and satellite images, namely reproduction of images; photographic image processing.

#### **Class 41**

(4) Education in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; training in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; entertainment services in the nature of online non-downloadable audio-visual videos in the field of meteorology, environmental monitoring and climatology on commercial internet platforms; cultural activities namely, organizing art exhibitions for cultural purposes; organization of competitions in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; conducting seminars in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; organization of seminars for educational purposes in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; organization of seminars for training purposes in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; organization of radio and television shows for educational purposes in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; organization of conferences in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather;

organization of award ceremonies; organization of conventions in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; arranging, conducting and organizing workshops [training] in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; arranging, conducting and organizing congresses in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; arranging, conducting and organizing symposia in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; arranging, and conducting conferences in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; arranging, and conducting seminars in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; the above-mentioned services in particular with regard to meteorology, environment, climate and meteorological, environmental and climatological information and data.

### **Class 42**

(5) Scientific and technological services namely research and design in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; industrial analysis and research services in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; design and development of computer hardware and software; scientific research in the field of meteorology, environment and climate; provision of meteorological information, namely prognosis regarding meteorology, environment and climate; information relating to meteorology, environment and climate; information services relating to meteorology, environment and climate; provision of information relating to meteorology, environment and climate; provision of meteorological information in the nautical field; computer programming; analyses regarding the installation of computer software and hardware; advisory services relating to environmental and climate protection; consulting services relating to research in the field of environment protection; geological prospecting; research relating to geology, environment and climatology; conducting scientific studies relating to geology, environment and climatology, namely research in the field of geology, environment and climatology; land surveying; urban planning; providing meteorological information; development and research services regarding new products for others; technical research in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; technical project studies in the field of satellite remote sensing, meteorology, environmental monitoring, climatology and space weather; providing quality control for the satellite remote sensing, meteorology, environmental monitoring, climatology and space weather industries; services relating to the data encryption and decryption; document data conversion from one media to another, namely between computer formats; encryption of digital images; IT consulting, namely computer hardware and software consulting services, consulting services in the fields of database testing, database migration, database quality testing, consulting services for telecommunications hardware and software; computerized data storage services, namely providing cloud storage facilities for use as a data center for others; computer services concerning electronic data storage, namely leasing of computer servers; development of systems comprised of computer hardware, software and servers for the storage of data; electronic data storage services for archiving online databases for others; providing online information in relation to meteorology, environment, climate and meteorological, environmental and climatological information and data; satellite-based and terrestrial data hosting services, namely hosting of web sites.

#### Class 07

(1) Industrial robots for handling, assembling, testing and inspecting components during electronic component manufacturing processes, parts, spare parts and accessories of all the aforesaid goods; industrial robots for manufacturing for handling, assembling, testing and inspecting components during electronic component manufacturing processes, parts, spare parts and accessories of all the aforesaid goods; automated assembly machines for assembling components during electronic component manufacturing processes, parts, spare parts and accessories of all the aforesaid goods; mechanical process control apparatus for machines, namely, sensors, actuators, and controllers for regulating movement, positioning, and operational sequences in industrial automation equipment, parts, spare parts and accessories of all the aforesaid goods; hydraulic and pneumatic controls for motors and engines for machines, in particular for robots, namely, hydraulic valves, pneumatic actuators, pressure regulators, and control systems, mechanical components for controlling machines, in particular for robots, namely effectors, joint actuators, and gear mechanisms for motion control and automation purposes, parts, spare parts and accessories of all the aforesaid goods.

**Class 09**

(2) Measuring, detection, monitoring, and control apparatus, namely, force sensors, proximity sensors, temperature sensors, optical sensors, current sensors, vision systems, encoders, and controllers in particular for being used with industrial robots, parts, spare parts and accessories of all the aforesaid goods; apparatus, instruments, and cables for electricity, namely, power supply units, electric cable and wire, motor controllers, encoders and electrical connectors for use in industrial automation, monitoring, and control systems, parts, spare parts and accessories of all the aforesaid goods; magnetizing and demagnetizing apparatus, namely, magnetic field generators, demagnetizing coils, handheld demagnetizers, magnetic testing equipment, and industrial magnetizing systems for use in industrial automation, monitoring, and control systems, parts, spare parts and accessories of all the aforesaid goods; optical apparatus and equipment, amplifying apparatus and correctors, namely, optical lenses, microscopes, optical amplifiers, laser systems, beam splitters, optical filters, and optical waveguides for use in imaging and measurement in industrial automation, monitoring, and control systems, parts, spare parts and accessories of all the aforesaid goods; sensors, detectors, and monitoring instruments and apparatus, namely, force sensors, proximity sensors, vision systems, temperature sensors, optical sensors, current sensors, position encoders, and motion detection devices for integration with industrial robots and monitoring, control and automation systems, parts, spare parts and accessories of all the aforesaid goods; electrical and electronic controls and control devices, namely, programmable logic controllers (PLCs), motor controllers, drive units, control panels, signal processors, and remote-control devices for integration with industrial robots and monitoring, control and automation systems, parts, spare parts and accessories of all the aforesaid goods; software for configuration and control of industrial robots, sensors and electronic devices as well as software for acquisition and evaluation of data of industrial robots, sensors and electronic devices and driver software, in particular for laser drivers, parts, spare parts and accessories of all the aforesaid goods.

**Services****Class 40**

(1) Custom fabrication and manufacture of industrial robots, automated assembly machines, and mechanical-process control apparatus for machines, namely, design, engineering, and production of robotic systems, automation equipment, and control mechanisms tailored for use in industrial automation, monitoring, and control systems; custom fabrication and manufacture of mechanical, hydraulic, and pneumatic controls for machines, namely, the design, engineering, and production of control valves, actuators, pressure regulators, sensors, detection instruments, monitoring systems, and control panels tailored for use in industrial automation, monitoring, and control systems; custom fabrication and manufacture of apparatus, instruments, and cables for electricity, namely, the design, engineering, and production of electrical connectors, power supply units, voltage regulators, current sensors, encoders, signal transmission cables, and devices for use in industrial automation, monitoring, and control systems; custom fabrication and manufacture of optical devices and equipment, amplification devices, and correctors, namely, the design, engineering, and production of optical lenses, mirrors, prisms, beam splitters, optical amplifiers, image correctors, and other precision optical components for use in industrial automation, monitoring, and control systems; custom fabrication and manufacture of sensors, detectors, and monitoring instruments and equipment, as well as electrical and electronic controls and control devices, namely, the design, engineering, and production of temperature sensors, proximity detectors, pressure sensors, motion detectors, programmable logic controllers (PLCs), motor controllers, control panels, and circuit protection devices for use in industrial automation, monitoring, and control systems.

**Class 42**

(2) Scientific and technological services, namely, research and development in the fields of industrial automation, robotics, optical systems, and electronic devices, engineering services for the design, integration, and optimization of automation systems and robotic solutions, technical consulting and support for industrial technologies and electronic equipment.

### Goods

#### Class 09

Software for logistics management in the fields of freight, supply chain and transportation; downloadable computer software and application software for preparing shipping documents over computer networks, intranets and the internet; downloadable computer software and application software for matching shippers with shipping companies, freight carriers, businesses and individuals; downloadable computer software and application software for collecting competing bids from shipping companies to ship articles on behalf of shippers; downloadable computer software and application software providing an online marketplace connecting customers with transportation providers; downloadable computer software and application software for the tracking of, and providing geo-location and global positioning information for, freight and packages over computer networks, intranets and the internet.

### Services

#### Class 35

(1) Online services in the nature of freight auctions, namely, collecting competing bids from shipping companies to ship articles on behalf of shippers; business services namely collecting, collating and presenting competitive bids from shipping service providers to consumers enabling consumers to select and connect with shipping service providers by means of an online marketplace; providing business information enabling buyers of shipping services to locate and

receive quotations from multiple competitive sources and sellers of shipping services to identify and bid on multiple new sales opportunities via a website, a mobile app and an online network; provision of an online marketplace which connects customers with transportation providers, via a website, a mobile app and an online network; collecting, collating and providing business and commercial information about transportation providers including by means of wide area communications networks, SMS, MMS, in-app instant messaging, online web-messaging and interactive chatrooms; collecting, collating and providing business and commercial information in the field of transportation including by means of wide area communications networks, SMS, MMS, in-app instant messaging, online web-messaging and interactive chatrooms; business management of logistics for others; business administration services in relation to transportation and freight logistics services and information relating thereto; business advisory and consultancy services in the field of transportation logistics; advertising the goods and services of others; providing online advertising space for the products and services of others; business management; business administration; office functions namely, providing virtual on-line office support staff services for businesses; business advisory services relating to business management, planning, administration and organisation provided to suppliers, customers and buyers in the transportation, shipping and transportation logistics fields; business intermediary services relating to the matching of consumers with suppliers of shipping and transportation services; provision of business information in fields of transportation, shipping, freight and transportation logistics, providing business information namely ratings and reviews about shipping and transportation service providers; provision of business information in fields of transportation, shipping, freight and transportation logistics, providing business information namely ratings and reviews about shipping and transportation service providers by means of wide area communications networks, SMS, MMS, in-app instant messaging, online web-messaging and interactive chatrooms; promoting the sale of goods and services of others in the field of transportation and shipping by receiving and processing requests to purchase products and services over the internet; providing business and commercial information to buyers and sellers of goods and services in the fields of transportation, shipping and freight and transportation logistics via a website; providing information relating to evaluation and ratings of shipping and transportation service providers for commercial purposes; provision of on-line trading systems, namely, providing an online marketplace for buyers of goods and services; provision of feedback and ratings data on buyers and sellers for commercial purposes in the fields of transportation, shipping and freight and transportation logistics; providing user ratings in the field of transportation for commercial purposes; dissemination of business and commercial information relating to transport and shipping including by means of wide area communications networks, SMS, MMS, in-app instant messaging, online web-messaging and interactive chatrooms; providing electronic tracking of freight information to others for business administration purposes; provision of business information relating to the reporting and tracking of vehicle movement and location by means of an on-line computer database; data retrieval services, namely, compilation, collection and analysis of business data for others in the field of transportation and shipping; direct marketing of the goods and services of others; promoting the goods and services of others via a global computer network; business introduction services, namely, connecting sellers and buyers of third-party goods and services through a website; business information services in the field of transport and delivery; advisory and consultancy services in the field of transportation logistics.

### **Class 39**

(2) Transport of goods by motor vehicle, rail, ship and air; transportation logistics services, namely, arranging the transportation of goods for others; transportation logistics, namely, planning and scheduling shipments for users of transportation services; packaging of goods; providing storage

facilities for others; travel arrangement; provision of information and digital data all relating to transport and shipping including by means of wide area communications networks, SMS, MMS, in-app instant messaging, online web-messaging and interactive chatrooms; reservation and booking of transportation of goods by motor vehicle, rail, ship and air via wide area communications networks, short message services (SMS), multimedia messaging services (MMS), in-app instant messaging, online web-messaging and interactive chatrooms; supply chain logistics and reverse logistics services for the delivery, transportation and storage of goods for others by air, rail, ship and motor vehicle; arranging the shipping of goods and cargo by motor vehicle, rail, ship and air; providing information relating to the shipping of goods and cargo including by means of wide area communications networks, SMS, MMS, in-app instant messaging, online web-messaging and interactive chatrooms; locating and tracking of cargo for transportation purposes; tracking and tracing of package shipments to ensure on-time delivery for business purposes; provision of information about cargo and freight space availability; reservation of cargo and freight space for transportation purposes; provision of transportation information relating to cargo and freight space availability and the location of cargo and freight; transportation logistics services, namely, planning and scheduling shipments for users of transportation services and information relating thereto; freight management services, namely, tracking packages and freight over computer networks, intranets and the internet for business purposes; information, advice and consultancy services in the field of transport of goods and cargo by motor vehicle, rail, ship and air.

#### **Class 42**

(3) Providing temporary use of non-downloadable computer software for preparing shipping documents over computer networks, intranets and the internet; providing temporary use of non-downloadable computer software for matching shippers with shipping companies, freight carriers, businesses and individuals; providing temporary use of non-downloadable computer software for collecting competing bids from shipping companies to ship articles on behalf of shippers; providing temporary use of non-downloadable computer software providing an online marketplace connecting customers with transportation providers; providing temporary use of non-downloadable computer software for the tracking of, and providing geo-location and global positioning information for, freight and packages over computer networks, intranets and the internet; scientific and technological services, namely, research and design in the field of computer software for facilitating shipping and transport; industrial analysis and research services in the field of shipping and transport services; design and development of computer hardware and software; web site design, creation and hosting services; research, development, design and upgrading of computer software; creating electronically stored web pages for online services and the internet; providing temporary use of non-downloadable computer software for preparing shipping documents and tracking freight in the field of logistics management; providing temporary use of non-downloadable software for logistics management in the fields of freight, supply chain and transportation; cloud computing provider services for general storage of data; computer software and technological consultancy services in the transportation, logistics and shipping industries.

### Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of a semicircle on a beige background, with a beige outline (PANTONE\* 155 C) inside a brown outline (PANTONE\* 7610 C). The semicircle features the stylized design of a forward-facing man wearing a red, white and black plaid shirt, with a white, black and grey beard and what appears to be white and black curly hair covered by a red and black baseball cap with a black outline that extends above the upper arc of the semicircle. The man's face and forearms are in shades of beige and red, with the eyes, eyebrows and mouth in black. Behind the man, a row of chestnut brown trees stretches to the right and to the left of him. A red rectangle (PANTONE\* 7622 C) with a brown outline (PANTONE\* 7610 C) containing the inscription MAPLE JOE in beige stylized letters (PANTONE\* 155 C) crosses the lower part of the man. A beige circle (PANTONE\* 155 C) underlined in brown (PANTONE\* 7610 C) and containing a red maple leaf (PANTONE\* 7622 C) appears once at the far right and once at the far left of the brown rectangle. \*PANTONE is a registered trademark.

### Disclaimer

The right to the exclusive use of the eleven-point maple leaf is disclaimed apart from the trademark.

## GEOGRAPHICAL INDICATION DETAILS

# West Niagara

### Indication type

Wine

### Goods

Grape wines.

### Territory

West Niagara is located within the western portion of the Niagara Peninsula, Ontario. It encompasses all lands within the defined Ontario geographical indications for wine known as Lincoln Lakeshore, Creek Shores, Short Hills Bench, Twenty Mile Bench, Beamsville Bench and Vinemount Ridge.

### Qualification

Soil composition and topographic features are key contributors to the flavour profile of the grapes grown in West Niagara and the resulting wines. The region is located on an ancient sea-bed comprised of layers of limestone, shale sandstone and dolostone. These rocks yielded a great deal of material to the glaciers when they advanced over the region. This material greatly influences the fertility and water-holding capacities of the soils. The surface soils are primarily lacustrine silty clay and clay loam that contribute to the specific mineral profile of the plants and resulting fruit grown on these soils. The West Niagara region is located adjacent to Lake Ontario, the deepest of the Great Lakes. The results in year-round temperature moderation that allows for grape production in the region. The lake effect acts as a heat sink and a moderator of prevailing colder north winds that are warmed as they cross the lake. This extends the growing season, an earlier spring with a slower warm up and a later autumn with a slower cool down. Winds from the north, already warmed by the lake, enter the West Niagara region and are reflected back from the Niagara escarpment ridge, circulating and retaining the warmer air within the region. Vineyards are planted on shallow slopes, allowing for cool air drainage and good sun exposure. The factors of distance from the lake, slope elevation and airflow pattern have created mesoclimates that favour vitis vinifera grape production. Combined with the specific soil profile, they influence the ripeness of the fruit and impart a particular mineral character to wines produced from grapes grown in this

region. *Vitis vinifera* grapes have been grown in West Niagara region since at least 1960 and specific viticultural and wine-making practices have evolved to express the unique conditions of the region.
